The Convention Programme.

The preliminary programme for the eighteenth annual convention of the Society of American Florists, to be held at Asheville, N. C., provides for the opening session at the Auditorium at 3 p. m., on Tuesday, August 19. The address of welcome on behalf of the city and the Board of Trade will be delivered by A. S. Barnard. The annual address of the president and the reports of secretary, treasurer, state vice-presidents and committees will follow. Later in the afternoon the judges of the trade exhibits will prepare their report. In the evening the president's reception will be held in the parlors of the Battery Park Hotel, with music and refreshments.

On the morning of Wednesday, following the judges' report, the subject "Developing Our Resources" will be discussed under the following sub-headings: "The Needs of the Commercial Florist in the North," by Fred. R. Mathison, Waltham, Mass.; "Remarks on the Bulb Situation," by Wm. R. Smith, Washington; "Possibilities in Bulb Culture in the South," by Prof. W. F. Massey, Raleigh, N. C. At this meeting the place for next year's convention will be selected and officers nominated.

The bowling contest will take place on the afternoon of Wednesday, and in the evening J. K. M. L. Parquhar, of Boston, will give an illustrated lecture on the growing, packing and shipping of foreign bulbs and plants for the American trade.

The subject for discussion Thursday morning will be "Marketing Cut Flowers," the wholesale and retail phases of the question being presented by Edgar Sanders and George W. Wienhoeber, of Chicago. Then the election of officers will take place, followed by action on two proposed amendments to the by-laws, both relating to auxiliary societies. One of these amendments is proposed by C. W. Ward and E. G. Hill and the other by Wm. J. Stewart and Edwin Lonsdale.

On Thursday afternoon there will be meetings of the Hail Association, the Chrysanthemum Society of America and the American Carnation Society. On the same afternoon there will be a shooting contest between teams representing the S. A. F. and the city of Asheville. In the evening J. D. Carmody, of Evansville, Ind., will discuss "The Humorous Side of the Florists' Business," and Dr. C. P. Ambler, of Asheville, the proposed Appalachian forest preserve.

Friday morning will be devoted to a

trip to Overlook Mountain and in the afternoon a carriage drive will be taken through Biltmore as guests of the Asheville Board of Trade.

Park and Outdoor Art Association.

The sixth annual meeting of the American Park and Outdoor Art Association will be held at Boston, August 5 to 7. The sessions are to be held at the beautiful new hall of the Massachusetts Horticultural Society and a most attractive programme has been arranged.

At the morning session of the opening day the business meeting of the association and auxiliary will be held. In the afternoon there will be an address by Dr. Charles W. Eliot, president of Harvard University, who will discuss "Popular Utilization of Public Reservations." J. N. Hallock, D. D., of New York, will talk on "The Influence of Beautiful Surroundings on Children." The addresses for the evening are "State Forest Reservations," by Mira Loyd Dock, of Harrisburg, Pa.; "School Garden Movement," by Dick J. Crosby, Washington, D. C.; "Water an Effective Factor in Municipal Art," by Albert Kelsey, Philadelphia.

Wednesday morning is to be devoted to an "experience meeting," the leading feature being brief addresses outlining the work of the various national associations engaged in civic improvement. In the afternoon there will be a meeting of the Woman's Auxiliary and a session for park commissioners addressed by W. B. de las Casas, Chas. E. Stratton, Geo. H. Cox and others. In the evening there will be an address on "Civic Improvement Work," by Hon. John DeWitt Warner, of New York, and J. Horace McFarland will tell of "The Forward Movement in Harrisburg."

On the morning of the third day there will be parallel business sessions of the association and the Woman's Auxiliary. In the afternoon there will be parallel sessions of the park commissioners and the school garden section. The former will be addressed by Bryan Lathrop and James Jensen, Chicago; C. C. Lancy, Rochester; J. A. Ridgeway, Minneapolis; S. A. Foster, Des Moines, and others. Leading the informal discussion on school gardens will be H. D. Hemenway, Hartford; W. A. Baldwin, Hyannis, Mass.; Ellen M. Tower, Lexington, Mass.; Geo. A. Townsend, Jr., Dayton, O.; Geo. H. Knight, New York; J. W. Spencer, Cornell University; Geo. T. Powell, Briar Cliff Manor, N. Y., and others. The conven-

tion will conclude with an evening session with the following programme: "Public Beauty and Good City Government," C. K. Woodruff, Philadelphia; "Relation of Parks to City Plan," Sylvester Baxter, Boston; "What is Municipal Art?" by Charles M. Robinson, Rochester.

A feature of the convention will be the exhibitions connected with it. At Horticultural Hall there will be an exhibition of maps and photographs of parks and landscape designs, an exhibition of photographs of school gardens especially collected by the Department of Agriculture, an exhibition of designs for artistic bill boards and an exhibition of the current literature of outdoor art. At the Public Library there will be a special exhibition of photographs of famous parks and gardens and of the literature of landscape architecture. At the Public Gardens there will be a special exhibition of tropical and sub-tropical plants, of conifers and hollies. At the Appalachian Mountain Club there will be an exhibition of photographs of mountain scenery and of views in the parks about Boston.

The committee is also preparing a long list of the attractive and inexpensive excursions that may be taken in and about Boston. Members will register for these at the time of the convention and members of the entertainment committee will accompany the parties and act as guides. Meanwhile, the following pleasant trips are suggested for the convention days.

Tuesday, visit to Museum of Fine Arts, Public Library and Public Gardens, only a moment's walk from Horticultural Hall.

Wednesday, drive through the parks as guests of Boston Park Commission.

Glimpses of Boston Park Scenery.

LONGWOOD BRIDGE.

This bridge connects the town of Brookline with Boston over the beautiful water course of Muddy river, once an eyesore worthy of its name but made beautiful by the genius of Frederick Law Olmsted. The bridge was opened three years ago. It is a beautiful 100-foot span of natural seam-faced Rockport granite. The church, the tower of which appears in the distance, is a replica of Colechester church in England. The pavilion shown in another illustration is situated on the riverway, close to Longwood bridge. It is built of Rockport granite with Dutch tiled roof. It affords a fine view up and down the Riverway and is a favorite resort for bicyclists. The river at this point is colonized by wild mallard ducks.

VIEW IN THE FENS.

The site of the Back Bay Fens was once a low, boggy salt marsh, over much of which the tide ebbed and flowed. The water has been now confined to a winding course which is fed by salt water from Charles river at every tide. About fifteen inches of new water is taken in at every tide, entering by an automatic gate at Brookline and being let off by another similar contrivance at Charlesgate. The poplars seen in the photograph reproduced were among the first trees planted on the reclaimed territory. They are appropriate, there being insufficient room for spreading trees, and they harmonize well with the surroundings.

ELLCOTT ARCH.

The circuit drive crosses this bridge, leading from the tennis house to the

now eighty-two in operation in the department. The courts are cared for by the park department, which also furnishes poles but the players are expected to furnish their own nets, balls, and so forth. Everything else, such as baths, is free.

BRIDGE AT FRANKLIN PARK.

This bridge spans a part of Scarborough pond, an artificial body of water which is colonized by wild fowl, such as mallard, black, wood, pintail, teal, and so forth. The parkway crosses the bridge. The banks are clothed with viburnums, cornuses and azaleas, and the island in the center of the pond is planted with willows.

JAMAICA POND.

This beautiful natural sheet of water is situated in Olmsted Park, Jamaica Plain. It was formerly a water supply for Boston. It comprises an area of seventy-two acres and in places is over fifty feet in depth.

POINTS OF INTEREST.

Some of the additional points of interest in Boston and vicinity may be listed as follows:

HISTORICAL.

Bunker Hill	King's Chapel
Central Burying Ground	King's Chapel Burial Ground
Concord and Lexington	
Copp's Hill Burying Ground	Liverpool Wharf
Eliot Burial Ground	Massacre, location of
Emancipation Statue	Old Corner Bookstore
Eric Statue	Old North Church
Faneuil Hall	Old South Church
Franklin Birthplace	Old State House
Granary Burial Ground	Shaw Monument
Homes of Longfellow, Lowell and Holmes	Somerville Powder House
Hancock Inn	Washington Elm

INSTITUTIONS AND BUILDINGS.

LONGWOOD BRIDGE AND MUDDY RIVER, BOSTON PARK SYSTEM.

Trip to Cambridge and visit to Harvard University.

Thursday, visit to Revere Beach, a great public bathing beach, reached by electric cars.

Friday, Paul Revere trip to Concord and Lexington by electric car. Fells Reservation trip by train and carriage. Charles River trip, by electric cars and launches.

The president of the American Park and Outdoor Art Association is Edward J. Parker, of Quincy, Ill., the secretary, Warren H. Manning, Boston.

tennis grounds. The house contains lockers and shower baths for men and women. The bridge is built of boulders set in cement, with the pockets filled with loam in which are planted rhubies, celandines and Euponymus radicans principally, with a few alpine plants.

THE TENNIS GROUNDS.

Tennis is exceedingly popular with the frequenters of the Boston parks and grows more so every year. There are forty-five courts in the section shown in the photograph reproduced and there are

A GLIMPSE OF THE BACK BAY FENS, BOSTON PARK SYSTEM.

WITH THE GROWERS.

HENRY A. DREER, RIVERTON, N. J.

This is the place for inspiration. One can scarcely visit this large establishment and be conducted about by that great plantsman who is director general without adding considerably to his knowledge and absorbing some of Mr. Eisele's enthusiasm. No matter how often a visit is made, there always seems to be something new or a matter of interest that had been overlooked before. This can easily happen, as many visits are necessary to know all the merits of the place.

At the time of my last visit the grand annual clean-up had just been finished. Do not think for a moment that there is a chaotic condition from this time on until next July, for this is not the case; the place is always as well kept and orderly as it is possible to be where there is so much moving of stock, packing for shipment and other changes incidental to the business of such a large concern.

At this time there did not seem to be anything out of place in the houses and about the grounds the same order was prevalent everywhere. Mr. Eisele explained that while they try at all times to have things looking ship-shape, for sake of economy as well as for appearance, the last week of June is given to getting every part of the place in the best possible order, as it is much easier to take account of stock when plants are all straight in the rows and the rows of equal length. As in many other large places each house, or range of houses, or separate department, has its foreman, or is given in charge of some one who is held responsible and as a rule such heads take a pride in each keeping his charge up to the mark. Stock-taking occupies the first one or two days in July, one day generally sufficing to do the work, so perfect is the system.

It is difficult to say which part of the greenhouses or grounds was the most interesting, but probably the several houses of the new *Pandanus Sanderi* should receive first mention, as this sterling novelty is occupying considerable of their attention. It is not to be sent out until 1903, when a large stock will have

been worked up and it will be offered at a popular price, so that all may get in on the ground floor if they so desire. The stock is looking very well and holding its own with the old *P. Veitchii*, a block of which is in the same range.

A novel plan for securing bottom heat under cuttings was being used in this range. Double burlap was hung around the sides of a table underneath which was placed an oil stove such as is used to keep frost out of the house in an emergency. This kept up a gentle bottom heat which was regular and easily controlled and will no doubt be found very useful at seasons before the regular fires are going and after they are out.

In the fern houses that grand variety, *Cybotium Scheidei*, is to be seen in large quantities and in most excellent condition. This is a great acquisition to the list of decorative plants for florists' use and, while it will not stand as much knocking around as the *kentia*, it is much tougher than it looks and will stand abuse even better than the popular Bos-

ton fern. As a finish to a decoration it has no equal and its use for this purpose is rapidly growing in the large cities.

A fine batch of *Adiantum Farleyense* was coming on. Mr. Eisele says they nearly always have orders for more than they can supply of this stock. Out in the frames where most of the small stock is grown on during the summer, the inventory showed over 300,000 which are destined to grace dinner tables the coming winter.

Near this summer colony of ferns a large range of about 60,000 feet of the Dietsch patent short-roof greenhouses is going up, to be used during the winter for the fall importation of azaleas. Their trade in these plants is increasing rapidly and it was necessary to have a place to store them for spring delivery. With these facilities they will be able to deliver their Easter stock in the exact condition desired, which is so important to all concerned.

In the palm ranges the stock never looked better. Tens of thousands each of *kentias*, *arecas* and *latanias* in various sizes were to be seen and from the 2-inch to the 12-inch, and even larger sizes, they displayed a vigor that must have been gratifying to those in charge. A great many young cocoses are coming on, several houses of them. They make this a feature, as it fits in nicely with fern orders. When asked about it Mr. Eisele said he does not favor sowing each seed in a pot by itself, as some do, to avoid the loss in removing the young plants. Mr. Eisele thinks that the seed does not come up regularly enough to warrant this plan and prefers planting the seeds in 6-inch pots, about twenty-five together.

In the grounds outside the water lily beds attract the most attention. Although a comparatively recent addition to the stock, the demand has been most satisfactory and is increasing rapidly. Under the care of Mr. Tricker, who has charge of this department and who is the foremost expert in this line in the country, the stock has improved greatly. All the varieties of merit have been added and a number of Mr. Tricker's own seedlings, which are very attractive. A number of new ponds have been constructed, occupying about half an acre, and are filled with stock to be grown on. The exhibition pond next the greenhouses

ELLIOTT AROH, FRANKLIN PARK BOSTON.

is now almost at its best, with its great leaves of the victorias covering almost half the surface.

The fifty and more acres of perennial and herbaceous plants would take a day to themselves if one was to do them justice. There were several acres of young hollyhocks coming on for next spring's delivery. The young stock is very susceptible to a blight but by a liberal use of slug shot as soon as it was noticed the trouble was overcome.

The herbaceous phloxes were a glow of color and we were assured are gaining greatly in popularity. Here was a large block of petunias of the strain that has made the firm famous. They are wonderfully beautiful from any point of view. They are first taken from the seed pans and put into pots. This is done to guard the little ones which usually got left when transplanted from boxes and these little fellows, Mr. Eisele says, are generally the best varieties. As the Scotch gardener used to say to his apprentices "Mind the wee ones; the wee ones are aye the best."

I must not forget the cannas, with their bright showy flowers. It is a pity that they do not carry better, for they would be invaluable as cut flowers. Mr. Eisele is of the opinion that cut flower artists do not give near the attention they should to this outdoor class of stock, as much of it would be found very valuable for their work.

ROBERT KIFT.

CHRYSANTHEMUMS.

THE BLACK APHIS.

Now is the time of black aphid on chrysanthemums. A sure, safe and cheap remedy is a half pound bar of Ivory soap dissolved in a pail of boiling water, adding three pails cold water and applying in a fine spray, at once, while warm. It kills all the aphides or red spiders it touches, never hurts foliage, even that of violets, and is equally effective for mildew on roses, even a badly affected Crimson Rambler outdoors. E. O. ORPHE.

SEASONABLE NOTES.

Plants set out about June 1 by this time have the beds well filled with roots. They are making a vigorous growth and to maintain this they will need every encouragement. If planted in the regulation bench of six inches of soil, the beds should be given a mulch of well rotted cow manure. The material should be made as fine as possible and spread evenly, to the depth of about one inch. If thoroughly rotted manure cannot be obtained, it is safest to mix some soil with it, about one part to three of manure. Before putting on the mulch go over the beds and loosen the surface of the soil. After applying the mulch water it well. We sometimes give a dressing of either wood ashes or bone meal when mulching the beds but this should be governed by the amount in the soil or the quantity used at planting time.

This is the season when chrysanthemum growers have all their work laid out, especially if other things have a claim on their attention, but if one expects to reap success his chrysanthemums must not be neglected. They will need to be securely staked to insure against crooked stems. Every grower has his own opinion about the way his plants should be tied up but our preference is for the cane stake, about four and one-half feet in height, the plants being tied with raffia.

Another important part of the work is

THE BOSTON PARK DEPARTMENT MAINTAINS EIGHTY-TWO TENNIS COURTS.

A GLIMPSE IN FRANKLIN PARK, BOSTON, MASS.

to keep the lateral shoots removed, also all buds forming at this time, allowing the side shoot to grow on. Many varieties are very persistent in forming buds at very close stages of growth, notably most of the early varieties, also Ivory and the Vivand-Morel family. These, therefore, need extra watching. Some varieties also send up a bud that is deceiving, more like a growth than bud. Mrs. Elmer D. Smith, Golden Wedding and Wm. H. Chadwick we find do this.

The plants need plenty of water just now and must not be allowed to dry out. Ample syringing is also essential, with all the ventilation possible day and night and no shading whatever.

Late varieties, and where the object is to grow late propagated stock, planted close, for medium-sized flowers, should be put into their permanent quarters without delay. Choose clean, vigorous stock. They can be planted six inches apart, or even less, each way and will make nice average blooms for cheap work.

C. W. JOHNSON.

Father Terry's Best Work.

Many a patient investigator and creator of new plants, by plentiful use of printers' ink, has been held up to the admiration of the world as a benefactor, and he has deserved it. But many as worthy have toiled long and patiently and are almost unknown. H. A. Terry is one of these. He lives in the quiet little town of Crescent, Iowa, about ten miles north of Council Bluffs. He is now about 77 years of age and has spent years in developing hardy plums for the west and northwest and has given us about fifty varieties. But I think his grandest achievement is the creation of a large family of peonias. He has given the world over ninety new ones, all of them of merit and some of superior value.

About thirty years ago Mr. Terry secured the finest peonias he could find anywhere and then commenced the work of propagation by seed. He had a good basis and took plenty of time and has succeeded. I have visited him several times and have been deeply interested in

JAMAICA POND, OLMSTED PARK, JAMAICA PLAIN, BOSTON MASS.

ON THE RIVERWAY, A FAVORITE SPOT WITH BOSTON BICYCLISTS.

the man and his work and have seen his new creations in the height of their loveliness.

The Bride is a dainty white flower. I have tested it several years and am highly pleased with it. Princess of Wales is white, mottled with rose tints. Prince of Wales is deep crimson, edged white, full double in clusters.

Now here is one lack we have, of a pæonia committee to whom names can be referred. Kelway & Son, the great English growers, have the same names for entirely different flowers and to avoid confusion the names of the originators should be prefixed, as Terry's Prince of Wales. We find elsewhere the same confusion. Thurlow has Madam Breon, a deep crimson. Others describe it as pink.

Juno is another of Mr. Terry's choice ones, fiery crimson. Hercules, LaReine, Morning Star and Mrs. Rudd are all good. Some that he originated have gone out of his hands. I think the beautiful and fragrant James Vick is one. The Queen, an immense white, very early, is

another which is not on the list but which he brought to light years ago.

Thus this noble old man will leave behind him a monument of beauty and when he has gone thousands of lovely and charming flowers will give silent praise to his memory. C. S. HARRISON.

Ornamental Species of Asparagus.

There are now many distinct species and varieties of the evergreen asparagus, and some are quite old introductions, but it was not until *A. plumosus nanus* was put into commerce that they attracted much attention as commercial plants. Now, however, several varieties are grown most extensively for market, and both as pot plants and for cutting from they are much appreciated. It is the variety generally grown, *A. plumosus nanus*, that finds most favor, but there is some confusion with regard to the name. I am reminded of this by seeing the illustration in the *AMERICAN FLORIST* for May 31, under the name of *A. Comorensis*. I have seen the strong variety

named *Comorensis* in this country. Seedlings vary very much, and cultural conditions make considerable difference in the appearance. Grown in light sandy soil and frequently divided, the tall growing variety becomes dwarfed. Going back to my first acquaintance with these, the variety with the flat, frond-like branches was called *plumosus nanus*, and that which is now coming into commerce as *Blampiedii* as *plumosus*. On comparing plants of *Blampiedii* with a large number of seedlings I had under my care I found they were identical. *Sarriensis* is another name given to the same variety. From the variations I have seen among the large number of seedlings which have come under my notice, I am led to believe that they are all natural varieties of one species.

Asparagus tenuissimus is a distinct species and one of the prettiest, and deserves to be more extensively grown. It is curious that this may be readily propagated from cuttings, while it seems impossible to get the varieties of *plumosus* by the same means.

Asparagus Sprengeri.—This is coming much more into favor than when first introduced. Though not quite so light as the foregoing, the long drooping sprays are very effective, and they last so well, and being nearly hardy is another point in its favor.

Asparagus virgatus.—This is an older introduction, having been first introduced about forty years ago, but it is not generally known. Grown under favorable conditions it makes a most elegant plant, just the sort of thing to use among flowering plants to give a little relief without obstructing the view.

Asparagus dellexis is another distinct and useful species having long, slender, wiry stems; this is sometimes confused with *A. decumbens*, but this is deciduous and of no value as a market plant. All of these referred to may be grown under cooler treatment than is generally supposed. A change from heat to cold is damaging, and none of them do well under the shade of other plants. A light, open position, a regular temperature, rich soil and careful attention to watering are the main factors in successful culture; and when cut for market they should be packed dry in air-tight boxes. —*Metropolitan in Hort. Advertiser.*

Pennsylvania Horticultural Society.

The usual monthly meeting of the Pennsylvania Horticultural Society was held at Horticultural Hall, Philadelphia, July 15, John McCleary presiding. The usual display of outdoor cut flowers for the Bodine prizes took place and resulted in strong competition and good displays, both from the quality of exhibits and arrangement of same. Many tables were occupied in this class and many interesting subjects were seen. John G. Gardner exhibited a number of perennial phloxes, both standard varieties and seedlings. Among the most notable were Wm. Robinson, Snowflake, Independence, Le Siecle, Epopee, Carran de Ache, Cocqueliot and several promising seedlings. Potatoes and lettuce were in competition for the Michell prizes.

The address of the evening was by John Thatcher, describing what he saw around Boston in a recent visit to that city. Mr. Thatcher's remarks were listened to attentively and there appear to be many things worthy of adoption. Boston seems to lead in many matters horticultural. She may well feel proud of the Arnold Arboretum and the progressive-

ness and originality of many private owners. Planting in masses of permanent and annual beds, Mr. Thatcher observes, is practiced very extensively and the effects created thereby make a lasting and favorable impression on the mind.

The awards for outdoor cut flowers, fifteen varieties, were, first, John McCleary; second, Wm. Kleinheinz; third, Ernest Schreiber. For lettuce, first, Thos. Holland; second, Thomas Long. For potatoes, first, John McCleary; second, Thomas Long. For frilled tuberous begonias, first, F. Canning. A certificate of merit was given to John G. Gardner for perennial phloxes and special mention went to Victor Holmes for Kentucky Wonder snap beans and double sunflowers. FRANCIS CANNING.

Crops That Gather Nitrogen.

George C. Watson, of Philadelphia, has been investigating the subject of nitrogen-gathering crops and with other information received the following communications:

I have not had very good success with cowpeas as a green manure, but I think this was partly my own fault in planting too early, as the peas failed to come up good. What few came were poor and quickly got smothered in weeds. Still, I believe they are a good crop to plow under. JOHN BURTON.

In answer to your inquiry about my using crimson clover for a nitrogen gatherer would say that I do so every year, but in conjunction with cowpeas and not in competition with them. I sow the peas about this time (June 17), plow them under in September and sow in crimson clover, which I in turn plow under when in blossom the following spring to seed to peas again. I like this method, not only because I get two crops of nitrogen gatherers in a year, but I think the repeated plowings keep the grubs from the soil, as I never have them in such ground. I copied this method from Wm. Munro, foreman for Robt. Scott & Son, when he was with me.

J. HENRY BARTRAM.

The Climbing Dahlia.

This is the name that has been applied to a new and remarkable climber closely related to the dahlia. It is a native of Costa Rica and was first introduced to the British Royal Gardens, Kew, a few years ago. It has since found its way into a few gardens, and there is no doubt when it becomes better known it will be a popular plant. The climbing stems attain a length of twelve feet or more under favorable conditions and are supported by means of the tendril-like stalks of the deep green leaves. These may be described as ternate or three-lobed, each lobe being pinnately cut, the outline of the entire leaf being more or less heart-shaped or triangular. When grown in the open air the flower heads appear from the end of August and continue until destroyed by frost. Each flower-head is two and one-half to three inches across, having bright orange-scarlet ray florets, surrounding a bunch of yellow florets in the center. In fact, the flowers are not unlike some single forms of dahlia or of *Cosmos bipinnatus*.

When first introduced to gardens, the climbing dahlia was treated as a warm-house plant, owing, probably, to the fact that it came from Costa Rica. Experience, so far, however, has proved that it

is not only hardy out of doors during the summer months, but also that it is a charming creeper for covering a south wall. As might be expected, the stems and foliage are not proof against a few degrees of frost, nor will the roots retain their vitality out of doors without good protection. The plant flourishes in ordinary good garden soil and may be increased by stem cuttings in gentle heat in spring, like dahlias, or from seeds sown under similar conditions. W.

Cool Weather at Asheville.

While in most sections of the country the weather just now is excessively hot and uncomfortable, that at Asheville appears to be the reverse—cool and

W. A. HAMMOND

enjoyable. In the *Asheville Gazette* of July 22, for example, we find the following item: "The audience at Riverside Casino last evening was rather larger than usual, even for an opening night. Overcoats and wraps were much in evidence."

Haemanthus Katherinae.

There are several species of haemanthus known to botanists, and a good many are to be found in cultivation. Only a few of the more showy kinds, however, like *H. coccineus*, *H. Lindenii*, *H. magnificus*, *H. multiflorus* (or *Kalbreyeri*), *H. Natalensis* and the subject of the present note, can be regarded as general favorites. The distinct character of the foliage and the large umbels of starry flowers render them, when well grown, very conspicuous objects in the greenhouse and anyone interested in bulbous plants should certainly give a few of the haemanthuses a trial.

I recently saw a grand specimen of *H. Katherinae* in blossom in a private garden. The large distichously arranged leaves, with wavy margins, were eighteen to twenty-four inches long, narrowed into a short stalk at the base and being deeply channeled down the center. The fleshy scape, about two feet high and quite an inch thick at the base, sprung up from the base of the bulb and bore an umbel, eight to nine inches across, of about fifty bright red, starry flowers, with golden yellow stamens poised on the top of deep crimson filaments. This species will remain in flower from November till

about the end of January in a greenhouse. It flourishes in turf loam, leaf mould and sand, and is readily increased by the offsets from the bulbs. W.

Coming Exhibitions.

[Secretaries are requested to supply any omissions from this list.]

BOSTON, MASS., September 11-14, 1902.—Annual exhibition of plants and flowers Massachusetts Horticultural Society. Robert Manning, Sec'y, Horticultural Hall, 300 Massachusetts avenue.

Advice From Fra Albertus.

"If the concern where you are employed is all wrong and the Old Man a curmudgeon, it may be well for you to go to the Old Man and confidently, quietly and kindly tell him that he is a curmudgeon. Explain to him that his policy is absurd and preposterous. Then show him how to reform his ways and you might offer to take charge of the concern and cleanse it of its secret faults.

"Do this, or if for any reason you should prefer not, then take your choice of these: Get out or get in line. You have got to do one or the other—now make your choice.

"If you work for a man, in heaven's name work for him!

"If he pays you wages that supply you your bread and butter, work for him—speak well of him, think well of him, stand by him and stand by the institution he represents.

"I think if I worked for a man I would work for him. I would not work for him a part of the time, and the rest of the time work against him. I would give an undivided service or none.

"If put to the pinch, an ounce of loyalty is worth a pound of cleverness.

"You cannot help the Old Man so long as you are explaining in an undertone and whisper, by gesture and suggestion, by thought and mental attitude, that he is a curmudgeon and his system dead wrong. You are not necessarily menacing him by stirring up discontent and warming envy into strife, but you are doing this: You are getting yourself upon a well-greased chute that will give you a quick ride down and out."

FLORISTS WILL GO TO DIXIE.

WHEN the wise florist plans his journey for Dixie his first thought will naturally be as to where he can join one of the large parties of his fellow craftsmen who will arrive in Asheville, N. C., on the morning of August 19. No one who has attended a recent convention of the S. A. F. needs be told that one of the most enjoyable features of the whole affair will be the railway journey through a new and wonderful country in the company of a band of care free pleasure seekers, many of them on the only outing they allow themselves each year. The Asheville convention, more than any in recent years, affords the opportunity for these big special trains for a thoroughly enjoyable ride. The trip is a long one and the railroad fare so very low that it, in itself, is an inducement to the formation of large and friendly parties. Most of those from the north who are going will join one of these special trains, either at Cincinnati or Washington, on the afternoon of Monday, August 18.

The Cincinnati train of Pullman sleepers will leave at two o'clock via the Queen and Crescent railroad, for its run of 442 miles. It will carry all those from the north, Pittsburg, Buffalo, Canada, Detroit, Cleveland, Chicago, St. Louis and smaller intermediate cities, who will reach Cincinnati sometime that forenoon.

The Washington special will pull out Monday afternoon at five, having on board the parties from Baltimore, Philadelphia, New York and New England, as well as the two and threes from many other places.

The Chicago party will leave at 8:30 p. m., Sunday, August 17, via the Big Four. A special train will be run if the reservations of berths warrant. All the west and northwest, from Milwaukee, St. Paul, Omaha and Denver, is expected to join the Chicago party. The Chicago cars go through to Asheville.

St. Louis will have a \$20 fare and a special sleeper leaving Sunday night and reaching Cincinnati to join the big train.

Detroit will set forth Sunday night, via the Michigan Central, reaching Cincinnati Monday morning.

Cleveland, Pittsburg and Buffalo will also get to Cincinnati before noon Monday. They have not yet decided on routes; those intending to travel with either party would better write the

president of that particular Florists' Club.

The New York party will take train at 10:10 a. m. Monday on the Pennsylvania railroad to join the Philadelphia contingent.

Philadelphia, re-enforced by New York, will take the 12:29 p. m. train on Monday, August 18, for Washington, whence all will travel by special train.

A PROGRESSIVE VIRGINIAN ESTABLISHMENT.

After the Asheville convention many whose first visit it is will scatter for a

good health. To-day his place consists of twenty-eight acres of land and his range of glass covers 200,000 square feet. Besides a number of smaller houses there is one remarkable range, a row of thirty-one houses side by side, each house 22x200 feet and thoroughly modern in every particular. A shed fifteen feet wide and 550 feet long passes down the center of this range, carrying the heating pipes.

The place is heated by two boilers of 150 horse-power each, so valued that either or both may be operated as occasion may require. The fuel is soft coal and in Richmond it costs \$3.10 per ton. At the boiler an 8-inch steam pipe starts down the long shed, feeding the 2-inch coils in the houses. Of course the main is reduced in size as it progresses and house after house is taken off. All the pipe in the shed is covered with asbestos to economize heat and the steam is returned to the boiler by an automatic pump. A steam pressure of fifty pounds is carried on the boilers, controlled by an automatic damper, and an 8-inch automatic reducing valve keeps the pressure in the heating pipes steady at one pound.

The water supply for this big establishment is in a well fifteen feet in diameter and thirty feet deep which has never been known to fail. There is a tank of 10,000 gallons capacity in which liquid manure is made and pumped to all houses by steam. The stock grown is principally cut flowers, carnations and roses, violets, chrysanthemums and the various seasonable specialties.

One of the accompanying illustrations shows three new brick walled houses, 22x200, which Mr. Hammond is putting up. They are on the plans adopted by the large growers for the principal northern markets, where space and light are the essentials. The iron gutters shown are the pattern made by Diller, Caskey & Company, successors to Jennings Bros. The upper illustration shows Mr. Hammond's residence, with a glimpse of the greenhouses, and on the opposite page is a portrait of Mr. Hammond himself. He will be at the convention and glad to see visitors at his place.

There are many other interests to repay one for a visit to the vicinity of Richmond, not only places horticultural, but of historical association which will cause them to endure in memory and literature long after the lapse of time has obliterated the works of man.

HOME OF W. A. HAMMOND, RICHMOND, VA.

MODERN HOUSES BUILDING BY W. A. HAMMOND, RICHMOND VA

closer inspection of the floriculture of the south. At Richmond, Va., these investigators will find the largest range of greenhouses in that section and, indeed, one of the largest in the country. It is the establishment of W. A. Hammond and its rapid upbuilding from a very modest beginning shows a progressive spirit and a masterly grasp of the business situation which would be a credit to the shrewdest member of the craft in the whole north. In fact few of the great places of the north have been developed more quickly.

Mr. Hammond started in business in 1887 with one acre of land and a greenhouse 20x100. His only capital was

Chicago.

LITTLE BUSINESS ENOUGH TO MAKE WHOLESALERS HUSTLE TO PROCURE SHIPPING STOCK.—ALL QUALITIES SADLY DETERIORATED.—CARNATION CROP PRACTICALLY OFF FOR THE MOMENT.—OUTDOOR STOCK MOVING VERY SLOWLY.—AN ACCIDENT.—GROWERS BUSY BENCHING STOCK.—THE CLUB PICNIC.—NOTES AND VISITORS.

The market is still very quiet but there is quite a little skirmishing for stock to fill out of town orders, for roses were never poorer and the cut of young Beauties has deteriorated remarkably with nearly all growers in the last week. Probably this market was never more bare of Beauties of whatever grade than in the past week. The result has been that good average values have been obtained. Tea roses have, it would seem, got down to the lowest notch. Both Brides and Bridesmaids have been very scarce and poor for some days past, Meteor pretty good, Kaiserin scarce, Golden Gate most plentiful and Liberty good, but the latter has to be cut very tight to be serviceable and the buds are very small in consequence. Carnations are almost out of the market for the moment; practically everyone is neglecting the old stock in the work of replanting the houses which have been cleared out. Asters are beginning to come in more plentifully and are good considering what they have had to go through this season, but the rains have put a quietus on sweet peas. Water lilies are again beginning to come in; they have been literally covered with water and out of sight. Gladioli are very abundant but not extraordinarily good; they are decidedly slow sale. Business takes a spurt now and then and cleans up the market pretty well on auratum lilies, but there are still quantities of them coming in.

Edward E. Pieser, son of Sam. Pieser, the North Clark street florist, and nephew of E. E. Pieser, of Kennicott Brothers Company, met with a very serious accident July 24, falling from the platform of the Metropolitan Elevated railway while returning from the ball game. Both shoulder blades and his left forearm were broken but his ultimate complete recovery is expected. The lad is 14 years of age and at Polyclinic Hospital on Chicago avenue, is hardly yet able to tell how the accident occurred.

The Florists' Club will hold its annual picnic at Bergman's Grove, Riverside, on August 12 and a big time is expected. The grounds are easily reached by electric cars from the Garfield Park branch of the Metropolitan elevated. There will be suitable prizes for numerous sports and a large attendance is assured. Most of the stores will close for the day.

At Joliet the Chicago Carnation Company has its new rose houses all planted and the stock doing well. The carnations are now being benched. Mr. Hartshorne says that while a few plants in the lower part of the field have been lost, the percentage is small and the average of the stock is better than he ever had it before.

Wictor Brothers have their roses all replanted, that is, all except the six 250-foot houses of Beauties which are to be carried over for another year. Although this is the firm's first season with chrysanthemums, there never was a finer looking lot of plants than theirs.

Leonard Kill was at New Castle last week and says that all the growers there have things in fine shape. Reinberg & Weiland have their place all planted, to tea roses and Beauties, no carnations

being grown this year although they have some good plants in the field.

Weber Brothers are drying off their roses preparatory to carrying them over another year. They cut some of the very best Brides and Bridesmaids the market saw last season and they are not throwing out a single plant.

E. C. Amling is receiving some very fine Rudbeckia Golden Glow, but it doesn't sell, except now and then to a storekeeper who wants an armful for his window because it's cheap.

Among the solid element which will be of the Asheville excursion party will probably be Peter Reinberg, Henry Wictor, John Muno and Adam Zender.

John Muno has planted up those of this carnations which were on low ground. The rest of his stock is on high, sandy soil and will be left out a little longer.

E. A. Kanst will attend the annual convention of the American Park and Outdoor Art Association at Boston next week.

Peter Reinberg has benched five houses of Mrs. Lawson carnation, two of them the biggest houses on the place.

The Rothschild funeral on Wednesday gave Fleischman, Friedman and others some good orders.

Miss Jessie Ludlow, of Vaughan's Seed Store, is ill with diphtheria.

A. L. Randall is on a trip to New York. Visitors: J. A. Valentine, Denver, Col.; Otto Speidel, Oconomowoc, Wis.; John Kalisch and Edward Kalisch, of Wm. Kalisch & Sons, St. Louis; H. H. Frey, Lincoln, Neb.; John Peterson, Omaha.

Philadelphia.

BUSINESS TIDE AT LOWEST EBB.—ASTERS RULE THE MARKET.—LITTLE OTHER GOOD STOCK.—THE PRICES.—NEW PETUNIAS USEFUL.—RELATED MARKET PROJECT NOW RECEIVING SERIOUS CONSIDERATION.—COMMISSION MEN FIXING UP.—THE RIBBON BUSINESS.—NOTES.

Asters now hold the boards and it is almost asters or nothing. They are very fine and there is a good assortment of colors. The light and dark purples help out nicely for funeral wreaths. Prices range from 75 cents to \$1.50 per hundred. It is a great pity that the stems foul so soon; there seems to be no help for it. There are a few carnations about but they are very poor and hardly worth the name, except a few Hills and Crockers, which sell for \$1.50 per hundred. Kaiserin and Carnot, with a few La France, are about the only roses worth mentioning. The few Beauties to be seen are very poor. Roses range from \$3 to \$6 per hundred. The double fringed white petunias are great for set work and sell at from 50 cents to 75 cents per hundred. Trade in the stores is very light, it seeming to be the very duller part of the season.

The market question is being pushed again and we understand that the time is now considered ripe. Well, the time was ripe fifteen years ago and it must be well on toward decay by now. Thousands of dollars have been lost to the growers and the dealers have been put to great annoyance and inconvenience all this time because some half dozen men stood in their own light and antagonized the project whenever it was proposed. There is not now near the necessity for a piece of this kind that there was fifteen years ago. Then there were scarcely any commission houses worth the name. Now one large house handles more flowers daily than came into the city from all the growers at that time. In the mean-

time most of the large cities have established markets and they are successful to a degree and pay, in addition to the great benefits they are to the growers and dealers, handsome dividends to those lucky enough to hold the stock.

S. S. Pennock is making improvements, the principal addition being the fitting up of a large room in the second story to give the ribbons a chance to branch out. The success of this department goes to show what can be done by intelligent and careful handling and a proper appreciation of the wants of the trade. The ribbon business has broken out in a new spot, as M. Rice & Co., who have long wanted to take up this line, have secured the services of "Jack" Turnbull, formerly with S. S. Pennock, and are laying in a stock that is to be second to none. Although this firm has been in its building only two years, they have outgrown their quarters and have annexed two stories of the adjoining building.

We paid a flying visit to the Westcott establishment the other day. John, the redoubtable, was off to his Barnegat club house with several friends on a fishing trip. His brother and partner, Wm. H. Westcott, was holding the place down in great style, however, and we never saw it looking better. Everything was in apple-pie order and the prospects are excellent for fall houses of choice stock this fall.

Eugene Bernheimer is now nicely settled in his new location, 11 South Sixteenth street. He is now on a principal thoroughfare and has a nice, light basement, much like the Twenty-eighth street stores in New York. Everything is painted white inside and the place presents a very cheerful appearance.

A great gloom has been cast over the entire craft by the unfortunate and untimely death of young John Burton. It was a sad ending of a pleasure trip.

Chairman Watson says that the names of the Asheville party are coming in lively and everything points to a large delegation from this city. K.

Boston.

TRADE STILL VERY QUIET AND NO IMMEDIATE PROSPECT FOR IMPROVEMENT.—SUPPLIES AMPLE FOR THE MODEST DEMAND.—GOOD SHOW.—NICE PARTY FOR CONVENTION TRIP.—FIGHT ON THE BEETLE.—SYMPATHY FOR PRESIDENT BURTON.—NOTES.

Midsummer stillness in the flower trade is broken only by the regularly recurring exhibitions at Horticultural Hall and the more or less frequent arrival of some tourist from other climes, seeking rest and recreation in the cool sea breezes of the New England coast. The weather has been decided enough in its frigidity to satisfy the most critical visitor as to the proximity of the north pole, but nevertheless the season keeps well in advance of the average as to date of outdoor bloom, the principal effect of the low temperature and frequent rains being the longer continuance of the flowering period and the more sturdy quality of the flowers coming to market daily. The quantity received at present is not heavy but fully as heavy as the needs of the buyers will justify. Prices are on a summer level and will remain about stationary, no doubt, until some decided influence is felt, such as the full tide of the aster cut or the crop of Japan lilies. Renovating is going on in a greater or less extent in the various flower marts. Many familiar faces are missing from their accustomed posts for, no matter

how good a vacation resort Boston may be for others, the native is not satisfied unless he gets away somewhere and experiences a change of scenery, if nothing else.

The exhibition last Saturday was a small one but furnished the necessary sensational interest, in the fine hydrangea shown by Mr. Walsh, which were awarded a silver gilt metal and for which a very brilliant future is predicted. W. J. Clemsen, Ed. Powell gardener, staged a splendid collection of hardy herbaceous plants and special collections of sweet peas and phloxes. Blue Hill Nurseries, George Hollis, E. L. Lewis and other regular exhibitors were also well represented. The mushroom display of the Mycological Club was very large and attracted an enthusiastic crowd of students.

A vigorous fight is on to keep in check the elm leaf beetle. Now that the habits of this disgusting pest are generally known and the virtues of Bowker's Disparene as a protection against it are recognized it is possible to forestall it and this is just what the park department has been doing with gratifying success. Some trees that were entirely defoliated last year are in good clean condition as a result of early and thorough spraying.

The arrangements completed for the reception and entertainment of the Park and Outdoor Art Association visitors next week give assurance of a very enjoyable and instructive time. For the park officials who are expected, the preparations for showing them Boston's great public reservations are especially elaborate. H. P. Kelsey is chairman of the introduction committee and Gen. F. H. Appleton of the committee on entertainment.

As the time draws near for the Asheville trip notice of intended participation is received from one after another who are not general attendants at these conventions and it now seems assured that New England will be fairly well represented when the roll is called. One party is being organized to go by the sea route via Norfolk.

The sad news of the bereavement that has come to the home of President Burton and in almost equal degree to the home of Edwin Lonsdale in the sudden taking away of young Mr. Burton has filled the hearts of a host of Boston friends with sorrow. The event has cast a gloom over us all.

J. W. Newman, formerly at 46 Brattle street, has opened a very finely appointed and well located store at 37 Washington street.

Mr. and Mrs. Alex. Wallace are spending the week in Boston.

St. Louis.

FLORISTS ENJOY A DAY IN A GROVE.—WINNERS OF THE SPORTING EVENTS.—GROWERS AND RETAILERS BUSY REPAIRING.—TRADE DULL AND STOCK IN LIGHT SUPPLY.

The florists' picnic was held at Priester's Grove on Thursday of last week and a large number were present. The weather was ideal for a picnic although a few drops of rain did fall and stop the ball game after the first inning. The sporting events were well contested. The prize winners were in the order named: Little girls' race, Miss Ammann, Miss Gutzman; boys' race, Master Carrick, Charles Cuendet; ladies' race, Mrs. J. W. Dunford, Mrs. F. M. Ellis; men's race, W. F. Hirt, Oscar Kuehn; growers' race, J. F.

Ammann, E. W. Guy; ladies' bowling, Mrs. Klaus, Mrs. E. Weber; men's bowling, E. W. Guy, J. J. Bencke; tug of war, J. F. Ammann's team. In the latter case the prize was a box of cigars and was shared with the defeated team of E. W. Guy. Boating and dancing furnished amusement for those that did not participate in the other events.

The wholesale market is not oversupplied with carnations this week but the few that are coming in do not bring more than \$1.50 per hundred for the best, principally Triumph and Flora Hill. Roses are a little more plentiful but are of low quality. Beauties are not overplentiful. Asters are rather small but sell at from 50 cents to \$1.50 per hundred. There is no market for lily of the valley though good stock is offered. Smilax is very good.

C. C. Sanders is busy putting up a new 120-foot show house. Mr. Sanders rebuilt several of his houses this spring and will take down one more in the near future. He has built a large wagon shed, large enough to drive in with a big wagon. He is thinking of putting up a brick office building next year. The benched chrysanthemums, potted cyclamens and other stock all looks good.

Fred. Meinhardt, Mrs. Ayers, the Koenig Floral Company, Geo. Waldbart and Aug. Kuntz are busy renovating their stores.

R. J. Mohr has left the employ of the Plant Seed Company.

R. J. M.

New York.

TRADE COLORLESS AND STOCK OF SUMMER QUALITY.—BEAUTIES THE ONLY GOOD ROSES.—OUTDOOR FLOWERS PLENTIFUL.—NOTES AND VISITORS.

The wholesale market is featureless. There are large quantities of short-stemmed roses coming in, from young planted stock, but the only really good material available is American Beauty, of which the supply is fair and the sales satisfactory. There are heavy receipts of summer stock of the usual lines. Sweet peas are plentiful and of excellent quality. Asters are increasing in quantity daily.

Charles Schenck returned Thursday with a good coat of tan acquired in the Thousand Islands of the St. Lawrence. He reports having had a splendid time.

Visitors: F. C. Stevens, Bermuda; J. C. Vaughan and A. L. Randall, Chicago.

Indianapolis.

FLORISTS OF THE STATE HAVE SUCCESSFUL OUTING.—PROFITABLE ASTER CROP.—A VARIETY OF PERSONAL DOINGS.—NOTES AND VISITORS.

The recent outing of the State Florists' Association was a great success; everybody seemed to enjoy it immensely. The attendance was so unexpectedly large that the ice cream supply gave out a little bit too soon. Among the amusements most enjoyed by the ladies was a steamer ride up the river. The center of attraction for the men was the base ball game. There was a Bertermann nine and the other side consisted of all the other base ball enthusiasts. It was a very lively game, which resulted in a score of 25 to 12 in favor of the "mixture." Success was due to John Hartje, who pitched a fine game.

Philip Conway is coining money out of his aster crop. He has them planted outside, and as the season was very favorable, it has proven a great success. Those with asters inside the houses find it

difficult to compete in prices with Mr. Conway.

Mr. Kaufman, a German horticulturist, spent ten days with his uncle, H. Junge. Mr. Kaufman was enroute for the west, inspecting horticultural establishments.

The Indianapolis Flower and Plant Company is completing two houses, which will make them a total area of 40,000 feet.

Carl Sommenschmidt and Ed. Bertermann and family will leave for Buffalo, Detroit and other places in a few days.

It is reported that L. Geiger has gone out of business. His place will hereafter be continued by Martin Nelson.

John Bertermann and family have gone to Elkhart Lake and other northern resorts for four weeks.

Mr. and Mrs. A. Wiegand are on a trip to Yellowstone Park.

Visitors: Harry D. Edwards, from Newport, Ky.; Mr. Hauswirth, Chicago; Mr. Elverson, New Briton, Pa.; H. Thaden, Atlanta, Ga. H. J.

Columbus, O.

VARIOUS JOTTINGS OF THE DOINGS OF GROWERS AND RETAILERS.—SWEET PEAS A PROFITABLE CROP.—FUNERAL WORK MAKES BUSINESS.

At the Maurice Evans place everything is found in apple-pie order, as usual, notwithstanding the fact that Ed. Evans is not altogether satisfied with his young rose stock, claiming it is not up to the usual standard. Mrs. Maurice Evans, who was very sick at the time of her husband's death, is very much improved and no doubt will soon be about again.

In spite of the excessive wet weather the aster crop is still looking well and quite a few are now being brought to market. Sweet peas are about done for. While these were sold low this season, they proved a very profitable crop for those who grew white and light pink extensively.

C. A. Roth has returned from the west. He reports having had a pleasant as well as a profitable trip and is well pleased with the outlook for winter crops of carnations about Joliet, Ill., from which course he obtains a great deal of his stock.

The past week was a profitable one for most of us, as there was quite a bit of funeral work and everybody had his share of it. CARL.

Paterson, N. J.

LITTLE DOING IN A TRADE WAY.—SOME PEOPLE READY TO QUIT.—VARIOUS NOTES.

Joseph Towell is still confined to his home and during the past two months he has been in bed. The business is being conducted by his son, Harry, who is going to grow smilax, Asparagus plumosus and A. Sprengerii in greater quantity than ever.

Florist Ed. Secery has been selected to represent the Paterson Park Commission, of which he is a member, at the annual convention of the American Park and Outdoor Art Association at Boston.

There is not much doing at present and stock is not over plentiful. The city is once more beginning to look like itself, many new buildings are going up in the buried districts.

Hoffman, of Albion Place, has offered his place for sale. He has been sick all the past winter and and is going to get out of the business.

Mrs. J. Kirberg, who conducts a retail store, is tired of the florist business and has offered her place for sale.

SHUK CITY.

THE AMERICAN FLORIST

EIGHTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.
Subscriptions accepted only from those
in the trade.

Advertisements on all except cover pages.
10 Cents a Line, Agate; \$1.00 per inch.
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive inser-
tions, as follows—6 times, 5 per cent; 13 times,
10 per cent; 26 times, 21 per cent;
52 times, 30 per cent.

Cover space sold only on yearly contract at
\$1.00 per inch, net, in the case of the two
front pages, regular discounts apply-
ing only to the back pages.

The Advertising Department of the AMERICAN
FLORIST is for florists, seedsmen and nurserymen
and dealers in wares pertaining to those lines only.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to
secure insertion in the issue for the following
Saturday. Address

AMERICAN FLORIST CO., Chicago.

Our Special Convention Number will
be issued August 16. Please send your
advertisement early.

The names of the flowers forwarded
by "J. S." are *Asclepias tuberosa* and
Lilium Philadelphicum.

LEADING growers of peonies report
that some good orders are booked and
that there will again be large plantings
this fall.

THIS year's S. A. F. convention, because
of its location and the low railroad fare,
will attract many of the craft who are
not regular attendants.

THE second annual exhibition of the
National Sweet Pea Society of England
was held in London July 15-16 and
proved even more successful than the
first one, held last year.

FREDERIC W. TAYLOR, acting chief of
horticulture at the St. Louis World's
Fair, called at this office during the week
and stated that very satisfactory progress
is being made in his department.

PRESIDENT BURTON lost one of his sons,
a very promising young man, by drown-
ing last week. We tender our sincere
sympathy to the sorrowing family and
feel that the entire trade does likewise.

Society of American Florists.

STATE VICE-PRESIDENTS.

It is most desirable that members
should express their preference as to the
selection of the local vice-presidents to
represent their respective states for the
coming year. It is the duty of each state
vice-president (or in his absence some one
who represents him) to call together the
members present from his state at the
convention, for the purpose of electing a
vice-president. If this is not attended to
it devolves upon the president to make
the appointment according to his best
judgment, and if such appointment should
be not entirely satisfactory the responsi-
bility rests solely with those who failed
to attend to the duty at the proper time.

WM. J. STEWART, Sec'y.

A New Volume.

With this issue we commence a new
volume which we hope to make even
more attractive and valuable than any
already published. During the past year
we have divided the customary annual
volume, making two half-yearly volumes.
This was done because of the unhandy
proportions which the former had
assumed. Our first half-yearly volume
commenced with the issue of August 3,
1901, and concluded with that of Janu-
ary 25, 1902. The second commenced

with our issue of February 1, 1902, clos-
ing with last week's number, that of July
26. The former contained 1,024 pages
and the latter 1,056, a grand total of
2,080 for the year, or sixty-four more
pages than the preceding annual volume.
Both of these half-yearly volumes will be
bound soon and ready for delivery at \$2
each.

Hotels of Asheville.

The following Asheville hotels are rec-
ommended as desirable and convenient
at rates quoted, American plan:

Battery Park, per day.....	\$3.00 to \$4.00
Swannanoa, per day.....	2.50 to 3.00
Berkeley, per day.....	2.10 to 3.00
The Manor, per day.....	2.10 to 3.00
Glen Rock, per day.....	2.00

Rainfall at Chicago.

Chicago is the center of a large area
over which there has been unusually
heavy rainfall all spring. The exact
situation is set forth in the following
table of the U. S. Weather Bureau, giving
in inches the precipitation for the past
four months compared with the same
period for the past four years:

Period	1902	1901	1900	1899
April.....	2.26	.33	1.02	.14
May.....	5.08	2.18	3.59	4.35
June.....	6.45	2.43	2.06	2.71
July.....	5.78	4.25	4.64	6.66
Total.....	19.57	9.19	11.31	13.86

Greenhouse Building.

Westport, Conn.—Fillow & Banks one
house.

Fryeburg, Me.—H. Tarbox, one house.

Marblehead, Mass.—E. Lefavour, carnation
house.

Stockbridge, Mass.—F. Aymar, one
house.

Dorchester, Mass.—The Franklin King
estate, house 30x150.

Carlisle, Pa.—John B. Lindner, two
houses 30x300.

DeHaven, Pa.—J. L. Wyland, house
18x130.

Carlstadt, N. J.—Jacob Ullmann, house
30x80.

Castle Shannon, Pa.—W. J. Campbell,
house 20x100.

The American Chrysanthemum Exhibition.

CHANGE OF DATE.

The date of the above exhibition, to be
held under the joint auspices of the
Chrysanthemum Society of America and
the Horticultural Society of Chicago, at
the Art Institute, Chicago, was first set
for November 4-8, but has now been
changed to November 11-15 inclusive.
This is the first exhibition attempted by
the national society and the arrange-
ments made for it by the local society
are most satisfactory. The main exhibi-
tion hall is sixty feet wide by 220 feet
long and thirty feet high, with an annex
40x80 feet. The conference hall—a beau-
tiful and commodious chamber—in the
same building can be secured for meet-
ings and discussions as may be found
necessary. More delightful and appropri-
ate surroundings for the great chrysan-
themum renaissance of America could
hardly be imagined and the building is
located in the very best section of the
city for the accommodation of visitors of
every class and from every direction.
The preliminary list of premiums has
been out for some time and copies of
same may be had by addressing Edwin
Lonsdale, Sec'y, Chestnut Hill, Philadel-
phia, Pa., or E. A. Kamst, assistant sec-
retary, 5700 Cottage Grove avenue,
Chicago.

Piping a Range.

ED. AM. FLORIST:—I am building a
range of three Dietsch short-span con-
nected houses 14x50 for carnations and
wish advice as to piping. The houses
run east and west, gutters seven feet
high, walls protected except on the east.
There is a lean-to 6x50 feet with a two-
foot wall on the south side; a shed 15x56
shelters the west ends, an office 14x22, a
greenhouse 14x18 and one 10x14 pro-
tect the north side. I do not wish to
heat the office with the apparatus that
runs the houses. I have a No. 16 Hitch-
ings corrugated fire box boiler capable of
handling 1,000 feet of 4-inch pipe and
have 650 feet of the pipe and all fittings
on hand. How shall I arrange the
piping? What is the best packing and
cement for the joints? L. L. F.

The three carnation houses can be
readily heated by running two 4-inch
flow pipes along the outer walls of each
of the outside houses, carrying them
across the end and with each feeding
two 4-inch returns. This will be sufficient
to give four 4-inch pipes in each house.
If it is not possible to carry the pipes
across the doors, use one flow and one
return on each side of each house. For
the lean-to, 6x50 feet, one 4-inch pipe
will be hardly enough except for violets
and pansies, but two 2½-inch would
answer for 50'. For the other houses
use one foot of pipe to four of glass.

While joints made of iron filings and
similar material are most durable, a very
satisfactory joint can be constructed
from oakum and Portland cement in
alternate layers, when the runs are short.
Even then care is needed to provide for
the expansion and contraction of the
pipes, lest the joints be pulled apart.
Failures with this kind of joint often
result from allowing the cement to set
too quickly, but this can be avoided if
the joints are covered with damp soil or
sawdust for a week or two. L. R. T.

Trouble With a Boiler.

ED. AM. FLORIST:—We have two boilers,
side by side, one eighty horse-power,
the other 120 horse-power. The small boiler
stands between the larger one and a
range of six houses. The flow from the
large boiler is 3½ inches, a 4-inch main
continuing after it passes the smaller
boiler. A 3½-inch return enters both
boilers. There is a valve between the
main feed pipe and each boiler. When
the large one is fired heavily it gains
steam on the gauge and the coils in the
last two houses choke up with water.
Then there is a hard kicking in the return
where it enters the large boiler. It seems
to us that the flow pipe from the large
boiler does not furnish relief for the steam
generated and the return being the same
size, 3½-inch, takes the force from the
boiler instead of from the other end of the
main. How shall we remedy the diffi-
culty? Will a 4-inch flow do it? G. H. S.

If a 120 horse-power boiler has only a
3½-inch steam pipe it is not strange that
the pressure rises when fired heavily. A
boiler of this size will handle 12,000 to
15,000 square feet of radiation and
should have for this radiation a 6-inch
pipe, at least for low pressure heating.
If carried at forty pounds pressure and
reduced in the coils, as might be desirable
under many conditions, a 4-inch main
would answer. The cause of the flood-
ing of the returns and the pounding may
be due to the fact that there is more
radiation than can be properly supplied
through the small main, or that the

boiler is too high to get a good return of the water, or, as is probably the case, to both. If this surmise is correct it will be necessary to put in a steam trap, among which the Morhead is one of the best for the purpose, in addition to increasing the size of the main. Even then the pressure will naturally rise when firing heavily, unless there is a very large amount of radiation. L. R. Taft.

OBITUARY.

JOHN FROST.

John Frost, a much respected citizen of Erie, Pa., died on Monday, July 28, at the age of 46 years. Mr. Frost was born in Kauzin, Germany, where at the age of 13 he began working for a greenhouse establishment, continuing there until 1889, when he came to America and established himself in the retail florist business at Erie. Mr. Frost had been sick for about six months. He was well thought of by those in the trade and leaves to mourn his death his father, four sisters and two brothers.

D. T. CURTIS.

D. T. Curtis, for many years known in horticultural and seed trade circles in Boston as a member of the firms Curtis & Cobb, Curtis, Cobb & Washburn and Curtis & Bowditch, died at his home in Dorchester, Mass., on July 26, after a long and painful illness. Mr. Curtis was 87 years of age. He retired from business about fifteen years ago. He was for many years an active worker in the Massachusetts Horticultural Society and retained his interest in its exhibitions as long as he was able to attend.

JOSEPH W. NORTH.

Joseph W. North, the St. Louis retail florist, died July 20 at his home in Kimmswick, Mo., after a brief illness. Mr. North has been prominent in his line in St. Louis for many years. He was born in England 62 years ago, and removed to Bridgeport, Conn., in early boyhood. He served in the Union cause during the civil war, and after the war went to St. Louis and established himself in business with greenhouses at Kimmswick. He was a member of St. Louis Commandery No. 1, and of Moolah Temple, Mystic Shrine. He leaves a widow and four children.

JOHN BURTON, JR.

John Burton, Jr., son of John Burton, of Chestnut Hill, Pa., president of the S. A. F., was drowned on Friday, July 25, while canoeing with his brother, Alfred, on the upper Delaware river, near Lackawaxen, a point about fifty miles above the Delaware Water Gap. Mr. and Mrs. Burton and two daughters, his sons John, Jr., and Alfred Burton, his eldest son, and wife, were all stopping at the Gap. On Wednesday Alfred and his brother went to a point about 100 miles up the river with the necessary outfit and, hiring a canoe, started on a trip down. At night they camped in the woods or put up at a farm house. All went well until Lackawaxen was reached on Friday noon, when in shooting the rapids here the boat was overturned and both were thrown out. They were both good swimmers, however, and managed to get hold of the boat and floated along with the current without any thought of danger. Finally, as the banks seemed close, John said to Alfred, "You hold on to the boat and work her in and I will swim ashore and run down the bank and meet you," and when last seen by his brother John was making good progress

toward the bank. Alfred after floating along about half a mile farther managed to edge the canoe in and, getting a footing, pulled the boat up on the bank. Opening a bundle, which was still in the boat, wrapped in oilcloth for just such an emergency, he changed his wet suit for a dry one, in the meanwhile keeping a lookout for his brother. Getting no answer to his calls and seeing nothing of him he became alarmed and with what help he could summon in this somewhat lonely place he exhausted every effort to find the body. Mr. Burton, who had gone to Philadelphia Friday morning, was telegraphed for and on arrival immediately offered \$500 reward for the recovery of the body. It was not, however, until the following Tuesday afternoon, although parties were continually dragging the river, that it was found, and then had to be brought to the surface by means of dynamite. It is presumed that John overestimated the strength of the current and received a blow on the head, by coming in contact with a rock, that dazed him or rendered him unconscious, as he was quite a good swimmer and capable of keeping afloat for a considerable time. The deceased was 22 years of age and very popular with all who knew him. He was engaged with his father and was very much interested in the business. The sad accident has cast a gloom over the community and the heartfelt sympathy of all in the trade here and throughout the country will go out to Mr. Burton and his family in their bereavement. The funeral took place privately Wednesday afternoon, July 30.

WANTED—A young man who understands something about orchid and fern growing. State where last employed and wages wanted, with board. Address J. M. GASSER Co., Euclid Ave., Cleveland, O.

WANTED—Experienced grower of Beauties and roses, able to take charge of range of houses and turn out first-class stock. Good wages to man with acceptable references. Married man preferred. Address H., care American Florist.

WANTED—A bright, ambitious young man with experience in a hardy plant and shrub nursery. Must be a good packer, capable of taking charge of packing house during packing season. Address, stating wages desired, J. W. ELLIOTT, Springdale, Pa.

WANTED—A working foreman to take charge of 22,000 square feet of glass, where first-class roses and carnations are grown, also one house of poinsettia; also one assistant. State age and wages expected, with board and washing. Apply to JOHN L. WYLAND, De Haven, Pa.

WANTED—Four boys, 17 to 20 years, as helpers or assistants in rose and carnation sections. Pay according to ability, from \$10 to \$20 per month and board. Apply at store, 37 Randolph St., Chicago, or to greenhouses at Morton Grove situated 14 miles from Union depot, on C. M. & St. P. R. R. POEHLMANN BROS. Co., Morton Grove, Ill.

FOR SALE—10,000 feet 10x12 glass, 80 hotbed sash and two 9-foot water back boilers. R. J. DONOVAN, 701 Granville Ave., Chicago.

FOR SALE—Well established greenhouse business, 12,000 feet of glass; steam heat, 100 miles from Chicago, INDIANA, American Florist.

FOR RENT—A prosperous retail and wholesale business; new houses complete; 15,000 feet of glass, 16x24; one acre of land and dwelling; rent \$60 per month; opposite Woodmere cemetery gates; one mile from Detroit, Mich. Address ANTON KAER, Woodmere, P. O., Mich.

FOR SALE OR LEASE—In a city of about 50,000 population, a well established greenhouse plant of 25,000 feet of glass, good dwelling, barn and everything complete. Will sell on easy terms or rent as long as parties want, but parties leasing same must buy stock. Don't answer unless you mean business. B. J., care Am. Florist.

FOR RENT—At Frederick, Md., greenhouses in complete order, 192x20, 63x18, 107x11, boiler room 60x18, equipped with No. 8 Furman boiler, small heater and all necessary pipes; large mushroom pits, stable, two acres of ground; dwelling for rent in immediate neighborhood; coal, manure, labor cheap, city water; no stock on hand. Rent \$300 per annum, half payable in advance every six months. Ill health of owner compelled retirement from successful business; principally vegetables under glass and mushrooms for Washington and New York. Address HENRY TRAIL, Frederick, Md.

For Rent or Sale Greenhouse

(about 7,000 feet of glass), dwelling and stable, Evanston, Ill., two blocks from C. & N. W. station. Good established trade direct from greenhouse. Rent reasonable. Address 1127 CHURCH ST., EVANSTON, ILL.

FOR SALE.

Now offered for sale, our entire plant, greenhouses, land, stock and business; thirty years established and under one management; nearly 25,000 feet of glass; products all sold retail; three-fourths income from cut flowers and floral work; whole place rebuilt in last ten years; the largest greenhouse place in northwest New England; a fine steady trade; books open. Desire to retire from active business reason for selling. For terms, write or visit

ELLIS BROS., Keene, N. H.

NOTICE

—OF—

STOCKHOLDERS' MEETING.

CHICAGO, July 19, 1902.

Stockholders of the American Florist Company:

You are hereby notified that the annual meeting of the Stockholders of the American Florist Company will be held in the Battery Park Hotel, Asheville, N. C., Wednesday, August 20, 1902, at 3 o'clock p. m. for the purpose of electing directors and officers for the ensuing term, and for the transaction of such other business as may come before the meeting.

J. C. VAUGHAN, Pres.
M. BARKER Sec'y.

Dallas, Tex.

RAINS FAVORABLE TO FIELD GROWN STOCK.—MANY COMPOSTS FOR CARNATIONS.—DOINGS OF RETAILERS.—TRADE LIGHT.—TREE PLANTERS.

Otto Lang has moved into his new store on Main street and has much more room now, also a far better location. He is a hustler and is fast coming to the front. He has closed a year's contract for the plant decorations for the Oriental Hotel. It requires quite a stock of palms to do this work and Mr. Lang has more than doubled his stock for this purpose.

The Haskell Avenue Floral Company is busy getting composts ready for carnations. They have four separate composts, all prepared differently, some heavy, some light, to be used for different varieties. The propagation of roses is also now on, and four benches 150 feet long are nearly ready for potting off. These benches will be filled three times more this season. The field-grown stock is the best they have ever had.

The ladies of Oak Cliff, a suburb of Dallas, have offered \$50 as a prize to the one having the best kept yard. The prize will be given next May. They have also organized a tree club and have planted large numbers of shade trees during the past summer. It is a commendable movement.

Texas is having plenty of rain now and the stock outdoors is fast coming to the front. Trade is rather quiet, with little doing outside of funeral work, and not much of that. Good flowers are scarce.

W. P. Hiebert is busy putting in a new hot water boiler and building a new potting shed. LONE STAR.

Lowell, Mass.

BUSINESS AT ITS LOWEST EBB.—LITTLE STOCK COMING IN.—WHITE COMMANDS GOOD PRICE.—PERSONAL DOINGS OF VARYING INTEREST.

With the end of July in sight, business is at a standstill and the supply of flowers, such as it is, is more than enough to meet the demands. Joost carnations are now about the size of buttons and this week will finish them up. Asters have made their debut and are welcome, especially the whites, since white carnations are very scarce. Carnot and Kaiserin are the only roses that are available, but they are in good shape. Water lilies are a noticeable shortage this year.

Peter McManamon returned home last week from a very enjoyable vacation in Canada. He was on the steamer Cumberland when she was struck, in Boston harbor, by another steamer, causing her to sink in a few minutes.

This has been a good season for the Crimson Rambler. Some very fine specimens have been seen and have caused a good many orders to be booked for spring delivery.

A. Roper's seedling carnation, Fair Maid, must be profitable, for he is getting \$4 per hundred for them and cannot supply enough.

For the past two weeks the weather has been very wet and the growers are complaining of injury to the stock outdoors.

C. F. Mills, who is located on upper Merrimac street, has closed his store for the summer.

M. A. Patten, of Tewksbury, is contemplating the convention trip. A. M.

ITHACA, MICH.—David Kleinhaus is removing his greenhouses to a lot across the street from his present location.

CUT FLOWERS AT WHOLESALE.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

WALTER P. STOKES, Pres.; C. N. PAGE, First Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

ONION seed prospects in Connecticut are good, but the crop is not yet out of danger.

CONTINUED drought in growing districts makes present outlook for good crop of tuberose and caladium bulbs unfavorable.

FRED. H. HUNTER, with the Cox Seed Company, San Francisco, and Miss Dorothy Miller were married at Salinas, Cal., July 21.

NEW ORLEANS, LA.—At the recent liquidation sale of the stock and fixtures of the Eichling Seed and Nursery Company, it is stated that C. W. Eichling purchased some of the stock and will continue business at the old stand.

VISITED CHICAGO: Jesse E. Northrup, of Minneapolis, Minn.; G. C. Thompson, representing R. & J. Farquhar & Company, Boston, Mass., returning from the Wisconsin pea fields; W. Atlee Burpee and wife, returning from the Pacific coast.

C. H. REED, of the Amzi Golden Company, Birmingham, Ala., will leave home in a few days to join his wife and family, who are spending the summer at Milwaukee and Lake Geneva, Wis. He will stop off at Chicago to call upon the trade.

MUSCATINE, IA.—Continuous rains and cold weather have injured the crops in this section very much. Tomatoes are nearly a failure; egg plants and peppers are looking healthy, but they are too late to make a large crop of seed; melons will not be over half a crop.

The Bermuda Lily Situation.

The Bermuda lily bulb crop turned out larger than expected. Favorable weather conditions produced good healthy growth of foliage which ripened down well and the entire crop is remarkable for plumpness and substance. Considerably more have been harvested than could have been anticipated till digging time but whether there will be ultimately any material surplus of bulbs is not yet known, as when our informant left Bermuda last week harvesting was not completed. The healthy growth referred to would fairly justify the confidence that there may be less trouble than formerly from diseased plants under forcing conditions.

Holland Seed Crops.

A Holland firm of growers sends the following report, dated last month, on the condition of the seed crops:

In a general way much of the seed crops of such biennial vegetables as cabbages and swedes was lost before the winter owing to the drought which prevailed last autumn, accompanied by insects. The winter itself did comparatively little harm, but the spring, especially the month of May, has been so continually cold that everything was quite backward, a condition which has changed for the better since fine weather set in. The stand of cauliflower is good but it is yet too early to judge of the crop. What was safely carried through the winter of white, red and savory cabbages and brussels sprouts developed well and promise middling crops. Only

LOVING CUP PRESENTED TO THE RETIRING PRESIDENT BY THE MEMBERS OF THE AMERICAN SEED TRADE ASSOCIATION.

a few plants of borecole were saved, so that we expect a small crop. Turnips as a whole stood the winter well and look promising. The stand of swedes is very good; kohlrabi is a middling crop; mangel-wurzels, beets, sugar beet, carrots, parsnips and scorzonera promise a good crop. Much cornsalad was sown and the stand is good. Some of the radishes have suffered from insects but the rest of the crop looks promising. The stand of Spanish radish, onion and garlic is good; celeriac middling; parsley and borage very good; chervil an average crop; spinach a little backward but stand good; peas look very well; English beans have a promising appearance; dwarf and runner beans have just started growing and look well.

The continual cold weather during May more or less interfered with most of our crops, but particularly those of the flower seeds. Although most items were backward for a long time, many sorts have recovered since favorable weather set in, so that as a whole present prospects are pretty good. The stand of antirrhinum, calliopsis and campanula is good; some plantations of candytuft have suffered badly from insects but otherwise the stand is good; centaurea and convolvulus look promising. The stand of dianthus, eschscholtzia, gypsophila, heli-chrysum and lobelia is good; mimulus very good. The stand of mignomette is uneven and the crop will be hardly middling. A great many of the myosotis were lost in the drought the preceding winter, but those that were carried through look pretty well. Nasturtium are a little backward, but the stand is very good; nemophilas, papavers, petunias, rhodanthes and Phlox Drummondii are promising. Virginian stocks have been partially hurt by insects, but those that were not so injured look satisfactory. It is too early yet to judge of the crop of the sweet peas. The stand of

ten-week stocks is very good; verbenas and violas look promising; wallflowers very good.

San Francisco.

TRADE BEGINS TO AWAKEN FROM THE SUMMER SOLSTICE.—BIG CROWDS COMING IN AUGUST.—MANY PERSONAL AND OTHER DOINGS OF NOTE.

For the month of July business has been very poor, as is usually the case, but it has commenced to pick up a little the last week and from now until the middle of October it will be good. People are returning from the country and the Knights of Pythias meet here the middle of August, with almost 100,000 visitors from the east. The stores will put on their best array and then there will be the fruit and flower show in the Ferry building.

At the last meeting of the Pacific Coast Horticultural Society nine new members were elected, bringing the membership up to 150, with many more applications in view.

E. W. McLellan, of Burlingame, has changed his city wholesale quarters to a more convenient and airy store a block further down the street.

F. Abie has gone on a three months' visit to Switzerland. He is suffering from lung trouble, from which he hopes to find relief.

Clark Brothers, of Fruitvale, are building another house 20x100, making eight houses in all.

T. H. Stevenson has returned from his visit to England. GOLDEN GATE.

GROTON, MASS.—Mrs. Low is about to open a school of horticulture at her place, Lowthorpe. Miss Louise Miller, who was last year at the Briarcliff school in Westchester, New York, is to be one of the teachers.

Our Pansies, Cannas and Roses received gold medals at the Omaha Exposition in 1898 and the Pan-American Exposition in 1901.

MASTERPIECE.

VAUGHAN'S "INTERNATIONAL"

Received the only reward for Mixed Pansies at the World's Fair. It is to-day better and more complete than ever. It contains the cream of the stock of 10 Pansy specialists. There is no better mixture in existence, as all the florists who saw or used it can tell you. Price per oz., \$10.00; 1/2 oz., \$5.00; 1/4 oz., \$1.50; trade pkt., 50c.

VAUGHAN'S "GIANT MIXTURE."

This mixture is specially made by us from all the separate colors of Giant Trimardeau, the Giant Bugnot and Cassier and several special strains which cannot be had any other way. If your trade demands large flowers there is no better mixture. Price, 1/4 lb., \$14; 1/2 oz., \$4; 1/8 oz., 60c; 1d. pkt., 25c.

VAUGHAN'S PREMIUM MIXTURE.

Embraces all the varieties of the Fancy German Sorts. We have sold this mixture for the past 16 years and it has given general satisfaction. Per pkt., 25c; 1/4 oz., 80c; 1/2 oz., \$3.00; oz., \$5.50.

IMPROVED GERMAN MIXTURE.

This is a mixture of three strains from different German growers, and is made up mostly of separate colors, with a sufficiently large percentage of white and yellow. Per large pkt., 25c; 1/2 oz., 40c; 1/4 oz., 60c; oz., \$2.00.

BELLIS OR DOUBLE DAISY.

MIGNONETTE, TRUE MACHET.

The seed we offer produces dwarf, vigorous plants of pyramidal growth, with very thick, stout flower stalks. Finest in every way for florists' use and for pots. We have tested this with several of the fancy named strains and always with results favorable to our seed. Trade pkt., 10c; 1/2 oz., 25c; oz., 50c; 2 ozs., 75c; 1/4 lb., \$1.25.

CINERARIA VAUGHAN'S COLUMBIAN MIXTURE. A mixture of the best English and German strains, unsurpassed. Pkt. (1000 seeds) 50c; 3 pkts. \$1.25.

CINERARIA HYBRIDA, LARGE FLOWERING, white, blood-red or crimson, double white or best double mixed, each, per trade pkt., 50c.

CALCEOLARIA HYBRIDA, choicest mixture, pkt. 50c. 10 PER CENT discount on flower seed orders amounting to \$2 and over for Cash with order.

"Vaughan's International" Primrose Mixture.

Unquestionably the best mixture of Chinese Primroses. It contains the largest variety of the best selling colors. Flowers large, beautifully fringed, borne in large clusters well above the rich green leaves. Pkt. (250 seeds) 50c; 5 pkts. (1250 seeds) \$2.00.

CHINESE PRIMULA, Chiswick Red; Alba Magnifica, white; Blue, Pink, Striped. Each, per pkt. of 250 seeds, 50c; 1000 seeds, \$1.75.

DOUBLE CHINESE PRIMULA, white, pink, red or mixed, per pkt. 50c.

VAUGHAN'S SEED STORE, 14 Barclay Street, New York. 84-86 Randolph St., Chicago.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.

CHAS. A. IJGENFRITZ, Ptos.; D. S. LAKE, Vice-Ptos.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y. Twenty-eighth annual convention, Detroit, Mich., June, 1903.

In the search of foreign fields the nurseryman should not overlook his home market.

Many nurserymen are going into landscape architecture, finding it a considerable aid to their business.

WILLIAM PITKIN, of Rochester, says that of all the nursery stock grown in New York seventy-five per cent is sold outside the state.

The Illinois Central Railroad Company is preparing to set out eighty acres of catalpa trees near Duquoin, Ill. The company has a number of such tracts of catalpas, producing post and tie timber.

Texas Nurserymen's Association.

The Texas Nurserymen's Association met at College Station July 17, with a large attendance. Much interest was manifested and good reports were presented from all parts of the state, showing large crops of fruit, large supplies of salable nursery stock and a demand which promises to consume everything available. E. W. Kirkpatrick, of McKinney, is president of the association, J. S. Kerr, Sherman, secretary.

Cleveland.

RAINS RESULT IN RUIN OF FIELD STOCK.—ASTERS AND CARNATIONS SUFFER MOST.—STOCK SCARCE AND OUTSIDE ORDERS GO UNFILLED.—PERSONAL DOINGS AND OTHER NOTES.

Unless weather conditions change the outlook for the average florist hereabouts is not very encouraging. The continuous wet weather has wrought havoc with the outdoor flowering stock. Asters are a failure and carnations are suffering. Stem rot has made its appearance and from present indications it will be a repetition of last season's disaster. Indoor planting of all kinds has been delayed beyond the limit, as it is impossible to get soil in condition. Those who were fortunate enough to get their rose stock planted before the deluge will certainly reap the benefit this fall. All kinds of flowers are scarce. The wholesalers are turning down scores of out of town orders daily. Anratum and speciosum lilies are in large supply but there is no great demand for them. Gladioli are becoming plentiful. Sweet peas are scarce, the rains having drowned them out. A few early dahlias are in evidence. Roses are nil.

The club at its last meeting decided to hold another picnic during the latter part of August or the first week in September. The following committee was appointed to select a suitable place: H. A. Hart, Isaac Kennedy, John C. Kelly and J. C. Andrews. This is to be an old-time outing and the expense will in all probability be borne by the club exchequer. Asheville and the convention was the chief topic of conversation at the meeting. The delegation from here will number anywhere from eight to twelve. The miserable weather we have had for the past two months has retarded operations to such an extent that a number of the growers find it impossible to get away even for a week. We all hope a good showing will be made. And we are

confident those who attend will never regret it, as North Carolina is undoubtedly the garden spot of America.

The club held a picnic out at Euclid Beach Park, Tuesday of last week, and had a fairly enjoyable time. Boating, bowling, dancing and drinking pop and pink lemonade were the chief features of enjoyment. The park is strictly "dry," hence the eagerness of members to hold their outing there.

Charley Graham has returned from a two weeks' vacation on the farm, where he spent most of his time speeding his trotter. Charley, besides being a hustling florist, holds the enviable reputation of being the champion indoor baseball pitcher of Cleveland.

Andrews Brothers say this has been one of the worst seasons they have ever experienced for berry growing.

The Grant-Wilson Company reports a very prosperous season in its new quarters.

Visitors: Will Schulz, Youngstown, O.; J. A. Shaw, New York; H. Thaden, Atlanta, Ga. Echo.

Cincinnati.

FLORISTS ENJOY AN OUTING.—MOST SUCCESSFUL IN THE HISTORY OF THE SOCIETY.—LARGE ATTENDANCE AND FINE PROGRAMME OF AMUSEMENTS.—BUSINESS THE BEST EVER RECORDED FOR MIDSUMMER.—VARIOUS NOTES OF LOCAL INTEREST.

The florists' outing on Thursday of last week was one of the most enjoyable affairs the society has ever had. The base ball game between the young blood florists was a dandy, as the score, 7 to 6, would indicate. It was a warm contest and "Billy" Rodgers, who acted as umpire, had his troubles, but was master

of the situation. The young ladies' running race was also worthy of mention. Miss Pfeiffer, of Newport, was the winner. The other contests, such as sack races, egg and spoon races, and so forth, were all very good and brought out a great many participants. The tug of war between the married men and single men looked to be a cinch for the single men, but it was impossible for the bachelors to budge the benedicts. Upon investigation, however, it was found that the married men had the end of their rope tied to a post and the decision was awarded to the single men. "Tom" Jackson's team won the bowling contest and Jackson himself won the individual prize, \$5, for the highest score. Too much credit cannot be given "Ben" George for the services rendered in arranging the outing, assisted by Messrs. Murphy, Rodgers and Rudolph. Norwood Inn Park is an ideal place for such a picnic.

The past month was the best July from a business standpoint in the history of this city. All florists, without exception, unite in saying this. The flowers received the past week have improved wonderfully in quality. Gus Meier is sending in some first-class Brides and Bridesmaids. J. A. Peterson is right in it on asters and George & Allan's lily of the valley is also very good. Some very good carnations are received from Michigan and gladioli and other outdoor flowers are plentiful.

Will Murphy says carnations in the field were never better. He is going to put his new one, Murphy's White, on the market the coming season. It is one of the best received in this market.

The Fall Festival Association has sent a notice to the florists that it will give \$500 in premiums this year, provided the florists get up a suitable display.

PLEASE mention the AMERICAN FLORIST every time you write to an advertiser.

THE
Asheville
Number

To Be Issued
August 16,
1902.

FOR many years the **American Florist** has issued one of its Special Numbers prior to each annual convention of the Society of American Florists. These Special Numbers have become so well known for their fine printing and illustrations, for their valuable trade text and for the business bringing qualities of the well displayed special advertisements, that it is unnecessary to dwell upon these matters. The Special Numbers are looked forward to by thousands of subscribers, read, preserved and re-read. Advertisers hear from them for months.

The **Asheville Number**, to be issued August 16, will, in many interesting features, excel even the Buffalo Number of a year ago. It will reach practically everyone in the trade in the United States and Canada whose business is worth consideration; also leading foreign houses.

Advertisements in body pages will be taken at our ordinary rates, namely \$1 per inch, \$30 per page of thirty inches, with the usual discounts on time contracts. Advertisements on second, third and fourth **SPECIAL COVER PAGES** (printed on heavy toned paper) \$30 per page, net.

In order that you may be given the best possible position and display, please **mail your advertisement now.**

**AMERICAN FLORIST
COMPANY,**

324 Dearborn St., Chicago, U. S. A.

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and sporting readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

The Chicago Florists' Club picnics August 12. The committee has a number of fine prizes for the athletic and other contests.

NATICK, MASS.—The aggregation from the Boston Flower Market came out here again last Saturday and once more walloped the local base ball team to the tune of 18 to 12. One of their number was badly hurt by a blow from the ball, sustaining a cut in the face which required the attention of the surgeon.

At Flatbush.

At the Flatbush alleys, Thursday, July 31, Louis Schmutz made his first appearance since his recent severe injury and was cordially received. Following is the score:

Player	1st	2d	3d

At Philadelphia.

There was a red hot time on the alleys last Thursday, July 24. It was a game between those who won places on the Asheville team and those who failed. The tie between George Craig and George Watson in the contest for sixth place was bowled off in the afternoon on the Elks' alleys, Watson winning out, 446 to 424. With the exception of Eimerman, who took Starkey's place, he being unable to bowl, the full Asheville team was up. There was a great deal of good-natured bantering, particularly by the Harris boys, but the Asheville boys laughed and

held their own for the first two games and led then by seventy-three pins. The third game, however, made a change, as the Harris boys set a very warm pace and fairly smothered the Asheville's and made them look like the proverbial "30 cents." They had to break the alley record for one six-man game to do it, making 1,108 the last game, which takes some of the sting out of the defeat. The score follows:

ASHVILLERS	1st	2d	3d	T'1
Moss	175	148	175	498
Anderson	143	166	147	456
Kilt	171	221	193	586
Robertson	116	133	107	356
Watson	114	164	110	378
Eimerman	173	168	189	530

Totals	892	1001	911	2804
HARRISHS	1st	2d	3d	T'1

Totals	879	938	1108	2925

K.

MERIDEN, CONN.—Edwin T. Dunne, of West Main street, has discontinued business.

SALT LAKE CITY, UTAH.—Trade is very quiet. The new Florists' Society is planning a big picnic.

UTICA, N. Y.—F. J. Baker has just finished two new houses which will be devoted to fern growing. He now has seventeen houses, all in good, modern condition, and a total of 25,000 feet of glass.

INNERKIP, ONT.—On the afternoon of July 14, a severe hailstorm passed over this city, breaking more than 1,500 panes of glass in Fred. Mitchell's greenhouses. Hailstones were measured and found to be over an inch in diameter.

THE ST. LOUIS FLORISTS ON A PICNIC. PHOTOGRAPH BY OSCAR C. KUEHN.

(See St. Louis news letter, page 9.)

Lilium Harrisii.

PACKED BY OUR OWN GROWERS.

SPECIAL FORCING SIZES

6 to 7-INCH This grade can be depended on for more uniform growth when forced, avoiding much shifting and rehandling of plants.
\$5.00 per 100; \$18 00 per case of 333 Bulbs.

7 to 8-INCH This is another uniform size, producing more blooms and saving a good margin over cost of regular 7 to 9 size. We are the first to offer this valuable grade assorted as above.
\$8 00 per 100; \$19.00 per case of 250 Bulbs.

We have a Full Stock of the Regular Grades

5 to 7-inch, 400 in case; 7 to 9-inch, 200 in case; 9 to 11-inch, 100 in case.

Now on dock and ready for shipping. Prices on quantity quoted on application. Customers wanting late dug bulbs can still be supplied. We have a few thousand all sizes which we will dig and pack on special orders in thousand lots at quoted rates. Delivery in two weeks.

LITTLE DOING IN A BUSINESS WAY.—MORE STOCK THAN DEMAND.—DOINGS OF THE GROWERS.—IMPROVEMENTS IN ORDER.—PERSONAL MOVEMENTS.—VACATIONS.

The volume of business is much less than for the preceding week. The supply of roses is more than equal to the demand. Liberty is the best rose we get. Kaiserin, Bridesmaid and Bride are better than they were a month ago. Asters are an important factor. Beauties are worthless. Auratum lilies are very fine. Carnations are inclined to be small, sleepy and of poor color.

John L. Wyland, of De Haven, will erect a new carnation house 18x130 feet and a new potting shed. He is now sinking a gas well and expects to find gas at 2,000 feet. He is going to try his luck with poinsettias, for there is a splendid market for them. Mr. Wyland's peach crop, which was so very large last year, will be a complete failure.

W. J. Campbell, of Castle Shannon, is a very successful grower of gladioli. He has one acre of them under cultivation and intends embarking in the business of cut flower growing as soon as he winds up some business that demands a great deal of his time at present. He has the material at hand for a house 20x100 feet.

C. Betscher, of Canal Dover, Ohio, has introduced several new colors and shades of gladioli, which were exhibited at the Pittsburg Cut Flower Company's during the week. Augusta, Mrs. Le Mons, Grand Rogue and Dr. Parkhurst are among the best.

A severe hail storm passed over Greensburg and surrounding country Thursday night of last week. Wm. Cronack, of Irwin, reports his loss to exceed \$200.

John Bader sent a letter from London stating that he was having the time of his life. He was preparing to proceed to Germany.

The August meeting of the Pittsburg and Allegheny Florists' Club has been declared off.

"Bob" Herron, of Lam & Company, will spend the next two weeks in the country.

"Billy" Hall and family depart Saturday for Niagara Falls, to be absent two weeks.

Harry Dillenuth, of Dunlop's, Toronto, spent three days in Pittsburg last week.

Charles Koenig continues to send in some exceptionally fine Kaiserins.

Dreer's Offer of Cibotium Schiedei

ARAUCARIA EXCELSA GLAUCA.

5-inch pots, 8 to 10 inches high, 2 tiers.....\$.75 each
 6-inch pots, 12 inches high, 2 to 3 tiers..... 1.00 each
 6-inch pots, 15 inches high, 3 tiers..... 1.25 ea h
 7-inch pots, 18 inches high, 4 tiers..... 1.50 each

If you have never tried this beautiful Fern in fine decorations or as a house plant, you should become acquainted with it at once. Its points of merit are so many that you cannot afford to be without it. It possesses a graceful, delicate habit unlike any other plant and while its appearance is that of being very soft, it is really as hardy as any of the commercial Palms. We have a fine stock of it this season and offer heavy plants as follows:

5-inch pots, \$1.00 each; \$10.00 per dozen.
 7-inch pots, 1.50 each; 18.00 per dozen.
 9-inch pots, 3.00 each; 36.00 per dozen.

The 7 and 9-inch pots are beautifully finished plants, suitable for decorative work.

Special Offer of Araucarias.

We have in stock about twelve thousand Araucarias, on which we are in a position to offer special values. It will pay you to procure your next winter's supply now and not only gain the benefit of the summer's growth, but also cheap transportation rates, as these plants can be safely shipped by fast freight during the summer months.

ARAUCARIA EXCELSA.

St. Paul.

OUTDOOR STOCK IN EXCELLENT SHAPE.—GOOD PRICES REALIZED.—FEW ROSES.—GOOD PROFIT IN SUMMER BLOOMS.—PERSONAL AND OTHER TRADE NOTES.

Along with the rest of the country we have had our deluge, but very little damage has been done. Outdoor flowers are abundant. N. C. Hansen is cutting millions of sweet peas of the finest quality imaginable, stems ten to twelve inches long and three to six blossoms on a stem. Haugen & Swanson are the aster kings this season and are bringing in thousands of fine blooms. R. C. Seeger is cutting some fine Beauties, which meet with ready sale. White stock is scarce, owing to the unusual demand for funeral flowers. All available stock is cleaned out each night and some orders are unfilled. This is an unusual condition for this season and may result in more stock being grown for summer cutting. With roses at \$4 to \$5 per hundred there is twice the profit in growing them for summer than there is in growing them in the winter for \$6 to \$8, with coal at \$4 to \$4.50 per ton. And carnations at \$1 per hundred in the summer are not grown at a loss either.

J. O. Zimmerman, of Pueblo, Colo., is sojourning in our midst. He notes a wonderful improvement in our city since his last visit nine or ten years ago.

Ludwig Anderson, formerly with Donaldson & Company, one of the best plantsmen in the state, has been engaged as foreman by Holm & Olson.

L. L. May & Company have received a carload of lumber from Chicago to be used in the erection of their new houses. FELIX.

CARLISLE, PA.—John P. Lindner, the shoe manufacturer, is building two carnation houses 30x300 feet and next spring will put up two houses of the same size for roses. Harvey E. Seitz, formerly with E. J. Bolanz, at Akron, O., will have charge. Mr. Lindner will also open a fine park near his greenhouses.

ASHEVILLE, NORTH CAROLINA.

'The Land of the Sky.'

The eighteenth annual meeting American Florists will be held at Asheville, August 19th to 22d, 1902.

A rate of **one fare for the round trip** has been made via Queen & Crescent Route and Southern Railway. Special train, composed of Pullman sleepers, will leave Cincinnati, Monday, August 18th, 2:00 p. m., via Queen & Crescent Route, and run through to Asheville via Southern Railway, arriving at Asheville next morning 7:00 o'clock.

Members will meet at Cincinnati and all go through together from there.

AUGUST 19th to 22nd, 1902,

ASHEVILLE, NORTH CAROLINA.

For this convention the "Big Four Route" (C. C. C. & St. L. Ry.) will sell tickets August 16, 17 and 18, good for return leaving Asheville not later than August 25, at **one fare for the round trip** from all "Big Four" stations. (\$20.00 round trip from Chicago.)

Florists' Special train will leave Chicago 8:30 p. m. Sunday, August 17th, running via "Big Four" to Cincinnati, thence via the Queen & Crescent and Southern Railways. Monday forenoon will be spent in Cincinnati, sight-seeing, etc., leaving there at 2 p. m. on the Florists' Special. Every florist should make a big effort to attend this convention, the first to be held in the beautiful Southland.

For berths in sleepers from Chicago or Cincinnati, and further information call on, or address E. F. WINTERSON, President Chicago Florists' Club, 45 Wabash Avenue, or J. C. TUCKER, Gen'l. Not. Agt. "Big Four", 234 S. Clark Street, Chicago.

FUMIGATION METHODS

By PROF. W. G. JOHNSON

Formerly State Entomologist of Maryland

A Practical Treatise and timely work on cheap and effective means of destroying insect pests and other vermin in various places. This work is the outcome of practical tests made by the author, together with the experiences of others, and is one of the most important books published this season and is much needed at this time. It will be of particular interest to

FRUIT GROWERS AND NURSERYMEN owing to the widespread prevalence of the notorious San Jose scale. Hydrocyanic acid gas is the only practical remedy for the destruction of this pest and is being used more extensively than ever before by nurserymen and fruit growers. The perfection of the apparatus for fumigating young orchard trees is outlined in this work. The methods can be easily applied in orchards and nurseries for many dangerous pests at very small cost. The writer is considered the best authority on this subject in this country and has left nothing undone to make this the most complete work of the kind ever published.

GARDENERS AND FLORISTS

have found that vegetables and flowers cannot be grown under glass without frequent fumigation for the destruction of insect pests. Hydrocyanic acid gas has solved this problem. The methods of procedure are fully described and every detail is given for generating and applying the gas.

MILLERS AND GRAIN DEALERS

have been looking forward to the publication of this work, as hydrocyanic acid gas has been found one of the most important materials for clearing mills and warehouses of insects. The subject of carbon bisulphide for fumigating mills and elevators containing grain in storage is also thoroughly considered. To this trade the work is indispensable and transportation companies have found it of great value for the fumigation of cars, ships and other inclosures infested with vermin.

FARMERS OF THE COUNTRY

have here fully described a simple, easy remedy for gophers, prairie dogs, squirrels and other animals in the ground, and rats and mice in any inclosure.

COLLEGE AND STATION WORKERS

will find it an up-to-date reference work on this subject. It is complete in every respect and is the only work of the kind ever published. It is written in a popular non-technical style, profusely illustrated, handsomely bound, covering 250 pages, price, post-paid, \$1.00.

Kalamazoo, Mich.

GROWERS BUSY GETTING IN SHAPE FOR FALL.—GOOD SEASON FOR OUTDOOR STOCK.—HOUSES REPLANTED.—A WEDDING.—NOTES.

G. Van Bochove & Brother are again at it, two additional houses 18x80, one for forcing and the other for cold storage purposes, being now in course of construction. As usual, these will be equipped with all the modern appliances and, from all appearances, will fill a long-felt want. Roses have not only been planted, but they have already made considerable growth, the young plants looking remarkably fine and vigorous. American Beauties will be grown in larger quantities than heretofore, the increased demand, both wholesale and retail, during the past season having been such that an additional house was a matter of necessity. Carnations in the field have never looked finer. Having been planted on high ground, the continuous rain did not seem to affect them. If anything, it seems to have quickened their growth, so that some varieties are already being lifted and housed.

At the Dunkley Floral Company's establishment things are in the pink of condition. Young roses are doing splendidly and carnations, both in the field, and the old plants in the houses, are all that a grower could possibly desire. I saw some Joost, Crocker and Flora Hill that would compare most favorably with stock grown in February. Mr. Kyle, the superintendent, will have considerable work during the next few weeks in making various repairs and improvements about the establishment.

John R. Van Bochove and Miss Wilhelmina Haugst were the central figures at a June wedding and have since received no end of congratulations.

Mrs. Dunkley, accompanied by her sons, is recuperating at a summer resort up the state, by the lake. NOMIS.

ROCHESTER, N. Y.—J. B. Keller Sons are busy rebuilding four old palm houses, the same buildings with which J. B. Keller started the business in 1875. The roofs are still sound, only the plates, gutters and posts needing renewal. None of the bars show signs of decay, though made of ordinary clean pine, but they were painted every second or third year. The ridge poles are very straight yet; 1 1/2-inch iron pipe was used to support them.

VEGETABLE Plants.

CELERY, White Plume and Giant Pascal, transplanted, \$1.20 per 1000. White Plume, not transplanted, \$1.20. Sample mailed for 5c stamp.

LUDWIG MOSBAEK, 85th St. near So. Chicago Ave., Chicago, Ill.

ANNUAL PICNIC PROVES VERY SUCCESSFUL.—TRADE MOVING SLOWLY.—FUNERAL WORK.—GLUT OF SWEET PEAS.—VARIOUS NOTES.

The tenth annual picnic of the Twin City florists, held at Spring Park, Lake Minnetonka, was a decided success. There were about 250 in attendance and, with a well arranged programme and fine weather, the day was enjoyed by all. The bowling contest and ball game were the main features. The former was won by H. Berg, first; A. H. Swabns, second; Osear Carlson, third; Gns. Will, fourth. The ball game resulted in favor of St. Paul. All other events were well contested and hard earned by the winners.

Trade continues in the same path, although considerable funeral work is called for. Stock in general is very scarce but there is a surplus of sweet peas. They can be bought for one's own price. Tea roses are simply off the market.

There will be a few of the trade who will take in the Asheville convention. Otto Will is one who has decided to go and will also take in New York and other eastern cities.

The Campbell Greenhouses, at St. Cloud, have been sold to P. H. Anderson who will continue the business for the present under the same name.

H. Sauer & Son are having a very heavy run of funeral trade and H. Barsch has had one of the busiest seasons in this line for a long time. C. F. R.

Newport, R. I.

The prizes offered by Com. E. T. Gerry for the best table decoration on the second day of the horticultural exhibition were awarded respectively to Bruce Buterton, C. D. Stark and W. H. Maher. The winners in the class for fancy basket of flowers were James Kyle, Andrew Ramsay and W. Barth. In the classes for gardeners' assistants Sam. Williams was first on basket and bouquet and A. Jenkins second on basket. The sweet peas from W. Barth, Jas. Kyle and James Robertson were very beautiful. The grapes from A. Frazer and D. McIntosh, the nectarines from A. Ramsay and W. Barth and melons from A. Griffin were luscious.

FRAMINGHAM, MASS.—S. J. Goddard has purchased a tract of land on Main street and will remove his greenhouses and business to the new location.

 Mr. THERON N. PARKER, Brooklyn, N. Y.
 Dear Sir—I have used your Wire Carnation Support the last two years in all about 12,000. They fill the bill in every particular. Nothing could be more satisfactory and would give me a great deal of pleasure if I can bespeak a good word for you to the trade and you are at liberty to refer to me at any time.
 Very truly,
 A. L. THORNE, La Fayette, Ind., July 8th, 1902.

Mr. THERON N. PARKER, Harrison N. J.
 Dear Sir—After using your Model Carnation Support in two of our houses the past winter, we have come to the conclusion that it is perfectly adapted to supporting carnations, and shall use them on all our plants the coming season. We were much pleased with the simplicity, strength and neat appearance of the support.
 Yours truly,
 F. DORNER & SONS CO.

Bargains

FOR Florists.

We are headquarters for a general assortment of the necessary material and supplies that you are looking for. If you are about to improve or construct, consult us.

In connection with the dismantling of the Pan-American Exposition, we have for sale:

20,000,000 FEET of fine seasoned lumber, practically new, consisting of all sizes of joists, timbers, dressed and matched boards and flooring; also sash and doors.
50,000 FEET of roofing glass.

PIPE.

We are headquarters for pipe. We offer you:
100,000 FEET of 2 to 4-inch wrought iron, lap welded casing. We can furnish this material in three ways: Either with sleeve or jacket couplings, screwed ends and threaded couplings or with expanded cast iron flanges with bolts and nuts.

1,000,000 FEET of standard black wrought iron pipe, size 3/8 to 12-inch. It is second-hand but has new threads and couplings and is in first-class condition.

1,000 TONS of galvanized wire 9, 10, 11, 12, 13, 14 and 15 gauge.

50,000 FEET of 2, 3 and 4-inch cast-iron soiled pipe and fittings.

100,000 FEET of garden hose, 3/4 and 1-in.

75,000 FEET of cotton rubber-lined fire-hose, (rubber-lined in and outside), ranging in sizes 1 to 2 1/2-inch.

VALVES and fittings of every kind.

BOX COILS for heating purposes.

RADIATORS, new and second-hand.

We also offer the following bargains in

Heating Boilers

50 CAST-IRON sectional heaters, capacity from 450 to 5,000 feet.

1 NO. 2 Standard Kroeschell hot water heating boiler.

FOUR 36x10 Horizontal Tubular.

FOUR 36x12 Horizontal Tubular.

FIVE 42x10 Horizontal Tubular.

FIVE 42x12 Horizontal Tubular.

SIX 48x4 Horizontal Tubular.

TWO 54x16 Horizontal Tubular.

FOUR 60x16 Horizontal Tubular complete with all fittings.

PUMPS of all Descriptions.

A carload of shovels and spades that we are selling at \$5.00 per dozen.

We carry a complete stock of hardware and farm implements, besides plumbing material of every kind.

Washington.

VARIOUS DOINGS OF PERSONAL AND TRADE INTEREST.—A GROWER INJURED.—LITTLE DOING IN A TRADE WAY.

George A. Leissler is making a very good showing at his farm in Virginia. He has fine large patches of dahlias, cannas and asters and his earnings are looking promising. July 9 he met with a painful accident. While burning some brush there was an explosion and his left arm, side and leg were filled with large grains of powder. He has no idea what caused the explosion.

There is not much doing among the retailers. Dahlias and asters are coming in fine and are useful for funeral work, which is about all there is to do. The growers are still busy getting things in shape for their fall and winter crops.

O. A. C. Ochmuler, formerly in business here, but who has been residing in Butte, Mont., for some time, has been visiting here, and on July 15 married Mrs. Waters, of Washington.

Ingram Nimmo, with A. Gude & Brother, was married July 14 to Miss Etta Leona Vanderveer, of Norfolk, Va.

Clark Brothers are making preparations for building a greenhouse 33x112 in place of two smaller ones P. G.

Springfield, Mass.

TRADE DULL AND STOCK EQUAL TO ALL DEMANDS.—HEAVY RAINS THE RULE.—NOTES OF PERSONAL DOINGS.

Business is very quiet and what funeral work comes along is easily taken care of. Cut flowers are plentiful and fair in quality. Queen of the Market asters are coming in and are good. We still have the disease among the plants, but not so badly as former years. Carnations, cannas, dahlias and so forth, are looking good, excepting geraniums, which, on account of so much rain and continued dark weather, do not show up so well as usual.

Most of the boys are taking their vacations. Mark Aitken and Mr. Morgan, of Longmeadow, spent a few days fishing at Goshen, a good catch being the result.

H. Barton, of Westfield, was in town the other day looking up building material. A. B.

FISHKILL, N. Y.—The greenhouses of Wood Brothers were struck by lightning during the storm July 28 but only trifling damage was done.

Profitable Greenhouses
"Gurney" greenhouses are profitable greenhouses because they're operated under the most economical conditions.

"Gurney" Heaters

maintain an even heat with the least amount of care, burn a minimum amount of coal to maintain the desired temperature, require no brick setting, and are without question the most efficient constructions on the market.
A host of nurserymen already use the "Gurney." If you're not on the list, send for catalogue and find out more about it. **Gurneys** promote the greatest hot-house success.

Stock for Table Ferneries.

"In time of peace prepare for war" is a hard worked maxim, but it may be applied to our business as a reminder of the necessity of preparing for the busy days of autumn and winter during these quiet months of summer.

Among the needs of the busy season that will come along toward winter and for which provision must be made soon, if not already done, is that of having a sufficient variety of small plants that may be used in table ferneries and as a groundwork for floral decorations.

Center plants for ferneries are frequently in demand and for this purpose it is hard to find any more satisfactory than *Cocos Weddelliana* or small, well furnished and dwarf-habited plants of *Kentia Belmoreana*. These two palms endure the atmosphere of the dwelling about as well as any of their family and, in addition to this, may usually be had when wanted.

Small plants of *Pandanus Veitchii* and *P. utilis* are also very effective among ferns and also in combination with certain flowers, but it must be remembered that the pandanus are not as hardy as the palms mentioned above, and especially if they have been grown in a rather close and moist house. Pandanus require more light than palms in general, and also plenty of ventilation during the summer season of rapid growth, in order to produce strong, short-jointed plants that will be of use for the work in question.

Dracaena Sanderiana in 2½-inch or 3-inch pots is also useful stock for the clear and well marked variegation, it being a good plan to have some single-stemmed plants and some compound or made up plants. There is no difficulty whatever in rooting cuttings of this dracaena, at any season of the year, in a moderately close and shaded house, provided the cuttings are kept moist, though there sometimes is some difficulty in getting cuttings enough, unless one has a considerable number of plants from which to propagate. Small plants of *Dracaena gracilis*, that old species with narrow, dark green leaves that are edged with brownish red, form useful center plants and may be had from cuttings in just the same manner as the former species.

A few small-leaved crotons are also useful to have about, *C. Katoni* or *C. Aureo-maculatum* being good ones for the work in view, and the old *C. Interruptum* being also adapted to such use.

The varieties named are possibly a little more hardy than some of the more showy, broad-leaved kinds, though even these should never be kept in a greenhouse that drops in temperature below 60° during the winter.

In preparing these small crotons for table use much the same rule applies as that advised for the pandanus, namely, to give them plenty of light and air during the summer and to syringe them forcibly and freely. The crotons will also need pinching back from time to time, so that they may form stout and bushy little plants that will make a good showing for the size of pot in which they are grown, for there need be no hesitation about pinching back these plants during the growing season, as they break away quite readily.

Another very pretty little plant is the dwarf sweet flag, *Acorus gramineus variegatus*, also known as *A. Japonicus variegatus*, the leaves of which are usually from three to six inches long and striped with ivory white variegation. This acorus does not need much heat to keep it in good condition during the winter, a night temperature of 50° being sufficient. Propagation is effected by means of division of the crowns or roots, an operation that is best performed in the spring or early summer, that the plants may become a useful size before winter. Good loam is the only soil required, and from the fact that the members of the acorus family are swamp-lovers it will be readily understood that an abundance of water should be given at all times.

Still looking among the variegated-leaved stock we find one of the dwarf bamboos, *Bambusa Fortunei*, a species that makes a quantity of short growths that are well covered with small green and white striped leaves. The shoots on young plants average four to six inches in length, but sometimes reach a greater size in old and well-established plants. This, also, is quite a cool house species, and in fact is nearly hardy, and is thus by no means difficult to keep in condition during the winter.

A few peperomias should also be remembered, *P. maculosa* being one of the best, but the season is passing rapidly and it now leaves but a short period in which to grow these plants from cuttings, but even were they propagated from leaf cuttings now, the resulting plants would probably become of a useful size before spring. The peperomias need a moderately shaded house during

the summer and at that season require plenty of moisture, but during the winter, when their growth is not so rapid, less water is needed, an over-supply sometimes resulting in rotting off the plants at the surface of the soil, this trouble being much more likely to appear if the peperomias are kept in too low a temperature, for example, below 60°.

Small plants of *Farfugium grande* may also be put among the available stock for table use, their leathery and yellow spotted leaves enduring much exposure without injury. In growing *farfugium* one should not make the mistake of placing it in a warm greenhouse, this plant enduring quite sharp frosts without serious injury when planted outdoors, and in some parts of great Britain being considered quite hardy.

The ferns are naturally an important item in the special branch to which these notes refer and, speaking in a general way, one may say that it is wisest to choose such species and varieties as are of distinct character, having firm foliage, and of reasonably rapid growth. Among these the pteris family probably stands first, such ferns as *P. serrulata*, *P. serrulata cristata*, *P. cretica albo-lineata* and *P. cretica magnifica* being among the standard sorts in most markets.

Davallia tenuifolia stricta and *Oncidium Japonicum* have more finely divided leaves and both are useful, while several of the lastreas or aspidiums make very shapely little plants and have foliage of particularly good substance. Some maidenhair ferns in small pots will be needed, but as a rule this does not last long in a fernery, and in consequence is less in favor for this particular purpose than are some of the stronger growing species already referred to.

W. H. TAPLIN.

Park and Outdoor Art Association.

The sixth annual meeting of this association opened at Horticultural Hall, Boston, on Tuesday, August 5, with a gratifying attendance of park commissioners, landscape gardeners and others interested in the development of outdoor art. President E. J. Parker, of Quincy, Ill., in his opening address spoke of the great destruction of forests in the past and the disastrous results therefrom upon climate and productiveness. He referred with approbation to the public awakening on the subject of forest and park reservation and gave interesting statistics on the growth of park systems within recent years and the improved systems of horticulture now practiced. He advocated a federation of allied interests under the general direction of the Park and Outdoor Art Association.

Mrs. Herman J. Hall, president of the Women's Auxiliary, who was the next speaker, made an appeal to horticulturists, landscape gardeners and others to aid the auxiliary in its work, with advice and suggestions. Secretary W. H. Manning, of Boston, and Treasurer O. C. Simonds, of Chicago, presented their reports, which were favorably received and were followed by Miss M. K. Christensen, secretary of the Women's Auxiliary, who told in detail of the work accomplished in this department. G. A. Parker, superintendent of Kenev Park, Hartford, Conn., presented a statistical report, giving areas and other figures in connection with the principal public parks in the United States, which closed the forenoon session.

The principal address of the afternoon was by President C. W. Eliot, of Harvard

University. His address, which was listened to by a very large and appreciative audience, dealt with the steps which should be taken to encourage Americans to live more in the open air. He referred to the more healthful customs prevailing in European countries and commented upon the apparent lack of appreciation by American people of the beauties of field, forest and seashore, especially in winter, which should be of so much benefit to the health and pleasure of the people. Rev. J. N. Hallock followed with

WM. P. RICH.

an address on "The Influence of Beautiful Surroundings on Children," after which an informal reception was held.

In the evening papers were given by Miss Myra Loyd Dock, on "State Forest Reservations," by D. J. Crosby, on the "School Garden Movement," and by Albert Kelsey, on "Water as an Effective Factor of Municipal Art." Miss Dock, who is a member of the Pennsylvania Forestry Commission, said that Massachusetts and Pennsylvania are the states that have the most state and municipal forests. The exhibition at Horticultural Hall, of maps and photographs of parks and landscape design, etc., attracted many visitors.

Wednesday forenoon was devoted to experience meetings outlining the work of the various national associations engaged in civic improvement effort, while the park representatives to the number of 150 were given a ride through the Boston park system under the guidance of the commissioners and Superintendent Pettigrew.

The next meeting will be held at Buffalo. Some of the visiting park officials are L. N. Gonger and W. R. Adams, Omaha; N. L. Flitton, Baltimore; W. M. Berry, John S. Dodge and C. M. Loring, Minneapolis; Sidney A. Foster, Des Moines, Ia.; W. L. Cukerski, Grand Rapids; H. A. Carpen, Yonkers, N. Y.; W. Armiston Roy, Montreal; D. D. England, Winnipeg; J. D. Pitts, Providence; L. R. Love, Kalamazoo; E. Baker, New Orleans; M. L. Moore, Toledo; E. A. Kanst, Fred. M. Bangs and R. H. Warder, Chicago; Theo. Wirth and G. A. Parker, Hartford; C. C. Laney, Rochester. Also T. B. Meehan, Philadelphia; O. C. Simonds, Chicago, and J. W. Spencer, of Cornell University, Ithaca, N. Y.

William P. Rich.

We present herewith the portrait of the gentleman who has been selected as secretary and librarian of the Massachusetts Horticultural Society to succeed the late Robert Manning. Mr. Rich is a native of Boston, now residing in the suburban city of Chelsea. Although engaged in active business pursuits for the past twenty years he has devoted much time to scientific studies, especially botanical research in connection with the native New England flora, a subject of which he is reputed to have an unexcelled knowledge. He is an active member of the New England Botanical Club and a frequent contributor to its literature. He has been for fifteen years a member of the Massachusetts Horticultural Society and has served for a number of years as a member of the committee on school gardens and children's herbariums.

Congressional Seed and Tree Distribution.

The position of Secretary Wilson, of the Department of Agriculture, is shown in the yearbook of the department, dated May 9, 1902, as follows:

"Congress has assigned to this department the duty of purchasing and distributing seeds and plants, and in order that there may be no question as to how and when this shall be done, the law in regard to it is made very specific. I have endeavored to meet the wishes of congress in this matter in every way possible, and to the best of my ability have secured seeds of as high character as could be obtained under the conditions under which we work. Notwithstanding all precautions, however, the system of securing seeds through a contractor is apt to cause trouble, not so much on account of the likelihood of having inferior seed furnished as of the contractor's inability to furnish the varieties called for, owing to the quantity required. This was especially the case the past year, and so many complaints were received in regard to this and other points pertaining to the work that I ordered a thorough investigation by the chief of the Bureau of Plant Industry, in whose charge the entire matter has been placed. No settlement has as yet been made with the contractor for last year's seed, and none will be made until every requirement of the contract has been fulfilled. No matter what the issue, the department is fully protected on every point.

"Although the amount to be expended for seed for the forthcoming distribution is double what it was last year, the work has been so systematized that no apprehension is felt as to our ability to send out all seeds on time. As soon as it was known how much would be available for the work, immediate steps were taken to get all the preliminaries arranged, and as a result the schedule, which provides that the distribution shall begin December 1 and end March 1, will be carried out to the letter.

"In the distribution of the vegetable seed through a contractor three important essentials are provided for; that is (1) the seeds must be true to name; (2) they must have a high vitality, and (3) they must be free from mechanical impurities. The scientific staff of the Bureau of Plant Industry is charged with the important duty of seeing that these conditions are complied with, and for every failure the contractor must abide the consequences.

"In order to increase the value of the work several changes have been made,

HOUSE OF GLOXINIAS GROWN BY ARTHUR CHILMAN, GARDENER TO F. S. MOSELY, NEWBURYPORT, MASS.

which may be briefly referred to here. It has been arranged to send out the cotton seed, tobacco seed, sorghum seed and sugar beet seed and the grasses and forage plants under the direct auspices of the officers of the department and not through a contractor. By following this plan we have been able to adopt a number of innovations which it is believed will add greatly to the value of the work. The cotton seed, for example, will be selected from high-yielding and comparatively new sorts. The department has been working for several years improving cottons by breeding and selection, and gradually the seed of these new forms will be worked into the distribution. Furthermore, the adaptation of certain varieties to peculiar conditions of soil and climate will be considered, and this, together with the gradual extension of better grades, will, it is believed, do much to improve the cotton industry in the south. Tobacco seed will be handled in very much the same way as the cotton seed, selected seed being used and varieties sent into districts where the conditions of soil and climate are favorable for their highest development.

"With the grasses and forage plants the object will be to demonstrate what varieties are of special promise for different regions, and to this end the country will be properly districted and such seed sent into each district as the experience gained through the work of the scientific branches of the department may suggest.

"It has long been my belief that much good might be accomplished by using a part of the appropriation in a judicious dissemination of some of the more valuable trees. Plans have therefore been made to place at the disposal of each senator, member and delegate in congress

a limited number of selected trees, the object being to encourage a love for tree planting and all that this work involves. It will, of course, be entirely beyond the scope of the department to send a large number of trees to any one place, but it is believed that the action contemplated will eventually lead to extensive planting through the educational effects of the work. Commercial establishments are well prepared to supply trees in nearly all parts of the country at reasonable cost, and the plan of our work will, it is believed, eventually advance their interest. Already there has been secured for distribution a choice collection of nut trees, principally pecans, and these are being grown by the department from nuts gathered from selected trees in all parts of the country.

"It is believed that some such plan as outlined for the distribution of the special crops mentioned above can be applied also to the general distribution of vegetable and flower seeds. It will certainly be an advantage to intelligently district the country and send into each district only such seeds as are likely to improve its conditions. This will obviate the necessity of having to secure such immense quantities of single varieties, a task which is often difficult to perform. It will furthermore enable the department to gradually introduce into the distribution rarer sorts, and to drop these after the first year or two, leaving the demand for them to be supplied by the trade. When the department has secured the seeds and plants which it is believed are best adapted to certain districts, its responsibility, to a certain extent, ends, as it looks to senators and members of congress to place them in the hands of such of their constituents as in their

judgment will make the best use of them. Due notice, however, will always be given of every special distribution, and in addition all information that the department possesses will be furnished, so that the recipients may act intelligently in handling whatever may be sent out. Carrying out the work as here outlined it is believed will result in good to the entire country, as is the intent of the existing law."

Culture of Gloxinias.

Arthur G. Chilman, gardener for F. S. Mosely, Newburyport, Mass., has had excellent success with gloxinias, as can be seen by a glance at the accompanying illustration. As to his cultural methods he writes as follows:

I start them the latter part of February in a temperature of 50° to 55°, in flats of good leaf soil. The tubers are set about an inch apart, with sifted leaf soil sprinkled among them and about a quarter of an inch of clean sand on the top. I like to keep the crowns above the sand; they seem to grow stronger that way. I give them all the light possible at this time.

As they grow I shift them into larger boxes, mixing a little good rose soil with the leaf mould. Finally I pot them off into 4-inch to 6-inch pots, just as the plant may require. I do not like to repot if I can avoid it, there is always the risk of damaging the leaves in doing so. In potting I use a good rose soil, one that will grow good Perles, with about one-fourth good leaf soil thoroughly mixed with it.

I grow the plants on in a temperature of 60° to 65°, probably 70° on warm days. As the flowers begin to push up

each plant is given a little Clay's fertilizer. They like this, but one needs to be careful not to let it touch the foliage, for it will surely burn. As the flowers expand I ventilate rather freely from the least exposed quarter. Gloxinias seem to like plenty of moisture, but I prefer to give it to them in the atmosphere rather than too much at the roots until they are carrying their flowers, then I reverse the practice and shade them.

Some of the plants in 5-inch pots are carrying from thirty to thirty-five fully expanded flowers each and some seedlings in 4-inch pots have fifteen fully expanded blooms. They commenced to flower the latter part of May. The picture was taken about the middle of June and at the present date, July 14, the flowers are more evenly distributed, although some of them are showing signs of being past their best. Still they are and have been a source of very much pleasure to my employers and their many friends.

Of course success depends in a large measure on details. In addition I pin my faith on the thorough ripening they receive after their flowering period. Both these and tuberous begonias, in fact all tuberous and bulbous stock, must be well ripened for best results. I may add that in potting it is my aim to keep the top of the tuber just above the soil, just as one would with cyclamens.

CARLSTADT, N. J.—Jacob H. Ullmann is adding a house 30x80 to his facilities.

Scenes Enroute to Asheville.

The railroad trip from Washington, D. C., to Asheville discloses little in the landscape scenery that is unfamiliar to northern eyes and the vegetation as seen in Virginia and North Carolina is not radically different from that of New Jersey or New York. Along the sides of the railroad tracks where the soil has been disturbed are quantities of yellow coreopsis, *Ipomoea pandurata* and a lovely hardy passiflora. An occasional lily or bunch of scarlet bignonia about completes the floral display in midsummer. The chinquapin has just got through blooming. This pretty little chestnut-like tree is exceedingly abundant on all sides and when in bloom makes an attractive addition to the woodland scenery.

The ravages of the seventeen-year locust are apparent in every direction and especially along the line between Wilmington and Washington. Oaks, chestnuts and locusts seem to have suffered most severely, but the distiguring dead branch tips with their brown leaves are seen more or less on all deciduous trees. In the cultivated fields, cotton, sweet potatoes and peanuts catch the interest of the northern visitor. There is plenty of tobacco also but no more luxuriant than that seen in Connecticut and western Massachusetts and the corn appears stunted and irregular in growth, due in part to the unusually dry season experienced in this section but also due to the unproductive quality of much of

the soil, which is in great need of a generous application of fertilizers.

Probably that feature of the landscape which will prove most interesting to S. A. F. tourists is the style of habitation fashionable with the colored brother and his equally impecunious contemporary, the poor white. How a large family manages to exist in such hovels is a problem difficult of solution and where and how the means of sustenance is procured is an equally tough puzzle. Yet there they are—not much on clothing, but fat enough and apparently contented. The little "coon" boys of varying grades of blackness that congregate about the car windows at station stops and offer "soft ripe peaches six for five" or propose a "song for a nickel" or a scramble for pennies will undoubtedly furnish rare amusement for the fun-loving contingent which is always on deck at S. A. F. affairs.

Tarrytown Horticultural Society.

At the meeting held July 31 at Tarrytown, N. Y., the executive committee reported the articles of incorporation completed, signed and certified. The following were elected to honorary membership: Mr. and Mrs. John D. Archibald, Mrs. Geo. Lewis, Mrs. J. H. Hall, John T. Terry and Addison Johnson. By request Grant Teetsale's name was transferred from the honorary to the active membership list. E. H. Bennett, Jas. H. Brewer, Chas. E. Powell and E. T. Tibbitts were elected to active membership. N. H. Dimond and Harry Stranall were proposed for membership. L. A. Martin was awarded honorable mention for dahlias and honorable mention for *Rubus sorbifolius*. Mignonette was shown by Francis Gibson and lilies by Thomas Cockburn. The essay of the evening was on stove plants, read by W. H. Waite, superintendent of Greystone, Yonkers. In the discussion which followed Messrs. Mooney, McFarlane, Scott and Donald brought out interesting points. At the September meeting L. A. Martin will read a paper on dahlias.

H. J. R.

Providence, R. I.

TRADE AT A STANDSTILL.—ALL STOCK IN OVER-SUPPLY BECAUSE OF ABSENCE OF DEMAND.—PRICES VARIABLE.—PERSONAL DOINGS.

Business is at a complete standstill, with all flowers going at unstable figures. Asters are over-plentiful at 25 cents and 50 cents per hundred and, while sweet peas are not in great surplus, the demand is light at 10 cents to 25 cents per hundred. The benching of carnations has started and it is improbable that any of the Providence florists will attend the convention. The *Macreus* seemed to be the only willing ones, but have given up the idea of going.

Thursday, July 3, was the day of the florists' excursion to Rocky Point. It was a fine day and everyone had a good time.

M. Sweeney is discussing the good that might accrue from a local credit bureau for better protection from bad debtors.

The only new feature of the week is the fine exhibit of palms, by Macnair, at the Arts and Crafts Exposition.

L. Williams has another branch. This time it is a pleasure resort on the Danielsville road.

Mrs. A. Rennie has returned from her trip to the west.

Thomas Macnair has gone north for two weeks.

(From a photograph by L. A. Berckmans, of Augusta, Ga.)

BILTMORE

Home of the Vanderbilts.

SPEAKING of Biltmore and Asheville, Col. A. K. McClure, the famous Philadelphia editor, wrote: "I have seen the grand mountain views of every part of our continent east of the Sierra Nevada, and must testify that there is no scenery this side of the Rocky mountains that equals, or even approaches the grandeur of the varied views presented here. It is not surprising that thousands of visitors come to enjoy the bracing atmosphere and unrivaled beauty of these mountains.

It is the one pleasure and health-seeking region which has all seasons for its worshippers. Its rides and drives of unequalled beauty; its dry and exhilarating atmosphere; its genial winters, even among the mountain tops, and its pure breezes and cool nights in the heat of summer, make it an all-the-year resort for those who seek pleasure, rest or fugitive health, and it is destined to become the great resort of the American continent."

This is Buncombe county, made famous by Bill Nye, the greatest American laugh creator, whose writings it is said first attracted the attention of George W. Vanderbilt to the locality. He has built there the grandest private estate in America, the show place of the city, the greatest attraction of the state aside from its climate and its scenery. Mr. Vanderbilt seeks privacy but his interest in the development of the vicinity is such, or perhaps it is his pride in his magnificent property, that he makes visitors welcome at such times as the approaching S. A. F. convention. The trip through the estate will be made on Friday afternoon and carriages will be provided by the Asheville Board of Trade.

"This drive" writes Sam Hudson, who visited Biltmore with the Pen and Pencil Club of Philadelphia, "was one of the pleasurable surprises of my life, as it showed me how the hand and the genius of man can improve upon rugged nature, and what can be accomplished with the aid of money. Mr. Vanderbilt has built 128 miles of macadamized road as smooth as a ballroom floor. He can keep driving for days over his labyrinth of roads with the eye drinking in scenery as beautiful as the continent can afford, an estate, incomparably the finest and costliest in America."

The chateau stands upon one of the steps of the mountain, about two miles from the city. It was begun in 1890 and completed in 1895. The building, about

300x700 feet in ground dimensions, built of marble, is said to have cost upward of \$3,000,000, and as much more has been expended upon its surroundings and the vast estate of a hundred thousand acres. All of the landscape gardening and the development of the park shows the master hand of Frederick Law Olmsted, under whose direction the improvements have been made. In every line of agriculture, forestry and floriculture there has been the highest development under expert direction, in order not only to improve the place itself, but to

America for the erection of a home which is as supreme among the houses of men as this spot is among the creations of nature.

At no spot on this continent has nature, already lavish in the bestowal of her favors, received such costly assistance in artificial embellishment. Aside from fortunes spent in constructive landscape work, many, many thousands of dollars have been applied to the horticultural department, and it is this feature which will principally interest the S. A. F. visitors. Here in the end will be the

most comprehensive arboretum in this country, the climate being such as to favor the work now under way. Millions of trees and shrubs have been established and other millions will be grown and planted before the work is finished. A large force of gardeners and propagators has worked for years under the direction of Robert Bottomley, the superintendent, and an equipment is maintained which would suffice for many a large commercial establishment. Aside from the work outdoors, the conservatories are among the finest in the land and contain a splendid collection of plants. A view of the structures appears on this page. The other picture gives a glimpse of the grounds.

The city of Asheville itself, however, must not be ignored, as it is smart and ambitious. Imagine a town pitched upon a mountain plateau so high up that a fellow, on a day of dirty weather, can wash his hands in the clouds, expending \$600,000 upon vitrified brick paving for its streets, and which is investing an equal sum for water works. Part, at least, of this progressive spirit has been infused by the owner of Biltmore. He thinks the Carolina mountains the most wonderful place on the continent and Asheville is the natural

center of the district. Mr. Vanderbilt has made large investments in the city itself and has added a great impetus to its development.

It is worth mentioning that nowhere are there better hotels than at Asheville and at few places are the accommodations so good for the money. This is a feature that the members of the S. A. F. have reason to appreciate. It should be remembered that Asheville is on the Southern Railway and can only be reached from the west via Cincinnati and Harriman Junction, leaving the Q. & C. at the latter point. E. G. Gillett, of Cincinnati, says that the "Florists' Special" will be the finest that ever left that city.

THE CONSERVATORIES AT BILTMORE, HOME OF THE VANDERBILTS.

A GLIMPSE AT THE THOUSANDS OF ACRES AT BILTMORE.

furnish a working model which would be an influential factor in raising the standard of the entire region and state.

The mansion is a rather highly elaborated version of the architecture of Francis I. and of the chateaux of the Loire. It is exceedingly rich in every detail, and the general effect is heightened by the free employment of decorative sculpture. Those who have stood spellbound upon the esplanade of this magnificent chateau and looked out upon the wild tumult of mountains which stretch away in every direction until lost behind the curtain of the horizon, can well understand why Mr. Vanderbilt selected this particular spot of all others in

In Memory of Wm. G. Bertermann.

[By L. G. Hill, of Richmond, Ind., Read at a memorial meeting of the State Florists' Association of Indiana, Indianapolis, August 5, 1902.]

It is next to impossible to do full justice to the memory of William Bertermann, for he abounded in excellent traits of character, and I hesitate to undertake the task assigned me, fearing that I may not be able to do him the honor due his character and his life work. Most of those present have had the pleasure of knowing him intimately and well and, like myself, thoroughly appreciated and valued his unchanging friendship.

My acquaintance dates back some twenty years, but not until the founding of our state society did I come to know him thoroughly. One of his finest qualities was the intense earnestness with which he went into an undertaking; everyone who knew him was impressed by this marked trait of his character. From the very inception of our state organization, he threw into it every force and energy necessary to make it a success, sparing neither time, labor nor money to carry out the plans and purposes of the society. As our faithful and painstaking secretary for so many years, we owe him and his memory a large debt of gratitude for the success which crowned our many undertakings.

Wm. Bertermann was both thoughtful and resourceful. It was my pleasure to be taken into his confidence and to have explained to me the ideas and plans of his vigorous mind, especially in regard to matters pertaining to the holding of our annual meetings and exhibitions. Very few of us realized the great amount of thought which he gave to our interests whilst serving us. I was very often surprised and delighted with the novelty of his plans and the energy with which he carried them to a successful conclusion, for many of the problems presented to him were intricate in the extreme. He was preeminently practical in his planning, and the fame of our exhibitions was in a large measure due to the wise forethought, discretion and energetic work of our secretary. He dreaded ruts and his effort was always for the novel and the artistic and he possessed a knowledge of the popular taste which was really wonderful.

He had the welfare of the profession ever at heart and one of his oftenest expressed and most fervent desires was that the members of this society, and the craft in general, might come to a better appreciation of our profession in relation to the material and artistic development which has been taking place in this country of ours and which is still going forward. He thought that the majority of florists should be more careful in their dress, in the appointments of their places of business, and as to the dignity of demeanor as befitted those who were thrown in contact with the most beautiful things of nature. This thought was constantly with him and he often spoke of the reform necessary in these particulars.

Mr. Bertermann was appointed on the executive committee of our national society while I was serving as president and I was amazed at the time and thought that he gave to this office. Through a reorganization of the executive body, we were only favored with his services for one year. It would have been well for the society if it could have held his service longer.

He planned large things for the firm of which he was a member and the large share of trade which the firm enjoyed came from the fact that the public had learned to know him and gave to him and his brothers the fullest measure of their confidence and trust. He was an observant man and he profited by his travels and journeys, never failing to bring back ideas and suggestions which he could incorporate into his own work in the way of elevating floral art.

Mr. Bertermann's ideas regarding the need of a closer study of decorative art, and this insistence in putting into practice his thoughts and ideas on this line, relative to hall adornment and decorative effects, led at times to harsh criticism and words of disapproval from many of his florist friends, but looking back over the past, I think that we are all agreed now that he was right in insisting that our annual meeting place should be so beautiful that it should serve as an educational factor with the general public as well as with the trade.

I shall ever remember with pride and pleasure my acquaintance with Wm. Ber-

termann. The warmth and strength of his friendship, his sunny disposition, his even temper; I shall always value the pleasant hours of companionship spent with him. My last conversation with him was late last autumn, when he went over most minutely all the details of our last exhibition, giving his ideas as to what should be done at another time, should an exhibition be held, and on this same occasion he spoke of the carnival meeting to come and unfolded his plans concerning the entertainment and work incident to that most interesting occasion. Alas, we were not favored to have him with us last February in person, but we of the state society knew that he was present with us in spirit.

Wm. Bertermann was possessed of a noble, generous spirit and his kindness of heart made for him many true friends. We shall mourn his loss. We have to-day a better and keener appreciation of the motives which actuated him, and I know that his memory will be as a pleasant fragrance filling our minds with better thoughts and higher ideals concerning the things which are vital to us as a profession. The tribute of esteem which surrounded our brother's bier and which bedecked his covered grave in peaceful Crown Hill Cemetery were most fitting testimonials to the esteem in which he was held by his family, his friends and his professional brethren. His life work was cut short; his courageous battle against disease was fought valiantly but in vain. May he have sweet peace such as is given to those who are loyal to truth and right.

The Weather.

The week ending 8 a. m., August 4, was slightly cooler than usual in the west Gulf states, in extreme southern California, and over the interior portions of the north Pacific coast, the average daily temperature deficiency being less than 3°, except in northern California and the eastern portions of Washington and Oregon, where it ranged from 3° to 5°. In all other districts the week averaged warmer than usual, being decidedly warm from the central Rocky Mountain districts eastward over the central valleys and upper Lake region, where the

THE FLORISTS OF OMAHA AND COUNCIL BLUFFS ON THEIR MOST SUCCESSFUL OUTING.

GRAND PRIX AWARDED "THE AMERICAN FLORIST" AT THE PARIS EXPOSITION OF 1900.

excess ranged from 3° to 9° per day, being most marked over the middle Rocky Mountain slope. The excess in the Atlantic coast districts was generally very slight.

Maximum temperatures exceeding 100° occurred over the middle and eastern Rocky Mountain slope and in the upper Missouri Valley, the highest, 104°, occurring at Pueblo, Colo., and Concordia, Kans., the maximum record for the first decade of August in previous years being exceeded by 2° at Concordia. No unusually high maximum temperatures occurred east of the Mississippi River. A few stations in the lower Ohio Valley report readings of 98°, but over the northern districts east of the Mississippi they were generally below 90° and in the Middle and South Atlantic and east Gulf States generally range from 90° to 94°.

Over much of the greater part of the country east of the Rocky Mountains the minimum temperature ranged from 60° to 70°, being slightly above 70° along the South Atlantic and Gulf coasts and below 60° in the extreme northern districts.

SEASONAL TEMPERATURE.

The seasonal temperature from March 1 to August 4 (157 days) continues in excess of the average over much the greater part of the country, although the area of deficiency, which is confined to the Pacific coast and Rocky Mountain regions, is somewhat greater than earlier in the season. Over the western Plateau

districts the seasonal deficiency ranges from 1° to 3° per day, and is greater in western Nevada. The area of excess embraces nearly all districts east of the Rocky Mountains and also the eastern portion of the southern Plateau region. The excess amounts to more than 1° per day over the greater part of the central valleys and Southern States and exceeds 2° per day over portions of the Lake region and Red River of the North Valley. Along the south Atlantic coast the seasonal temperature is nearly normal.

PRECIPITATION.

Very heavy rains have fallen in central and northeastern Texas, northern Louisiana, over the greater part of Arkansas and western Tennessee, and northern Mississippi, in which districts weekly rainfalls ranging from 1 to more than 10 inches are reported. Generally well distributed rains occurred in portions of the Missouri, Red River of the North, upper Mississippi and Ohio valleys, and Middle Atlantic States, where the total for the week ranged from ½ inch to more than two inches. Less than the average amount fell generally throughout the South Atlantic and east Gulf States, over most of the Lake region, and in portions of the lower Ohio, central Mississippi and lower Missouri valleys. There was also less than the usual rainfall along the immediate west Gulf coast. A considerable portion of the upper Lake region received no appreciable amount, and there was a general absence of rain in the Rocky Mountain and Pacific coast dis-

tricts, except on the coast of Washington, where light showers occurred.—*Weather Bureau Bulletin.*

New York.

PAST WEEK THE Dullest thus far in the summer.—PRINCIPAL INTEREST IN CONVENTION TRIP.—GOOD-SIZED PARTY SEEMS ASSURED.—REMEDY FOR A Borer.—VACATIONS.—NOTES.

News is scarce in this section of the country. Very little is doing in the cut-flower line. Indeed, the past week is commented upon by many as the deadest ever experienced at this dead season of the year. A desultory agitation is going on daily regarding the trip to Asheville and it develops, as the returns come in, that this neighborhood will send a fairly good-sized delegation to the convention, the transportation rates being unexpectedly favorable and the interest seems to increase as the time approaches, under the inspiring efforts of the very efficient committee in charge.

Dunne & Company have discovered a prime remedy for the troublesome borer that has made so much havoc with bark-covered rustic settees, etc. They have named it Dunnite No. 5, and all rustic work sent out by them now receives a good coating of the remedy before shipping. They have equipped a big factory at Kingston-on-the-Hudson for this department.

Mrs. Hallinan, with her daughter Marguerite and son George, is at Ossining for two weeks with her mother. On her

return C. A. Bird will take his family on a fortnight's crabbing and fishing expedition, but he says he will put away all rings before starting. This is one on Mallon, of Brooklyn.

Charles Snell, recently with Thorley, has accepted a position with W. J. Palmer, of Buffalo, in the new store which Mr. Palmer is to open on September 1.

Frank Traendly is off this week on a trip to the Thousand Islands.

Chicago.

MARKET HAS ITS UPS AND DOWNS.—TRADE HAS AN OCCASIONAL SPURT.—BEAUTIES THE BEST OF THE ROSES.—ASTERS SUBSTITUTED ON ALL KINDS OF ORDERS.—GLADIOLI RECEIVED IN IMMOVABLE QUANTITIES.—DOINGS OF THE GROWERS AND OTHERS.—VACATIONS IN ORDER.

Trade continues to have its ups and downs, one day fairly active, the next decidedly dead. There is very little stock, except garden flowers, and there is difficulty in filling orders. Beauties have improved in quality under the influence of a few days of favorable weather and the cut from the early benched young plants is decidedly the best stock in the market. Several growers are cutting considerable quantities for so early in the season, but the demand fluctuates so strongly that what is a shortage one day frequently develops into an oversupply the next. Brides and Bridesmaids are scarce and poor. Meteor is better. Those few growers who provided houses of Kaiserin, Liberty, Marquise Litta, La France, Carnot or Golden Gate for summer cutting are reaping a reward in proportion to their enterprise. White carnations are very scarce and in the greatest demand. There are not many colored ones good enough to ship and asters take their place as a general thing. As a matter of fact the buyer who adds the code word "dancing" to his order is pretty certain to find that the box contains a large proportion of asters. Asters are likely to be substituted for almost anything these days. The good asters sell well but there is a lot of low grade stock on the market which moves slowly and at very low prices. Gladioli are coming in by many thousands. Some of the fancy varieties sell well but most of the commission houses have bucketsful standing around out of which they will never realize the express charges. There are still plenty of auratum but not so many longiflorum. Greens are abundant and not in active demand.

The George Wittbold Company has completed its new range of three houses at Edgebrook and moved in the stock this week. The houses are strictly up-to-date, 27x300, and give an opportunity which the firm has long needed of growing the stock on to larger sizes. Otto Wittbold will live at the new place and have charge. Henry Wittbold will also live at Edgebrook and conduct the nursery department, for they are going into hardy perennials and other kindred lines.

The daily papers are full of talk about a strike by the drivers for all the express companies in the city. Such a move, with the animosities and strife it would create, would be a serious thing for the cut flower business and every other line in which the stock is perishable. The men ask a raise of from \$5 to \$10 per month, a ten hour day and 35 cents an hour for overtime and the management is obdurate.

The Kroeschell Brothers Company is

again tied up by a strike of boiler makers, which includes every boiler shop in Chicago. Not only has all work ceased but boilers already made cannot be shipped because the teamsters' union will not haul them to the depot pending the settlement of the difficulties. It is not now thought that the strike will be of long duration.

Sinner Brothers have put in a busy season, remodeling their carnation houses and building a cistern to hold 110 barrels of manure water. They do not believe in keeping on the dry side. By August 1 they had finished benching carnations, having housed 15,400 plants, all looking fine. The roses, too, are in good shape, making fine growth. G. E. Anderson is the grower in charge.

The committee is planning a great time for the Florists' Club picnic at Bergman's Grove, Riverside, next Tuesday. There will be a long list of contests, for which some fine prizes are offered. Meet the committee at Wabash and Randolph street at 10:30 and go along. Take Garfield Park branch of the Metropolitan "L."

Edgar Saunders was stricken by the heat July 31. Paralysis of the right side ensued but his medical advisers do not consider the case serious. There has been very little change in his condition during the week but the doctors are hopeful of early improvement.

Jacob Heinz, a nurseryman, was driving on Hinman avenue, Evanston, Thursday when his wagon load of trees was collided with by an automobile run by R. D. Markham. The auto was wrecked, the wagon smashed and the nursery stock ruined.

C. L. Washburn returned Tuesday from his week in the woods and on Wednesday O. P. Bassett and Mrs. Bassett went to Athelstane, Wis., from which they have a twelve-mile drive to the fishing club where Mrs. Washburn is domiciled.

F. A. Baller, the pronia and clematis grower of Bloomington, called here during the week en route to Sheboygan, Wis., where he will spend his vacation. Mr. Baller says business has been unusually good with him this season.

A. Dietsch is home again from the southwest, where he spent the winter, and enjoying very good health. He hopes he is cured of the asthma with which he has suffered for the past two years.

Edward Palmis, for seven years with Swain Nelson & Sons, is now located at his own greenhouses, 258 West Huron street, where he will grow a miscellaneous stock and do a general retail business.

S. Wachenheim, of Vicksburg, Miss., who has been spending a month's vacation at the Wisconsin summer resorts, called upon several local firms during the week.

The supply dealers report business keeping up very well this summer. Both E. H. Hunt and McKellar & Winterson have been busy right along.

G. H. Piesser, secretary of the Kennicott Brothers Company, leaves next Tuesday for a two weeks' fishing trip to Lakewood, Wis.

T. D. Mosconesotes, at the Masonic Temple, is handling large quantities of short American Beauty roses these days.

Miss Grace Todd, bookkeeper for E. C. Amling, has gone to Wakeman, O., for a two weeks' vacation at her old home.

J. B. Deamud is again at his place of business, having returned from Michigan early in the week.

George Reinberg is cutting outdoor carnations to the extent of several thousands daily.

Miss Jessie Ludlow, who has been down with diphtheria, is progressing favorably.

John Thorpe is at Kansas City on business connected with the fall flower show.

The last heard of John Mangel he was enroute from Paris to Rome.

Philadelphia.

WELL ATTENDED MEETING OF THE CLUB.—HALF A HUNDRED IN THE ASHEVILLE PARTY.—GOOD TIME ASSURED.—REASONABLE HOTEL RATES.—CONVENTION TO BE DISCUSSED NEXT MONTH.—BUSINESS LIGHT.—BEAUTIES IN DEMAND.—VARIOUS LOCAL NOTES OF INTEREST.

The August meeting of the club was very well attended, the interest in the coming convention being the attraction. Chairman Watson, of the transportation committee, reported that his list of acceptances had already reached thirty-six, and it is thought that with this showing now the party will finally number over fifty. Many of those who are going were present and expressed themselves as looking forward to a delightful trip, as the section of country is so different from that of other meetings. The rate of fare for the distance traversed is very low, a trifle over \$20, with \$3 each way from Washington for Pullman car accommodations. Mr. Rust, of the hotel committee, reported that the accommodations are excellent and quite reasonable in price, ranging from \$3 to \$4 per day at the Battery Park and \$2 to \$3 at the Swananna, both on the American plan. He also reported several other houses on the European plan at from \$1 per day upwards. One of the interesting details was that Chairman Westcott is provided with the wherewithall, so that the tourists or the friends they meet on the way shall want for none of the good things that usually accompany the delegates on such occasions. The subject for next month's meeting is, as has been the custom for the past ten years, "The Convention." This year it is to be enlarged on and judged from different standpoints. Joseph Heacock will speak for the growers, S. S. Pennock for the commission men and M. Rice will represent the supply houses. The retail end will be held up by George Craig, while Jno. F. Simson will tell what he saw to interest the gardeners.

Business is very light in the stores at present. With the exception of asters and Kaiserin roses there is not much to offer the few customers who do break in on the silence that prevails. John Burton is cutting a few new crop Beauties which are grabbed up instantly by those lucky enough to see them. Leo Niessen says there are not near enough summer Beauties, and if growers would devote a little time to them a trade would be built up that would undoubtedly pay. S. S. Pennock says that he cannot get near enough Beauties for his regular orders. He hopes the new crop will soon make its appearance.

Since Robert Craig has returned from Summit, N. J., looking much benefited by his trip, Robert Craig, Jr., is away on his vacation. The work on the four large carnation houses being erected by the Lord & Burnham Company is going forward. The stock to be planted is mostly of the new carnation, Adonis, and is looking fine. Snatches of base ball talk are heard where two or three are gath-

ered together here and naught but pity is expressed for that city team when they make their appearance next Saturday.

A rolling chair parade is to take place in Atlantic City Friday of this week. It is to be a floral affair, as all the chairs are to be decorated with natural flowers. We hear of some large orders that have been received, and if the weather turns out all right the parade will no doubt be a great success and incidentally use up a great lot of asters, rudbeckias, hydrangeas and the like. K.

St. Louis.

TRADE NOT ACTIVE BUT GROWERS BUSY.—PRODUCING AND PREPARING FOR ANOTHER SEASON.—WHOLESALE PRICES.—CLUB TO CROSS THE RIVER FOR ELECTION.—VARIOUS NOTES.

The market has made no decided gain on last week. Roses are selling at from \$2 to \$3 and even lower for some. Carnations are quite plentiful and enough white are now had to supply the demand. White Cloud is about the best variety sent in and this brings as high as \$1.50 for the best; 75 cents per hundred is the general run. Asters are coming in quite plentifully and bring from 75 cents to \$1 per hundred. Pink asters are not as plentiful as the whites and purples. Tuberoses are bringing from \$3 to \$5. There is a better market for singles than for the doubles. Gladioli are going very slowly at from \$2 to \$3. Sweet peas are about done for at present.

A visit to the Tesson greenhouses found all busy repairing and planting. They have several fine houses of roses, some in their second year. The chrysanthemums are also fine. There is in the neighborhood of 30,000 square feet of glass in this range and all in very good condition. If the World's Fair people succeed in getting this tract they will without a doubt use these houses to grow their stock plants and bedding plants in. This deal is not as yet settled, but will be in a short time. The rose houses are 300 feet long and are of the three-quarter span style. The plant is heated by steam from two large boilers. All the soil used has been sterilized and there are no weeds.

The annual election takes place at the next regular meeting of the St. Louis Florists' Club and all who possibly can should be present, for that reason, as well as for the chance to see Mr. Ammann's range of greenhouses, for the meeting will be at Edwardsville. Take Stock Yards car at foot of Ead's bridge in East St. Louis at 12 o'clock, and transfer to Gross Park car, which will land you in Edwardsville at 2 o'clock. A good time is promised and there will be much of interest in the trip.

H. G. Berning and wife have started on a trip west and will be gone several weeks. His base ball nine played the Tesson team and beat it with a score of 3 to 1. The next game, which is to be played in a short time, is promised to be very lively and may end differently in regard to score. Mr. Berning is having bad luck with his horses. Both of them are out of commission and all delivering is done on foot or by cars.

It does not seem that there will be a very large delegation from St. Louis to the S. A. F. convention this year. So far the following people expect to go: Fred. Weber, wife and two children; George Windler and two ladies; C. C. Sanders, John Connon and Adolph Fehl, of Belleville, Ill. The last two are still doubtful.

J. A. Peterson, of Cincinnati, is in town. R. J. M.

Boston.

NO DEMAND FOR CUT FLOWERS AND LIGHT RECEIPTS AMOUNT TO AN OVER-STOCK.—ASTERS IN UNWELDY SUPPLY.—FINE GLADIOLI.—A GOOD EXHIBITION.—NOTES AND VISITORS.

The market is decidedly off color this week. There is not a surplus of cut flower stock of acceptable quality if there was anything doing, but there is not. The shipping trade languishes, being far behind the record for previous years. The weather has been against the beach business, but it is fair to expect that the day is not far off when conditions will change and then it will be a short and a merry hustle. American Beauty is improving in quality, the average of stock offered being of fairly good grade. A great many short-stemmed roses are now coming in, quality not bad. Carnations are not abundant. On the other hand, asters are so plentiful that it is next to impossible to sell, for any price, the heavy accumulation and at present time practically no offer is refused by those who hold the flowers, even though the results would not pay even the cost of picking. Lily of the valley is of excellent quality. Among the summer specialties is the Shakespeare gladioli, which is being received by the wholesalers in a quality never excelled but, as with other things, the market does not respond. Sweet peas are overstocked daily.

The exhibition at Horticultural Hall on Saturday, August 2, was rich in phloxes, of which T. C. Thurlow and Geo. Hollis showed each a fine collection of named varieties. Antirrhinums from Mrs. J. B. Lawrence and W. J. Clemens, phloxes from W. J. Clemens, dahlias from B. F. Flanders, gloxinias from F. A. Blake and herbaceous flowers from Shady Hill Nursery were among the attractions in cultivated displays and the collections of wild flowers were very extensive and interesting. The mushroom exhibit of the Boston Mycological Club included sixty-one species.

Among the many visitors this week are W. A. Peterson and wife, Chicago; Aloise Frey, Hartford, Conn.; Chas. J. Molloy, Rochester, N. Y.; H. H. Battles, Philadelphia, and C. B. Weathered, New York.

Detroit.

CLUB HAS A WELL ATTENDED MEETING AND ELECTS OFFICERS.—NICE PARTY ASSURED FOR CONVENTION TRIP.—TRADE DULL.—A NEW FIRM.—BATCH OF PERSONAL NOTES.

Thirty members of the club attended the regular meeting last Wednesday evening. It was the occasion of the annual election of officers, which resulted as follows: President, Edward Beard; vice-president, John Dunn; treasurer, B. Schroeter; secretary, J. F. Sullivan. The contest for president was a spirited one between the two nominees, Robert Flowerday and Edward Beard, but on the fourth ballot the latter had a majority of four votes over the opposing candidate, who was, however, absent. Mr. Dunn, for vice-president had a handsome majority while the treasurer and secretary were unanimously retained.

The party going to Asheville will consist of Jas. Taylor and wife, G. H. Taepke and wife, Philip Breitmeyer, Wm. Dilger, Robert Watson, Harry Smith, Geo. Reynolds, J. F. Sullivan and good prospects for a few others. As previously stated, the party will leave Detroit Sunday evening, August 17, at 10 o'clock via M. C. and C. H. & D. railways to

Cincinnati, which will be reached Monday morning at 7 o'clock, where the northern delegations will be joined, leaving there by special train at 2 o'clock that afternoon.

Midsummer condition of trade still prevails, with but little variation. Recent favorable weather has been conducive to an abundance of all kinds of outdoor flowers and especially asters, which are very fine. Some good carnations are yet to be had but roses are small and few of them in the market, with the exception of some fine Beauties.

Brown & Northcott is the firm name of the successors to Chas. Schauble, 308 Woodward avenue. Mr. Brown has been in the employ of the Detroit Floral Company for the past fifteen years. His partner is not a florist but joins Mr. Brown as a business venture.

E. H. Smith, who has been foreman for J. F. Sullivan for the past two years, has accepted a similar position with the Park Floral Company, Denver, Col., and left for there with his family last Tuesday.

Elmer D. Smith and wife, of Adrian, stopped over in the city a short time Tuesday on their return from a two weeks' trip to Mackinac and the Georgian Bay.

Robert Watson, of Townsend avenue, is building one house 18x75 feet and a coal shed 15x35 feet.

Geo. W. Davis is building three houses, each 15x85 feet, and a work shed 10x50 feet.

Frank Holzuagle visited the florists of Toledo last week.

Wm. Dilger is visiting the trade in Cleveland.

Visitors: J. A. Valentine, Denver, Col.; C. W. Scott, Chicago; Elmer D. Smith, Adrian; B. Rosens, J. Austin Shaw, C. S. Ford, New York; S. S. Skidelsky, Philadelphia. J. F. S.

Indianapolis.

ASSOCIATION OF FLORISTS HOLDS MEMORIAL MEETING.—DOINGS OF THE GROWERS.—PERSONAL AND OTHER NOTES.

The memorial meeting of the S. F. A. held August 5 in honor of William G. Bertermann was very well attended. Those present from outside the city were J. A. E. Haugh and J. A. Evans. All members paid high tribute to Mr. Bertermann, dwelling upon his great energy and immense working capacity. It was also mentioned that the association of the florists of the state was mostly due to Mr. Bertermann's efforts. A communication from the Bertermann family was read, in which they expressed their thanks for the sympathy shown them by the association and all state florists. Brothers of the deceased presented the association with a set of photographs of Mr. Bertermann, which were distributed to all members present.

F. Hückriede & Son will soon have their place equipped with city water. There will then be a good chance for a less fortunate brother to buy a wind-mill cheap.

Albin Schreiber, of Bertermann Bros., is almost through planting carnations in the houses. His plants are extraordinarily fine.

The fact that outdoor asters and sweet peas are done with is deplored by some and rejoiced over by others.

Miss M. Wurmell, of Huntington & Page, is in Chicago for a week.

John Heidenreich has put in a new forty horse-power boiler.

Mr. Hasselman and family are in Maxinkuckee. H. J.

THE AMERICAN FLORIST

EIGHTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.
Subscriptions accepted only from those
in the trade.

Advertisements on all except cover pages,
10 Cents a Line, Agate; \$1.00 per inch.

No Special Position Guaranteed.

Discounts are allowed, **only on consecutive inser-**
tions, as follows—6 times, 5 per cent; 13 times,
10 per cent; 26 times, 20 per cent;
52 times, 30 per cent.

Cover space sold only on yearly contract at
\$1.00 per inch, net, in the case of the two
front pages, regular discounts apply-
ing only to the back pages.

The Advertising Department of the AMERICAN
FLORIST is for florists, seedsmen and nurserymen
and dealers in wares pertaining to those lines *only*.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to
secure insertion in the issue for the following
Saturday. Address

AMERICAN FLORIST CO., Chicago.

THE public seems to take it for granted
that St. Louis will be the meeting place
for all conventions in 1904.

CORRESPONDENTS and advertisers are
urged to get their "copy" in early for the
big Convention Number, to be issued
next week.

THE Federal inspection law to which
the American Association of Nurserymen
has given its endorsement and which is
expected congress will pass at the next
session, does not apply in interstate com-
merce to florists' stock.

Helpful to All.

ED. AM. FLORIST:—We value the
FLORIST for the profitable advice we
find in its columns. We are beginners
and find it very helpful in building up our
trade. Put us down for another year.

HAMMERSCHMIDT & CLARK.

Medina, O.

Cincinnati to Asheville.

The Florists' Special, via the Queen and
Cresecent and Southern Railways will
leave Cincinnati at 2 p. m., August 18,
reaching Asheville for breakfast the next
morning. All delegations and individ-
uals from the north and west should so
time their start as to reach Cincinnati
for this train.

Chicago to Asheville.

Everyone from the west and north-
west is invited to join the Chicago party
to the S. A. F. convention. If you buy
through tickets see that they read via
Big Four railroad Chicago to Cincinnati.
Round trip fare from Chicago, \$20.00.
Write E. F. Winterson, 45 Wabash ave-
nue, or the AMERICAN FLORIST and
acomodations will be reserved for you
on the cars from Chicago, which will be
a part of the special train from Cincinnati
to Asheville.

Washington to Asheville.

The special train from Washington for
Asheville will leave Washington, D. C.,
via the Southern Railway on August 18,
at 5 p. m., arriving at Asheville at 9 a.
m., on the morning of the first day of the
convention. All florists from Boston,
New York, Philadelphia, Baltimore and
way stations will time their departure
so as to arrive here in good time for the
special, as the next regular train leaving
Washington will not reach Asheville
until 1 p. m., too late for the opening of
the convention.

P. BISSET, State Vice-president.

now, cucumber house.

Wilson, Conn.—W. Bancroft, carnation
house.

American Carnation Society.

PRELIMINARY PREMIUM LIST.

The American Carnation Society has
issued the preliminary premium list for
the exhibition to be held at Brooklyn, N.
Y., in February, 1903. Class A is for
vases of 100 blooms of the usual eight
color divisions, premiums \$12 and \$6 in
each. Class B is for vases of fifty blooms
of the same colors, premiums for each
color \$6 and \$3. Class C is for vases of
twenty-five blooms, premiums \$3 and
\$1.50 in each color. Certificates of merit
and preliminary certificates will be
awarded as heretofore. Among the special
prizes are three for a collection of not
less than ten or more than fifteen vari-
eties, not less than fifty or more than 100
of each. The Ward silver cup and a
second prize of \$10 are offered for collec-
tions of not less than six or more than
ten varieties, not less than fifty or more
than seventy-five blooms of each. Two
prizes are offered for the competition of
growers with not more than 15,000 feet
of glass, for collections of not less than
five or more than eight varieties, not less
than twenty-five or more than fifty
blooms of each. A silver cup is offered
for the best 200 blooms of any variety.
Two prizes are offered for best single
blooms. The gold, silver and bronze
Lawson medals are offered as three pre-
miums for vases of 100 blooms of any
variety. The S. A. F. silver and bronze
medals are offered for undisseminated
varieties.

The regular premium list and pro-
gramme of the meeting will be issued
early in January and will contain
announcement of many other special pre-
miums.

Society of American Florists.

RAILROAD FARES TO ASHEVILLE.

Members in Western New York state
and Pennsylvania will please note the
following modification of arrangements
regarding railroad fares to Asheville as
heretofore announced: The Trunk Line
Association, comprising the railroads in
the middle states, east of Buffalo,
Pittsburg, etc., will sell tickets to Ashe-
ville and return on the basis of one and
one-third fare to Washington plus one
fare therefrom to Asheville, except that
*from Buffalo Pittsburg and other Trunk
Line termini on the west via Washing-*
ton regular one-way fare via Washing-
ton will apply for round trip, charges from
intermediate points on direct lines not to
be higher. This gives all those attending
the convention from or via Buffalo or
Pittsburg and neighboring territory the
concession of one fare for round trip in
common with Cleveland, Chicago and
other western centers. These will be
regular round trip tickets, no certificates
being required, limited to continuous
passage in each direction. They will be

sold and good going, August 17, 18 and
19, and one day earlier than these dates
from Buffalo, Pittsburg and other Trunk
Line western termini, with final return
limit of August 25 inclusive.

DEPARTMENT OF PLANT REGISTRATION.

M. H. Walsh, Wood's Holl, Mass., reg-
isters climbing rose Wedding Bells, a
seedling from Crimson Rambler, flower-
ing from June 1 to July 1. Flowers
cherry pink, borne in large clusters on
every shoot. Flowering shoots spine-
less. H. T. Rose Princess, Margaret
Dickson x La France, 1898. Color flesh
pink, buds large, pointed; stems strong
and straight. H. T. Rose Franca, seed-
ling from American Beauty, 1897. Color
intense carmine, vigorous, foliage large,
stems stout; free bloomer.

Lager & Hurrell, Summit, N. J., reg-
ister Cattleya Hardyana Mrs. Geo.
Schlegel, Cattleya gigas x C. chrysozona;
a natural hybrid from Columbia. Bulbs
and foliage extra large and strong.
Flowers, sepals and petals deep rose pink,
lip over three inches across, very long, of
intense purple color heavily fringed and
and lacerated, throat golden yellow
spreading laterally into two unusually
large blotches.

J. B. Trudo, Alderbend, N. Y., registers
Carnation Miss Aimee, Mrs. Lawson x
Eldorado. Flower white, edges finely
striped scarlet, clove scented, three to
four inches across. Foliage glaucous,
stems wiry, holding heavy flowers erect.
Height two feet. Carnation Miss Alice
Roosevelt, Mrs. Lawson x Eldorado.
Color white dotted and splashed with
carmine to center of each petal. Flower
three and one-half to four inches across,
full, edges fringed, clove fragrance. Fol-
iage glaucous, stems stiff, two feet high.

WM. J. STEWART, Sec'y.

A Sidehill Greenhouse.

ED. AM. FLORIST:—I have a piece of
land on a hillside which slopes about four
feet in eighteen. I am thinking of build-
ing a greenhouse 18x60 here. The hill-
side faces south and the house would run
east and west, the long span to the
south. What would be the proper length
of sash bars for each side. On which side
should the ventilators be? What heating
system will give the best results with
the least fuel? Would a natural bed on
the north side do as well as a bench? If
so how would you heat it? Would
12x12 glass be an economical size? How
does one prepare soil so that no weeds
will grow? W. T. G.

For the location described it will be
well to have the walls of about the same
height above the present level of the
land, if the grade is to be left as it is now.
When a greenhouse is built on a side hill
there is always more or less trouble in
securing the same temperature on the
lower as on the upper side, the difference
often being as much as 10° when the
wind is strong from the south, and my
choice would be in an 18-foot house to
grade the site so as to have the difference
in level two feet at most. This would
make it possible to have the same differ-
ence between the heights of the north
and south walls; that is, the north wall
would stand two feet above the south
one. If the house is to be eighteen feet
inside measurement, the sash bars could
be thirteen and one-half and eight feet.
The ventilating sash will give rather
better satisfaction on the south side,
and, especially if the prevailing winds
are from the south, they should be hinged
at the lower edge.

For a single small house hot water should be used for heating. In sections where the temperature does not drop much below zero twelve 2-inch pipes will be needed for roses and nine for carnations. In case a solid bed is used along the north side, it will be well to have a walk between the bed and the wall and carry part of the pipes on the wall. In order to warm the soil of a solid bed it will be a good plan to carry an extra heating pipe in the bed at a depth of one foot.

For most crops it will be best to use glass that is 16x20 inches, but a smaller size will answer for some purposes, such as growing violets. Where one does not have steam heat, the best way to compost soil is to pile up sods and cow manure, using about five to one, during the early summer, wetting it down well if dry. After three or four weeks of warm weather it can be worked over, cutting the sods into thin slices. If the pile is kept moist and is worked twice more at intervals of four weeks most of the weed seeds will be killed and the soil can be stored in the fall for use during the winter.

L. R. TAFT.

The Present Fad.

Oh, Mary had a little mat
Of raffia to sew,
And everywhere that Mary went
That mat was sure to go.

It followed her at home, at school,
Hung by her side at meals;
"Oh, mother help me splice this on,
Nor mind my stocking heels."

And Johnny had a basket, too,
Of strong rattan to braid;
It kept him from all household tasks,
And neath his pillow laid.

Now everybody has a loom
Designed by brainy man,
To weave with rags a heathen rug
Of most artistic plan.

And when the teacher quite worn out,
Goes home, what doth appear
But rugs and b. skets strewn about
For her to finish here.

"Why doesn't Johnny learn to spell?"
The anxious mothers cry.
"Because we cannot weave it in,"
The teachers do reply.

—Linden Hill News.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plain ads. not admitted under this head.

Secretary.

NOTICE

—OF—

STOCKHOLDERS' MEETING.

CHICAGO, July 19, 1902

Stockholders of the American Florist Company:

You are hereby notified that the annual meeting of the Stockholders of the American Florist Company will be held in the Battery Park Hotel, Asheville, N. C., Wednesday, August 20, 1902, at 3 o'clock P. M., for the purpose of electing directors and officers for the ensuing term, and for the transaction of such other business as may come before the meeting.

J. C. VAUGHAN, Pres.
M. BARKER, Sec'y.

Pittsburg.

TRADE DEAD AND STOCK VERY POOR.—GLADIOLI HELP OUT IN ALL KINDS OF WORK.—VACATIONS THE PRINCIPAL THING.—NOTES.

Business has migrated. I don't know where to, but it has departed absolutely from these "diggings." The weather has been fine for outdoor flowers. Roses have gone back a point. A few Beauties are to be had, but they lack color and size. Carnations are poor. Some fine gladioli are coming in and assist wonderfully in work of every character. Florists are going for and returning from their vacations.

Many funeral designs were sent to the funeral of the late Isaac Knowles, of East Liverpool, Ohio, this week. Thos. Ulam & Company sent a magnificent vase which stood about six feet high. Gus Ludwig sent a furnace made of flowers, and E. C. Ludwig sent a large standing wreath.

L. S. Crall, of Washington, Pa., will open a fine cut flower store. "Charlie" Crall will manage it. The refrigerator will be placed at the front of the store and will take the place of the display window.

Ben. Elliott is remodeling some of his houses, also putting in a new boiler and new benches.

John Baldinger, of Ulam & Company, has gone to Atlantic City for ten days' outing.

Ben. Elliott goes to Atlantic City next week. E. L. M.

Bay City, Mich.

BOEHRINGERS HAVE A MODEL PLACE.—WELL-KEPT GROUNDS SERVE TO ATTRACT TRADE.—GOOD DAYBREAK CARNATION.

Boehringers Brothers, in their quiet way, are expanding in a manner that denotes progress and enterprise. Starting in 1893, at a time when the conditions were most unfavorable, they seem to have harnessed success and little by little built up a place, as well as a trade, that would do credit to much older establishments. Their recent addition, built this summer, consists of two houses, one 26x100, built expressly for their new light pink carnation, the improved Daybreak, and the other 12x100, for violets.

As to the improved Daybreak, its appearance at Indianapolis in February by no means showed its true merit and commercial value. One must see it here to form an adequate idea of its many excellent points. It is now in its fourth year's test and the Boehringers assure me that no carnation on their place has yielded them better returns. They are, in fact, inclined to grow it exclusively for their own use.

A stroll through the other houses showed things in splendid condition, and another thing worthy of mention is the beautifully kept grounds about their establishment. Instead of broken pots, empty boxes and rubbish one finds a velvety and faultlessly trimmed green lawn, with here and there a star worked out in cobs, a crescent in alternanthera and a bed of cannas. Such things add to the attractiveness of the place and prove the most potent advertisement that a florist, catering to local trade, could possibly invest in. NOMIS.

MANCHESTER, MASS.—The annual sweet pea show of the North Shore Horticultural Society, held at Lee's hall on July 24, was a very attractive and successful affair.

CUT FLOWERS AT WHOLESALE.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

WALTER P. STOKES, Pres.; C. N. PAGE First Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

ONION set pulling is on in earnest among the Chicago growers.

THE calla bulb crop in California is turning out short as usual, some growers reporting seventy-five per cent only.

THE Dutch bulb crop is reported as ripening very late this season and shipments are expected to arrive ten days later than usual.

TWELVE thousand packages of vegetable seeds will be distributed to each member of the House and Senate, beginning soon after September 1.

BOSTON, Mass.—M. B. Faxon has moved from 31 State street to more commodious quarters at 34 Merchant's row, the center of the seed trade district.

THE advent of the Rocky Ford muskmelon marks a distinct era in the history of this valuable esculent, to the extent that fruit of uniform high quality may now be had in every important city of the country.

VISITED CHICAGO: Edwin M. Haven, of the Haven Seed Company, South Haven, Mich.; Fred. S. Plant, of the Plant Seed Company, St. Louis, Mo.; C. H. Reed, of the Amzi Godden Company, Birmingham, Ala.

FRED. S. PLANT, of the Plant Seed Company, St. Louis, Mo., who has been spending a three week's vacation in northern Michigan, states that his firm contemplates taking more commodious quarters for its retail store.

SEEDSMEN will find much to interest them in the extract on "Congressional Seed and Tree Distribution," page 34 of this issue, from Secretary Wilson's report in the latest issue of the "Yearbook of the Department of Agriculture," dated May 9, 1902.

CHAS. P. BRASLAN writes from San Jose, California, July 31: "This section was visited a few days ago by a severe wind storm and the onion seed that was ripe at the time was to a great extent blown from the heads. This will mean a loss of about twenty per cent of the crop. This condition not only exists with one grower on this coast but with everyone. It will be safe to say that the crop will be one-fifth less than it was two weeks ago."

The May Souvenir.

The accompanying illustration is from a photograph of the oxidized silver fern dish presented to Mr. and Mrs. L. L. May at the close of the recent seedsmen's convention. The inscription on the gift is as follows: "A souvenir of a June-day's trip, from their friends of the American Seed Trade Association. St. Paul, June 25, 1902. To Mr. and Mrs. L. L. May."

German Seed Crops.

The following is an extract of a report from the Magdeburg (Germany) region on the crop prospects: "Mangel wurzel, stock carrot, radishes and peas promise very well; beans, lettuce, kohlrabi and Savoy cabbage only medium; rutabaga, white cabbage and onions are rather poor and the red cabbage very poor."

SILVER FERN DISH PRESENTED TO MR. AND MRS. L. L. MAY.

The weather in May was very unfavorable for pansies, so that they were still in full bloom at the end of July, and the continuous cloudy weather has been very unfavorable to the forming of seeds. The aster stand is excellent. Ten-week stocks are very backward in consequence of the cool weather in May and June, and the best weather is required if a good crop is to be harvested.

BAY SHORE, N. V.—The Suffolk County Horticultural Association will hold a big flower show at the Bay Shore Opera House next November.

Admires High Standard.

ED. AM. FLORIST:—Enclosed is \$1 for subscription for the current year. I admire very much the pure tone and high business standard of the AMERICAN FLORIST. H. R. LEE.
Ocean Park, Cal.

OTTUMWA, IA.—C. Kranz has absorbed the business conducted by Miss Lotta Baker.

LIVERPOOL, ENG.—Arthur Newell, of Kansas City, Mo., sails to-day (August 6) for home.

Importation of New Crop Pansy Seed JUST RECEIVED

Type of Hunt's Unrivaled Pansy.

HUNT'S UNRIVALLED MIXTURE—Universally acknowledged the best and most reliable Pansy Mixture for sale anywhere. We do not trust to one grower for the Seed, but purchase on contract from several European Pansy Specialists their choicest strains and newest novelties. We then form the mixture ourselves, so we know absolutely that the correct proportion of each sort is used. Every variety is tested upon receipt and strains are discarded which do not show 87 1/2 to 98 % germination. The fact that the seed comes from so many sources is ample assurance against off varieties. The Odier, Cassier, Bugnot and Trimardeau strains, together with the striped and veined German Show Pansies, Masterpiece and all the late creations, forms a variegated and splendid mixture which defies competition. Trade pkt., 25c; 1/2 oz., \$1.00; 1 oz., \$8.00; lb., \$125.00.

OTHER FINE MIXTURES.

TRIMARDEAU—A mixture of all the Giant sorts, including the rich reds, yellows and blues. We have spared nothing to make this the highest quality giant mixture in America. Trade pkt., 20c; 1/2 oz., 75c; oz., \$3.50.

LARGE FLOWERING MIXED—A fine mixture of the large-flowering sorts, including all the latest French Pansies. Trade pkt., 25c; 1/2 oz., 75c; oz., \$1.00.

CHOICE MIXED—Where a cheaper grade will do this mixture is recommended. Fine for bedding. Trade pkt., 15c; 1/2 oz., 10c; oz., \$2.00.

PRIMULA—Hunt's Florists' Mixture "THE GRAND." Fine assortment of colors, including the better selling shades and all the Giant sorts of Chinese Primula, English grown seed. The seeds forming this mixture are grown for us by English Specialists. The quality is uniform and always the best to be had anywhere at any price. Trade packet, 50c; 1000 seeds, \$1.50.

CALCEOLARIA—Hunt's Hybrid Grandiflora. The best Florists' mixture on the market, containing all the tigered, mottled, variegated and spotted types, beautifully marked and self colored strains, representing a vast and marvelous diversity of colors. Trade pkt., \$1.50, Calceolaria Special, \$1.00, Fine mixed, 50c.

CINERARIA—Hunt's "SPECIAL" mixture. An assortment of unquestioned merit containing all the finest English strains exclusively. 1000 seeds, 75c; 2 trade pkts., (2,000 seeds), \$1.25. Finest German Mixture, 50c trade pkt.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSEYRYMEN.

THAS. A. IJGENFERTZ, Pres.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y. Twenty-eighth annual convention, Detroit, Mich., June, 1903.

THE Association of American Cemetery Superintendents meets at Boston, August 19 to 22.

WILLIAMSBURG, IA.—Hugh Harrington, of H. Harrington & Co., nurserymen, was married to a Miss Sheetz, at Davenport, July 26.

THE sixteenth annual convention of the Wisconsin State Cranberry Growers' Association will be held in the vicinity of Cranmoor and Elm Lake R. R. Stations August 19. W. H. Fitch, of Cranmoor, is secretary of the association.

NURSEYRYMEN will find much to interest them in the extract on "Congressional Seed and Tree Distribution," page 34 of this issue, from Secretary Wilson's report in the latest issue of the "Yearbook of the Department of Agriculture," dated May 9, 1902.

THE Red river fruit belt in northern Texas is proving to grow apples very successfully. The varieties most grown, named in order of popularity, are Ben Davis, Jonathan, Red June, Early Harvest, Black Twig, Winesap and Gano, with many other varieties on trial.

PATRICK BARRY, of the firm of Ellwanger & Barry, who for years was president of the Western New York Horticultural Society, provided a memorial for horticulture in the form of a legacy to the society, the interest upon the bequest to be used among other things for the encouragement of originators of new and valuable fruits. By the action of the society the sum of \$50 was to be put into a gold medal, to be known as the Barry medal, and this was to be given to the originator of a deserving new fruit. At the last annual meeting of the society two of these medals were awarded, one to Charles G. Hooker for a red currant, and the other to John Charlton, for a grape. These medals have now been issued. On one side is a faithful likeness of the remarkable man whose name the medal bears, and on the reverse side is an inscription showing the nature of the award.

Study of Commercial Trees.

One of the most important and interesting undertakings by the Bureau of Forestry of the Department of Agriculture during the present field season is a careful study of a number of the most valuable American commercial trees. This will include among others a study of the Adirondack balsam, in Franklin county, New York. Incident to the work of the bureau in connection with the Chippewa Indian reservation in Minnesota is a careful study of the red pine in progress.

A study of the rate of growth in the sugar pine in California, which was begun last season, is now being continued. Last year's work began in the northern part of the state and in southern Oregon, and this season the examination will be continued southward with the idea of covering the full commercial range of this important timber tree.

The southern hardwoods will be studied in Kentucky, North Carolina and West Virginia. This work will be mainly devoted to the consideration of the

oaks and the yellow poplar, the idea being to study them in their commercial ranges, along with other trees which occur in mixture with them.

Kansas City Parks.

"Uncle" John Thorpe, superintendent of the flower show, and Arnold Ringier, a seedsman of Chicago, were taken for a drive over the city's park and boulevard system yesterday afternoon by Samuel Murray, says a Kansas City newspaper of August 4, and both admitted last night that they had seen sights such as they did not suppose could be seen here.

"You people don't know what you have in Kansas City," said Mr. Ringier. "I was never so surprised in my life as I was when I saw the beauty of Kansas City's parks and drives. Why, Chicago cannot hold a candle to some of them."

Mr. Thorpe expressed great surprise over the tree system he saw.

"Your trees are finer than we have in Chicago by a good deal."

"And when John Thorpe says that," added Mr. Ringier, "It is pretty nearly so."

Lowell, Mass.

FORMER CITIZENS OF LOWELL RETURN FOR A WEEK BUT SPEND LITTLE MONEY WITH FLORISTS.—VARIOUS NOTES.

This has been "Old Home" week, which brought a good many thousands of people to the city but they did not spend much money with the florists. One day over 5,000 firemen were in parade, all wearing some sort of a bouquet, but they were from somebody's garden. However, much money was left in the city and the florists will get their share of it eventually. Funeral work has been a little more plentiful but with the abundant supply of stock it is easily attended to and scarcely makes any impression on the surplus. The supply of asters at present is tremendous and \$2.50 per thousand buys good stock.

Harvey B. Green returned last week from a business tour and has now taken his wife and family down in Maine for a few week's rest.

George W. Patten starts for Salt Lake City next Wednesday to attend the Elks' convention. He will return via San Francisco.

Mr. and Mrs. Alex. Wallace, of New York, were the guests of M. A. Patten, in Tewksbury last week.

Patten had charge of the decorations at the Fernald-Pearson nuptials in Boston last Tuesday.

A. M.

Strawberry Plants.

FROM POTS. Well established young plants of Clyde and Wadfield (both immense croppers), for planting now and in August. Warranted to produce a full crop of the finest berries next spring. Price 50c per doz.; \$3.00 per 100. P. S.—100 planted now will give an ordinary family all they can use.

THE AMERICAN FLORIST CO.,
.....324 Dearborn St., CHICAGO.

Our Pansies, Cannas and Roses received gold medals at the Omaha Exposition in 1898 and the Pan-American Exposition in 1901.

MASTERPIECE.

VAUGHAN'S "INTERNATIONAL"

Received the only reward for Mixed Pansies at the World's Fair. It is to-day better and more complete than ever. It contains the cream of the stock of 10 Pansy specialists. There is no better mixture in existence, as all the florists who saw or used it can tell you. Price per oz., \$10.00; 1/2 oz., \$5.00; 1/4 oz., \$1.50; trade pkt., 50c.

VAUGHAN'S "GIANT MIXTURE."

This mixture is specially made by us from all the separate colors of Giant Trimardeau, the Giant Bugnot and Cassier and several special strains which cannot be had any other way. If your trade demands large flowers there is no better mixture. Price, 1/4 lb., \$14; oz., \$4; 1/2 oz., 60c; td. pkt., 25c.

VAUGHAN'S PREMIUM MIXTURE.

Embraces all the varieties of the Fancy German Sorts. We have sold this mixture for the past 16 years and it has given general satisfaction. Per pkt., 25c; 1/2 oz., 80c; 1/4 oz., \$3.00; oz., \$5.50.

IMPROVED GERMAN MIXTURE.

This is a mixture of three strains from different German growers and is made up mostly of separate colors, with a sufficiently large percentage of white and yellow. Per large pkt., 25c; 1/2 oz., 40c; 1/4 oz., 60c; oz., \$2.00.

A prize for greatest number of spares in three games.

INDIVIDUAL CONTESTS.

The Watson trophy, gold badge, for highest total in three games. Given by G. & C. Watson, Philadelphia, and to be known as the "Old Man's Race." Open to all, 55 years of age or over.

The Berkowitz medal, for highest total in three games. Given by Paul Berkowitz of Bayersdorfer & Co., Philadelphia, to be known as the "Young Man's Race." Open to all, 25 years of age or under.

A. B. CARLEIDGE,
ROBERT HALLIDAY,
Committee.

Philadelphia Gardeners' Cricket League.

Wootton met Ravenhill at Ravenhill on Saturday, August 2, and succeeded in winning by almost the same score as from Wolruh. Captain Long can well establish the claim for the championship for this year, and the veteran Hammond will stand as a good example for aspirants for cricketing honors. The score follows:

WOOTTON.

S. Hammond lb w b Boyington	23
W. Burnett c McCleary b Robertson	0
G. Cummings c McCleary b J. McCleary, Jr.	13
J. Dennis b J. McCleary, Jr.	0

F. C.

Shooting Contest at Asheville.

INDIVIDUAL CONTESTS.

First event, 15 targets, 1st, 2d and 3d prizes (high guns).

Second event, 25 targets, 1st, 2d and 3d prizes (high guns).

The team to compete against that of Asheville will be selected according to the records made in the above two events.

TEAM MATCH.

Asheville vs. S. A. F. 25 targets per man.

A memento of the win will be presented to each member of the winning team. The match will take place Thursday afternoon, August 21, and we will have the use of a very nice grounds, regularly fitted up for this sport, equipped with magazine and set of expert traps, and we can assure every lover of the gun a pleasant afternoon's sport. We would urge that all of the craft who shoot, will not only attend the coming convention, but will bring along their guns and shells and join in this outing.

ROBERT J. HALLIDAY, (Com.)
A. B. CARLEIDGE, (Com.)

At Philadelphia.

Another exciting contest between the "ins" and the "outs" of the Asheville team took place on the club alleys last Thursday evening. It was the second of a series of three or more games to try out the team and get them used to working together. The first match, a week ago, resulted in a defeat for the Ashevilleers, as they are called. This time, however, the honors rested with the "regulars," they defeating the "scrubs" by fifty-one pins in the three games. Messrs. Harris and Westcott were not in the game for the "scrubs;" neither was Anderson for the other side, and as the first two were high for their side in the other argument, had they played there might have been a difference. While the scores were not quite as good as in the first game, they are comforting and in a measure satisfactory. The scores follow:

ASHEVILLEERS.	1st	2d	3d	TOT.
Moss	169	194	176	539
Starkey	135	141	149	425
Anderson	115	115	—	230
Watts	148	159	190	497
Robertson	159	159	141	459
Craig	148	129	175	452
Kirt	176	224	157	557
Totals	1065	1006	1064	3065

SCRUBS.	1st	2d	3d	TOT.
Polites	136	166	170	472
Gibson	152	132	135	419
Harris	148	148	—	296
Kuestner	195	166	163	524
Adelberger	110	144	156	410
Etmerman	150	166	171	487
Connor	179	194	151	524
Totals	1092	968	1094	3054

The afternoon matinees and the evening performances take place with more or

less regularity and these, in addition to the contests that rise to the dignity of matches, keep the pin boys busy. The following is a list of the averages of all games bowled for the month of July:

Mooney	177	Harris	160
Dunham	175	Bonsall	159
Moss	167	Adelberger	157
Kirt	165	Fletcher	155
Kuestner	164	Anderson	149
Connor	163	Craig	148
Westcott	161	Gibson	145
Etmerman	160	Watson	143
Polites	160	Robertson	140

K.

PROVIDENCE, R. I.—The store of Johnston Bros., on Westminster street, was deluged with water from the automatic sprinklers in the building overhead on last Thursday evening, a small blaze having started in one of the rooms.

TOLEDO, O.—Anton F. Schramm has sold his interest in the firm of Bernard Schramm and bought out the retail business of Moore W. Mahaffey. Mr. Mahaffey is looking for a site to go into the wholesale growing of cut flowers.

WASHINGTON, D. C.—Elmer Keek is preparing to remove his range of houses to a larger tract of land outside the town and will build a downtown store and show house.

THE PIERSON FERN Nephrolepis Piersoni.

The Most Valuable Novelty Introduced
In Many Years. Awarded

GOLD MEDAL

Massachusetts Horticultural Society, March, 1902. A rare distinction, having been awarded only a very few times in the history of the society. Also Gold Medal by New York Horticultural Society, May, 1902, for the best horticultural novelty. The highest honors that can be bestowed on any horticultural novelty in America. These very high awards testify to the sterling merit of **Nephrolepis Piersoni**.

F. R. PIERSON CO., Tarrytown-on-Hudson, N. Y.

Nephrolepis Piersoni is as easy to grow and propagate as the well-known Boston Fern, of which it is a sport and which it will assuredly supplant in popular favor.

THIS WILL BE A MONEY MAKER FOR YOU!

See our exhibit of this at the S. A. F. Convention, Asheville. Will be introduced to the trade in spring, 1903. Demand is sure to be enormous. Place your order at once in order to secure early delivery, as orders will be filled strictly in rotation.

Prices: \$9.00 per doz.; 50 plants at 60c each; 100 plants at 50c each; 500 plants at 45c each; 1,000 plants at 40c each.

IVORY, or White Golden Gate. TRUE STOCK

Strong 4-inch pot plants, \$6.50 per 100; \$60.00 per 1000.

Strong 2 1-4-inch pot plants, \$3.00 per 100; \$25.00 per 1000.

TRADESPEOPLE HAVE THE BEST OUTING ON RECORD.—GREAT BOWLING CONTEST.—PERSONAL NOTES.

The outing of the Nebraska and Iowa Florists' Society was a grand success. The attendance was large and it was the merriest party we have had together since the S. A. F. convention here four years ago. The ladies enjoyed themselves on the shores of beautiful Lake Courtland, while the men had a fine bowling contest for a prize donated by J. F. Wilcox for the best two out of three games. Mr. Wilcox himself was the captain of the winning team but it was a great struggle and not decided until the last ball had been rolled, for the victors were only one pin to the good. At eight o'clock the band played a march and some fifty jolly florists and their ladies promenaded to the well-laden refreshment table for supper. We hope to see many more such outings. A photograph of the group at the picnic is reproduced on page 38.

Mr. Nelson, who has been with Hess & Swoboda, has been appointed florist at the State University of Nebraska.

J. J. Hess was at Tecumseh to attend the summer meeting of the Nebraska State Horticultural Society.

Arnold Kingier, of Chicago, is spending a few days here on business. GRIPPE.

Minneapolis.

TRADE DROPS OFF AND WHOLESALERS CARRY THE STOCK.—SUMMER FLOWERS IN DECIDED SURPLUS.—PERSONAL NOTES.

Roses and carnations are in fair supply, but of gladioli, asters and sweet peas it is an abundance, with a very quiet market. The retailers carry a very small stock now, so it keeps the wholesalers with a surplus. Shipping trade has dropped off considerably and will continue dull until about the end of September.

They say E. Nagel, known by all as "Grandpa," was nearly laid up from exertions in the fat men's race at the recent picnic.

A. Swanson does not report a very brisk business but his display windows never lose their beauty.

A good many of the trade are taking a day off now and then on fishing excursions.

"Ted" Nagel is again back in the store and reports a fair trade.

C. F. Rice has returned from a trip in Iowa. C. F. R.

KANSAS CITY, Mo.—John Thorpe is here in conference with F. J. Taggart, arranging the premium list and other details for the big November flower show.

FUMIGATION METHODS

By PROF. W. G. JOHNSON

Formerly State Entomologist of Maryland

A Practical Treatise and timely work on cheap and effective means of destroying insect pests and other vermin in various places. This work is the outcome of practical tests made by the author, together with the experiences of others, and is one of the most important books published this season and is much needed at this time. It will be of particular interest to

FRUIT GROWERS AND NURSERYMEN owing to the widespread prevalence of the notorious San Jose scale. Hydrocyanic acid gas is the only practical remedy for the destruction of this pest and is being used more extensively than ever before by nurserymen and fruit growers. The perfection of the apparatus for fumigating young orchard trees is outlined in this work. The methods can be easily applied in orchards and nurseries for many dangerous pests at very small cost. The writer is considered the best authority on this subject in this country and has left nothing undone to make this the most complete work of the kind ever published.

GARDENERS AND FLORISTS have found that vegetables and flowers cannot be grown under glass without frequent fumigation for the destruction of insect pests. Hydrocyanic acid gas has solved this problem. The methods of procedure are fully described and every detail is given for generating and applying the gas.

MILLERS AND GRAIN DEALERS have been looking forward to the publication of this work, as hydrocyanic acid gas has been found one of the most important materials for clearing mills and warehouses of insects. The subject of carbon bisulphide for fumigating mills and elevators containing grain in storage is also thoroughly considered. To this trade the work is indispensable and transportation companies have found it of great value for the fumigation of cars, ships and other inclosures infested with vermin.

FARMERS OF THE COUNTRY have here fully described a simple, easy remedy for gophers, prairie dogs, squirrels and other animals in the ground, and rats and mice in any inclosure.

COLLEGE AND STATION WORKERS will find it an up-to-date reference work on this subject. It is complete in every respect and is the only work of the kind ever published. It is written in a popular non-technical style, profusely illustrated, handsomely bound, covering 250 pages, price, post-paid, \$1.00.

AMERICAN FLORIST CO. 324 Dearborn St. CHICAGO, ILL.

Dreer's Offer of Cibotium Schiedei

ARAUCARIA EXCELSA GLAUCA.

5-inch pots, 8 to 10 inches high, 2 tiers.....	\$.75 each
6-inch pots, 12 inches high, 2 to 3 tiers.....	1.00 each
6-inch pots, 15 inches high, 3 tiers.....	1.25 each
7-inch pots, 18 inches high, 4 tiers.....	1.50 each

If you have never tried this beautiful Fern in fine decorations or as a house plant, you should become acquainted with it at once. Its points of merit are so many that you cannot afford to be without it. It possesses a graceful, delicate habit unlike any other plant and while its appearance is that of being very soft, it is really as hardy as any of the commercial Palms. We have a fine stock of it this season and offer heavy plants as follows:

- 5-inch pots, \$1.00 each; \$10.00 per dozen.
- 7-inch pots, 1.50 each; 18.00 per dozen.
- 9-inch pots, 3.00 each; 36.00 per dozen.

The 7 and 9-inch pots are beautifully finished plants, suitable for decorative work.

Special Offer of Araucarias.

We have in stock about twelve thousand Araucarias, on which we are in a position to offer special values. It will pay you to procure your next winter's supply now and not only gain the benefit of the summer's growth, but also cheap transportation rates, as these plants can be safely shipped by fast freight during the summer months.

ARAUCARIA EXCELSA.

Columbus, O.

GROWERS MAKING GOOD PROGRESS WITH THE SUMMER WORK.—GOOD CARNATIONS.—NEW GERANIUMS AND CANNAS.—VARIOUS NOTES OF LOCAL INTEREST.

J. R. Hellenthal is about at an end with his building for this season. This place, with its reconstructed houses and fine potting shed, is a model. The large potting shed is so constructed as to allow a horse and wagon to back in out of the cold or wet. This is an advantage, it is plain to be seen, every florist should have. Mr. Hellenthal has a seedling geranium, something on the Leviathan type, which has been tried on his place for the past three years. It seems to be very promising. He also has some seedling cannas, of which one variety, at least, will hold its own with any good scarlet.

Asters are coming in more than plentifully and it is a question if the demand will keep pace with the supply. Gladioli are also fine and plentiful this year. The Livingston Seed Company is cutting a fine lot of these at the gardens west of the city, where the display of French cannas is also fine and will be quite a treat for those who will be in Columbus the latter part of this month to attend the state fair. It will surely pay them to take in these trial grounds.

Carnations are now being housed by some of the growers, the plants being of good size and clean. Crocker stood the hot weather under glass this summer better than any other similar variety. The old plants of this variety, where still left growing, are producing good quality of bloom up to the present date.

Among roses Golden Gate will be grown more extensively than heretofore, it having proved itself a free bloomer at all times. Ivory will be given a trial in this locality and if found as free as Golden Gate will no doubt replace the Bride for summer bloom to a great extent.

The Franklin Park Floral Company is making a change in the ventilating system by putting in all new machines of the Evans make. The summer cut of roses and carnations on this place broke all previous records. CARL.

HARTFORD, CONN.—Another daughter, the second, was presented to J. F. Huss by Mrs. Huss on the morning of July 28. Genial "J. F. H." is as happy as a lark and is doing as well as could be expected.

GERANIUMS 20,000 Ready Now.

Society of American Florists National Convention,

AUGUST 19th to 22nd, 1902, ASHEVILLE, NORTH CAROLINA.

For this convention the "Big Four Route" (C. C. C. & St. L. Ry.) will sell tickets August 16, 17 and 18, good for return leaving Asheville not later than August 25, at **one fare for the round trip** from all "Big Four" stations. (\$20.00 round trip from Chicago.)

Florists' Special train will leave Chicago 8:30 p. m. Sunday, August 17th, running via "Big Four" to Cincinnati, thence via the Queen & Crescent and Southern Railways. Monday forenoon will be spent in Cincinnati, sight-seeing, etc., leaving there at 2 p. m. on the Florists' Special. Every florist should make a big effort to attend this convention, the first to be held in the beautiful Southland.

For berths in sleepers from Chicago or Cincinnati, and further information call on, or address E. F. WINTERSON, President Chicago Florists' Club, 45 Wabash Avenue, or J. C. TUCKER, Gen'l. Nor. Agt. "Big Four", 234 S. Clark Street, Chicago.

FROM ALL PARTS.

AM. FLORIST CO.—It is remarkable the amount of orders my 2 inch ad. brought me from the Special Number of your paper. Orders came pouring in from all parts of the United States. The American Florist is O.K.
W. W. COLES.

IT IS THE BEST.

EDITOR AM. FLORIST—Enclosed find \$1 for which please renew my subscription to the American Florist. It is the best paper going. The last Special Number alone was worth the year's subscription.

JOHN RODGERS.

IT PAYS BEST.

ED AM. FLORIST.—My advertisement in your paper is paying better than in any other paper and better than it ever did before. J. N. PRITCHARD, Elk Park, N. C.

MR. ADVERTISER:

You know the excellence of the Special Issues which are a feature of this journal. You know that it covers the trade, that its readers await these Special Numbers with keen anticipation, that they are highly prized, kept for months, read and re-read. That's what makes their particular advertising value.

The Asheville Number, issued at the time of the convention of the S. A. F. at Asheville, N. C., will appear August 16. It will be in every way equal to the best of our splendid Special Issues. That's enough said. Advertising copy to be in time must reach us by noon on Thursday, August 14. It's to everyone's advantage if you are early.

Very truly yours,

AMERICAN FLORIST CO.

324 Dearborn St., Chicago, Ill.

REACHES GOOD PEOPLE.

AM. FLORIST CO.—Your paper certainly does bring orders from good, reliable firms.
F. R. WILLIAMS CO., Cleveland.

BROUGHT MANY REPLIES.

AM. FLORIST CO.—My advertisement in your paper brought me so many replies that I think I will sell all the plants I care to spare; another insertion would swamp me with orders.
R. SCHIFFMANN.

Please Mail Your Adv. Now.

Cleveland.

LITTLE BUSINESS SAVE FUNERAL WORK.—SLIGHT DEMAND FOR GARDEN FLOWERS.—GROWERS BUSY BUILDING.—SUCCESSFUL SEASON ENCOURAGES MANY ADDITIONS.

Business and weather conditions are about the same as last week; nothing doing except funeral work. The roses have picked up a little and quality is a little better than at last report. Carnations are very scarce, scarcely any coming into market. Branching asters from indoors promise to be fine. Some superb gladioli are to be seen in the store windows. Large quantities of rudbeckias and hardy phloxes are in evidence, with no special demand for them. The growers are busy benching carnations. They are beginning to realize the value of early planting.

Greenhouse building is in full swing now. Lars Andersen, for many years connected with the J. M. Gasser Company, has branched out for himself and is erecting a plant of about 10,000 feet of glass. He will deviate from the usual course of producing flowers and grow lettuce instead, for which there is a growing demand in this city.

The Andrews Brothers, on Detroit street, have decided to dip a little deeper into flower raising and are erecting two houses 20x100 for carnations. Their success this past season with one house has been very encouraging.

Robt. Kegg, the genial superintendent of parks, is erecting on his West Park place four houses 22x100 for cut flowers; the houses are to be strictly up to date in every respect.

Lincoln Brown is very well pleased with his new position on Lake avenue. Mrs. Brown, I am glad to state, has entirely recovered from her recent illness.

Chas. Schmitt has returned from a trip to Philadelphia, New York and the seashore, looking as ruddy as a mountaineer.

Mrs. Isaac Kennedy and family have gone to Philadelphia for a visit with friends.

Mr. Paterson, of Montgomery, Ala., was a visitor this week. Echo.

DES MOINES, IA.—W. L. Morris has begun work on the big greenhouse at his new location on West Thirtieth street. A boiler house and work shed will be built this season and next year the old range will be re-erected here and several more new houses added.

American Florist Ads

Always do business, week days and every day. Sundays and holidays, all over the country, at home and abroad.

Cincinnati.

TRADE GOOD FOR THE SEASON AND PROSPECTS VERY BRIGHT FOR AUTUMN.—STOCK NOW SCARCE AND PRICES LOW.—DOINGS OF GROWERS AND OTHERS.

Business for this season of the year is good, and flowers, too, hold up exceptionally well. Bride and Bridesmaid roses are a little scarce, there being not enough at times to fill orders. Some very good Kaiserin and La France are being received, which sell readily at \$3 and \$4 per hundred. Carnations are poor in quality and go at 75 cents per hundred. Asters are very good and move pretty well at 75 cents per hundred. Gladioli and other outdoor flowers are plentiful. We have had delightful weather all summer and this has a great deal to do with the quality of flowers.

The florists of this city are looking forward to the Fall Festival, which takes place September 15 to 27. There will be a great many flowers used for the civic parade and I hear of several good sized orders booked, one calling for \$500 worth of material. President Roosevelt will be here and this, too, will keep one or two florists busy furnishing flowers and decorations for the receptions. The future outlook for business is very bright.

Will Murphy is getting along first rate with his building. He has torn away all his old houses and built an extensive new range. He will be ready to plant his carnations in a week or ten days.

J. A. Peterson is on a three weeks' business trip, visiting St. Louis, Chicago, Detroit and Cleveland before taking in the convention at Asheville.

Henry Greve writes from Dallas, Texas, that business is very good. Henry is a Cincinnati boy and we are glad to hear that he is prospering.

From present indications the attendance from this city at the S. A. F. convention at Asheville will be limited to about a half dozen.

Another store has been opened on Fourth street, by Mr. Eberhardt, under the name of Eberhardt & Wetzel. D.

PITTSFIELD, MASS.—The C. M. Atkinson greenhouses on Elm street have been leased to Richard Engelman.

CLARKSVILLE, TENN.—James Morton, who has assigned with liabilities of \$4,675.12, charges his failure to the loss by hail about a year ago, which put him so far behind that he has never been able to catch up.

The Model Extension Carnation Support.

Flushing, Long Island,
Dec. 14th, 1901.

MR. THERON N. PARKER,
Brooklyn, N. Y.

Dear Sir — I have used your Wire Carnation Support the last two years, in all about 12,000. They fill the bill in every particular. Nothing could be more satisfactory and would give me a great deal of pleasure if I can bespeak a good word for you to the trade and you are at liberty to refer to me at any time.

Very truly,

A. L. THORNE,
La Fayette, Ind.,
July 8th, 1902.

MR. THERON N. PARKER,
Harrison, N. J.

Dear Sir: — After using your Model Carnation Support in two of our houses the past winter, we have come to the conclusion that it is perfectly adapted to supporting carnations, and shall use them on all our plants the coming season.

We were much pleased with the simplicity, strength and neat appearance of the support.

Yours truly,

F. DORNER & SONS CO.

THE Gardeners' Chronicle.

A Weekly Illustrated Journal.

ESTABLISHED 1841.

The GARDENERS' CHRONICLE has been for over SIXTY YEARS THE LEADING JOURNAL of its class. It has achieved this position because, while specially devoting itself to supplying the daily requirements of gardeners of all classes, the information furnished is of such general and permanent value that the GARDENERS' CHRONICLE is looked up to as the STANDARD AUTHORITY on the subjects of which it treats.

Subscription to the United States, \$1.20 per year. Remittances to be made payable to H. G. COVE.

OFFICE:—

41 Wellington St., Covent Garden, London, England.

Bargains FOR Florists.

We are headquarters for a general assortment of the necessary material and supplies that you are looking for. If you are about to improve or construct, consult us.

In connection with the dismantling of the Pan-American Exposition, we have for sale:

20,000,000 FEET of fine seasoned lumber, practically new, consisting of all sizes of joists, timbers, dressed and matched boards and flooring; also sash and doors.
50,000 FEET of roofing glass.

PIPE.

We are headquarters for pipe. We offer you:

100,000 FEET of 2 to 4-inch wrought iron, lap welded casing. We can furnish this material in three ways: Either with sleeve or jacket couplings, screwed ends and threaded couplings or with expanded cast iron flanges with bolts and nuts.

1,000,000 FEET of standard black wrought iron pipe, size ¾ to 12-inch. It is second-hand but has new threads and couplings and is in first-class condition.

1,000 TONS of galvanized wire 9, 10, 11, 12, 13, 14 and 15 gauge.

50,000 FEET of 2, 3 and 4-inch cast-iron soiled pipe and fittings.

100,000 FEET of garden hose, ¾ and 1-in.

75,000 FEET of cotton rubber-lined fire-hose, (rubber-lined in and outside), ranging in sizes 1 to 2½-inch.

VALVES and fittings of every kind.

BOX COILS for heating purposes.

RADIATORS, new and second-hand.

We also offer the following bargains in

Heating Boilers

50 CAST-IRON sectional heaters, capacity from 450 to 5,000 feet.

1 NO. 2 Standard Kroeschell hot water heating boiler.

FOUR 36x10 Horizontal Tubular.

FOUR 36x12 Horizontal Tubular.

FIVE 42x10 Horizontal Tubular.

FIVE 42x12 Horizontal Tubular.

SIX 48x14 Horizontal Tubular.

TWO 54x16 Horizontal Tubular.

FOUR 60x16 Horizontal Tubular complete with all fittings.

PUMPS of all Descriptions.

A carload of shovels and spades that we are selling at \$5.00 per dozen.

We carry a complete stock of hardware and farm implements, besides plumbing material of every kind.

WARM WEATHER CAUSES INDOOR STOCK TO DETERIORATE.—GOOD MATERIAL FROM THE GARDENS.—GROWERS ARE BUSY BUILDING.—VARIOUS LOCAL NOTES.

Very warm weather has had a bad effect on roses and, excepting a few Meteor and Kaiserin, stock is of very inferior grade. The new plants seem late coming into bloom and the flowers cut from the young stock are short in the stem. Beauties are again on the market but are mostly short of stem and pale in color. Outdoor stock at present is exceptionally fine. Sweet peas were never better or more plentiful and meet with ready sale. Asters are in quantity and the wet weather and cool nights have given good, clean flowers, larger than other seasons. Lilies are quite abundant, longiflorum, auratum and album helping out with funeral work.

Grobba & Wandrey, of Mimico, have purchased six acres of ground adjoining their present property. They have been hampered for space and will now grow more outdoor stock. The past season has been a very active one for them. Several new houses were put up, a new well sunk, new boilers installed and fresh paint put on. The place is now in fine order.

J. H. Dunlop has put up a range of seven houses under one roof. This is a new rose section and has been planted mostly in Bridesmaids and Brides. Tile benches are used and all the latest improvements make this the most modern section on the place.

The month of July was a good one; several good weddings and many funerals used up all available stock and often left one in a dilemma to fill orders.

With coal at \$7 per ton and coke at 10 cents a bushel, greenhouse heating is expected to prove expensive the coming season.

Frank Duffort, of Little York, has put up a new brick dwelling and will put up several houses before frost.

Mr. Smith, of Smith & Fetters, Cleveland, is a visitor. H. G. D.

NEWBURYPORT, MASS.—J. J. Conley has opened an attractive new flower store on Pleasant street.

GRASS LAKE, ILL.—The native yellow columbinum, or water chinquapin, (N. luteum) is blooming very profusely here this season.

WATER.

If you want water only when the wind blows a windmill will do your work and cost less money than our Rider and Ericsson Hot Air Pumps, but if you want water every day while your flowers are growing and do not want your pump blown down when the wind blows too hard, no pump in the world can equal ours. We have sold about 20,000 of them during the past twenty-five years, which is proof that we are not making wild statements.

Our Catalogue "A 3" will tell you all about them. Write to nearest store.

**SOCIETY OF AMERICAN FLORISTS AND
ORNAMENTAL HORTICULTURISTS.**

OFFICERS—JOHN BURTON, Philadelphia, Pa., president; J. W. C. DEAKE, Asheville, N. C., vice-president; W. M. J. STEWART, 79 Milk Street, Boston, Mass., secretary; H. B. BEATTY, Oil City, Pa., treasurer. The eighteenth annual meeting will be held at Asheville, N. C., August 19-22, 1902.

Advice From Fra Albertus.

"If the concern where you are employed is all wrong and the Old Man a curmudgeon, it may be well for you to go to the Old Man and confidently, quietly and kindly tell him that he is a curmudgeon. Explain to him that his policy is absurd and preposterous. Then show him how to reform his ways and you might offer to take charge of the concern and cleanse it of its secret faults.

"Do this, or if for any reason you should prefer not, then take your choice of these: Get out or get in line. You have got to do one or the other—now make your choice.

"If you work for a man, in heaven's name work for him!

"If he pays you wages that supply you your bread and butter, work for him—speak well of him, think well of him, stand by him and stand by the institution he represents.

"I think if I worked for a man I would work for him. I would not work for him a part of the time, and the rest of the time work against him. I would give an undivided service or none.

"If put to the pinch, an ounce of loyalty is worth a pound of cleverness.

"You cannot help the Old Man so long as you are explaining in an undertone and whisper, by gesture and suggestion, by thought and mental attitude, that he is a curmudgeon and his system dead wrong. You are not necessarily menacing him by stirring up discontent and warming envy into strife, but you are doing this: You are getting yourself upon a well-greased chute that will give you a quick ride down and out."

Topics of the Times.

As the eighteenth birthday of the S. A. F. rolls around, the value and accomplishments of that society become timely topics and may, perhaps, be touched upon in this small budget of horticultural gossip without encroaching upon the territory that will doubtless be much more ably covered in the annual address of the president of the society.

In union there is strength and, while the national society thus far has only included a fraction of the numerical strength of the trade, yet even that fraction, when in combination, has shown its force and been able to accomplish some things that we units of the trade had been powerless to do. Recognition of the trade by those autocrats of transportation, the express companies, was one long stride forward, and an advance that would have been long delayed had it continued to depend upon individual rather than organized effort.

Now the railroads have gone so far as to advertise special rates for the period covering the annual meeting of the society, and this year offer better terms than ever before, all of which goes to show that while we cannot yet give mortal combat to the glass trust, there is a measure of recognition being accorded to the florist trade.

The meeting of this year will be the first in the history of our society to take place in a really southern city and it is reasonable to expect that our brethren of the south will attend that meeting in goodly numbers and do all in their power to ensure its success. The hospitality of the south is far famed and there is every reason to believe that all the traditions on that point will be quite fulfilled.

But there is another thing that may be done, and possibly will be done, on this occasion; that is to show us by means of exhibits some of the advantages of the south from a horticultural point of view, for in a country that is such a mine of wealth from a botanical standpoint, as the state of North Carolina, for example, there must be great horticultural possibilities, and many of these possibilities may now be in course of development.

That many members make the S. A. F.

meeting the occasion for a pleasure trip is not doubted, but the exchange of ideas between visitor and visited is also bound to occur, and is decidedly one of the valuable features of such gatherings. It will be remembered that in the manufacture of various kinds of small hardware a number of small castings are cleaned and polished at the same time by rubbing against each other in a "tumbling-barrel," and on the same principle the ideas of one man may be polished into shape by rubbing up against the ideas of the other fellow.

Of course there appears from time to time some one who thinks the S. A. F. is conducted by a small ring for their own benefit, and in much the same manner that seems to be most approved in municipal politics, but if such were the fact, there is one remedy that is equally open to all members of the society, and that is found in the privilege of attending the meetings and casting a ballot at the proper time and where it will do the most good.

A kick entered after the meeting is over is not likely to mend matters to any great extent, nor to make any radical change in the management of either a society or a political party. The proper time to make a protest effective is at the time the objectionable action is about to be taken. Therefore if there should be some progressive brother who has useful suggestions to offer regarding our national society, it is respectfully submitted that the third week in August is the accepted time, and the Auditorium in Asheville, N. C., is the proper place for their presentation.

Another topic that comes to mind just now is the apparent trend toward centralization in our business. From the various "first greenhouses in America" that have been illustrated in different publications, down to the modern, extreme type of commercial greenhouse that is anywhere from 500 to 1,000 feet long, is a big stride, though one that has been made in a comparatively short time. While the limit of usefulness and convenience may have been reached in regard to the dimensions of individual structures

the limit in size of establishment has not yet appeared. Glass is put up by the acre now, and it would require a bold prophet to predict what may be done twenty years hence. The question arises as to whether some of the little fish will not be swallowed up by some of the larger occupants of the pool of trade before that time arrives, and whether the dear public will not be considering the pros and cons of the florists' trust some time in the future.

If this increase of glass area continues proportionately we may read something like the following among the trade reports of the future: "We are creditably informed that on Monday next the John Smith Rose Company will send in by refrigerator cars, about 100,000 extra fancy, long-stemmed Beauties. This information, coupled with the fact that favorable crop reports have been received from a number of prominent producers throughout the rose belt has caused some little depression in the market, and we venture to predict that during next week at least earload lots may be secured at a reduction of several points from present quotations."

But before such reports become common there will be improvements made in the methods of distribution, and the central market idea will be developed in many of our cities, for with the phenomenal increase of business in cut flowers there must be advances made in the methods of handling the product.

When the original proprietor of the Ames shovel works began making shovels in North Easton, Mass., it is related that after having made a few of these useful tools he would close up his shop and take his product into Boston, where he would sell these few shovels and then return home to make some more. But as the quality of his output became known the demand increased to such a degree that shop after shop was added to the plant and the product increased to hundreds of dozens per day, and it was no longer a one man business run in a one-horse way. And judging from the way that greenhouse establishments have grown during the last decade, it does seem just a little primitive that the product should be peddled about from store to store, as is still the practice in some of our large cities. But the flower market idea is gaining in strength, and we believe will effect a lodgement even in our conservative city of Philadelphia before many more seasons have gone into history.

Novelties among plants and flowers are always timely topics to the trade, but among the former there have been comparatively few of very great merit of late years, this possibly being due to the fact that more attention has been paid to improved cut flower stock than to foliage or ornamental plants. This is quite natural on account of the fact that the returns are secured from a new cut flower or improved variety in much less time than is possible from the introduction of a new foliage plant or a new orchid, and quick returns are what most people are looking for in this hurried age.

The improvements that have been made in florists' flowers are truly wonderful, and the improvers deserve all the credit that is due them, also all the duents that may be realized from their discoveries, for most of the valuable improvements that have been made in this line are the result of painstaking and systematic experiments.

There are being established some ideals, which goes to show that there is something definite in mind and that American

floriculture is making some definite advances. Our fine carnations are not all greeted with enthusiasm in Europe because there is a difference of opinion as to the ideal form for a carnation, and a flower that suits our markets may not meet with full approval on the other side, but this is no reason why we should not have standards of our own.

Our methods of exhibiting cut flowers are an advance on the older practice, a neat vase of long-stemmed roses, carnations or chrysanthemums being infinitely more graceful and more natural than the exhibition board of ancient usage, and also adding very greatly to the effectiveness of our various flower shows.

On the whole the horticultural outlook in this good year of 1902 is encouraging, both from an artistic and materialistic standpoint, even though competition may be keen.

W. H. TAPLIN.

George H. Ellwanger.

Few books have done as much to promote a knowledge and love of horticulture as the "Garden's Story," by George H. Ellwanger; and no book, it has been justly said, has taught its lesson so delightfully. With good reason, in that

GEORGE H. ELLWANGER.

the author has brought to his subject a long and practical experience, a fine and cultivated taste and the pen of a ready writer.

Mr. Ellwanger is the eldest son of George Ellwanger, the veteran and venerable horticulturist and founder of the Mount Hope Nurseries. He was born in Rochester, N. Y., and finished his education by a five years' course of study and travel in Europe. He thus became an easy master of French and German, and so can turn his command of those languages to good account and keep in ready touch with all the foreign periodicals and literature on floriculture and arboriculture. Many friendships and intimacies were formed at this time and in later visits to Europe, with such distinguished men as William Robinson, George Nicholson, Andre Leroy, Reynolds Hole and others, whom simply to have known argues a liberal education in the matter of roses and hardy flowers and every tree and shrub that blooms and grows.

But aside from his technical and scholarly knowledge in this especial field, Mr.

Ellwanger has loved to dig and delve and prune for himself, and to know intimately and as personal friends the daffodil and rose, the pæonia and phlox and every ornamental bush and shrub that serves to make the spring and summer glorious. He has said that every tree has its individuality as marked as the eyes or nose of a man, and it is this human sympathy with his impersonal friends among the trees and flowers, which has made the "Garden's Story" and his other volumes on nature so readable and helpful. The "Story of My House" followed the "Garden's Story" as a graceful companion piece, and Mr. Ellwanger has published in quick succession "In Gold and Silver," "Idyllists of the Country Side," "An Introduction to White's Natural History of Selborne," a new and revised edition of "The Rose," by H. B. Ellwanger, an anthology entitled "Love's Demesne," and other works. In the meanwhile, too, he has found time to contribute articles on flower or fruit to various garden journals. As a writer within these lines his characteristics are his catholicity, his graceful versatility and the assured knowledge wherefrom he speaks.

Mr. Ellwanger is a director and secretary of the Ellwanger & Barry Company and also director and secretary of the Ellwanger & Barry Realty Company. He is a member of the Author's Club, of New York, of the Pundit Club, of Rochester, the oldest literary club in America; and is an honorary member of the National Rose Society of England. All lovers of the queen of flowers will be glad to learn that he has promised for early publication a new, revised and fuller edition of "The Rose," by his brother, the late H. B. Ellwanger, the American standard of authority on that flower.

That George H. Ellwanger will succeed to the high honors of his distinguished father, George Ellwanger, the pioneer of American horticulturists and pomologists, would seem predestined by stronger laws than those of mere inheritance. Yet happily George Ellwanger is still with us, enjoying a ripe old age of almost four score years and ten.

A Wedding Decoration.

The accompanying illustration is from a photograph of a church decorated by Jos. Kift & Son, Philadelphia, for a June wedding. With the exception of the lilies in the baptistry and the central arch, the only flowers were roses, of which more than 6,000, medium to short-stemmed, were used. The varieties were Kaiserin, Bride, Bridesmaid, Queen of Edgely and Robert Scott, the colors being limited to white and pink. The effect was of a large arbor, covered with climbing roses in full flower. Each color was kept separate, the plants being apparently growing from large green pots which contained laurel branches and these, being covered with roses, showed a fullness and irregularity that gave the whole decoration a more natural appearance.

In the photograph, which was taken by flash light, the difference of color is not apparent, but, while each variety was kept to itself, they were trained, some straight, others diagonally, and all to look as natural as possible. The space covered was ten to twelve feet high by seventy-five feet long. The roses were arranged in Kift's vase rods, which were suspended by wire from stout tacks in the top of the cornice rail. The whole arrangement was in front of polished

A WEDDING DECORATION BY JOSEPH KIFT & SON, OF PHILADELPHIA, PA.

woodwork and was taken down without leaving a scratch. The pew ends and kneeling stool were decorated with white roses and palms were used in front of the platform and on either side of the front of the church. The baptistry, as is seen, contained Easter lilies in trumpet or horn shaped vases. The edge was covered with curved mossed boards, and on the arch lilies were placed in the vases on rods. The wedding took place on Saturday, and the Sunday following being children's day, the decorations, with the exception of the pew ends and kneeling stool, were allowed to remain. The cut flowers kept splendidly and were in such good condition after the evening service that they were distributed to the members of the congregation.

ROBERT KIFT.

CARNATIONS.

METHODS OF BENCHING.

We think the best time to bench carnations is from the first of July to the middle of August. We always try to have them benched during July if possible, especially the red varieties and others that are somewhat slow in starting. All the new ones we have on trial we bench early. It gives them a fair showing with the older varieties and also gives us a chance to see whether later planting would benefit them any. The stock for propagating purposes we like to bench from August 15 to September 1.

Our method of planting is as follows:

We first shade the houses heavily with mud wash. Then we empty the benches and clean them thoroughly with hose and broom. While they are still wet we give them a thick coat of lime wash and cover the cracks with leaves and straw to keep the soil from falling through. We are then ready for the soil. Having the soil hauled where it is most convenient, we add what fertilizer we think it needs, turning it over about three times and pulverizing it.

We fill about fifteen feet of the bench at one time, leveling it off sufficiently that it can be packed firmly by tramping. We then use a 2x4 somewhat longer than the bench is wide, so as to be able to get a good hold on each end, and rake the soil even with the top of the bench. We water the soil the day before we plant and mark off the bench so that we can tell just where each row goes.

We have two men who use good judgment in digging up plants, being careful to put the spades on each side far enough away from the plants so as not to cut any roots, each pushing down his spade at the same time deep enough to get below the bottom roots, lifting together so as to leave a large lump of soil around the roots. Other men pick up the plants and reduce the balls of soil so that we can just see the roots. In filling the two flats we cover all roots exposed and take them to a shaded place or into the house that is to receive them. We have enough help to keep two or more planters busy. They use care not to bunch the roots, and break the soil to give them a chance to take immediate hold, planting them a

great deal higher than they stood in the field and with about a quarter of an inch of soil over the top of the roots. We leave hollows around the plants to hold sufficient water to keep them growing, and water for three weeks in these depressions only. We syringe the plants twice a day and keep the walls and walks damp until the plants have taken hold. Then the shade is taken off so as to give them the full benefit of the sun, with plenty of ventilation at all times.

We have some two-year-old carnations growing in soil that we used last year, being sterilized, but not sufficiently, owing to lack of boiler capacity. We also have some young plants growing in new soil sterilized completely, and chrysanthemums growing in two-year-old soil. They all look very promising. In fact we are picking some very nice carnations from the two-year-old plants to-day. The crop they have on is enormous.

CHAS. KNOPE.

We commenced to bench our carnations July 17, and had them all planted early in August. In this section there is very little if any variation in the weather between the middle of July and the end of August. We are just as liable to get a hot spell one time as the other, so that practically, as far as the temperature is concerned, the conditions would be the same at either time. Our plants benched early have just so much more chance to brace up and get hold of the soil, and with us the results are decidedly in their favor.

Before beginning to clean out the benches we cover the glass with a lime and mud shading, adding a handful of salt to each bucketful of the mixture. This is to prevent the rain from taking it off before the plants are established, after which it is easily removed in a dry state with a broom. We give the house a thorough cleaning, both in the benches and underneath, before bringing in the soil.

The soil here is a black prairie loam. To this we add equal parts of a yellowish clay, which, when in a dry state, crumbles at the slightest touch. When ready to wheel in the dirt we haul one load of black soil, then one of clay, another of black soil, another of clay, and on top of this a load of well rotted cow manure, making a pile of five loads. These are dumped at the ends of the house, where the compost is thoroughly mixed and then wheeled onto the benches, a man inside leveling it as it is brought in.

We then sprinkle over the surface a dressing of fine bone meal, working it well in. Should the soil be in a dry condition we go over the beds and tread it down, but after so much rain we have not had to do so this season; it settles enough without.

In lifting the plants we leave on only the soil that clings to the roots. The plants are placed in boxes deep enough to hold them upright, the roots given a sprinkling and moved inside right away. Should the weather turn very hot, we take half barrels out to the field and fill them with water, dipping the roots before placing the plants in the boxes, first sprinkling a little dry soil on the bottom. We find this dry soil to stick to the wet roots, preventing any withering whatever.

We have now the most important part of all to deal with, that of setting the plants. Our plants are set eleven inches across the bench and twelve inches lengthwise. In planting we are very particular to get the roots spread well out around the plants and not on one side only, as we have noticed with some planters, also being particular that the plants are set no deeper than they were when growing in the field.

We then give them a good watering, around the plants only, after which we keep them syringed two or three times a day for about a week, by which time, if everything is right, they will have taken hold of the soil and less syringing is necessary. Some of the shading is also removed and in a very little while they will stand full sunlight.

In mapping out our planting we are particular to place together varieties that require the same temperature, as near as we can. Some varieties will need watching to keep them uniform in growth and prevent a shoot here and there running up to flower before you are ready for them. We do not put on the wire supports right away, but wait until the beds have been weeded a couple of times, after which the wires are placed and the plants are then ready for the winter's work.

CHAS. W. JOHNSON.

Planting the houses is the present move in carnation culture and there is no more critical period in a carnation plant's life than that between the field and its becoming established in the house. Preparation in the field consists of cutting off all developed buds. In fact, except with very late varieties, there is a distinct gain in cutting off every shoot that shows a bud,

as all buds formed in the field will produce second grade flowers. Aside from this the production of these second grade flowers robs the plant of its vitality at a time that vitality can be least spared.

Presuming that you have planted a few hundred more than you need of each variety, as all good growers do, all plants that do not show a healthy growth should be left in the field. Where every plant is needed, a little judicious trimming is good policy. All broken branches should be cut off clean, with a sharp knife. Under no circumstances break any branches off. All branches that show poor, unhealthy foliage should also be cut off. This treatment will sometimes give a healthy plant for the winter, but, as before stated, where you have plants enough it is far better policy to leave all such plants in the field.

The only point to be observed in digging is to break as few roots as possible

ROBERT BOTTOMLEY.

and to follow the digger closely, boxing the plants as fast as they leave the spading fork. The plants should either have the roots dipped in water or be well watered in the boxes, as each box is filled, for under no consideration should they be allowed to become wilted.

One cannot pick the exact weather for planting but it will pay to wait a day or two rather than dig the plants when a high wind is blowing, as on such days the rapid evaporation of moisture from the leaves is extremely hard on the plants. Another form of weather to avoid is that right after a warm rain, as then the plants are so filled with moisture that the checking of root action which is a part of planting, no matter how carefully done, is apt to put them in bad shape.

Having brought them into the house in good shape, the next important point is to have the soil in the houses nice and moist. Every florist knows the proper condition. Plant them with a big trowel and make the hole large enough so that the roots are not cramped. Firm the bed according to the condition of the soil. Some soils bear tramping with the feet to make them solid, and others will be plenty solid enough with a pressure of the trowel or hand. Great care should be used to see that the plants are not set too deep. All the branches and leaves should clear the ground by at least a half

inch and more if the stem will allow it. Not all of the stem rot is caused by deep planting, but a good proportion of it comes from this fault.

Watering should follow the planting very closely and the first watering should be pretty thorough, so that it reaches the roots of the plants, but do not make the soil soggy, as this condition is very hard to remedy at this time of the year on account of the plants not being in active growth. The whole aim of watering and syringing is to keep the plants from wilting and the soil from souring. Syringing on bright, hot days should be often and light for the first week or ten days after planting, and after the plants have taken hold only enough to keep down the spider.

Staking should be done as soon after planting as possible. We stake each row as it is planted with a short wire stake at each end of the row and between each of the plants. The tying is done in the form of a loop around the stakes and not by tying the plants to the stakes. This method keeps them off the ground, starts them straight and serves until the rush of fall work is over; then the stakes are easily removed for the regular system of staking for the winter. This may seem like considerable work but it pays a big interest on the investment.

Shading is largely a matter of weather. Some growers use no shade but better results are obtained where the plants are shaded for a week or ten days after planting, not heavily enough to make the house dark but enough to break the strength of the sun's rays. A clay or lime wash is easily removed. For a lime wash, air-slaked lime is a little harder to keep in solution but is much easier removed when no longer needed than the wash made of water-slaked lime. This shading must be removed just as soon as it is not needed, as it is exceedingly harmful if left on too long.

The first week no direct current of air should be allowed to reach the plants but there should be some air on the houses and, if the day is calm and hot, the ventilators should be put on full. The only point to watch is that there is no direct draft over the plants. As soon as they are well established they can be given an abundance of ventilation.

The whole question resolves itself into careful digging, careful planting, careful watering and proper shading and ventilation and then, after the plants have taken a hold, in giving them light and air in abundance.

ALBERT M. HERR.

Robert Bottomley.

Robert Bottomley, superintendent of the greenhouses at Biltmore, came to this country thirty years ago, a trained gardener, and took charge of the S. R. Payson estate at Belmont, Mass., near Boston, previously known as the Cushing place, one of the finest and most noted private estates in the United States at that time. Mr. Bottomley soon took an active interest in the Massachusetts Horticultural Society, becoming a member and contributing to its annual exhibitions. During the thirteen years he remained in charge of Mr. Payson's place he was a frequent competitor against such well-known horticulturists as H. H. Hunnewell, Wm. Gray, Jr., F. B. Hayes and F. L. Ames, frequently winning out on show collections of palms, marantas, ferns, crotons and other stove and greenhouse plants which the records show to have been of unprecedented per-

HYDRANGEA SUPERBA, A HYBRID RAISED BY M. H. WALSH, WOODS HOLL, MASS.

fection. In 1878 he received a silver medal for *Maranta Massangeana*, then shown for the first time. In 1881 the coveted silver cup for twelve ornamental foliaged stove plants was won by him, and in 1882 he was awarded a silver medal for *Asparagus plumosus nanus*, a novelty which was a revelation to the horticultural world.

Mr. Bottomley then went to J. S. Bush, at Tremont, N. Y., in the commercial business, known as one of the best plant growers in the vicinity of New York. The records of the Madison Square Garden exhibitions show that Mr. Bottomley still kept in the front rank as an exhibitor of choice material. From Mr. Bush he went to the Vanderbilt estate at Biltmore, where he has now presided over fifteen years and where the S. A. F. visitors will find him ready to extend the hand of fellowship and open the doors of the great conservatories for an inspection of their contents.

Mr. Bottomley has been an enthusiastic and willing worker in the preparations for the visit of the S. A. F., of which he has long been a member. To the writer he expressed much joy at the prospect of meeting so many of his brother gardeners, for the isolation of the big estate, far removed from the active centers of horticulture, is a serious handicap to one of strong fraternal instincts. By special permission of Mr. Vanderbilt a number of palms and other decorative plants from the Biltmore conservatories will adorn the Auditorium, where the S. A. F. will meet.

Asparagus Scandens Deflexus.

According to the dictionary *A. deflexus* is said to be "probably a form of *A. crispus*" and *A. crispus* is the accepted name for *A. decumbens*. According to "Argus" *A. deflexus* is an entirely distinct plant and more desirable than *A. decumbens*.

In my travels recently I was much struck with the elegance of a plant labeled *A. scandens deflexus*, which I came across, and procured a sample spray for illustration. Although the dictionary gives *A. scandens* and *A. deflexus* as distinct, it would appear the

label is correct in the present instance from the fact that the leaves are borne in threes, while in *A. decumbens* they are in twos. *A. deflexus* is in general effect about half way between *A. Sprengeri* and *A. plumosus*; the leaves are only one-fourth of an inch long and borne in threes. I think it is a very beautiful and charming thing and will be greatly appreciated as soon as it becomes plentiful. I do not know of any being in commerce at present.

G. C. WATSON.

A New Hydrangea.

The new *Hydrangea superba*, a photograph of which is reproduced herewith, was honored with a silver gilt medal at the Massachusetts Horticultural Society's exhibition in Boston on July 27, 1902. It is a seedling raised by M. H.

Walsh, of Wood's Holl, who gives the parentage as *H. Otaksa* and *H. cymoclada hortensis*, the plant illustrated being now four years old. The flowers at the time of exhibition presented a beautiful gradation of pink, violet and blue, the youngest bloom being white. The flowers are of great substance and borne on slender, wiry stems.

Notes on Aqualics.

The weather during July has been equally as trying as was June for all tropical plants. While we had a month of pleasant weather the temperature generally was below the normal and the result has been that many plants that suffered during the month of June have not made up what was lacking. This has been very disappointing in many instances but there is much to be learned from such experience and the practical man will observe these abnormal seasons with profit. It is gratifying to know that such seasons do not follow close together and that the next will likely not be a repetition of this one.

It is well to note that it is risky to plant out tropical water lilies at the first approach of warm weather and that it is better to wait and grow the plants on under protection, or even to put out the usual plants later if protection cannot be afforded them. As I stated in the issue of July 12, plants and started tubers planted out the latter end of June have been most satisfactory. These have continued to grow without check and at this date several of the varieties have attained their full size, particularly the day flowering varieties, such as *Nymphaea Zanzibariensis* and its forms, also *N. gracilis* and its forms, *N. stellata* and so forth. The Indian species and other night flowering varieties have made excellent growth, a few flowers have expanded and a full complement of first-rate flowers may be expected during August. In northern and eastern sections the night flowering nymphaeas will probably be late in flowering and it will be well to note the difference between the day and the night flowering varieties.

During this period we have, however,

ASPARAGUS SCANDENS DEFLEXUS.

enjoyed the hardy nymphæas, which have been in their element and will doubtless continue so during the month of August and, in more northern latitudes, a month or more later. With this class of nymphæas very much can be done without entailing loss or disappointment. They possess strikingly brilliant colors and vie with the tender nymphæas for supremacy. True, they are not as large, but they have large flowers and colors not to be met with among the tender varieties. The market value of these may be some detriment, but stock is limited. However, it is but one outlay and when once planted they can be grown as readily as the native varieties, requiring similar care and treatment.

Perhaps the greatest disappointment in the cultivation of aquatics this year is with the victorias in unheated ponds. There is no certainty what the weather will be for two or three weeks ahead,

plants during June. Certain it is that all tender aquatic plants can be grown out of doors in these northern states with the best of results provided means are at hand to protect them during the early stages, if necessary.

There is still another group of plants that have held their own during the past month and that is the nelumbiums. They can always be depended on to add their oriental splendor to the water garden, when once established. They have their enemies, as do other plants, and they must be looked after. The most difficult problem sometimes is to establish them or perhaps to get them started. They are hardy, as hardy as hardy nymphæas, but the tubers will not stand any frost. We are apt to forget that it rightly is a tropical plant. Many are asked for too early and many failures result. A given day or week will not do; the proper conditions are essential. May

is usually the month for planting but it is sometimes the middle of the month and again another season it may be the end of the month, before warm, settled weather is at hand. A rich loam soil, well rotted manure, sunny exposure and protection from high winds will suit them admirably.

WM. TRICKER.

The Crimson Rambler and Its Uses.

The many uses and the popularity of the Crimson Rambler rose were very noticeable this spring. Fences, verandas, archways and so forth are conspicuous in every direction at this season and looked upon with genuine pride by their owners. Newspaper correspondents relate how many clusters or single blooms are on their climbers with alarming exactness, showing how strong this introduction is in public favor. Aside from this, its judicious use in ornamental gardening on private estates has taken considerable hold. We have seen and read of many fine examples in this direction, but in the formal rose garden it seems especially appropriate, its rapidity of growth being a desirable feature. The illustrations herewith represent an arch and hedge that have been planted only two years in such a garden on the estate of Mrs. Chas. Wheeler, Bryn Mawr, Pa. Mr. Fowler, the gardener in charge, has developed an old-time English rose garden and, with the use of these newer introductions, the old ideas are complemented and reveal a delightful spot. Many other climbing roses are used for like purposes in this garden. Evergreen Gem, Jersey Beauty, Climbing Hermosa, Yellow Rambler, Pink Roamer and many varieties of the Wichuraiana type each lend their aid in framing this modern old-fashioned garden.

FRANCIS CANNING.

Kalanchoe Flammea.

This plant, which first flowered in England in July, 1897, belongs to the crassulaceæ order, and is a native of Somaliland, East Africa. It was first introduced to commerce by James Veitch & Sons, of London, England, in 1900 and groups exhibited before the Royal Horticultural and other societies received gold medals and other high awards in 1900 and 1901.

THE CRIMSON RAMSLER ON AN ARCH IN A ROSE GARDEN.

and the grower desirous of adding this great attraction to his lily ponds must take chances or provide for their special care during June. Our method of culture has been given before, but no season has proved its great advantage as much as the present.

Our plants were planted out the end of May and were protected with a frame and sashes, and steam heat was applied during June. At the end of June the pipes were detached, frames and so forth cleared away, the pond filled up and assumed its natural condition. Although the weather has been cool and the temperature of the water occasionally down to 70°, the plants have not suffered and we have had numerous flowers of good size. The cost of heating three pits for one month is trivial compared with the results. Reports from eastern and northern sections are discouraging but from Richmond, Va., a gentleman reports the best results after failure for two or three years.

In the latitude north of Washington, and even at Washington, there is uncertainty and growers must be prepared to meet reverses occasionally or have a plan for heating, and caring for, these

USE OF THE CRIMSON RAMBLER IN A FORMAL GARDEN.

SWEET PEAS GROWN BY ARTHUR E. CHILMAN, GARDENER TO F. S. MOSELY, NEWBURYPORT, MASS.

This variety is quite distinct from the other kalanchoes in the size and color of its flowers, and is a very beautiful summer flowering greenhouse plant. Although coming from a tropical part of Africa, we find it succeeds very well here under ordinary cool greenhouse treatment.

The plant is some fifteen inches in height, leaves pale green, obovate, two to three inches long and one to two inches wide, above which the brilliant orange-scarlet inflorescence stands exposed. The inflorescence is corymbiform, with an erect peduncle which is repeatedly branched. The flowers are half an inch in diameter and remain fresh a long time, either on the plant or in water. When better known it will be much used for room decoration, for which it is admirably fitted. Our plants were raised from seeds sown in March, 1901, and flowered in June, 1902. A compost of fibrous loam, sand and broken brick seems to suit it. Like the crassula to which it is allied, it should be grown rather dry at the root.

W. N. CRAIG.

Good Sweet Peas.

The sweet peas illustrated herewith were sown just as soon as the frost was out of the ground in spring. The ground had a good dressing of rich barnyard manure in the fall, well spaded under in the spring. Small trenches were opened one spade deep and another dressing of manure was worked into the bottom of the trenches and thoroughly forked in. We sow on this. As the peas grow we pull the soil back into the trench at intervals till the trench is filled up. And then, as dry weather comes along, we mulch with short horse manure.

I have adopted this plan for three years on the same piece of land and have had

good results. I find it pays to be liberal with the manure, as our land is a very light sandy loam, ranging from nine to twelve inches deep on a sandy and gravelly subsoil. We cut large quantities of flowers from these sweet pea vines all through the season. In cutting I always mix in considerable growth and buds. They look much better in vases this way and it induces the vines to continue growing and flowering till frost. There are numbers which escape cutting but before they have time to mature their seed we go over the rows and cut them off. We also watered thoroughly in dry weather.

In regard to seed, I have one row of distinct varieties on wire netting. My employers like them so and if we need separate colors it is easy to get them from this row. This and the next row, a mixture, came from a reliable firm in Boston. They are splendid varieties, on long stems and the individual flowers are large and handsome. The seed for the third row came from a hardware store in Newburyport, Mass. It is difficult to distinguish them. The only difference that I can see is that the stems are a little shorter and the flowers smaller, but there are more of them. Our people are very fond of sweet peas and they use large quantities in the house and to send to their friends.

A. C. CHILMAN.

Sweet Pea Season in Massachusetts.

The papers tell about some man who rented a seaside hotel for the "summer," and then plead that the contract was void because there had been no summer. When shall we see the like again! I suspect Mr. Burpee had a hand in it so that we might get our courage up again on

sweet peas. It seems like old times to see the vines holding a healthy color, blooming freely, and not a red spider or aphid in sight. I would not have the heart to dig up a vine yet to see what the showing of root is. Enough for once to enjoy the blessing that is in sight. The season has been either cool or wet—mostly both cool and wet—up to date. Indeed, a few days ago the buds blasted on account of the rain, an indication that the root cannot support the bloom while making a new spurt of foliage. It takes a week to rally from this condition.

The best showing we have in this vicinity is Horace C. Smith's. He seems to be immune against all sweet pea woes, partly due to his forty year's experience, and quite as much to his locality. He is where he must get a liberal sub-irrigation from the river, has a deep clay deposit for a soil, and thoroughly manures and works it for various market crops. He says well rotted horse manure is better than cow manure, which may be true on his cold clay soil. He runs his plow deep, twice through his furrows, plants five inches deep, never hoes when the vines are wet, and never after they begin to bloom.

We have not had a day yet in which the evaporation has at all tested the root. Several growers made an additional later planting, and two rows side by side show that even a little difference in time of planting makes a large difference in the time of bloom. If the rains that blast the buds come just when these later rows are throwing out their first buds they are apt to be more seriously retarded than the vines that have got into bloom. Once fairly into bloom they quickly rally and get down to work again, but otherwise the rains stimulate a rank growth that may divert the life

of the vine away from bloom for the whole season.

I wish such a season as this could have come two years earlier, before the popular courage had ebbed so low on this flower. Almost everybody who has persisted till this year will get his reward and next year some of the disheartened ones will try again. Say what we will about the seed, the varieties at least hold their type beautifully. To me it is a delight to go through a mixed row and recognize them one by one, reviewing their history for fifteen years. How few people appreciate the apparently endless variety, and know that the letters of the alphabet are not more distinct than the named varieties of sweet peas. I have never yet seen one that could be traced to anything but the skilled and persistent work of the hybridizer.

Mr. Darlington writes me from Fordhook, July 21: "We are having the finest show of sweet peas that we have ever had since your first visit to Fordhook, having probably about 500 trials, all of which are now coming into full bloom, while, owing to the extremely favorable weather even the early sorts are still flowering freely. There is no sign whatever of any deterioration in the seed. Possibly a dozen samples in all show the sweet pea blight, but I do not think this can be laid to the seed in any way, as the trouble seems to be more prevalent in the oldest type of flower, and it is all in one corner of the ground containing the trials. These trials this season are planted on sod land which has been in grass for three seasons and the soil is exceptionally loose and friable. This, combined with the favorable weather and frequent cultivation, has given us a most satisfactory show of flowers, and I am especially pleased with the large size and fine form of many of the varieties. Eckford's new *Coccinea* is very bright and pleasing in tint."

It is a magnificent aster season here. The Queen of the Market is in full bloom, and of finest quality. So are dahlias. It

seems to be a perfect year for them, no matter whether planted early or late. But the farmers deserve our sympathy. The condition of the hay crop reads like a calamity. Repeated soakings have so far been the rule. And if a hail storm misses one field of tobacco to-day, another volley strikes it to-morrow.

W. T. HUTCHINS.

English Hybrid Orchids.

ODONTOGLOSSUM RAYMOND CRAWSHAY.

This is another charming addition to the already long list of varieties of the *O. crispum* group. A strong plant, with five bulbs and eleven flowers was exhibited by Mr. Crawshay at the Royal Horticultural Society, London, last November and received a first-class certificate. The individual blossoms were three inches across and were remarkable for the breadth and substance of the segments, which had a white ground color flushed with rose, and blotched in the center with bright chestnut brown. The lip was large in proportion, with a large blotch in front of the bright yellow purple-speckled crest, and several smaller blotches at the sides. The petals were not only broad but also irregularly toothed or fimbriated on the margins.

SOPHRO-LÆLIA GRATRIXÆ.

This is a very interesting hybrid between two orchids which may be described almost as extreme both as regards their stature and the size of their flowers. One of the parents is the well known scarlet flowered *Sophrontitis grandiflora* and the other is the Charlesworth variety of *Lælia tenebrosa*. The plant obtained by crossing these two genera was exhibited some time ago before the Royal Horticultural Society in London and received an award of merit. It is, of course, impossible to say at present what the plant may become, but when exhibited, it was about six inches high, with oblong leathery leaves about four inches in length. Only a solitary flower was

borne, about three inches across, and of a deep crimson color flushed with bronze. The lip is tubular, like that of a miniature *Lælia tenebrosa*, and is deeper in color than the sepals and petals, with dark lines in the throat. The illustration gives a fair idea of the shape of the flower.

SOPHRO-CATTLEYA NYDIA.

This hybrid, although not remarkable for the great size of its blossoms (which measure about three inches across) is nevertheless interesting on account of its parentage. It was raised by Charlesworth & Co., of Heaton, Bradford, Yorkshire, by crossing *Sophrontitis grandiflora* with *Cattleya calummata*—the last-named parent being a hybrid between *C. intermedia* and *C. Aelandia*. A sturdy little plant with five pseudobulbs varying from two inches to four inches in height, each bearing one or two oblong, deep green, leathery leaves, was exhibited by the raisers in London last winter, when the orchid committee of the Royal Horticultural Society recommended a first-class certificate. The oblong, elliptic sepals, and the broader sub-spathulate petals are of a dark, swarthy red color, irregularly speckled near the margins with blackish spots. The lip has a deep crimson, spreading front lobe, while the over-arching side lobes are washed with faint orange red at the base and more or less distinctly veined on the outer surface. This charming little hybrid makes an excellent companion to *Sophrontitis grandiflora* and *Cattleya intermedia* and is thus a close blood relation. W.

Opening a Fresh Can.

Friends, fellow countrymen, Romans, the ginger jar is empty, and the Barnum of that cool and crisp receptacle is in doubts as to what the next preserve should be. He wavers as to whether he should join the ranks of the Genial Philosophers, men like Benjamin Franklin, Oliver Wendell Holmes or Robert Craig; or whether he should cast his lot with the Hammering Crowd—Samuel Johnson, Thomas Carlyle or Willis N. Rudd; and then again he thinks perhaps the suave and gentle style of Samuel Taylor Coleridge, Charles Lamb or Edwin Lonsdale would be the proper caper under the circumstances.

In the midst of this quandary comes an inspiration. He thinks he has an idea! (Don't smile, please). He will not herd at the tail end of either of the above mentioned noble armies. He has grasped the idea that it is better to be at the head of the commonalty than at the tail of the gentry, and so he is going to make his condiment in such a manner as will fit the common stomachs of the common folks with all the common sense he can gather for that purpose.

Be it understood, of course, that he is not catering to the transcendental intelligence of a "Job," a "Bison" or a "Phil," but only to the ordinary insides of the plain people who have an inveterate habit of figuring that two and two make four and, as Josh used to say, would listen with admiration to the fellow who told them that two and two made six—and the same to the "Smart Alick" who showed them that two and two made twenty-two when placed side by side—but would not invest anything in that kind of arithmetic.

The first thing "Vox Populi" (that beats my other aliases all hollow, eh?) has discovered in his new dish is the gen-

SOPHRO-LÆLIA GRATRIXÆ.—NATURAL SIZE.

ODONTOGLOSSUM CRISPUM "RAYMOND CRAWSHAY."

eral goodness of the Genus Homo if they had all got plenty of Greens. You may call them Long Greens, Cold Greens, Hot Greens, any old kind of Greens, but Greens in plenty is the main thing! What is it that brings out the good points of mankind best? Is it not freedom from worry? And what frees man from worry like plenty of the long, cold, hot, merry, cool, charming Green? How can a man be other than crabbed and irritable when he is hunting day in and day out on a constant tension to get enough to keep the hungry kids filled up and to scare that dirty Orangeman, the sheriff, from the premises. ("V. P." supposes he absorbed that about the Orangeman from Dooley or Pat O'Mara. They say he's more of an A. P. A. than anything else. But that's ignorance. He's really a Presbyterian-Pagan and intends to found a church of that denomination as soon as he gets a little leisure and Greens). And what makes a man so happy and contented as the thought that all his bills are paid and a comfortable bunch laid by to draw on?

Then the good points of the Genus Homo come out, the father and mother, the mother-in-law and the whole menagerie of relations, near and remote, get a whack at it, the white church, the black church, the pig-tails, and the Hottentots, all come in for a share; the lame horses, the hungry cats, the dyspeptic goats, and even the Weary Willies are treated with complacency and Christian charity. His nibs goes about doing good, with a kind word and a dollar for every poor devil in a hole, and his smiling red face shines like that of the Angel of Mercy! When he comes the clouds roll by and the sun shines, the hailstones cease and coal and glass may go to blazes or the other way, who cares?

But let that same Angel of Mercy go down town some fine morning and find that the cashier at the National has gone off fishing in New Brunswick with most of his and other people's funds in the bait box and then see how quick the "A. M." will become like the rest of us—lean around the chops and showing a hungry glitter in his eyes. God help Weary Willie and Massa Brown if they run up against their erstwhile "A. M." then!

"V. P." is firmly convinced that we are

all good and all bad alike, according to the quantity of Long Green we have and that if we all had plenty of it the world would take such a stride forward in practical civilization in a few years as would startle into goggle-eyes the most unimaginative among us and forever put to shame the old Scottish homily, "contentit wi' little and eanty wi' mair," for it's really the discontented that make things happen.

So here's hoping that a better distribution of the Long Greens may take place soon so that you may all have benevolent, red, wise, angel-of-mercy faces and never look grim and hungry any more. If "V. P." can do anything to help that desirable consummation along he'll be only too glad. The first thing for us to find out is "How do some of them get too much?" It's as bad for

the community as the man to be drunk with riches as to be drunk with wine. For one thing, it stops that desirable distribution of the Long Green among the commonalty which has been the burden of this homily from your old friend,
GEORGE C. WATSON.

ROSES.

A WELL-KNOWN ROSE PEST.

ED. AM. FLORIST:—I am sending some rose leaves on which you will find an insect. I should like its name and a method of destroying it. It is a new pest in this section, doing a great deal of damage to roses. It is a sort of white fly and, when fully grown, will leave the bushes when disturbed, only to return again. It always works on the under side of the leaf. We have tried all common remedies without much effect. What would you suggest? H. L. D.

The insect which you send and which you state is destructive to rose leaves, is the common rose leaf-hopper (*Typhlocyba roseae*). This is a common and well-known enemy to roses, and is the cause of frequent annoyance to persons owning rose bushes when the insect occurs in great numbers. At such times it sucks out the cell contents of the leaves, imparting to the upper surfaces a peculiar white-spotted appearance. The mature insect is quite active, and is apt to return to plants when molested. This is not however, true of the nymphs, or younger stages. The young have no wings, and if driven from the plants have difficulty in returning. It follows, therefore, that the nymphs, which are also more delicate than the adults, are more easily destroyed. This is not a matter of extreme difficulty if only a few bushes are to be treated. The common yellow Persian powder, lubach or pyrethrum, is the simplest remedy, although somewhat costly. Tobacco is also of service, applied as a fine powder, or in a decoction. Kerosene emulsion will also destroy these pests. But both tobacco and kerosene preparations are objectionable on account

SOPHRO-CATTELEYA (NYDIA). NATURAL SIZE

of their odor. That of kerosene, however, is not especially persistent on growing plants. It ought not to be applied at its full strength, but in the form of an emulsion.

F. H. CHITTENDEN.

NOTES ON SEASONABLE TREATMENT.

For some time past we have been having very cloudy weather over a large portion of the country and consequently, when the bright days do come, we find the stock soft and not in the best condition to stand the heat. The plants will need to be aided as much as possible. A thorough syringing every bright morning will do much, but we may also wet down under the benches and in the walks at noon if it is a hot day. Of course, judgment should be used, for if the plants in a house are badly affected with black spot, too much moisture will prove to be more dangerous than the effects of the sun.

Advantage should be taken of all cool and rainy days. Have the fires started and force the steam through one pipe in each house. If the pipe is well painted with sulphur you will find this to do more toward checking mildew than anything else. Even if you find it necessary to leave a small amount of ventilation on you will be able to see the good results. Air-slaked lime is also very good to keep the air in a house clear and free from fungus. Blowing this through the house purifies the air and the lime which settles on the benches does a great deal toward keeping the top of the soil clean.

Notes From Cornell.

The greenhouses at the experiment station of Cornell University are but six in number, comprising an area of 8,000 feet of glass, yet the amount of material handled and produced here under the energetic management of C. E. Hunn is almost incredible. Mr. Hunn has been in charge here for the past seven years. He is also a class teacher and the author of several well-written works on horticultural topics. The houses are primarily to furnish material for practical demonstration in the teaching of horticulture. Soft-wooded plants are mostly grown and the variety includes all of the commonly cultivated commercial sorts. The last season showed an increased demand for instruction in the art of vegetable and fruit forcing under glass and the photographs reproduced herewith show what was accomplished that season with a bench of strawberries. The variety grown is Glen Mary. The plants were lifted in August, put first into 3-inch pots and afterwards into 6-inch and put through the necessary processes of slow drying off and securing well-ripened crowns, after which the pots were plunged on the bench and started gradually into growth. The net result was six to ten fruits to a plant, twenty berries making a quart. Liquid manure was given generously after the fruit had formed.

The instruction comprises a longer and a shorter course, there having been last school year about thirty-five students pursuing the former and fifty the latter

course. The studies cover such subjects as plant culture, greenhouse construction and management, literature of horticulture, pomology and landscape gardening, nursery and orchard practice, the principles of vegetable gardening, and practical work in forcing houses. The experiment station here at Cornell is under government patronage as well as state supervision. It seeks to specialize while that at Geneva generalizes. The special points of instruction are soil mixtures, potting, propagating, watering, training and pruning and fifteen acres are appropriated for an experimental farm where objective instruction is carried on.

The botanical department is separate and here are taught the fundamental principles of plant life and relationship, by lectures, laboratory practice and demonstration under six professors. The superintendent of the botanical houses is Robert Shore, well known in the profession, and with a proud record as a plantsman. His enthusiasm in his work here is recognized and is warmly seconded by his pupils. He is landscape artist for the grounds and approaches to the college buildings.

Prof. L. H. Bailey, who is director of all the horticultural departments, is a man of boundless industry and energy and his individuality pervades everything. As author of the "Cyclopedia of American Horticulture" he is widely known and as editor of *Country Life* he talks to a large and ever increasing audience. His ambition is to enlarge the scope and usefulness of the Cornell experiment station and the work done there hitherto with limited resources is the best guarantee that a larger income would be well expended.

Forcing Tomatoes and Melons.

Our earliest sowing of forcing tomatoes is made on or about July 4. Plants from our last sowing were placed in 4-inch pots in late July and were transferred to the benches about August 12. These plants will give us ripe fruit early in October and will continue to bear profitably, with proper attention, until the following May. If one wants ripe tomatoes, say by the middle of November, he should sow seed of a good forcing variety at once, transfer to boxes when of sufficient size, and if he can spare the time it will pay him to pot into 4-inch or 5-inch pots before benching. The seed can be sown outdoors and the plants grown in the open during August, but would be better under glass after September 1, as a preventive of mildew.

Tomatoes sown at once will begin to

STRAWBERRY PLANTS JUST SHIFTED INTO 6-INCH POTS AT CORNELL.

All who had their houses planted early should have the plants staked by this time, several ties to each plant. Do not allow any plants to be tied up by bunching several shoots together but tie each shoot separately; it will pay better in the end even if it does take longer.

If you have grafted stock, watch carefully for all Manetti shoots and cut them out as fast as they appear. Be careful with the disbudding. The houses should be gone through twice a week and all shoots that are sufficiently ripe should be cut back below the first eye at least. This will encourage a new break which will be stronger than if only the bud is pinched out.

It is a very good plan to go over the beds as often as the top becomes crusted or green and loosen the soil, but care should be taken not to scrape down into the roots. As soon as the roots appear near the surface this will have to be stopped.

R. L.

FORCED STRAWBERRY PLANTS IN FRUIT SEVEN WEEKS AFTER SHIFT.

STRAWBERRIES GROWN AT THE CORNELL UNIVERSITY EXPERIMENT STATION.

produce ripe fruit about the end of November. If the grower is inexperienced with tomatoes under glass, I would recommend him to restrict the root run of his plants. Four inches of earth eighteen inches wide is ample to start them in; more will induce rank growth at the expense of fruit. Occasionally light top-dressings can be given. Hand pollination from December 1 to March 1 will cause a good set. Tomatoes want a dry atmosphere and should have a minimum winter temperature of 60°; if 5° higher all the better.

Some of the prominent seedsmen carry stocks of good forcing tomatoes; the outdoor varieties are useless for winter work. Frogmore Selected and Eclipse are both excellent sorts. We are at present forcing Rochford's Forcing, not yet in commerce in America, and find it an ideal forcing tomato in all respects.

Melons as a winter crop will require much greater care than tomatoes, but given several divisions to grow them in, they may be had the whole year around. They require a higher temperature than tomatoes. The winter minimum should not go below 70°. By sowing seed now and growing it on under glass; the plants will in three weeks, or less, if the weather is very warm, be fit to plant out in the hills on the benches. Of course these plants are to be trained up the roof of the house. They do fairly well when allowed to ramble over the surface of the benches in summer, but need all light, and especially sunlight, during the short, dark days of winter. We set our plants two feet apart and allow them to carry two to three fruits each; they will seldom finish over four fruits satisfactorily.

From seed sown now one should, given the proper conditions, be able to cut melons about the middle of November. For a Christmas crop the seed would require to be sown about September 1 and forced right along without check. At this season of the year we cut melons from ten to twelve weeks from seed sowing, but fully a month longer is necessary if the fruit is required at the time named.

Owing to the prevalence of blight the last three years on standard American sorts, we have been compelled to discard such excellent melons as Paul Rose, Chris-

tiana and Rocky Ford, and now grow English varieties exclusively, such as Sutton's Scarlet, Frogmore Scarlet and Royal Favorite, the last being a white fleshed variety. We consider the Frogmore Scarlet the finest variety.

The melon blight has during the past three years been so serious that it is useless attempting to grow outdoor melons in this section and we rely entirely on those forced under glass for our supply. The American varieties appear to blight just as badly indoors as in the open, and even on the English sorts occasional traces of disease are seen. A spraying twice a week with Bordeaux mixture acts as a preventive. There are many little details in melon culture which would require quite an exhaustive article to properly explain. W. N. CRAIG.

WHITEHALL, MICH.—Thomas Denham has purchased the greenhouse property formerly conducted by C. W. Redfern.

A Californian Establishment.

The accompanying illustration is a reproduction of a photograph taken in the store of the Redondo Floral Company, at Los Angeles, Cal. The business is a department of the Redondo Improvement Company, located at Redondo Beach, where they have some 2,000 acres of land, of which thirty acres are devoted to the floral department. Fifteen acres are devoted to carnations, which bloom here all the year around, in the open. All the stock has thus far been grown in the open, but the past spring three modern greenhouses 200 feet long were erected, and an expert grower from the east engaged to see what he could do with the best varieties known to the New York and Chicago markets. Roses will also be given a trial under glass. As no one has as yet recorded a distinct success with cut flowers under glass in Southern California, the venture is more or less of an experiment but up to the present everything is promising and a success will mean that the company will add largely to its glass for next year. A. F. Borden is the manager of the company's floral department. He is now on his way east and will be at the Asheville convention of the S. A. F. He is visiting the leading growers and retailers as he progresses. His producing department is twenty miles from the store, but it is the company's own railroad that brings in the daily cut, which averages some 4,000 carnations.

Lagerstroemia Indica.

Every person who had the good fortune to be present at the convention of the S. A. F. held at Washington, D. C., in 1892, and especially those who took the trip to Mount Vernon and saw the fine specimen in full bloom of that magnificent plant, Lagerstroemia Indica, the crepe myrtle, will remember what a beautiful sight it was, and how many of us wished it was hardy enough so that it could be planted generally for outdoor decoration. It may be interesting to your readers at this time to learn that it has been known to live out all winter in the vicinity of Philadelphia. With me a plant has lived

STORE OF THE REDONDO FLORAL COMPANY, LOS ANGELES, CAL.

out for the past two winters unprotected, and is now in full bloom. It is growing in a tub, and possibly that is one reason why it has not been winter-killed, because the growth, I believe, on that account has become more thoroughly ripened.

It was quite accidental that the plant was left out the first winter. It was a "boarder," and the people who owned it moved away without settling the bill, and as I had no convenient place in which to keep it over winter, it was allowed to take its chances, with the results as above noted. It is situated where it is partly shaded from the morning sun, though it stands somewhat in the open and a short distance apart from the Norway maple and a retinospora and the residence, all of which furnish more or less shade. It is not sheltered from the northwest, the wind from that direction having practically a full sweep upon it. The first winter the growth was killed to the soil line, but new growth sprang good and strong from the base and flowered profusely the latter part of

August very satisfactorily, continuing through September.

This note is written for the purpose of encouraging the planting of this beautiful flowering shrub experimentally in a small way. Planted in a well drained spot, in soil not too rich, so that growth would not be made too late in the season for it to ripen thoroughly, and in a situation where it would be shaded from the morning sun in winter and where the temperature does not touch zero too often, it certainly ought to be worthy of a trial. We residents of Chestnut Hill are located about 425 feet above high tide, where it is much colder in winter than in the city of Philadelphia proper.

I have known three varieties of crape myrtle, a white flowered one, also a purple, and the pink variety grown here. The latter one I prefer, as its natural habit of growth is more compact, whereas the white variety is inclined to be straggling in its manner of growth, which, of course, could be helped somewhat by judicious pruning.

EDWIN LONSDALE.

Spraying Milwaukee Trees.

ED. AM. FLORIST:—I note in a recent issue that insects are making havoc with the shade trees in Milwaukee and that spraying is being practiced extensively. We are having the same trouble and if your correspondent will give the ingredients of his effective antidote I shall appreciate it.

PULLMAN.

The accompanying illustrations show something of the extent to which many Milwaukee trees are infested with insect enemies, the principal of which are the cottony cushion scale, elm leaf beetle, elm bark louse and tussock moth. I have found a spraying mixture of one pound Paris green and one pound quick lime to 200 gallons of water very good in dealing with the elm leaf beetle and kerosene emulsion serves for the other pests. The apparatus employed (shown at work in one of the illustrations) is that supplied by Morrill & Morley and I have found it very satisfactory.

C. B. W.

Park and Outdoor Art Association.

The following are the officers elected at the meeting at Boston last week:

President, Clinton R. Woodruff, Philadelphia; vice-presidents, W. Ormiston Roy, Montreal; Dick J. Crosby, Washington; Warren H. Manning, Boston; secretary, Charles M. Robinson, Rochester, N. V.; treasurer, O. C. Simonds, Chicago; committee on checking abuses of public advertising, F. L. Olmsted, Brookline; Mrs. W. F. Grower, Chicago; Mrs. Lovell White, San Francisco; Joseph Lee, Boston; committee on local improvement, W. J. Stevens, St. Louis; Dr. D. R. Burrill, Canandaigua; Miss Myra L. Dock, Harrisburg; Frederick W. Clark, North Billerica; auditing committee, F. W. Kelsey, New York; John C. Olmsted, Brookline; Lewis Johnson, New Orleans; publication committee, Charles M. Robinson, Rochester; Mrs. Martin Sherman, Milwaukee; G. A. Parker, Hartford; committee on park census, G. A. Parker, Hartford; John C. Olmsted, Brookline; Lewis Johnson, New Orleans; committee on school grounds, Dick J. Crosby, Washington; Mrs. Mary M. Kehew, Boston; H. D. Hemenway, Hartford; J. W. Spencer, Ithaca.

Herbaceous Plant Notes.

The ordinary *Coreopsis lanceolata* is not a continuous bloomer, neither is it a very reliable perennial, for the plants usually perish for one reason or another after their second year. Instead of it we always employ either *C. grandiflora* or the variety *monstrosa*, both of which are at least as good, if not superior to the best type of *C. lanceolata*. Neither of these two will ever act like the biennials. Each begins to bloom in early June and is sure to keep up a continuous succession until late fall. By removing the old flower heads occasionally, not allowing seeds to ripen, we may greatly assist the plants in their efforts to develop flowers of best quality as well as in quantity.

A few years ago we planted a patch of these *coreopsis*es intermixed with the blue *Scabiosa caucasica*, which grows about the same height, and that patch has been an attraction ever since, though no work or special care has been put on it except the annual spring cleaning and forking over. Apparently it is good for several seasons to come and for a permanent bed this combination seems to be a decided success.

We have also tried *platycodon*s with

INSECTS ON MILWAUKEE TREES
(Showing the sprayers at work).

the coreopsis. They are of a deeper shade of blue and very effective for about two months, but when they cease blooming the bed has a ragged, uneven appearance and does not recover a pleasant look until late in fall, when a second crop of flowers appears on the platycodons. Speaking of these, I may say here that *P. Mariesii*, in its true dwarf form, is a most charming plant, but we rarely see this form. Nearly all I have come across are taller and longer-jointed than they should be, some of them very near the height of the ordinary *P. grandiflora*. In the true variety the joints are very short, the stems thickly furnished with foliage, the growth very compact and stiff, not over nine inches in height, the bells widely open, broad saucer-shaped. We have never raised seedlings which retained the dwarfness of the original plants which were imported shortly after its introduction, in 1884 or 1885.

All the rudbeckias are now out in full blast. The deep yellow of their long petals shines brighter in the reflecting glass of dark brown, cone-like disks. *Echinacea purpurea*, with its purplish pink flowers, is a good companion to mix in with them. A neglected plant worth growing in a mixed border or in front of shrubbery, and also a very useful cut flower, is the *sidalcea*, a malvaceous plant resembling a miniature hollyhock, with slender, erect stems two and one-half to three feet high and exceedingly floriferous and lasting. *S. malvaeflora atropurpurea* is usually a few inches taller than the pure white *S. candida*. Both are desirable and succeed in almost any soil or situation. They are true perennials and do not require replanting like the hollyhocks in front of evergreens or tall shrubs.

Stokesia cyanea has been in bloom for about two weeks. Its large purple flowers are always in demand, and as the plant will continue to flower winter-ruptedly until late fall every florist should endeavor to keep up a stock for cutting purposes. Once planted they can remain undisturbed for an indefinite time. An old clump will produce a hundred or more flowers annually, and if the flowers are not needed one week they will not spoil the plants, for, like asters, they are just as good next week. In borders or beds, in large or small places, wherever planted, everybody likes it, for it is a clean, neat, compact, free blooming plant and as hardy as our native oak trees in the woods. J. B. K.

Mushroom Culture.

There would appear to be something of a fascination in mushroom culture, judging from the number of novices who annually essay to raise a few. Large numbers of people, not those who are mushroom growers, believe that "toad-stool" culture is a veritable Klondike to the happy man or woman engaged in it. It is certainly true that sometimes the mushroom grower succeeds in "hitting it just right" with good crops and remunerative prices, but a far larger number have failures to mourn and, while there may be a fair profit for the careful and painstaking grower, the business is very uncertain and is likely to remain something of a lottery.

We start to collect fresh horse manure—that from grain-fed horses is the best—early in September and continue to do so for some ten weeks. When received it is placed in an open shed or a position where it can be protected from heavy rains. The rough straw is shaken out

INSECT PESTS ON MILWAUKEE TREES.
(Showing scales on the branches.)

of the manure and the pile added to until there is sufficient to spawn a good bed. It is turned over daily to allow the escape of rank steam and until danger of burning is over. Two or three days before spawning we mix one-third as much loam, screened through a coarse sieve, as there is manure. We have better success with adding loam than when we use pure manure. Should the manure be dry, we wet it slightly with the hose. Dry manure will never produce good mushrooms.

The beds may be made either flat or slanting. If the former, a uniform depth of nine inches of manure is desirable; if the latter, the depth for a bed three to three and one-half feet wide maybe fourteen inches at the back and five inches at the front. We have had equally good success with both systems. The manure is placed in layers and pounded as hard as possible with a wooden mallet or brick. Probably hard tramping with the feet would answer as well, but it is not usually possible to use the feet where the beds are made. It is very important to

firm the bed thoroughly; this will guarantee a steady and more lasting heat, and of course more mushrooms. After the temperature of the bed has declined to 90° we insert the spawn, which is broken into pieces the size of an English walnut and planted six inches apart each way at a depth of two to three inches. We use English milltrack spawn exclusively. We have tried French spawn, also some of American manufacture, but neither equaled the English.

Eight or ten days after spawning we spread two inches of fine loam, screened through a half-inch sieve, over the bed. Old soil from the benches or pasture will answer. This is beaten firmly and a little hay or straw placed over the bed to prevent it from drying out. The time which will elapse before mushrooms appear is as gloriously uncertain as the weather. We have seen them peeping in a little over three weeks, and two years ago one of our beds started to produce a fine crop just sixteen weeks after spawning. A person does not want to be of a

too highly strung nervous temperament with mushrooms or he may throw a bed out just when it is about to bear. On an average six weeks will elapse before buttons appear.

Not having a special mushroom house, we make our beds under the benches in violet, tomato or other houses. A temperature of 60° is very suitable, but we find they yield well in one 10° lower. Beds should be kept as dark as possible, and all sunlight excluded. They should never be placed near furnaces, or in other dry localities, or returns will be discouraging. When the surface of the bed dries we give water through a coarse rosecan, at a temperature of 90° to 100°; this helps to warm the bed and promotes production. Any caves, cellars or sheds where a temperature of 55° to 60° can be maintained, and the atmosphere is not too dry, are suitable for mushroom culture. Beds should continue to bear for three to four months. If they become partially exhausted it is a good plan to give a top dressing of an inch of new loam, water with warm water and cover with straw. A second crop will usually appear in a few days.

Cockroaches are sometimes destructive; they may be caught in quantity by sinking one or two jars half filled with molasses in the beds, or a mixture of one part white arsenic, one part powdered sugar and five parts lard will work effectively. Wood lice may be poisoned in the same way or by smearing the poison on pieces of potato or other vegetable roots.

The beginner in mushroom culture should be careful to procure fresh imported spawn from a reliable firm. All the pains of making a bed goes for naught if the spawn is old. Do not let him, however, spawn a dry, wet or cold bed and then blame the seedsman if results are nil. We think there is a lot of fun in mushroom culture. Last year from 175 feet run of beds we had no failures, but the uncertainty of the crop is proverbial and let no one be discouraged by a single bed failing; a second attempt will probably prove successful, and very often the beginners succeed where old tried hands fail. W. N. CRAIG.

A Dangerous Cucumber Disease.

During the past two or three years a peculiar fungus disease has made its appearance in the cucumber houses of some large English market growers, around Worthing and London. Quite recently I saw about a dozen large houses, each nearly 300 feet long and about thirty feet wide, which presented a most extraordinary appearance. They were filled with cucumber plants and were bearing a fairly heavy crop of fruits in all stages of development. The leaves, however, had none of that beautiful soft and fresh green peculiar to healthy plants. On the contrary, many of them hung from the stems like limp, dirty brown rags, while others less advanced towards decay were covered with large blotches of brown and silver. The leaves which had just been attacked showed small greyish-brown spots at first and, soon afterwards, around each spot was developed a gradually increasing area which was silvery in appearance and almost translucent. It looked like a piece of tightly-stretched parchment inserted in the green tissue. This disease is probably that known in America as melon leaf spot or perhaps the mildew that attacks cucumbers, melons and other cucurbitaceous plants from time to time.

The question of prevention is rather a difficult one. The grower of the afflicted plants told me that he found the disease was checked by keeping the atmosphere dry and ceasing to use the syringe. By adopting this means, however, it was simply a case of out of the frying pan into the fire, because, although a dry atmosphere checked the fungus, it brought about a condition that was favorable to the appearance of that other cucumber pest, the red spider. Under the circumstances spraying with Bordeaux mixture or any other poisonous compound was out of the question, owing to the crop of fruit that was borne at the time. It would have been most dangerous at least to have marketed produce which had been recently sprayed. The grower took the only sensible course, in my opinion, under the circumstances. He cleared all the houses out and burned the

INSECT PESTS ON MILWAUKEE TREES.

(Showing abandoned nests of insects—enlarged).

plants so that the spores of the fungus should spread as little as possible.

One of the principal difficulties in battling with this disease seems to be that it does not make its appearance until the plants are well established and bearing large crops of fruit. If it were noticed when the plants were very young, or soon after being planted, it is probable that a few sprayings with Bordeaux mixture would be an excellent preventive. As the matter stands at present, the fungus threatens one of the largest industries among growers in Great Britain and should it get the upper hand, cucumber growing will sooner or later become a thing of the past in the British Isles. W.

Trouble With Cauliflower.

ED. AM. FLORIST:—I started Early Erfurt cauliflower seed in the hotbed early in March, transplanted in the hotbed after the plants had formed leaves and again transplanted them, this time into the garden, early in May. The plants were not more than ten inches

high when they headed, the flowers being from the size of a lemon to that of a good sized orange. Can you explain why the plants did not grow to a height of two feet and the heads weigh from five to seven pounds? I gave them plenty of liquid fertilizer. I had the same trouble last year with the early crop but had good success with the fall plants. Could it have been caused by transplanting twice? J. B.

I am not at all surprised at the correspondent's lack of success with his spring sown cauliflowers. We have never had any good heads from sowings made in March. This vegetable, perhaps more than any other, requires plenty of moisture at the root during the whole growing season. Good drainage and an absence of excessive sun heat are essential to success. In Massachusetts we had a very dry month in May, and the first half of June was also much drier than usual. Given these conditions the crop could hardly fail to be an unsatisfactory one. Applications of liquid fertilizer, unless the ground was damp and the plants making satisfactory growth, would not be of much benefit.

We have excellent success with Early Erfurt cauliflower sown in a cool greenhouse about January 1. When large enough to handle they are pricked out into boxes and from there again are transferred to 4-inch pots. In March they are planted out in frames in rich compost, eighteen plants being allowed to a 6x3 sash. The lights are left on until the plants start to grow. About April 1 they are removed entirely unless a sharp frost necessitates their being put on. The plants are kept well soaked with water, and liquid manure is freely given when growth is vigorous. We never fail to cut fine heads from these plants, commencing in April and lasting until the beginning of June, although they do not average five to seven pounds weight. A sowing made a month later and similarly treated gives us plenty of cauliflower until June 20, and after that date they are not required before fall.

I would recommend this method of culture for an early crop. I do not believe one will have much success unless he can keep the plants thoroughly watered, and this is difficult in the open ground, while in the limited space in a frame they can easily be soaked with the hose, and furthermore plants produced in this way are vastly superior in flavor to any which can be raised in the garden. The reason that late sown cauliflowers are usually a success is that the cool nights, heavy dews and decreasing sun heat make conditions more conducive to their growth. W. N. CRAIG.

Aucubas in Pots.

The green-leaved varieties appear to be the ones most prolific in bearing berries and handsome little bushes can be produced in 5-inch and 6-inch pots, literally laden with the bright crimson, holly-like fruits. They can, of course, be secured in larger pots, but the sizes mentioned seem to be most useful for conservatory decoration during the winter months. The plants are six inches to twelve inches in height and can be brought to the berry-bearing stage in twelve to eighteen months. The female plants, of course, are the only ones that can be used for this purpose and it is necessary to resort to artificial fertilization with the pollen from a male plant to ensure a big crop of berries. W.

CEMETERY OFFICE, MT. GREENWOOD, ILL., GABLE COVERED WITH AMPELOPSIS QUINQUEFOLIA, VAR. ENGELMANNI.

Ampelopsis Veitchi.

ED. AM. FLORIST:—My comments on *Ampelopsis Veitchi* in the AMERICAN FLORIST of July 26, page 926, have been criticised, I am informed, in another publication. I wish to state that this plant can be seen growing in all parts of Milwaukee. A stranger would be inclined to think that the citizens had just awakened to the value of the vine because none of those he may notice are large, but if he takes the trouble to look closely he will find that almost every house on the most fashionable streets has marks of where the dead tendrils have been rubbed off, the owners—after three or four efforts, and wasting from ten to twelve years of time—having either concluded to go without the clinging vine or plant *A. quinquefolia*, var. *Engelmanni*. But so many, like "Bison," know nothing about this variety. *A. Veitchi* does better on north or east exposures than on south or west, but it is a failure on all sides. *A. Engelmanni* has proven much superior to it and, as stated in my former note, much more satisfactory. Florists with local experience only and little nursery stock should beware of rushing too freely into print at space rates, with statements or recommendations for our northern cities without some actual knowledge and practical experience under different climatic conditions from those of their own backyard.

C. B. W.

Under most conditions, *Ampelopsis Veitchi* is hardy in Chicago and vicinity. Still no specimens can be seen equal to many in Buffalo or Boston, showing that the vine is not entirely contented. Young vines often freeze back to the ground and should therefore be protected for a few years with straw. After the vines assume a thickness of a quarter of an inch or more, it will stand the winters, although some of the new wood at the extreme tip may freeze. The proper name for the vine in question is *A. trienspidata*. *A. quinquefolia*, var., *Engelmanni*, a form of the native Virginia creeper, will cling to walls and seems hardy beyond question.

W. C. EGAN.

This ampelopsis may be hardy in Chicago but I know of but few good

specimens and those grown under most favorable conditions. After struggling with it for years we gave it up as a bad job. We find *Ampelopsis Engelmanni*(?) eminently satisfactory. It is absolutely hardy, is a most vigorous grower, clings well to stone or brick and its leaves are quite pubescent, which seems to repel the attack of red spider, a pest which sadly defaces the ordinary twining form of *Ampelopsis quinquefolia*. The illustration herewith shows the growth three years after planting. This vine, which is sometimes stated to be a varietal form of *Ampelopsis quinquefolia*, is a native here, although not common, and it comes true from seed.

W. N. RUDD.

The Virginia Creeper.

The fact that in the northwest the Virginia creeper, commonly known as *Ampelopsis quinquefolia*, is almost the only hardy climber suitable for use on

buildings, makes it important to recognize differences that may exist in it as affecting its adaptability to this use. It has long been recognized as a disadvantage that windstorms are very likely to dislocate the vine when planted against houses, unless the precaution had been taken to fasten it by the use of loops of leather or in some similar way. For some years past, however, dealers have offered and recommended the use of a form of the Virginia creeper that is said not to require this artificial support, since it produces disks like those of the Japanese ivy, *Ampelopsis trienspidata*, in sufficient quantity to attach it closely and firmly, even to walls, which is not true of the ordinary form, the tendrils of which are more like those of the grape, coiling if given the support of chicken netting and the like, but producing few or no disks for attachment to flat surfaces.

The formation of such disks is one of the characters of the genus *ampelopsis*, which Michaux formed for the reception of this plant, that had previously been placed in the genus *vitis*, and that the latest monographer of the vitaceae as a whole, Planchon, puts in the genus *parthenocissus*, which also includes the Japanese ivy and a few other Asiatic species. Just what the distribution of the diskless form is, is not easy to say. The earlier descriptions, which were based on eastern rather than western specimens, in the main, mostly note the disks, without going into details as to their abundance. About St. Louis, the impression of field observers is that the plant always clings to tree trunks very readily, and is abundantly furnished with disks, and an examination of the thousands of vines of this species growing in the Missouri Botanical Garden, mostly collected within a relatively short distance of the city, shows it to be the only form that we have in cultivation. In Tower Grove Park are growing a number of purchased plants of *Ampelopsis Engelmanni*, which are not very noticeably different from the native form, and equally, but no more, firmly attached to their supports.

It appears from the records of several persons who have observed the difference in disk-production in the plant as cultivated, that the diskless plant has been most commonly sold as *Ampelopsis quin-*

INSECT PESTS ON MILWAUKEE TREES.

(Showing scales on the under side of leaf, much enlarged.)

quifolia, doubtless because it was in stock and used for propagation, and it has been assumed frequently that it really represents the typical form of the species. Hence it has come that the other, with abundant disks—apparently the true type of *A. quinquefolia*, as intended by the earlier writers on the species—has been designated by one or more varietal names, among them Engelmanni. In 1893, however, Professor Knerr, of Kansas, rightly recognizing the disk-bearing form as true *A. quinquefolia*, gave the name *vitacea* to the other, with grape-like tendrils, which Professor Britton, in his recent manual recognizes as the same as the variety to which Planchon had earlier affixed the varietal name *laciniata*.

In point of fact, from the horticulturist's point of view, it is necessary to recognize primarily two forms, one with disks, and hence adapted to use where supports are not furnished it, which is the true *Ampelopsis quinquefolia*, and another, with grape-like tendrils, rarely producing disks, and hence not so useful for house covering, which is the variety *vitacea* or *laciniata*. The latter apparently varies much less than the other, and it is to the interest of dealers to get rid of it as stock for wholesale propagation purposes, although its fruit is larger and it possesses a few other points of superiority over the typical form, which gives it a little value for amateurs who aim at variety in their collections. The disk-bearing form varies much more than the other, in thickness and pubes-

cence of foliage, abundance of the dark brown roots with which the tendrils are supplemented, and in the width of leaflets and compactness of foliage, fruit, etc., and in Bailey's cyclopedia these are sufficiently characterized by Mr. Rehder for all practical purposes. It is not evident, however, that to a prospective purchaser for ordinary use Engelmanni or any other of these varietal names is worth the payment of anything over the ordinary market price of *A. quinquefolia*, provided the dealer will give assurance that under this name he is selling only the disk-bearing form.

WM. TRELEASE.

A Handsome Design.

The accompanying illustration is from a photograph of a design made by the Guardian Angel Orphan Asylum, Chicago, for the funeral of the late Archbishop P. A. Feehan. The materials were lavender sweet peas, lily of the valley, *Asparagus plumosus* and Sprengeri, auratum lilies, swainsona, Bride and Bridesmaid roses and Boston ferns. The whole was tied with a bow and streamers of two-inch white satin ribbon bearing the inscription.

The Wreath and Its Forms.

The simplest and yet the most popular form of floral arrangement is the wreath. It can be used to voice all manner of sentiment. It crowns the victor's brow in the height of his popularity and, again,

with equal propriety, is placed upon his bier when his earthly career is closed.

When it first became the custom to send flowers to funerals in this country, wreaths were tied or wrapped to a single wire or bent willow form, and it was not until years after that the mossed wire frame foundation came into general use. Although the design is so informal, it is capable of more manipulation than any other arrangement, without losing its individuality. In order to increase its efficiency it is often elevated on a stand, the base of which is also filled with flowers or growing plants of delicate foliage.

Another effective manner of display is to place it on an easel. This permits every flower and spray of green to be seen and spread out to the most advantage, and the ribbon, if any be used, with an inscription, as is often the case in large pieces, can be much better arranged. While these accessories are very useful in adding to the importance of the piece, they take away, in a measure, its simplicity, and place it with the set design class, to which so many object.

The accompanying illustrations are of a combination of stand and wreath that just sufficiently elevates the form to show it off to the best possible advantage. The base is cone-shaped, and from its apex radiate the wires which support the design, all of which are covered with green and are practically obscured from sight. When placed on a table or rest of any kind it stands out from other pieces, and, while it is but a simple wreath, is given an individuality that is not possessed by the old style. Another form of support is one similar to the folding pillow frame. This enables the wreath to be used flat or elevated, as desired.

ROBERT KIET.

The Philadelphia Flower Market.

A movement to establish a flower market in Philadelphia, after slumbering some fifteen years, with an occasional waking and effort to get on its feet and accomplish something, has now been given another prod by its friends and is so aroused that one meeting has actually been held, to see if by any means enough life can be infused, or enthusiasm worked up, to bring about the desired result. One of the leaders in the necessary canvassing is a prominent wholesaler who hopes, by seeing such a center established, to break up the "peddling," although in the true meaning of the word it only applies, if then, when flowers are plentiful and not all taken by the customers on the regular daily route.

The growers who sell direct in this market live within a radius of fifteen miles of the city. Some send their stock by rail, while others drive in. The flowers reach the stores between seven and eight o'clock in the morning and the salesmen manage to get through before eleven. Fifteen years ago it would have been very much easier to have established a market of growers, as there were no commission houses worth the name. Now there are ten hustling firms, one of which, at least, handles more flowers daily than did all the growers put together at that time. As to the system of peddling, it is an established custom of the commission business in this city, as each of the houses has one and some of them two wagons which are going the rounds continually from morning until night.

E. G. Gillett, of Cincinnati in his last week's letter to the Florists' Exchange, makes statements which show that he

A STANDING WREATH OF VARIOUS FLOWERS.

WREATH BY JOSEPH KIFT & SON, PHILADELPHIA, PA.

is talking from a distance and does not understand the situation. The movement is not against the commission houses and it is not the small growers who are forward in the matter, one of the most active men being, as above said, prominent in the wholesale trade, while those associated with him are all large growers who sell their flowers direct to the stores.

The market, if established, is to be for the benefit of all, the small grower as well as the large. All who can in any way be benefited will be asked to come in and help their own interests and others by centralizing the business and thus establish a system that will benefit all branches of the trade. Flower markets that have had for their sole purpose, the bringing together of the buyers and sellers, have succeeded wherever established. In Boston the annual sale of choice of stalls brings almost enough to pay the rent of the building, which must be very gratifying to the stockholders and shows how popular it has become.

ROBERT KIFT.

Nasturtiums for Winter.

Now is the time to sow nasturtiums for climbing up the partitions in the greenhouses. One dozen plants will cover a large space. Constricted root space is necessary, however, to the production of an abundance of flowers. Therefore provide a box the length of the partitions but not wider or deeper than 6x6 inches. A few cross wires will serve for support. To those who have never grown them it will be a revelation to see the abundance of bloom a few vines will produce in this way. F. C.

A Novel Employment of Raffia.

Rafia, raffia, or raphia fiber, one of the natural vegetable products peculiar to Madagascar, has long been known as an article of European importation, chiefly employed for horticultural purposes, says Consul Hunt, of Tamatave. It is, moreover, woven on handlooms by the natives of the island into various fabrics, from

the coarsest sacking to a stuff with the wool of white silk, so fine that it is used by ladies in Europe for dress materials. Some small quantities of one variety occasionally find their way to New York, under the denomination of rabanas, a striped, colored, medium quality, forming a unique and novel tissue for draperies and curtains.

In the *Journal Officiel*, of Tamariyo, I note an interesting reference to the new experiment of employing raffia fiber for the manufacture of cigarette paper. The French firm which has taken this initiative is that of Messrs. A. & P. Duplat freres, 17 rue des Bons-Enfants, Marseilles, and samples are now in the Commercial Museum at Tamariyo. The paper presents the qualities of decided suppleness and strength, and as the fiber from the start is tasteless, inodorous and

exceedingly clean, it certainly recommends itself to the most fastidious. But I would draw the attention of paper manufacturers, always in search of new productions, to the possibilities of this fiber for other uses. These are too varied to quote, but will immediately suggest themselves to the scientific manufacturer, who might be interested in following the experiments.

The Dutch Horticultural Society.

At the June meeting of the Dutch Horticultural Society at Overveen, near Haarlem, the floral committee awarded first class certificates to Kas & Van Ommeren, of Hees, for *Pteris Schoonhorsti*, and P. W. Voet, of Overveen, for *Eremurus robustus superba* (Himalaicus robustus). Certificates of merit were given to W. Van Veen, of Leiden, for *Delphinium formosum eclecticum*, and to C. J. Kikkert, of Haarlem, for *Odonoglossum crispum Triange*. A botanical certificate was given to P. W. Voet for *Iris Frumensis*.

Diseased Boston Ivy.

ED. AM. FLORIST:—I am enclosing a couple of leaves of a Boston ivy growing on a wall in front of my house. This is the second year that this blight has made its appearance on the vine. I have tried Bordeaux mixture but it does not appear to do any good. Can you tell what the trouble is and its remedy? J. V. S.

The leaves of Boston ivy are attacked by a parasitic fungus, the same that causes the black rot of grape vines. If the Bordeaux mixture had been properly made and applied, it is hardly possible that the disease would not have been kept well in check. As a rule fungicides are not employed soon enough for their best effects to be realized. It is very important after the disease has appeared one season for fallen leaves to be burned before the beginning of the growth of the succeeding spring. When the buds begin to open, an application of the fungicide should be made, taking care to thoroughly wet the new growth as well as the old wood. At intervals of ten or twelve days, a second and third spraying

WREATH BY JOSEPH KIFT & SON, PHILADELPHIA, PA.

should be given, to be followed by at least two additional treatments at intervals of about fifteen days. If the season is a rainy one, more applications will be required than if it is dry. The disease when appearing upon grape vines, is usually controlled by six sprayings, although eight may be needed during a rainy season. The same amount of treatment will doubtless control the disease upon Boston ivy.

Another New Nephrolepis.

The accompanying illustration is from a photograph of a new form of *Nephrolepis exaltata* which originated with H. C. Fruek, gardener to Joseph H. Berry, Grosse Point Farms, Mich., and has been named by him *Nephrolepis "Hilda Fruek."* It is said to possess all the merits of the Boston fern and several distinct characteristics.

Coming Exhibitions.

Secretaries are requested to supply any omissions from this list.

BOSTON, MASS., September 11-14, 1902.—Annual exhibition of plants and flowers, Massachusetts Horticultural Society. W. P. Rich, Sec'y, Horticultural Hall, 300 Massachusetts Avenue.

BOSTON, MASS., November 6-9, 1902.—Chrysanthemum show, Massachusetts Horticultural Society. W. P. Rich, Sec'y, Horticultural Hall, 300 Massachusetts Avenue.

CHICAGO, ILL., November 11-15, 1902.—First annual exhibition, Chrysanthemum Society of America and twelfth annual exhibition, Horticultural Society of Chicago, to be held jointly. E. A. Kanst, Assistant Secretary, 5700 Cottage Grove Avenue, Chicago.

KANSAS CITY, MO., November 3-8, 1902.—Flower show, Convention Hall Directors, Kansas City, Mo.

LENOX, MASS., October 23, 1902.—Fall exhibition, Lenox Horticultural Society. F. Herremans, Sec'y.

LOUISVILLE, KY., November 12-15, 1902.—Chrysanthemum exhibition, Business Women's League. H. Natz, superintendent, Louisville, Ky.

MADISON, N. J., November 6-7, 1902.—Seventh annual flower show, Morris County Gardeners' and Florists' Society. C. H. Atkins, Sec'y, Madison, N. J.

MARSHALL, TEX., November 13-14, 1902.—Annual flower show, East Texas Flower Association. W. L. Martin, Sec'y, Marshall, Tex.

NEW YORK, N. Y., October 30-November 8, 1902.—Annual exhibition, New York Florists' Club, John Young, Sec'y, 51 W. Twenty-eighth street.

PHILADELPHIA, PA., November 11-15, 1902.—Annual autumn exhibition, Pennsylvania Horticultural Society. David Rust, Sec'y, Horticultural Hall, Broad street below Locust, Philadelphia.

PROVIDENCE, R. I., November 13-14, 1902.—Chrysanthemum exhibition, Rhode Island Horticultural Society. C. W. Smith, Secretary, 27-29 Exchange street, Providence.

ST. PAUL, MINN., November 3-5, 1902.—Chrysanthemum and orchid exhibition, Ladies Auxiliary of the Northwestern Manufacturers' Association. Mrs. A. P. Moss, Sec'y.

TARRYTOWN, N. Y., November 11-13, 1902.—Fourth annual exhibition, Tarrytown Horticultural Society. Edw. W. Neubrand, Sec'y, Tarrytown, N. Y.

Disorged the Jujubes.

W. R. Smith, superintendent of the U. S. Botanic Garden, ex-president of the S. A. F. and the man who obtained for it its national charter, tells a good story at the expense of two of his employes: In 1876 a Frenchman, after returning home from the Centennial Exposition, in a spirit of friendship for the government of the United States, sent a bag of seeds to the Botanic Garden. Two young men, Clark and Graham, were given them to plant, but the resemblance of the seeds to jujubes was too great a temptation for them and they ate freely of them. When they came to the label they found it to read "*Chamarops humilis macrocarpa argentea*." Struck with horror and convinced that they were poisoned they took a heroic dose of hot water internally and persisted until all the supposed "jujubes" had been disorged. The first plant from that batch of seed to come into bloom is now setting fruit. Mr.

Graham is still in the garden and Mr. Clark not far away, but it is safe to say that the "jujubes" will not be disturbed when they get ripe.

Two New Hemerocallis.

I have flowered this season two new *Hemerocallis*, says a correspondent of the *Gardeners' Magazine*. The first is a cross between *H. flava* (seed parent) and *H. aurantiaca major* (pollen parent). The flower is in color about half way between its parents; in size it approaches twice the size of *flava*. It opens well, is thick in texture and stands well above the foliage. The flower stems are twice the thickness of those of *flava*, though hardly as

NEPHROLEPIS HILDA FRUEK.

tall. The foliage is intermediate. The plant, which has flowered, apparently intends to spread at the root in the same way as *flava*. The scent is that of the mother, though hardly so strong. I do not think I shall be accused of calling my geese swans if I say that it is a strikingly handsome plant. I have provisionally named it *Chrysolite*.

The second is a cross between *H. Thunbergi* (seed parent) and *H. Middendorfi* (pollen parent). In shape it seems to "feature" the father more than the mother, though the reverse is the case with the foliage. It is intermediate in color, and is rather taller than I should have expected. The scent is strong, though not unpleasing.

E. S. Beard.

Edmund S. Beard, the president-elect of the Detroit Florists' Club, was born in Detroit, June 2, 1864. He is still a bachelor and the junior member of the firm of Beard Brothers, wholesale florists, West Fort street. After leaving high school he engaged in gardening with his father and brothers on the premises yet occupied by the family. In 1889 he joined his brother Frank in partnership and added the growing of flowers and plants to their extensive vegetable gardening operations, making the growing of carnations a specialty. Their glass area now consists of about 25,000 square feet. Mr. Beard, though of a modest, retiring disposition, has a well deserved popularity, his congenial and happy nature making him many friends. He takes the keenest interest in floriculture and readily adopts the

most improved methods in plant growing and greenhouse operation. The continued advancement of the club is assured by his election to the presidency.

Chicago.

TRADE TAKES UP ALL GOOD STOCK IN SIGHT.—BEAUTIES AGAIN THE PRINCIPAL ITEM.—ROSES ONLY GOOD FOR DESIGN MAKING.—NO CARNATIONS.—ASTERS BY THE CARTLOAD.—THE SHOW.—A SLENDID UNDERGROUND COOL ROOM.—VARIOUS DOINGS OF THE GROWERS.—NOTES AND VISITORS.

The market is in a period which a farmer would say is "between hay and grass." All the old stock is out and the cut from new plants not yet anything to speak of. There are a few good Beauties coming in, New Castle supplying some of the best, but the crop is not increasing very rapidly, either in quantity or length of stem. The demand for this item is fair, large orders for out of town being not infrequent. Detroit was a good buyer this week for the funeral of Senator McMillan. The summer roses, grown for the occasion, are good and clean up well, but of Brides, Bridesmaids and Meteors there are too many, for there is nothing but the young stock, small buds on very small stems. Such flowers are hardly serviceable for other purposes than funeral work. The carnation crop is small, a very few from indoors and not many from the field, but there are asters in any quantity, quality and color desired. Probably never before were there so many asters in the market as this season. And they are selling, according to their deserts, but not so much because people want asters as because there is practically nothing else for them to use. There are large quantities of rudbeckia standing around, and occasionally a pot of golden rod, but they do not sell. Neither do gladioli, except the fancy varieties. There is a let-up in the supply of auratum, but there is still a plenty of them. The present sees little call for greens.

After six weeks steady work Kennicott Brothers Company has practically completed the remodeling of its quarters and E. E. Pieser thinks they can now handle twice as much stock with the same amount of work. The floor space has been largely increased and new tables put in, on iron legs, but these improvements have to be numbered among the minor details, with painting and so forth, for the greatest thing is the new cool room, 18x36. It is under the sidewalk and street and is solidly cemented inside, so that it is water, air and gas proof. The walls are of thick building tile, with air spaces. The firm believes that this room will increase the value of every consignment handled in it, and even a very small percentage of increase will make it a profitable investment.

Everyone is pleased with the selection of the Art Institute for the autumn flower show. It is the consensus of opinion that it is the best place in town for a financially successful exhibition. From present indications it should be in all respects the best show the Horticultural Society has ever held, re-enforced, as it will be, by the prestige of the Chrysanthemum Society of America.

Among those not previously mentioned in this column as among those who will attend the convention are Mr. and Mrs. C. W. McKellar, Mr. and Mrs. J. D. Thompson, Mr. and Mrs. J. C. Vaughan, W. N. Ruld, James Hartshorne, C. W. Scott and J. S. Wilson, also Fritz Bahr and Thomas Tuttle, Highland Park

Peter Reinberg goes to New Castle to-night to spend Sunday, expecting to meet the Asheville party at Cincinnati Monday morning. Reinberg & Weiland have some fine carnation plants at New Castle, and at the Chicago place Mr. Reinberg has a nice surplus, clean plants but not large.

A. F. Borden, manager of the Redondo Floral Company, Los Angeles, called upon the trade early in the week, incidentally booming the California city for the next S. A. F. convention. He left for the east on Tuesday and expects to go to Asheville with one of the eastern delegations.

W. A. Peterson returned Wednesday from a six weeks' trip east. He says he was on a pleasure trip, accompanied by Mrs. Peterson, but people were so anxious to buy peonias that he took a number of good sized orders.

F. Stielow, at Niles Center, is benching his carnations but says he is in no hurry. He lost a good many plants in the field. His principal sorts are White Cloud, Norway, Joost and Dorothy.

O. J. Friedman and Miss Clara Schlesinger were married on Tuesday and are now in the east on a wedding trip. The bride is a daughter of L. Schlesinger, of Schlesinger & Mayer.

J. A. Peterson, of Cincinnati, was at the Palmer House this week with fine samples of his Pandanus Veitchii, Begonia Gloire de Lorraine, fenses, kentias, arecas and field carnations.

August Lange and wife left last Wednesday for a three weeks' vacation in the east, intending to visit Pittsburg, Washington, Baltimore, Philadelphia, Atlantic City and New York.

F. J. Robinson, the veteran florist of Oak Park, died August 9. He had retired from business, the greenhouses having been dismantled some two or three months ago.

E. C. Amling is deliberating as to whether to buy stocks and bonds with his surplus cash or to put it into ferns this fall, anent the Easter shortage and high prices.

There will be a goodly party for the convention trip. At Cincinnati Monday there will be entertainment at the hands of the Cincinnati Florists' Society.

Weiland & Risch cut Ivory rose on August 7, the first noted in the market. Of course it was very short but the buyers took to it nicely.

J. B. Deamud did much the largest business in his business history last season, but he is making his plans to beat it next year.

Wietor Brothers are now cutting from nine varieties of roses. They say the La France is the best seller at the moment.

August Swanson, of St. Paul, and Frank Berry, Stillwater, Minn., will join the Chicago convention party.

Arnold Ringier, of W. W. Bernard & Co., has returned from his western trip. C. M. Dickinson says that this is a very good summer at E. H. Hunt's.

Edgar Sanders has improved slightly during the week.

Other visitors: C. B. Whitnall, C. C. Pollworth, W. A. Kennedy, Milwaukee; A. E. Lutey, Calumet, Mich.; C. Winterich, Defiance, O.; G. E. Engel, Nenia, O.; C. C. Wonneman, Mexico, Mo.; Herbert Heller, New Castle, Ind.; J. S. Pollard, Allegheny, Pa.; H. C. Fruek, Detroit, Mich.; James Hayes, Topeka, Kan.; Samuel Murray, Kansas City.

SOUTH BEND, IND.—Trainer & Rettie are tearing down their greenhouses preparatory to rebuilding.

Philadelphia.

TRADE VERY QUIET AND PRINCIPAL CALL FOR BEAUTIES.—NEW CUT NOT ALL IDEAL BUT INCREASING EVERY DAY.—HYDRANGEAS HELP MAKE A PROFIT.—GROWERS PUT IN COOLING PLANT.—VARIETY'S LOCAL NOTES.

Things are certainly dull enough to suit the most pessimistic in or out of the business. However, we will not make it seem worse by talking about it. We believe it is the lot of the retail florist never to be supremely happy, for now that he has but little to do, that little is

EDMUND S. BEARD
(President-elect Detroit Florists' Club.)

generally a call for something that is very hard to get. Three out of every four customers want Beauties and in spite of all explanations, it is almost sure to be Beauties or nothing, and it is almost impossible to find anything worth the name. We are glad to say, however, that there are signs of a change in the near future, as several growers have commenced on the new stock and some eighteen to twenty-inch stock has been seen that was really first-class for the season. The early asters are on the wane but the Scuple's will soon succeed them and help out nicely. Hydrangea paniculata, with its great white heads, can now be had in large quantities and is a great factor in profit making, particularly when a large funeral order happens along.

The market question is still being agitated. It's a good thing; help it along. What is needed is some convincing person to see each grower who carries stock about the streets of the city and show how it will benefit him to co-operate with his fellow craftsmen in adopting an improved system of selling flowers, show him that it will put money in his pocket, both in the matter of time saved and an increased demand for his product and, if his stock grades high, a better price. Don't wait to have the matter forced on you, however, but if at all interested look up Jos. Heacock, Chas. Meehan, John Burton or other like gentlemen. Don't suppose for a minute that the buyers are not coming in; they are not going to miss the opportunity to see the stock of thirty to fifty growers each morning, no matter whether they live uptown or downtown. A nickel or

two will not stand in the way and, as the horse cars beat walking, and the trolleys put the horses out of business, so will the new way of handling flowers conquer.

The Lansdale Mushroom Company, of Lansdale, Pa., has put in a complete refrigerating plant, which is to be used for the purpose of cooling a range of mushroom houses so that a supply can be obtained all the season round. This shows an enterprise that is highly commendable and which we hope will be successful to a degree.

There is considerable building in the neighboring city of Wilmington, Del. Simons Brothers, whose specialty is carnations and who are very successful with them, are erecting four houses 24x200, in addition to their already large plant.

William J. Moore will move from his present location to 11 South Sixteenth Street. Here he will have an elegant light store with four times the room of his present quarters.

Of course the convention is uppermost in everybody's mind at present. There is to be a large delegation and all look forward to a fine trip. K.

New York.

CLUB HOLDS WELL ATTENDED AND INTERESTING SESSION.—LARGE PARTY FOR CONVENTION TRIP.—EXHIBITION PLANS.—EXHIBITS.—NOTHING DOING IN THE MARKET.—VALUES FLUCTUATE WIDELY.—NOTES.

The meeting of the New York Florists' Club held Monday evening, August 11, was fairly well attended. The chairman of the transportation committee reported that a stop-over privilege at Washington had been obtained. The matters of refreshments and badges were favorably passed on by the club. It is expected that the committee will have to look after a fairly representative delegation. Mr. O'Mara, reporting for the exhibition committee, referred to a meeting held by the committee in July, at which many pertinent questions were taken up and considered. A conference was held with a representative of the Sculpture Society, at which it transpired that the sculptors had responded to the request for exhibits to the number of 150 pieces of marble and bronze. A plan for the arrangement of the exhibition is being considered and altogether the prospect is bright for a very successful show. The amendments providing for active, associate and honorary classes of membership were adopted, also the amendments relative to the admission of members. On motion of Mr. Wallace the secretary was instructed to convey to John Burton, president of the S. A. F., the sincere condolences of the club on the loss of his son. The committee on awards reported on exhibits as follows: Certificate of merit for collection of seedling gladioli to George Burchett, Mountclair, N. J.; honorable mention to H. Beaulieu, Woodhaven, N. Y., for collection of dahlias, coleus and dill-hoeks. Arthur Cowee, Berlin, N. Y., made an exhibit of gladioli, but the committee would like to see them in better condition before giving an award.

The condition of the cut flower market is uneventful. The irregular demand for good roses is easily met, though it cannot be said that the supply is even moderately ample. American Beauty heads the list for quantity and quality, but only the longer stems figure as to price. There is more than a sufficiency of medium and short-stemmed roses of nearly all vari-

eties. These, with asters and other outdoor stock, must be disposed of, when buyers can be found, at any price. Values are shifting on almost everything, depending on the uncertain requirements of the retailers. Lily of the valley is still depressed in price. Orchids maintain their price well. *Cattleya gigas* still fetches 60 cents, *Harrisonia* 20 cents, and a few fancy cypripediums 15 cents each. *Harrisi* lilies are scarce. *Asparagus*, *smilax* and *adiantum* are in over-supply.

Thomas Young, Jr., is about to open a fine retail establishment on the northeast corner of Fifty-eighth street and Sixth avenue.

On Monday Mrs. Alex. Burns jumped from a runaway trolley car going from Woodside to Brooklyn and was seriously injured.

John Wier's son is dangerously ill with appendicitis.

Visitors: August Gaetleke and bride, Nashua, N. H.

Boston.

MARKET SHOWS LITTLE CHANGE AND NO IMPROVEMENT.—ASTERS IN OVER-SUPPLY.—THE WEEKLY EXHIBITION.—PARK VISITORS.—DEPARTMENT STORE HAS A FLOWER DAY.—DOINGS OF THOSE IN THE TRADE.—NOTES.

Last week's report on trade conditions would do very well for this week, as the present state of business remains just about as it was except that asters are coming in even more heavily, while carnations seem to be growing less in numbers daily. Beach prospects are not so rosy as they might be and the outlook for this once profitable line seems very forlorn, as already half of August has passed and the cool nights begin to whisper of September. Outdoor vegetation never looked better. Lawns are vivid green, gardens are fresh and bright and the trees have luxuriated in the abundant rains by day and heavy, cool dews by night, regardless of all the insect pests that have been terrorizing the heart of the nurseryman. It certainly has been an elegant summer for the stay-at-homes. The only complaint is that there is not enough business.

Monday, August 11, was "flower day" at Houghton & Dutton's department store. This firm has made a practice for several years of giving away on stated occasions, every three or four months, a bunch of flowers to every customer. Needless to say that the quantity of roses, carnations, peas, and so forth, used up in this manner runs high in the thousands and is a great relief to the market.

At the horticultural exhibition last Saturday J. Lawson, gardener to E. J. Mitton, exhibited nice plants of *Cattleya Dowiana* and *C. Gaskelliana*. The awards for displays of annual flowers were won by E. S. Converse and Mrs. J. L. Gardner. There were some good perennial phloxes from George Hollis, dahlia from Mrs. J. B. Lawrence and B. F. Flanders and gladioli from A. F. Schenkellberger.

Among the park visitors last week were Messrs. Wilcox, president, and Sam'l Parsons, Jr., superintendent, of the New York park department. They were given a drive through the Boston parks and playgrounds by Superintendent Pettigrew and expressed surprise and admiration at the progress being made in this department.

Next week the Association of American Cemetery Superintendents convenes in Boston, its meeting coming on the same

days as that of the S. A. F. at Asheville. Jas. H. Morton, of Mt. Hope Cemetery here, is secretary, the president being Frank Enrich, of Detroit.

J. W. Newman has moved from his old place on Brattle street to a very central and well lighted store at 37 Washington street. Quietly and without any ostentation he has been building up a good steady business in a section hitherto shunned by the retail florists.

The number of those going to Asheville from this neighborhood grows to a respectable size as the day for starting approaches. The party that will enjoy the trip the most is that conducted by Fred. Mathison via the sea route to Norfolk.

R. & J. Farquhar are showing flowers of the *Ostrich Plum* aster at their store. It is as great an advance over the best Comet aster as that was over the old-fashioned type.

Visitors: Geo. H. Thompson, Lenox, Mass.; Wm. Griffin, Thompson, Conn.; H. S. De Forest, New York.

St. Paul.

TRADE ALREADY SHOWING IMPROVEMENT.—STOCK NOT PLENTIFUL AND FUNERAL FLOWERS SCARCE.—NOTES OF DOINGS OF THE GROWERS.—VARIOUS JOTTINGS.

The end of the heated season is approaching and already trade is improving. Good stock is not plentiful, white flowers being very scarce at times. Roses are improving daily, both in quantity and quality. Carnations are scarce and poor, though some good ones are received from Joliet and Chicago. Japanese lilies are becoming quite plentiful, as well as tuberose, and are a welcome addition to the list of funeral flowers. Asters and sweet peas are now of poorer quality and smaller quantity.

P. H. Peterson, formerly with L. L. May & Company, has purchased the Campbell Greenhouses, at St. Cloud, and will conduct them in the future. There are six houses in the range, which will be moved next season onto Mr. Peterson's property, which he purchased some time since. The business will be known as the Anderson Floral Company.

This city was visited August 9 by the worst rain storm in its history. Over three inches of water fell in forty minutes. All outside stock was damaged. Carnations and other stock on side hills were washed out or badly buried in sand.

The Warrendale Greenhouses have the benches all replanted. They grow principally Brides and Bridesmaids on their own roots and claim they obtain more blooms during the winter than from grafted stock.

It is hoped that the local florists, as well as those from other places, will assist in making the flower show of the Ladies' Auxiliary a grand success and thus give the business a decided impetus.

E. F. Lemke has torn down the remainder of his old range of houses on his Hague avenue property and is building three new houses for carnations and violets.

N. C. Hansen has his new house on Dale and Maryland streets well under way. It will be 25x125 in dimensions, 16x18 lapped glass to be used.

L. L. May & Company have berched 7,000 carnation plants. They are very strong and stocky, having made an excellent growth in the field.

Chris. Hansen changed his traveling plans and is visiting Manitoba and the Canadian northwest, where he is interested in farming lands.

So far as I have learned, A. S. Swanson will be the only one to go to Asheville from this city.

Dr. R. Schiffmann, of orchid fame, is away on another trip to the Pacific coast.

A. S. Swanson is rebuilding the conservatory connected with his city store.

Herman Bunde will resume possession of his houses September 1. FELIX.

St. Louis.

BUSINESS QUIET AND A LIGHT STOCK SUFFICES.—WORLD'S FAIR GETS THE TESSON PLACE.—VARIOUS NOTES OF LOCAL DOINGS.

Stock is not as plentiful this week as last, but is enough to supply the trade, which is very quiet, outside of a few funeral orders. Roses are much improved, Brides and Kaisers being the best, although a few Meteors are very fine. Beauties are good and moving quite briskly. Carnations are very good and the fancies are bringing good prices. Asters and tuberose are doing well but gladioli move slowly. *Auratum* lilies are coming in quite plentifully of late.

The Louisiana Purchase Exposition people have signed for the Tesson tract of fifty-one acres at \$51,000 for two and one-half years, they to pay all taxes and other expenses and to return it in good condition at the end of this period. The Exposition will not get the greenhouses until the first of next May. This will give Mr. Tesson the chance to get the crop off. The place is looking very fine now.

Fred. W. Bruenig is hard at work getting his place moved across the street, beside the large Beauty house that he built last year. He is putting cement walks in and around his houses.

J. Burke has repainted his store and made several other improvements.

R. J. Mohr is now employed at the Tesson greenhouses. R. J. M.

Columbus, O.

DOINGS HERE AND THERE IN THE TRADE.—GROWERS BUSY.—GOOD STOCK.—A NEW CUT FLOWER PRODUCER TO START.

Mr. Drobish tells us that owing to a lot of repairing on his houses he will not get away much this summer. He has quite a mailing trade which necessitates the propagation of a great portion of the stock during the summer months. This, in connection with a large demand for design work, keeps Mr. Drobish at his post rather closely.

A purchase of twenty-five acres of ground in the suburbs of Columbus has been made by a newly formed company for the purpose of growing cut flowers on an extensive scale. Columbus has been a back number for a number of years, but we will get to rank among the best. All we want is a little time.

Mr. Welch, of the Seibert Floral Company, says they are doing quite a bit of repairing, but at the same time are taking good care of their general stock, which is quite promising for this winter.

Sherman Stephens has more than doubled his space for chrysanthemums and, judging from the looks of his plants, will cut some good blooms this season.

Afleck Brothers, who have been devoting their entire space to roses for the past few years, are planting part of it with carnations this season.

At this writing it is hard to tell who will attend the convention, but four are positively booked to go.

Mrs. E. M. Krauss, who has been ill for the past two weeks, is somewhat improved. CARL.

Newport, R. I.

BUSINESS NOT UP TO PREVIOUS RECORDS.—SOCIETY ACTIVE.—SOME LARGE WEDDING ORDERS.—A SUN DIAL.—VARIOUS NOTES.

Business is not up to the standard for this date. Society seems active, but florists and gardeners report business unsatisfactory. Of course some prominent weddings have taken place, the most recent on Saturday, the Thatcher-Davies affair, when All Saints' church was transformed into a fairyland of flowers, with an artistic arrangement of greens and palms as a background, the entire building, from vestibule to altar, being included in the decorator's scheme. The bride's bouquet was composed of orange blossoms and lilies of the valley. The Hodgson Company executed the floral work, both at the church and residence.

A somewhat novel and unique horticultural adornment has just been added to the beautiful grounds attached to the summer residence of Mrs. Burke-Roche, in the way of a sun dial sixteen feet in diameter. A yew tree nine feet high is the style by which the sun's shadow is cast on the dial. On a white gravel base are the figures and circle made of common box, usually cultivated for edging. Arranged in a half circle at the front and separated from the dial, and also made of box, appears a French legend, the interpretation of which is "Happy hours are not counted." J. C. McLeish, Jr., is the gardener.

Robert McLeod, for about twenty-five years gardener for ex-Mayor Fearing and also well known as an exhibitor in Boston, resigned that position and now acts as landscape gardener and overseer for Reginald Vanderbilt, on the large farm recently purchased by the latter in the suburbs.

As in former seasons, the Bellevue avenue stores consist of Gibson Brothers, Fadden, Siebrecht & Son, Wadley & Smythe and the J. M. Hodgson Company, each of whom makes a daily exhibit pleasing to passers-by.

J. C. McLeish, who, by the way, is also Newport's efficient street commissioner, reports an excellent high grade crop of peaches, grapes and nectarines, with little difficulty in disposing of same.

The stock in trade of James Gohm, for many years in the seed and farm implement business, is advertised for sale by the sheriff on August 18.

C. D. Stark, Jr., has taken the so called Findlay Greenhouses and advertises fine peaches, grapes and nectarines and reports a good market. C. J. M.

Toronto.

TWO HOLIDAYS BREAK IN ON THE BUSINESS OF THE WEEK.—CANADIAN SOCIETY ASSURED OF SUCCESSFUL MEETING.—VARIOUS LOCAL NOTES.

Last week we had two holidays, Monday and Saturday, to break into the usual routine and, consequently, there was little done on those days. The balance of the week was fairly good, but with a scarcity of roses it was hard to catch up. This city, always known for its good roses, was never more likely to lose its reputation than at present. Most crops are off and the few blooms are decidedly small, with much mildew. Carnations are neither plentiful nor good, but with a large supply of good asters they are not much in demand. Wet weather and cool nights have been very beneficial to dahlias and gladioli, but, as they are mostly dark colored, they are as yet not much in demand.

The fifth annual convention of the Canadian Horticultural Association, to be held in Hamilton, September 3 and 4, is expected to be the banner meeting of the association. Toronto boys will turn out in full force and the cheap rates which are to be run to Toronto for the exhibition will enable all outside visitors to reach here cheaply. A good time is promised to all who find it convenient to help join in this auspicious occasion.

W. Waters has been to Brampton for a few days and enjoyed his trip thoroughly. At present he is bringing in some fine white and mauve centaurea.

George Hollis is bringing in some fine double helianthus, which are very salable.

A few long stemmed Beauties are coming in from Manton Brothers.

Walter Muston, of North Toronto, is off on a trip to Winnipeg. H. G. D.

Kansas City.

PLANS FOR UNIQUE FEATURES FOR FLOWER SHOW.—ENTERPRISE OF INTEREST TO OTHER EXHIBITION MANAGERS.—TO CLOSE WITH A FREE DAY AND A BALL.

Last year the flower show managers went to Japan for decoration ideas. This year they are going to stay at home. The display in Convention Hall will be called an all-American flower show. At the entrance to the hall there will be two large pyramids, each twenty-five feet high, and composed of 500 scarlet salvias. After passing through this entrance the spectator will find himself in an exact reproduction of the garden that now surrounds the old home of George Washington at Mount Vernon. In the dim distance, away to the rear of the hall, will be a large painting, 100 feet long, of the White House.

The garden at the old home of Washington is full of old-fashioned flowers and these plants will be shown in Kansas City's reproduction. "We are now growing these flowers and we have two greenhouses full of them," said Mr. Taggart to a reporter. "These plans have been in progress for months and long ago we took the necessary steps toward securing the very flowers that we wanted for this great feature of the flower show of 1902.

"To carry out the 'All-American' effect all the society women taking part in the flower show will be dressed in colonial costumes. These same costumes will be in evidence at the flower show ball on the Monday night following the closing of the regular exhibit."

One of the distinctly unique features of this year's show will be a bird exhibit. Special prizes will be offered in this class. Effort will be made to have between 1,000 and 2,000 song birds of all kinds on exhibit in the big hall.

The formal opening of the show will be held Monday afternoon, November 3, from 2 to 5 o'clock. For the remainder of the week the hall will be open from 10:30 a. m. to 5 p. m., and from 7:30 to 11 p. m., daily. The show proper will run from Monday till Saturday, inclusive. On the Sunday following the directors, through the Provident Association, the Salvation Army and other charitable organizations, will give tickets to the show to all deserving persons who wish to see it. On Monday night following, the first annual flower show ball will be given in Convention Hall.

The season tickets this year will be sold in pairs, at \$5 per pair, and every purchaser of two season tickets will be entitled to a ticket to the flower show ball, admitting one lady and gentleman.

Washington.

FLORISTS ACTIVE IN CLUB MATTERS.—WANT THE NEXT YEAR'S CONVENTION.—REFRESHMENTS ENROUTE TO ASHEVILLE.

The Florists' Club meetings have been well attended lately and quite a number of new names added to its roll. On August 7 there was a special meeting, with J. R. Freeman in the chair, to take action on the personal property tax question, on growing stock, claimed by the assessors to be assessable under an act of congress at its last session. It was decided to pass in an estimate on pot plants only. At the last meeting it was proposed to provide a dinner or refreshments for the delegates passing through Washington enroute to Asheville. A committee was appointed to make the necessary arrangements. A proposition was made and unanimously adopted to invite the Society of American Florists to hold its next convention in Washington.

Albert C. Shaffer, of Laurel, Md., has leased Wm. H. King's greenhouses and place at North Langdon, lately occupied by Z. D. Blackistone. He will grow cut flowers and bedding plants.

Robert Bowdler is building a range of five houses 20x80 running east and west, in place of some small houses running north and south. His carnations in the field are in fine shape.

Wm. F. Gude has been elected president of the Business Men's Association. The Times recently printed his portrait and a sketch of his life. He is prominent in many societies.

J. and C. Norton, of Brightwood, have built a house for carnations 16x96, also a propagating house 20x25.

George C. Smith and John Davidson, with A. Gude & Bro., have returned from their vacations.

Charles W. Wolf, with J. D. Blackistone, is taking his vacation. P. G.

Catalogues Received.

J. M. Thorburn & Co., New York, wholesale list of bulbs; Schlegel & Fottler Company, Boston, wholesale list of bulbs; Rice Brothers, Minneapolis, florists' supplies; Peter Henderson & Company, New York, plants, seeds and requisites; Cedar Hill Nursery and Orchard Company, Winchester, Tenn., nursery stock; Wm. Elliott & Sons, New York, wholesale list of bulbs; Henry F. Michel, Philadelphia, bulbs; A. N. Pierson, Cromwell, Conn., palms and ferns; Chas. D. Ball, Holmesburg, Philadelphia, Pa., palms and decorative plants; Uerto Hillebrand, Pallanza, Italy, bulbs and seeds; Wm. Baylor Hartland, Cork, Ireland, bulbs; Haaslach & Roumanille, St. Remy-de-Provence, France, seeds; Gt. Van Waveren & Kruijff, Sussenheim, Holland, bulbs; W. Keessen, Jr., & Zonen, Aalsmeer, near Amsterdam, Holland, nursery stock; Martin Grashoff, Quedlinburg, Germany, Waldersee aster; Ant. Van Velsen & Company, Haarlem, Holland, bulbs; Alex. Dickson & Sons, Newtownards, Ireland, new roses; M. Herb, Naples, Italy, bulbs; E. H. Kreege & Son, Haarlem, Holland, bulbs; Dammann & Company, San Giovanni a Teduccio, near Naples, Italy, seeds and bulbs; Rippley Hardware Company, Grafton, Ill., sprayers, insecticides, etc.; Harlan P. Kelsey, Boston, hardy native plants; Giblin & Company, Utica, N. Y., heating apparatus; Walker & Pratt Manufacturing Company, Boston, boilers; American Blower Company, Detroit, blowers, etc.; John Lucas & Company, Philadelphia, paint.

THE AMERICAN FLORIST

EIGHTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00. Subscriptions accepted only from those in the trade.

Advertisements on all except cover pages. 10 Cents a Line, Agate; \$1.00 per inch. Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive insertions, as follows—6 times, 5 per cent; 13 times, 10 per cent; 26 times, 20 per cent; 52 times, 30 per cent.

Cover space sold only on yearly contract at \$1.00 per inch, net, in the case of the two front pages, regular discounts applying only to the back pages.

The Advertising Department of the AMERICAN FLORIST is for florists, seedsmen and nurserymen and dealers in wares pertaining to those lines only.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to secure insertion in the issue for the following Saturday. Address

ASHEVILLE.

SOME of the new petunias are remarkably effective in funeral work.

No greenhouse owner can afford to be without both hail and fire insurance.

EASTER of 1903 falls on April 12, practically two weeks later than last spring.

SEVERAL large growers of rose plants complain that Meteor has been a slow seller this season.

ANY florist can sell hardy shrubs in profitable numbers if he has a little show ground and asks for orders for the next season's planting.

WHEN autumn comes again Appleton and Eaton will rule the cut flower markets. They have been planted everywhere in immense quantities.

J. PIERPONT MORGAN has put down his name for \$5,000 toward the proposed new hall of horticulture for the Royal Horticultural Society of England.

IN building see that every piece of lumber that goes into the structure is covered with paint; mind the spots where shavings are taken off to make a joint.

THE mailing label on your paper shows when your subscription expires; when you send your renewal note that the date changes within two weeks; it will serve as your receipt.

THE fuel question is becoming a serious problem to the florists in a large portion of the country. There seems no immediate prospect for a settlement of the strike in the anthracite coal regions.

The Liberty rose is like our men of strong personality; it has its warm friends and its vindictive enemies, furthermore its friends are mostly men whose friendship is worth having.

THERE is a heavy demand for Begonia Gloire de Lorraine out of small pots, but the big growers say the stock grows slowly this year because of dampness and cold. Usually there is no trouble after the cuttings are rooted.

WHEN Peter Barr visited Cincinnati one of the growers of that city showed him a fine lot of young plants of Adiantum Farleyense. The veteran daffodil authority admired the plants but, to the amusement of his companions, inquired whether they were seedlings.

Size of Return.

ED. AM. FLORIST:—In using hot water, if the flow pipe from the boiler is 4-inch, how large should the return be where it goes into the boiler? G. & F.

The main flow and return pipe should always be of the same size. L. R. T.

Want 1903 Convention.

The 1903 convention of the S. A. F. seems to have sprung into great demand. Milwaukee has concluded that it would be welcome, Cincinnati wants it and so does Washington. Baltimore stands with open arms and Los Angeles wishes to be considered as in the field.

Hotels of Asheville.

The following Asheville hotels are recommended as desirable and convenient at rates quoted, American plan:

Table with 2 columns: Hotel Name and Rate. Battery Park, per day \$3.00 to \$4.00; Swannanoa, per day 2.50 to 3.00; Berkeley, per day 2.00 to 3.00; The Manor, per day 2.00 to 3.00; Glen Rock, per day 2.00.

Running a Dynamo Without Cost.

In a recent issue of another paper, in an article on "Business Methods for Busy Florists," I note the following: "In large places, those with 50,000 square feet or more of glass, the cost of running a dynamo for lighting purposes will amount to little or nothing outside of the lubricating oil. The exhaust steam in most plants will do the work nicely."

This is a pernicious absurdity. In twenty-four out of twenty-five large plants there is no engine to produce exhaust steam in order to run another engine to run a dynamo with. In the second place exhaust steam can not furnish pressure enough to run a high duty, high speed engine such as is required for lighting purposes. In his estimate of cost the writer neglects to include the cost of the engine. Judging from his general misinformation on the subject, it is quite likely that he imagines one might pipe the "exhaust steam" direct to the dynamo and leave out the engine altogether.

It takes steam acting through a steam engine, and lots of it, to run a dynamo, and it takes coal to make steam.

SYSTEM No. 2.

Society of American Florists.

DEPARTMENT OF PLANT REGISTRATION.

M. H. Walsh, Wood's Holl, Mass., registers Hydrangea hortensis superba, a cross between the varieties Otaksa and cyanoclada. Habit dwarf, flowers lively pink two to two and one-half inches in diameter, often semi-double, petals thick and pointed.

Henri Beaulieu, Woodhaven, N. Y., registers Dahlia Wm. Scott, show, color bright red; flower flat, unlike any existing variety; diameter five inches or more; height, four feet; flower stem fifteen inches; strong grower, moderate bloomer;

WM. J. STEWART, Sec'y.

American Carnation Society.

DEPARTMENT OF REGISTRATION.

S. J. Reuter, Westerly, R. I., registers Carnation Lillian Pond, a large white, of good form and strong fragrance; good keeping qualities; strong stem and an early and continuous bloomer.

There are a number of new carnations about to be introduced and others that have not been registered. This is a serious neglect on the part of the originators, as they should be registered either with the American Carnation Society or the Society of American Florists, so that the names and descriptions may be on record. The fee with the American Carnation Society is \$1 for each name and registration is open to anyone having a new carnation whether a member of the society or not. All names registered with the carnation society must be sent to Albert M. Herr, Lancaster, Pa. Those that are registered with the S. A. F. must be sent to Wm. J. Stewart, 79 Milk street, Boston, Mass. In this society registration is free to members and to outsiders the fee is \$5 for each name.

ALBERT M. HERR, Sec'y.

Piping a Carnation House.

ED. AM. FLORIST:—I have a carnation house 15x70, ten feet to ridge. With two 2-inch flows through the center with a fall of eighteen inches, each flow feeding three 1 1/2-inch returns, will I have enough radiation to give me 45° in zero weather? If not, would it be better to have four

1½-inch returns to each 2-inch flow or to run another 1½-inch flow through the center and connect with two 1½-inch returns, one for each side of the house?
M.

There should be no difficulty in maintaining the desired temperature with two 2-inch and six 1½-inch returns. If a higher temperature than 55° should be desired each of the flows could carry an additional return. While good results can be secured with 1½-inch pipe, 2-inch pipe will be even more satisfactory in 70-foot houses. Seven pipes of this size will be desirable for the above described house.
L. R. TAFT.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

Every paid subscriber to THE AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

BOILERS FOR SALE.
Two No. 6 Cottage Hot Water Boilers and one No. 15 Lord & Burnham. The Park Department is increasing their greenhouse area and is changing from hot water to steam and wish to dispose of these boilers at once. They are in first-class condition in every way. Grates and all connections are perfect. All three of the boilers have the shaking and dumping grates, and the two smaller Cottage boilers have a capacity of 600 feet of 4-inch pipe. The larger one has a capacity of from 1,400 to 1,600 feet of 4-inch pipe. These boilers are comparatively new, having been used but a short time.
Prices for the smaller ones \$50.00 apiece. For the large one, \$80.00; cash. These prices f. o. b. Cincinnati. All smaller fittings and pieces will be packed. Address
SUPERINTENDENT OF PARKS,
City Hall, Cincinnati Ohio.

The annual meeting of the Florists' Hail Association will be held at the Auditorium, Asheville, North Carolina at 2 P. M., Aug. 21, 1902.
John G. Esler,
Secretary.

NOTICE
—OF—
STOCKHOLDERS' MEETING.
CHICAGO, July 19, 1902.
Stockholders of the American Florist Company:
You are hereby notified that the annual meeting of the Stockholders of the American Florist Company will be held in the Battery Park Hotel, Asheville, N. C., Wednesday, August 20, 1902, at 3 o'clock P. M., for the purpose of electing directors and officers for the ensuing term, and for the transaction of such other business as may come before the meeting.
J. C. VAUGHAN, Pres.
M. BARKER, Secy.

Buffalo.

CRAFTSMEN ENJOY A VERY SUCCESSFUL OFFING.—EVENTS WELL CONTESTED.—A VARIETY OF PERSONAL AND TRADE DOINGS.

The florists' outing was a decided success. The great feature was the ball game between the All-Scotts and All-Buffalos. The former were victorious, owing to the errors of their opponents. The other events, too numerous to mention, were well contested. The Bedell is a fine place to go, but their bill of fare was far from satisfactory.

Reichert and Wiese, in the quarter-mile race, ran well. The young people, Scott, Braik, Long and McClure enjoyed themselves in the dance hall and, had it lasted longer, Wm. Legg would have been limbered up for an eight hand reel.

Business is very quiet and stock running to outdoor varieties. Asters and gladioli are good and roses about what we may expect in August. Funeral work has been quiet and the greenhouses are being generally overhauled.

Mrs. D. Newlands & Son have had a very good trade this season and are well satisfied. Their greenhouses are well situated for cemetery trade.

W. A. Adams is at Dunkirk and Miss E. C. Smith, of Anderson's, is in Toledo, Ohio. M. Steger, of Kasting's, is also away.

Work on Palmer's new store is progressing nicely.

L. H. Neubeck is busy at his Corfu greenhouses. Bison.

Lapeer, Mich.

W. H. Watson has benched one house of carnations, the Marquis, and is hard at work on the rest of the task. He will bench upwards of 35,000 plants. He has been exceptionally fortunate this year in that his field is high ground and out of 61,000 plants not more than 1,500 show injury from the wet weather. Stem rot is almost unknown with him. Mr. Watson early took alarm at the prospect for a coal famine and in June laid in 370 tons, which is within fifty tons of his season's requirements. He says that he sleeps better with that coal pile to fall back upon.

MY GOOD WISHES

To all florists whom I expect to meet in North Carolina.

I have now for sale **FANCY** and **DAGGER FERNS**, at 40c, 45c and 50c per 1000. They are picked fresh every day and will guarantee them to be all right.

Also **SPHAGNUM MOSS** and **CHRISTMAS TREES**.

Bouquet Green, Laurel Roping and Spruce Boughs for cemetery use.

FLORISTS' SUPPLIES of all kinds.

Give me an order before the 26th of August so you can take to me over it to North Carolina. Address all orders to

CUT FLOWERS AT WHOLESALE.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

WALTER P. STOKES, Pres.; C. N. PAGE, First Vice-Pres.; S. F. WILLARD, Withersfield, Conn., Sec'y and Treas.

CHINESE lily bulbs are reported a short crop this year.

THE Connecticut seed crops, of beet, carrot, turnip and parsnip, were looking well July 25.

THE city of Pittsburg has awarded the contract for the supply of bulbs for Schenley, Highland and Southern parks to W. C. Beckert, of Allegheny, Pa.

THE Long Island cabbage seed crop will be a full one on nearly all kinds, with the possible exception of Early Spring, Hollander and Danish Ballhead. The seed will germinate high and be of good carrying quality.

ONE pea crop report from Canada indicates a crop of two and one-half to one. The Sturgeon Bay, Wis., and Sheboygan, Mich., pea reports are in the main favorable. Alpena, Mich., pea crops are not so good. The dwarf wrinkled sorts are the poorest.

PHILADELPHIA, PA.—One of the large buildings of D. Landreth & Sons, located at Bloomsdale, on the outskirts of Bristol, was destroyed by fire early August 7. The loss is placed at about \$40,000, the building and contents being fully insured. The building was used for storage and packing purposes.

The Acreage of Sugar Beet.

The number of acres devoted to sugar beets in the United States is reported as follows

	1900.	1901.	1902.
	Acres.	Acres.	Acres.
California.....	12,000	64,300	71,234
Colorado.....	10,800	23,700	39,149
Michigan.....	39,000	57,400	58,000
Utah.....	11,200	12,500	18,600
Other States.....	28,700	36,825	32,230
Total.....	131,700	194,725	259,513

Nebraska Seed Crops.

A Waterloo, Neb., correspondent reports, August 11, that the prospects for muskmelon and watermelon are exceedingly poor. The melon louse or aphid has appeared in great numbers, making the conditions still more serious. Because of the weak early growth of the plants, they are in poor condition to withstand these attacks. Cucumbers are looking some better and squashes fair. Corn is unusually fine at present and should yield above the average, but the acreage is not large.

Lewis L. May.

The subject of this sketch is a Canadian by birth, having been born in Oshawa, near Toronto, about forty-six years ago. In early life he engaged in telegraphing but soon gave this up for the nursery business, entering the employ of T. W. Bowman, of Rochester, about thirty years ago. He went from there to Chase Bros. After a few months with this latter firm he engaged with Stone & Wellington as their northwestern representative, locating in Winnipeg about twenty-five years ago. Two years later he removed to St. Paul and entered into partnership with the old firm under the name of Stone, Wellington & May, conducting an agency business for the sale of nursery stock in the then rapidly devel-

oping states and territories of the great northwest. On the death of Mr. Stone in 1882 he purchased the entire business, which has since been conducted under the firm name of L. L. May & Company. In 1887 greenhouses were erected and a floral business added to that of the nursery. In 1889 the wholesale seed trade department was established, and has since grown to large proportions. In 1899 a large farm was purchased and the following year the first plantations of nursery stock were made at Mayfield. Possessed of unbounded ambition, push and ability, he has forged rapidly to the front in the several lines of business in which he is

LEWIS L. MAY.

engaged and his firm is now as well known as any in the country.

In 1881 he married Miss Lovell, of Toronto. His family consists of a daughter, Miss Grace, and two sons, Lewis and Lovell. Although a very busy man at all times he always has time to exchange a hearty greeting with all his friends and their name is legion. In his home city he has been twice honored by appointments to the school board and police board of commissioners. He is now vice-president of the latter body.

Government Seeds in the West.

The old clabber-faced barnacles are all on the pay roll. Bowlegged agricultur-

ists, who can't farm; supernannated preachers, who can't preach; ex-lawyers, doctors and editors, decayed politicians—ballheaded, spectacled and bewhiskered—who have grown old, bleary eyed and decrepit writing about the number of kicks in a mule's hind leg; the per cent of protein in a boiled cabbage; the number of hammers in a yellowhammer's hammer; and they are all on the pay roll, with big salaries, as naturalists, archaeologists, zoologists, pomologists, meteorologists, entomologists, ornithologists; and their numbers are as the sands of the sea; and they belong and are a part of the agricultural department, Washington—the main part—the whole thing, in fact; and they work the congress to a frazzle for appropriations to pay them, while they sit in their back offices lolling out their tongues while enlightening the sovereign squats on the subject of farming. Did you ever see an agricultural department agriculturist? And did you ever see an agricultural department garden seed? Well, they both look alike. A bag or two of the agricultural department garden seeds struck this town last spring; and the packages were given to the unsuspecting farmers, round about; and the returns are just coming in. Speaking of agricultural department "sweet corn"—a mixture of yellow and white Indian corn, crossed with calico squaw, broom, flint, Katfir, ninety day Dent, Early White Kentucky and every known and unknown variety grown on the continent; and these old clabber-faced barnacles buy it by the ton and ship it west as sweet corn. Lord help us!—*Eldorado Republican.*

Importation of New Crop Pansy Seed

JUST RECEIVED

Type of Hunt's Unrivalled Pansy.

HUNT'S UNRIVALLED MIXTURE - Universally acknowledged the best and most reliable Pansy Mixture for sale anywhere. We do not trust to one grower for the seed, but purchase on contract from several European Pansy Specialists their choicest strains and newest novelties. We then form the mixture ourselves, so we know absolutely that the correct proportion of each sort is used. Every variety is tested upon receipt and strains are discarded which do not show 87% to 98% germination. The fact that the seed comes from so many sources is ample assurance against old varieties. The Odier, Cassier, Bugnot and Trimardeau strains, together with the striped and veined German Show Pansies, Masterpiece and all the late creations, forms a variegated and splendid mixture which defies competition. Trade pkt., 25c; 1/4 oz., \$1.00; 1 oz., \$8.00; lb., \$125.00.

OTHER FINE MIXTURES.

TRIMARDEAU - A mixture of all the Giant sorts, including the richest, yellows and blues. We have spared nothing to make this the highest quality giant mixture in America. Trade pkt., 20c; 1/4 oz., 75c; oz., \$3.50.

LARGE FLOWERING MIXED - A fine mixture of the large-flowering sorts, including all the latest French Pansies. Trade pkt., 25c; 1/4 oz., 75c; oz., \$4.00.

CHOICE MIXED - Where a cheaper grade will do this mixture is recommended. Fine for bedding. Trade pkt., 15c; 1/4 oz., 40c; oz., \$2.00.

PRIMULA - Hunt's Florists' Mixture "THE GRAND" - Fine assortment of colors, including the better selling shades and all the Giant sorts of Chinese Primula, English grown seed. The seeds forming this mixture are grown for us by English Specialists. The quality is uniform and always the best to be had anywhere at any price. Trade packet, 50c; 1000 seeds, \$1.50.

CALCEOLARIA - Hunt's Hybrida Grandiflora. The best Florists' mixture on the market, containing all the tigered, mottled, variegated and spotted types, beautifully marked and self-colored strains, representing a vast and marvelous diversity of colors. Trade pkt., \$1.50. Calceolaria Special, \$1.00. Fine mixed, 50c.

CINERARIA - Hunt's "SPECIAL" mixture. An assortment of unquestioned merit containing all the finest English strains exclusively. 1000 seeds, 75c; 2 trade pkts., (2,000 seeds), \$1.25. Finest German Mixture, 50c trade pkt.

Grower of the Finest Pansies.

"THE CORONATION" Giant Fancy Market Pansy

Having again been successful in harvesting our crop of this magnificent strain, which we now beg to introduce to the notice of our American friends, we feel certain from the many flattering reports reaching us from all quarters, that it is unsurpassed for size, quality and diversity of colors. The blooms being carried well above the foliage (a great desideratum), show off the bright and distinct markings to the greatest advantage, embracing as they do most beautiful shades of pink, rose, salmon, purple, blue, yellow and velvety maroon, with the margin of the petals distinctly and regularly marked in gold, white, blue, etc. In fact an eminent Continental Grower writes us that our strain is "the best he has ever seen." Trade price—Per pound, \$50.00; per oz., \$4.00; per packet, \$1.00, postage paid.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.

CHAS. A. ILGENFRTZ, PRS.; D. S. LAKE, Vice-
PRES.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y.
Twenty-eighth annual convention, Detroit,
Mich., June, 1903.

WHERE a low, deciduous hedge is wanted nothing equals Berberis Thunbergii.

STERS have been taken to organize The Southern Nut Growers' Association. J. F. Wilson, Poulan, Ga., is secretary of the temporary organization.

D. S. LAKE, of Shenandoah, Ia., is building a packing cellar 130x193 with an ell 75x164. A switch from the Burlington railroad will run inside the building.

S. W. FLETCHER has resigned as professor of horticulture at the Washington Agricultural College, Pullman, Wash., and will make his home at Amherst, Mass.

THE best apple scion is about one-fourth inch at the butt and twelve to fifteen inches long, and many large growers prefer them under that size rather than above it.

JOHN S. KERR, the nurseryman of Sherman, says that of the states of the Union, Texas is not only first in area and cattle and cotton, but nearing the top in peaches, apples, pears and berries, while fast developing the limitless production of potatoes, melons, cabbage and tomatoes.

ILLNESS prevented the attendance of P. J. Berekmans at the annual meeting of the Georgia State Horticultural Society, at Macon, August 6 and 7, but he was elected president for the twenty-seventh time. W. M. Scott, state entomologist, of Atlanta, was elected secretary and L. A. Berekmans, treasurer.

Hardy Yellow Roses.

ED. AM. FLORIST:—I shall be pleased to read in your columns a list of hardy yellow roses. B. W. J. Garrison, N. Y.

The list of hardy yellow roses is a very limited one. The Austrian brier, *Rosa lutea*, a native of the orient, has been long in cultivation, and has handsome, golden yellow, single flowers. There are three varieties of this species: Austrian Copper, with delicate coppery-red, single blossoms, is extremely beautiful; Persian Yellow, with bright yellow, small flowers, and Harrison's Yellow, with semi-double blossoms and more free blooming in habit than either of the above. In 1898, M. Pernet-Ducher, the well known rosarian at Lyons, France, exhibited for the first time at Lyons a yellow flowering hybrid remontant rose, to which he gave the name Soleil d'Or, and which immediately attracted attention among rosarians everywhere. It was obtained by fertilizing the stigmas of the hybrid remontant rose Antoine Ducher, with the pollen of *Rosa lutea*. The color of Soleil d'Or might be described as orange yellow, with a slight tinge of nasturtium red, and is exceedingly beautiful when the buds are half open. Experience in this country so far with Soleil d'Or is very promising, and unless there is contradictory testimony, which has foundation in fact, Soleil d'Or, as a hardy yellow rose, will be a splendid acquisition. The above list, so far as the writer knows, contains all the hardy yellow roses worthy of cultivation. JOHN DENBAR.

Paeonias Failing to Flower.

ED. AM. FLORIST:—What would you suggest as the cause of paeonias, failing to bloom when planted in a sunny situation and in rich soil? What treatment should be given? C. C.

I have not had much experience with paeonias failing to flower, as the bulk of the stock which we have purchased thus far has bloomed after it has been established two or three years. We received, some three years since, a collection of 200 varieties of paeonias from Europe. Some of the roots were severely cut in dividing and in this collection there are several varieties that have not as yet given us good flowers. Many of the varieties, especially those that are late bloomers and of dwarf, compact habit, frequently will not bloom after the roots are divided until they have had two or three

years' growth. In fact, we do not consider a paeonia bloom fit for judging unless it has been grown on a plant from three to four years old.

There is no special treatment for paeonias so far as I know. We plant them in rows three feet apart in well prepared soil, and cultivate them with a horse hoe the same way we cultivate corn and potatoes. Paeonias are gross feeders and require plenty of plant food. It will do them good to give them a mulching of coarse, rough manure every fall and work it in around the roots lightly. The soil should be stirred around the plant for a distance of twelve inches from the base of the stalks. If planted in the lawn and the grass allowed to grow into the clump it possibly might interfere with their blooming.

C. W. WARD.

THE AMERICAN FLORIST

Our Pansies, Cannas and Roses received gold medals at the Omaha Exposition in 1898 and the Pan-American Exposition in 1901.

MASTERPIECE.

PANSIES.

VAUGHAN'S "INTERNATIONAL"

Received the only reward for Mixed Pansies at the World's Fair. It is to-day better and more complete than ever. It contains the cream of the stock of 10 Pansy specialists. There is no better mixture in existence, as all the florists who saw or used it can tell you. Price per oz., \$10.00. 1/2 oz., \$5.00; 1/4 oz., \$1.50; trade pkt., 50c.

VAUGHAN'S "GIANT MIXTURE."

This mixture is specially made by us from all the separate colors of Giant Trimardeau, the Giant Bugoot and Cassier and several special strains which cannot be had any other way. If your trade demands large flowers there is no better mixture. Price, 1/4 lb., \$14; oz., \$4; 1/2 oz., \$6; td. pkt., 25c.

VAUGHAN'S PREMIUM MIXTURE.

Embraces all the varieties of the Fancy German Sorts. We have sold this mixture for the past 16 years and it has given general satisfaction. Per pkt., 25c; 1/2 oz., 80c; 1/4 oz., \$3.00; oz., \$5.50.

IMPROVED GERMAN MIXTURE.

This is a mixture of three strains from different German growers, and is made up mostly of separate colors, with a sufficiently large percentage of white and yellow. Per large pkt., 25c; 1/2 oz., 40c; 1/4 oz., 60c; oz., \$2.00.

For full list of different varieties, write for our Special Pansy List, mailed free.

"Vaughan's International" Primrose Mixture.

Unquestionably the best mixture of Chinese Primroses. It contains the largest variety of the best selling colors. Flowers large, beautifully fringed, borne in large clusters well above the rich green leaves. Pkt. (250 seeds) 50c; 5 pkts. (1250 seeds) \$2.00.

CHINESE PRIMULA, Chiswick Red; Albu Magnifica, white; Blue, Pink, Striped. Each, per pkt. of 250 seeds, 50c; 1000 seeds, \$1.75.

DOUBLE CHINESE PRIMULA, white, pink, red or mixed, per pkt. 50c.

CINERARIA VAUGHAN'S COLUMBIAN MIXTURE A mixture of the best English and German strains, unsurpassed. Pkt. (1000 seeds) 50c; 3 pkts. \$1.25.

CINERARIA HYBRIDA LARGE FLOWERING, white, blood-red or crimson, double white or best double mixed, each, per trade pkt., 50c.

CALCEOLARIA HYBRIDA choicest mixture, pkt. 50c. **10 PER CENT** discount on flower seed orders amounting to \$2 and over for Cash with order.

MIGNONETTE, TRUE MACHET.

The seed we offer produces dwarf, vigorous plants of pyramidal growth, with very thick, stout flower stalks. Finest in every way for florists' use and for pots. We have tested this with several of the fancy named strains and always with results favorable to our seed. Trade pkt., 10c; 1/2 oz., 25c; oz., 50c; 2 ozs., 75c; 1/4 lb., \$1.25.

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and sporting readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

"Sweet recreation barred, what doth ensue
But moody and dull melancholy,
Kinsman to grim and comfortless despair,
And, at her heels a huge infectious troop,
Of pale distemperatures, and foes to life?"
—Comedy of Errors.

Shooting Contest at Asheville.

INDIVIDUAL CONTESTS.

First event, 15 targets, 1st, 2d and 3d prizes (high guns).

Second event, 25 targets, 1st, 2d and 3d prizes (high guns).

The team to compete against that of Asheville will be selected according to the records made in the above two events.

TEAM MATCH

Asheville vs. S. A. F., 25 targets per man. A memento of the win will be presented to each member of the winning team. The match will take place Thursday afternoon, August 21, and we will have the use of a very nice grounds, regularly fitted up for this sport, equipped with magauptrap and set of expert traps, and we can assure every lover of the gun a pleasant afternoon's sport. We would urge that all of the craft who shoot, will not only attend the coming convention, but will bring along their guns and shells and join in this outing.

Bowling Contest at Asheville.

DETROIT TROPHY.

Year.	Place of meeting.	Won by.	Score.
1899	Detroit.	Philadelphia.	926
1900	New York.	Buffalo.	1021
1901	Buffalo.	New York.	883

Conditions of Detroit trophy, greatest number of pins in any one game. Cup to be won twice before awarded finally. Winning club each year to have name engraved on cup, with number of pins and place of contest. If after four years the cup has not been won twice, it is to be awarded to the club having made the highest number of pins during that time, from among clubs having won the cup.

LORD & BURNHAM CUP.

To team making highest total in three games. To be won twice before being finally awarded.

Year.	Place of meeting.	Won by.	Score.
1900	New York.	Buffalo.	2775
1901	Buffalo.	Philadelphia.	2560

RITCHINGS CUP.

To team making highest score in third game, to be won twice before finally awarded.

Year.	Place of meeting.	Won by.	Score.
1901	New York.	Buffalo.	1021
1901	Buffalo.	New York.	883

The H. Bayersdorfer & Co. Gold Medal, valued at \$20, for highest aggregate individual score in three games.

Halliday Brothers Gold Medal, value \$15, for second highest aggregate individual score in three games.

A prize for third highest aggregate individual score in three games.

The William J. Stewart prize, value \$15, for greatest number of strikes in three games.

A prize for greatest number of spares in three games.

INDIVIDUAL CONTESTS.

The Watson trophy, gold badge, for highest total in three games. Given by Geo. C. Watson, Philadelphia, and to be known as the "Old Man's Race." Open to all, 55 years of age or over.

The Berkowitz medal, for highest total in three games. Given by Paul Berkowitz, of Bayersdorfer & Co., Philadelphia, to be known as the "Young Man's Race." Open to all, 25 years of age or under.

A. B. CARTLEDGE,
ROBERT HALLIDAY,
Committee.

Chicago Florists Picnic.

The annual picnic of the Chicago Florists' Club was held at Bergman's Grove, Riverside, on Tuesday, August 12, and was probably the most successful on record, a result largely attributable to the indefatigability of Walter Kreitling, chairman of the committee in charge. The attendance was large and the programme afforded diversion for all throughout a very pleasant afternoon.

In the contests the following were prize winners:

Fifty-yard race for misses, first, C. Ludlow; second, L. C. Polis.

Fifty-yard dash for boys, first, L. Brady; second, Phil. Marder.

Fifty-yard race for girls, first, Miss Bentley; second, Miss Rose Garland.

Her Proxy.

Cholly Clerker—"What? Did she return my gift of flowers?"

Messenger—"Aw, no! She ast me please would I wear 'em fer your sake, dat's all."—Chicago Daily News.

Fifty-yard misses' race, first Miss Hill; second, Miss Brady.

Hurdle race, first, C. B. Smeeton.

Fifty-yard race for married ladies, first, Mrs. Fred. Wittbold.

Hundred-yard dash for men, first, John Sell; second, J. Walker.

Bowling contest, P. J. Hauswirth won both first and second, a ball and bag and bottle of champagne.

Ladies' bowling, first, Mrs. Mehms; second, Mrs. School.

Ball game, Winterson's team defeated Bentley's, 13 to 8.

At Philadelphia.

The Asheville team and the "scrubs" had a warm scramble on the Elks' alleys Friday night, August 8, which resulted in another victory for the "scrubs." What a difference it does make when one gets away from home! The alleys may be the most perfect imaginable but somehow the pins will not fall as expected, and before the experimenting has resulted in any good, the game is over. This defeat of the pride of the club is very humiliating and it behooves Captain Moss to get his charge into a corner and read the riot act or do something impressive. The score follows:

ASHEVILLERS.				
	1st	2d	3d	T
Moss	201	140	137	478
Robertson	104	165	126	396

Southern Ry. Crescent Route.
225 DEARBORN ST. 113 ADAMS ST.
CHICAGO, ILL.

Society of American Florists National Convention,

AUGUST 19th to 22nd, 1902,

ASHEVILLE, NORTH CAROLINA.

For this convention the "Big Four Route" (C. C. C. & St. L. Ry.) will sell tickets August 16, 17 and 18, good for return leaving Asheville not later than August 25, at one fare for the round trip from all "Big Four" stations. (\$20.00 round trip from Chicago.)

Florists' Special train will leave Chicago 8:30 p. m. Sunday, August 17th, running via "Big Four" to Cincinnati, thence via the Queen & Crescent and Southern Railways. Monday forenoon will be spent in Cincinnati, sight-seeing, etc., leaving there at 2 p. m. on the Florists' Special. Every florist should make a big effort to attend this convention, the first to be held in the beautiful Southland.

For berths in sleepers from Chicago or Cincinnati, and further information call on, or address E. F. WINTERSON, President Chicago Florists' Club, 45 Wabash Avenue, or J. C. TUCKER, Gen'l. Nor. Agt. "Big Four", 231 S. Clark Street, Chicago.

Did You Ever Try to Force Lilies for Xmas?

Our Retarded or Cold Storage LILIUM LONGIFLORUM Readily Answer the Call and it will Certainly Pay You to Try Some.

Do not confuse these with some old left-over stock that may be offered cheap elsewhere, which would only lead to disappointment and be dear at any price.

The retarding of LILIUM LONGIFLORUM bulbs in cold storage with us is no longer an experiment, but an unqualified success.

Our bulbs are imported and packed specially for cold Storage and we are the pioneers in this line.

Our RETARDED or COLD STORAGE LILIUM LONGIFLORUM bulbs (owing to our secret method of storage) are as perfect to-day as when they reached us from Japan in November last, and are guaranteed to be in first-class condition before shipping. SEE SAMPLE CASE ON EXHIBITION AT CONVENTION. Price 7 to 9-inch Bulbs, 300 in a Box, \$7.50 per 100; \$60.00 per 1000. One whole Box at 1000 rate.

PRICES UPON ALL OTHER BULBS UPON APPLICATION. ASK FOR CATALOGUE.

Lily of the Valley From Cold Storage.

Cold storage valley should be used considerably more, particularly for Thanksgiving, Xmas, New Year and in January. At that time even the very best selected newly imported pips don't bring any foliage, come uneven and hardly pay; very often they turn out a total failure, even with the best attention and very best arrangements. Cold Storage Valley brings flowers and foliage without much trouble and without special arrangements. Care should be taken to grow them as cool as possible and without bottom heat.

My stock is very fine this year and promises to give good results. Place your orders now.

Fine pips \$13.00 per 1000; Case of 2,500, \$31.50; Per 100, \$1.50.

Fancy Cut Valley Always on Hand.

Springfield, Ohio.

LOCAL BUSINESS MEN TAKE OVER AN ESTABLISHED GREENHOUSE PLANT.—A NEW ROSE GROWER.—A BIG ADDITION.

The John A. Doyle establishment, which changed ownership June 1, Mr. Doyle retiring from the business, will hereafter be conducted by the Springfield Floral Company, which has been incorporated with \$40,000 capital stock. The officers are: President, John Mellinger; vice-president, Judge Goodwin; secretary, L. Bradford; treasurer, V. V. Smith; superintendent, Gus. T. Schneider. The other stockholders are Dr. Gotwald and Geo. Steele. The above are all business men of Springfield. Mr. Schneider, superintendent and manager, has been in the business for the past seven years, beginning with the Geo. H. Mellen Company and later going with Schmidt & Botley. The firm will continue the general plant business.

Harry Reeser, brother of Will Reeser, of Urbana, has built four houses and will devote same to the growing of young roses for wholesale trade.

The Good & Reese Company says business has been good the past season and is adding a large range of new houses. C. W. S.

New Orleans.

HORTICULTURAL SOCIETY ELECTS NEW OFFICERS.—ASSOCIATION PROSPEROUS.—TRADE DULL.

The election of officers to serve for the ensuing year took place at the last meeting of the New Orleans Horticultural Society. The following members were elected: President, C. R. Panther; vice-president, A. Chopin; secretary, D. Newsham; treasurer, John Eblen. The general opinion was that the society is well directed and everybody hopes that the new officers will bring fresh life and success to the association. At the supper which followed toasts were numerous.

Business is very dull. Dry weather for several months has made everything worse than usual at this time of the year. And it will be some time before we can hope of any change for the better. M. M. L.

MANCHESTER, MASS.—The annual sweet pea show of the North Shore Horticultural Society was held at Lee's Hall on July 24 and was an unusually brilliant display of summer blooming flowers.

14 BARCLAY STREET, NEW YORK.

Dayton, O.

CORPORATION FORMED TO ENGAGE IN CARNATION GROWING.—A CHANGE IN BUSINESS MEANS NEW RANGE.—GOOD STOCK.—ON TO ASHEVILLE.

Wm. Kiefaber, Sr., has formed a stock company, to be known as the Miami Floral Company, and is building three houses 23x200 each, to be used for carnations only. Ed. Bissell, who has been with J. W. Bernard, Marion, Ind., for the past five years, will have charge of the range. They expect to enlarge the plant as fast as business requires it. The election of officers will take place in the course of a week or two.

G. J. Horlacher has sold his greenhouses on South Brown street to his brother, W. W. Horlacher, who will continue the business. G. J. Horlacher is building three houses 17x150 each about two miles further south on the same street. He intends growing carnations for the wholesale market.

H. M. Altiek, the carnation grower, has part of his houses planted and intends to finish up as soon as possible. He thinks they do better in the houses than in the field. He will attend the convention at Asheville.

John Boehner has some fine roses for this season of the year. His field carnations are looking good. He says he will be at Asheville. C. W. S.

Lafayette, Ind.

BUSY SEASON AT THE DORNER ESTABLISHMENT.—REBUILDING IN PROGRESS.—CARNATION PLANTS LOOKING WELL.

The buzz of the saw and the fall of the hammer are familiar sounds on Dorners' place at present. Five houses are being rebuilt and remodeled and when completed it will be a model range in all that this term implies. Business throughout the spring and summer season has been all that could be expected. There has been a brisk demand for plants of all sorts and for all occasions and they have enjoyed a very good business in cut flowers. Carnation plants in the field look well, healthy and vigorous, and that despite the rainy season, which, in some sections has had a decidedly injurious effect upon carnation plants. In all likelihood these will be housed early. Of course a considerable number of seedlings will be benched for trial and while it may be premature to talk of the next one to be put on the market, one thing is certain, it will be well worthy of the introducers' reputation. Mr. Dorner never takes blind chances but is invariably sure before going ahead. NOMUS.

BENTON HARBOR, MICH.—A. E. Crooks is progressing finely in the removal of the Archer greenhouses, recently purchased at St. Joseph, and their re-creation here. He will be well fixed by fall.

We always have in stock the finest grade

KENNIGOTT BROS. CO. Wholesale Cut Flowers

42-44 Randolph St., CHICAGO, ILL.

FOUNDED twenty years ago, this business has developed steadily, keeping step with the marvelous growth of the florist trade in the United States and at all times setting the pace for those who handle cut flowers on commission. A close and painstaking attention to the needs of the out-of-town buyer has built up a shipping trade which, with the backing of capital ample to its needs, is the largest and most prosperous in the west, if not in the entire country. That this business is solidly established on the foundation of long years of square dealing is proven by the fact that each season has shown an increase requiring constant addition to our facilities. This year we have practically doubled our capacity, doubling our floor space and counter room and building the grandest cool room in the trade. It has always been our policy to handle stock by the most approved methods and now we have a refrigerator 36x18x7 feet, of solid cement, floor, walls and ceiling, impervious to heat, moisture and all gases, which will improve the quality of stock immeasurably. It is an improvement both buyers and growers will appreciate.

This house has earned a reputation for having supplies of stock in season when other houses cannot fill orders. Our unequalled resources help to bring us the bulk of the shipping trade.

While Kennicotts seldom if ever are at a loss for stock to fill orders, our facilities for the prompt handling of receipts and shipments will permit us to largely increase our business again this year and we will take on a number of producers of first-class stock between this date and October 1. Write us what shipments you have to offer. Payment weekly.

KENNIGOTT BROS. CO.

Announcement.

WE wish to advise our many friends and customers in the trade that we have made arrangements with some of the very best growers for this season's supply and will have an unlimited quantity of American Beauties, Brides, Bridesmaids, Meteors, Liberty, Golden Gates and Ivory Roses. Also all varieties of Fancy and Standard Carnations, including all the newest varieties; Wild Smilax, Asparagus Plumosus, Asparagus Sprengeri, Adiantum, Smilax and Fancy Ferns. We are supplying now, and will continue to throughout the season, the very best Valley that comes to this market.

If there is anything that your trade demands and the other fellow cannot supply it, write, telephone or telegraph DEAMUD, as we have the most complete stock in Chicago.

J. B. Deamud,
51-53 Wabash Ave., Chicago.

50.....	5.00
100.....	10.00
250.....	23.00
500.....	37.50
1000.....	75.00

Back. Reduced one-fourth.

Long, strong stems. Flowers 3 1-2 to 4 inches. Fine form and very fragrant, strong calyx. Continuous and early bloomer.

DELIVERY COMMENCES FIRST WEEK IN JANUARY.

We have had the exclusive sale of the Lillian Pond during the past four years; there is no other white carnation shipped us that is so much in demand as the Lillian Pond. They were always ordered in advance at a price in excess of other white carnations. It is a good commercial flower, stands handling and shipping well, large, fine form, strong stems, a good keeper and very fragrant.

THE PIERSON FERN Nephrolepis Piersoni.

**The Most Valuable Novelty Introduced
In Many Years. Awarded**

GOLD MEDAL

Massachusetts Horticultural Society, March, 1902. A rare distinction, having been awarded only a very few times in the history of the society. Also Gold Medal by New York Horticultural Society, May, 1902, for the best horticultural novelty. The highest honors that can be bestowed on any horticultural novelty in America. These very high awards testify to the sterling merit of **Nephrolepis Piersoni**.

Send for our Illustrated List giving full description.

Nephrolepis Piersoni is as easy to grow and propagate as the well-known Boston Fern, of which it is a sport and which it will assuredly supplant in popular favor.

**THIS WILL BE A MONEY
MAKER FOR YOU!**

See our exhibit of this at the S. A. F. Convention, Asheville. Will be introduced to the trade in spring, 1903. Demand is sure to be enormous. Place your order at once in order to secure early delivery, as orders will be filled strictly in rotation.

Prices: \$9.00 per doz; 50 plants at 60c each; 100 plants at 50c each; 500 plants at 45c each; 1,000 plants at 40c each.

F. R. PIERSON CO., Tarrytown-on-Hudson, N. Y.

ENCHANTRESS

QUEEN OF CARNATIONS.

Of all Varieties it is the **Largest and Best**

Light pink, deepening toward center, deeper than Daybreak at its best, outclassing all others.

Lawson stem and calyx that never bursts, exceeding four inches when full, a free bloomer like the Lawson.

ENCHANTRESS is a Lawson seedling, originated by Peter Fisher, who says: "I consider **ENCHANTRESS** the best seedling I have ever raised, as far ahead of Lawson as Lawson was ahead of everything else when sent out." Delivery of rooted cuttings begins January 15, 1903.

LARGE PROFITS FROM ADVERTISING.

Joliet, Ill., August 7th, 1902.

The American Florist,
Chicago, Ill.

Gentlemen:--

Replying to your inquiry as to the amount of business our advertisements in the American Florist have brought us in the past year, would say, that we use the card system for advertising, and have kept accurate account of the returns from our advertisements; that is, giving due credit to our different advertising mediums for orders received. We find our advertisements with you for the past year have cost us \$172.65, and we have received orders from same to the amount of \$5,336.55.

Yours very truly,

(Signed) J. D. THOMPSON CARNATION CO.

With 800,000 square feet of glass on North Robey street, Chicago, and 100,000 feet at New Castle, Ind., (Reinberg & Weiland) we are the largest producers of cut flowers in America. Better begin your cut flower buying this fall where you can rest assured of getting what you want all through the season.

We are now getting a first-class cut of summer stock and

THIS FALL

we shall be right in line for business with very large supplies of the very highest grade of cut flowers. Our place contains 500 000 feet of glass and the following are some of the plants we shall cut from:

**60,000 'MUMS, 54,000 BEAUTIES,
55,000 TEA ROSES, 80,000 CARNATIONS,
5,000 HARRISII LILY PLANTS.**

All through our stock the varieties are the newest and best and the quality of the cut flowers will, as in the past, compare favorably with the stock produced by any other grower in the country. We want your business from the beginning to the end of the season.

CARNATION PLANTS.

Our carnation plants have been on fairly high light soil this summer and made good growth; some varieties are very fine and all are clean and healthy. We find ourselves with a small surplus. Write us your needs for pricing:

TRADE FAIRLY HEAVY AND STOCK SUFFICIENT FOR ALL DEMANDS.—SOME LINES SELL CHEAPLY.—WILL ENTERTAIN VISITORS.—CONVENTION WANTED.—NOTES.

At a meeting of the Florists' Society committees were appointed to receive the florists passing through this city on their way to the convention. The following were assigned to the different stations: Grand Central Depot, Albert Sunderbruch, Max Rudolph, Geo. Murphy and Gus Adrian; Pennsylvania Station, Ben. George, Wm. Schuman and James Allan; C. H. & D. depot, Wm. Murphy and Wm. Rodgers. These committees will take charge of the visitors and escort them to special cars which will take them to Eden Park, where a lunch will be served. After the business meeting there was a social time to which the ladies were invited, and they all expressed a desire to come again. No doubt we will have more such sessions in the future.

Business continues to hold up well, with a plenty of flowers to fill orders. Asters are becoming a glut on the market, but this is to be expected at this season. George & Allan are sending in some very choice ones, with good stems, and realize \$1.50 per hundred. Nice lots of Liliun album and L. roseum are coming in and fetch \$4 per hundred.

Quite a number of Beauties with stems ten to eighteen inches long are being shipped into the city, but \$4 per hundred seems to be the best price received for them. This hardly pays the grower.

The Citizens' League has requested the local florists to invite the S. A. F. to hold its convention in this city in 1903. Hope we will be able to land it, for everybody will be well taken care of.

Witterstaetter continues to send in some very good blooms of his new white carnation. This seedling undoubtedly is a very good white variety for summer blooming.

Hardesty & Company had a tray of Eucharis Amazonica in their window the beginning of the week, which attracted a good deal of attention.

Alex. Ostendorp is on his vacation this week to Niagara Falls. D.

PORTLAND, ORE.—Miss Lillian Pfunder, daughter of Louis G. Pfunder, and Wm. E. Mitchell, a broker, of New York, were married June 18. The couple will make their future residence in New York city.

CARNATIONS

I have a few nice plants to offer of the following varieties, field-grown: Crocker, Gomez, Marquis, Roosevelt and Flora Hill, also 500 of the new pink Geranium Jean Viaud from 3 and 4-inch pots at Bargain Prices.

ANNOUNCEMENT!

In the Spring of 1903 I will distribute a Seedling White Carnation to be known as

MURPHY'S WHITE.

Parentage: Bridesmaid and Lizzie McGowan. Its good qualities are: Vigorous and healthy grower, early and continuous bloomer; stem very strong 2½ to 3½ feet in length; calyx one of its best points. Does not burst; flowers fragrant, and from 2½ to 3 inches across; roots like Lizzie McGowan and ships like Bridesmaid. A1 good keeper, both on and off the plant.

Its bad qualities: Not an exhibition variety for its size is against it. Flower buds have a crimped appearance early in the season, but this disappears later.

For stem, calyx, blooming qualities, and as an easy variety to do in the field and house, I place it on the market as a Commercial White Carnation.

I purchased it from the originator, C. C. Murphy, where I have observed it growing the past four years. It can be seen also at the following growers' who have kindly given it a place in their fields for trial this summer: A. N. Pierson, Cromwell, Conn.; Geo. Osborn, Hartford, Conn.; Fred. Burki, Pittsburg, Pa.; Peter Reinberg, Chicago, Ill.; S. M. Harbison, Danville, Ky.; Thos. Windram, Ft. Thomas, Ky.; Albert Sunderbruch, Cincinnati, O.; J. A. Peterson, Cincinnati, O.

Cuttings will be select stock, well rooted. Prices within reach of every grower.

Orders Booked for January Delivery:

100	at \$6 00	per 100
1,000	at 50.00	per 1000
5,000	at 45.00	per 1000
10,000	at 40.00	per 1000

WM. MURPHY,
Wholesale Carnation Grower,
Station F, CINCINNATI, OHIO.

Miss Louise Faber

The Longest Stemmed and Most Fragrant Carnation in Existence

Stems measure from 3 feet 6 inches to 4 feet. Flowers are of a beautiful pink, similar to a well colored Bridesmaid rose and average 2½ inches. Continuous bloomer when once started and calyx never bursts. Will be distributed the coming spring. Prices—\$2 per 12; \$10 per 100; \$75 per 1000; \$500 per 10,000. Orders booked for Jan. delivery.

Saginaw, Mich.

GROWERS FIND THE WEATHER THEIR ONLY CAUSE FOR COMPLAINT.—RAINS HASTEN THE BENCHING OF CARNATIONS.—PLACES ALL IN GOOD SHAPE AND PROFITABLE SEASON SEEMS ASSURED.

Scarcely a day has passed in weeks without a downpour, but this is the only complaint expressed on any side. Fortunately, carnation plants in the field seem to be holding their own. Those planted on high ground look especially well and promising. Early planting seems to find many adherents among the growers this season. The consensus of opinion is that a plant in the house, out of harm's reach, is worth two in the field, exposed to the elements. Aside from this immediate reason, many believe that plants housed early will make their growth and thrive equally as well on the bench as in the field.

Chas. Fruch & Sons have added an American Beauty house to their already extensive range. Among other things to be grown in quantity during the coming season are poinsettias. The demand for these, both wholesale and retail, has invariably, during the last two or three seasons, exceeded the supply. Their red scedding carnation, now in its third year, bids fair to make its mark. It possesses size, color, length of stem, vigorous constitution and is a fine producer. It will be shown in Brooklyn in February.

J. B. Goetz has planted one of his large carnation houses with Oriole. Not a fancy, it is a remarkable producer. It is Mr. Goetz's intention to plant all his carnations within the next few days. This accomplished he will start to remodel five of his houses, to conform with the rest of his range, which is up-to-date throughout. Roses have already been planted and are doing well.

The Roethke Floral Company has confined building operations this season to a fine stable. Their roses, both young and old plants, never looked better. As to carnations, Ethel Crocker is fairly in its glory at present; through the winter season, however, it is inclined to go to grass. Flora Hill is producing remarkable buds for midsummer. Field plants will be housed soon.

Mrs. Geo. Waldhaur has no complaints to make, except it be about the weather. She reports an exceptionally fine spring trade and enough to keep her busy throughout the summer. NOMS.

Begonia Rex

Thirty named varieties; strong plants, from 2½-inch pots, \$5.00 per 100.

Carex Japonica Var.

One of the most useful decorative grasses. Makes a pretty plant for the table or conservatory. Now is the time to get your supply for winter. Fine 2½-inch pot plants, \$2.50 per 100.

A VARIETY OF PERSONAL AND TRADE DOINGS.—GROWERS PREPARING FOR ANOTHER BUSY SEASON.—NOTES HERE AND THERE.

C. H. Kunzman's new carnation house 32x120 feet, glazed with 24x36 glass and built with Garland gutters is about completed. He reports his field of carnation plants as being in splendid condition.

Coenen & Baurman have made a specialty of the Gloire de Lorraine begonia and have been very successful, bringing them in at Christmas and Easter in large quantities.

Nanz & Neuner will rebuild one or two houses this summer. Their 300-foot house of American Beauties is doing well and their chrysanthemums are in fine condition.

The Society of Kentucky Florists has held its meetings at Riverview Park during the summer and its members have had a fine time.

Louis Kirch, the carnation specialist, is bringing in splendid stock. F. Walker & Company take the entire cut.

Anders Rasmussen has started to build one large greenhouse on his new place at New Albany, Ind.

Wm. Walker and Wm. Mann have gone to Atlantic City to spend their vacation.

Summer trade has kept up pretty well, there being considerable funeral work.

Victor Mathis is cutting some nice Kaiserins, Bridesmaids and Brides.

J. A. Peterson, of Cincinnati, was here the other day on a business trip.

Herman Kleinstark's new residence is nearly completed.

C. W. Reimers is cutting fine Beauties at present.

E. G. Reimers will build four houses this fall. H. G. W.

MANSFIELD, WIS.—R. E. Macklin has done a good business since he established here in 1900. He proposes to soon add a new house, which will increase his facilities fifty per cent.

6,000 VERY FINE FIELD-GROWN

CUT FLOWER BOXES

SEE OTHER SIDE OF THIS SHEET FOR SIZES
AND OTHER INFORMATION REGARDING THIS
NEW LINE OF ELEGANT LITHOGRAPHED CUT
FLOWER BOXES.

The National Folding Box & Paper Co.

315 TO 325 CONGRESS AVENUE,

New Haven, Conn.

OUR CUT FLOWER BOXES.

It is only a few years ago that "any old box" was considered quite suitable for use in sending out cut flowers and often a piece of paper was the only protection afforded a handsome and costly bunch of roses or violets; to-day every retail florist recognizes the advantage, if not the necessity, of placing his goods in substantial and attractive boxes that will protect the flowers and please the buyer. It is human nature to be impressed by outward appearances; the well dressed man is received with courtesy and consideration (even if he does turn out to be a book-agent or insurance solicitor) the tramp is escorted from the premises by the bull dog. The discriminating customer will go again to the florist who sends home his purchase in a neat and attractive box rather than to the one who delivers it in an old and soiled box, or hands it to him wrapped in a piece of paper, even if the former charges a little more and his flowers are no better:—they will LOOK better because they are properly packed. This leads us up to the subject we had in mind when we started:—OUR BOXES. We are so well known to the florist trade through our regular line of Cut Flower boxes that we don't propose to say anything about them now, except that they are "all right." What we particularly wish to call attention to is our line of Lithographed Cut Flower boxes, brought out late last year, too late in fact to properly introduce them. The sale, however, was very large in the limited territory covered, and proved that we were not mistaken in believing that the retail florist WANTED a better box for his fine trade; we have it and we want every dealer in cut flowers to see it. The illustration on the preceding page shows the design used on our Rose box; similar in design, but with the appropriate flowers substituted, our Violet, Carnation and Chrysanthemum boxes complete the most elegant line of Cut Flower boxes ever offered to the trade. Reference to the following list will show that they are made in a variety of sizes to meet every requirement. The bodies are made of heavy stock, the same as used in our regular line, the stock being especially prepared to resist dampness; the covers are made of white enameled stock, lithographed in colors from designs by a celebrated painter of floral subjects. In the preliminary work incident to the production of this line we have spared no expense to make it the best that experience, skill and money can produce.

OFFICERS OF THE HORTICULTURAL CLUB.
—AN ACTIVE ORGANIZATION.—VARIOUS
TRADE NOTES.

The Seattle Commercial Horticultural Club is holding regular meetings, on the first Wednesday of each month, at the hall at the corner of First and Cherry streets. The officers are: President C. Malmo; vice-president, G. Gandel; secretary, Wm. Hopkins; treasurer, John Holze. There is much interest in the affairs of the club and it is the agent of much practical good to the trade.

C. Malmo has been laid up for three weeks with rheumatism, but is now able to be out again. Mr. Bathurst, manager of the nursery department of Malmo & Company, has also been ill.

Trade is very dull at present, but little funeral work and practically nothing else. This month the Elks' carnival should make business for six days.

J. C.

Nashville, Tenn.

GROWERS PREPARING FOR INCREASED OUTPUT FOR FALL AND WINTER.—CUT FLOWER TRADE VERY QUIET.

Geny Brothers have put up three houses 25x100 feet, which, added to those they already have, give them an extensive area. They propose raising carnations in all three of the houses. This is one of their specialties and they find a good sale for all they can produce. Their chrysanthemums are coming on in good shape and they propose to have their usual supply of fine violets.

Joy & Son are also increasing their capacity and, to an already extensive area of glass, have erected two rose houses each 400 feet long. They have had a pretty display of gladioli in their show windows, but the demand is not great.

The cut flower business has been on the quiet for the past week or so, but there is great activity at the growing establishments.

M. C. DORRIS.

P. J. Berckmans Co.

Walker & McLean, Youngstown, O.

Syracuse, N. Y.

VISITING GROWER REPORTS CARNATIONS DROWNED IN THE FIELD.—NO SURPLUS OF PLANTS.—BUSINESS FALLING AWAY.—VARIOUS NOTES.

E. D. Wheadon, of Little Falls, N. Y., was in town Monday. He is manager of the Overlook Greenhouses and his specialty is growing carnations for the wholesale trade. He supplies many retailers in his section, including J. O. Graham, the only retailer in Little Falls. Mr. Graham, by the way, is spending a few weeks in Holland. He will be home the latter part of the month. Mr. Wheadon is the father of W. S. Wheadon, manager of the Quinlan stores in this city. He has been in the business over twenty years and has been a subscriber of the AMERICAN FLORIST since its initial number. Mr. Wheadon says that his carnations in the field were "drowned out." He will have only enough for his own use and no surplus. He thinks that carnation growers will all come sooner or later to the potting of carnations through the summer instead of putting them out doors. This will do away with stem rot and other troubles that are due to the fickleness of the weather.

Henry Morris is planting American Beauties and the plants look well. The prospects are favorable to a big chrysanthemum trade and the plants are fine. Mr. Morris' violets are out of doors now, but will be in soon. He has been improving and building new houses this summer.

Business during the month of July was fairly good because the cold weather kept many people from going out of town. August, so far, has been wet and cool, but the exodus has begun, the people realizing that they must go pretty soon if they get any vacation at all.

Syracuse florists do a big business at this season, caring for the plants of people who are away. It is the rule to take charge of plants only at the risk of the customer but the business is always unsatisfactory. The usual charge on "boarders" is 50 cents a month.

P. R. Quinlan & Company report the best July business in years. This company has suffered considerably from the rains, the carnations in the field being injured the most. A. J. B.

BELOIT, WIS.—John Rindfleisch has been in business here sixteen years. The last season was a particularly good one, but he expects next year to beat it.

Dreer's Offer of Cibotium Schiedei

ARAUCARIA EXCELSA GLAUCA.

- 5-inch pots, 8 to 10 inches high, 2 tiers.....\$.75 each
- 6-inch pots, 12 inches high, 2 to 3 tiers..... 1.00 each
- 6-inch pots, 15 inches high, 3 tiers..... 1.25 each
- 7-inch pots, 18 inches high, 4 tiers..... 1.50 each

If you have never tried this beautiful Fern in fine decorations or as a house plant, you should become acquainted with it at once. Its points of merit are so many that you cannot afford to be without it. It possesses a graceful, delicate habit unlike any other plant and while its appearance is that of being very soft, it is really as hardy as any of the commercial Palms. We have a fine stock of it this season and offer heavy plants as follows:

- 5-inch pots, \$1.00 each; \$10.00 per dozen.
- 7-inch pots, 1.50 each; 18.00 per dozen.
- 9-inch pots, 3.00 each; 36.00 per dozen.

The 7 and 9-inch pots are beautifully finished plants, suitable for decorative work.

Special Offer of Araucarias.

We have in stock about twelve thousand Araucarias, on which we are in a position to offer special values. It will pay you to procure your next winter's supply now and not only gain the benefit of the summer's growth, but also cheap transportation rates, as these plants can be safely shipped by feet freight during the summer months.

ARAUCARIA EXCELSA.

- 5-inch pots, 8 to 10 inches high, 3 tiers.....\$.50 each

Newark, O.

NOTES OF A VISIT TO TWO PROGRESSIVE GROWERS.—CARNATIONS TO BE PRODUCED IN INCREASED QUANTITIES.—STOCK OUTDOORS LOOKING WELL.

Geo. L. Miller is modernizing his place in a truly up-to-date manner. Aside from giving his entire range a thorough overhauling, he has in course of construction an additional carnation house 30x120, a conservatory and a new office. The latter will be equipped with all the comforts and modern conveniences. Mr. Miller reports a good trade all along the line, both wholesale and retail. His catalogue trade proved far ahead of that of the previous season. It is Mr. Miller's intention to go in heavier on carnations than heretofore, although roses will by no means be relegated to a back seat. His carnation plants in the field look well.

A call on A. J. Baldwin, as usual, proved interesting. Busy or not busy, Mr. Baldwin's place invariably presents an attractive appearance and is a model of neatness. Business has been fine with him throughout the season and, encouraged by the results, Mr. Baldwin is adding a good-sized carnation house to his place. While growing a general stock for his retail trade, Mr. Baldwin will grow more carnations during the coming season. Boston ferns have been much in demand and at this writing he is practically sold out of small plants. He likewise found a brisk demand for the Wittboldii fern, of which he grows a large quantity. Carnation plants look well. Noms.

MARSEILLES, ILL.—F. P. Tisler has a new greenhouse fifty feet long and is erecting two more houses 16x32.

NORTHAMPTON, MASS.—The liabilities of Alex. Parks, who went into bankruptcy last week, are given as \$9,522.38 and available assets \$9,100.00. Among the largest unsecured creditors are A. N. Pierson, \$479.65; First National Bank of Northampton, \$440, and the F. R. Pierson Company, \$322.97.

NOTICE.

THE MODEL PLANT STAKE COMPANY, formerly of Brooklyn, N. Y., has removed to 208 Jersey St., Harrison, New Jersey, and is now The Parker-Bruen Mfg. Co.

The Model Extension Carnation Support.

Flushing, Long Island,
Dec. 11th, 1901.

MR. THERON N. PARKER,
Brooklyn, N. Y.

Dear Sir— I have used your Wire Carnation Support the last two years in all about 12,000. They fill the bill in every particular. Nothing could be more satisfactory and would give me a great deal of pleasure if I can bespeak a good word for you to the trade and you are at liberty to refer to me at any time.

Very truly,
A. L. THORNE,
La Fayette, Ind.,
July 8th, 1902.

MR. THERON N. PARKER,
Harrison, N. J.

Dear Sir:— After using your Model Carnation Support in two of our houses the past winter, we have come to the conclusion that it is perfectly adapted to supporting carnations, and shall use them on all our plants the coming season.

We were much pleased with the simplicity, strength and neat appearance of the support.

Yours truly,
F. DORNER & SONS CO.

THE AMERICAN FLORIST COMPANY'S Trade Directory for 1902, fully revised to date, with thousands of new names and changes of address, is now ready for distribution. It contains 418 pages, including complete lists of the Florists, Seedsmen and Nurserymen of the United States and Canada, arranged both by states and towns and all names alphabetically. Also lists of Private Gardeners, Firms which issue catalogues, Horticultural Supply Concerns, Parks, Cemeteries, Landscape Architects, Experiment Station Horticulturists, Botanical Gardens, and much other conveniently indexed and invaluable trade information. Published by the

American Florist Co.

324 Dearborn St., Chicago, Ill., U. S. A.

*Contains
418 Pages.*

Directory for 1902.

Sing a song of summer,
 A pocket full of kicks;
 Four and twenty florists
 In an awful fix.
 Fill their store each season
 With goods they cannot sell;
 Indignant and disgusted--
 Customers rebell.

Sing a song of profit,
 A pocket full of cash;
 Four thousand happy florists--
 Not a bit of trash.
 The stock they show each season
 Is the newest and the best;
 'Tis Harry's own selection
 And Paul--he does the rest.

Harry is over in Europe now. He knows the kind of stock the American trade requires and will take nothing else. Paul will be at Asheville and will show there what a first-class florist's supplies should consist of. It will comprise the usual comprehensive display for which this house has become noted at the annual S. A. F. Conventions and is in itself well worth a journey of inspection. A rare opportunity for progressive florists. If you are unable to come to Asheville, send us your address for an Illustrated Catalogue.

FUMIGATION METHODS

By PROF. W. G. JOHNSON

Formerly State Entomologist of Maryland

A Practical Treatise and timely work on cheap and effective means of destroying insect pests and other vermin in various places. This work is the outcome of practical tests made by the author, together with the experiences of others, and is one of the most important books published this season and is much needed at this time. It will be of particular interest to

FRUIT GROWERS AND NURSERYMEN owing to the widespread prevalence of the notorious San Jose scale. Hydrocyanic acid gas is the only practical remedy for the destruction of this pest and is being used more extensively than ever before by nurserymen and fruit growers. The perfection of the apparatus for fumigating young orchard trees is outlined in this work. The methods can be easily applied in orchards and nurseries for many dangerous pests at very small cost. The writer is considered the best authority on this subject in this country and has left nothing undone to make this the most complete work of the kind ever published.

GARDENERS AND FLORISTS have found that vegetables and flowers cannot be grown under glass without frequent fumigation for the destruction of insect pests. Hydrocyanic acid gas has solved this problem. The methods of procedure are fully described and every detail is given for generating and applying the gas.

MILLERS AND GRAIN DEALERS have been looking forward to the publication of this work, as hydrocyanic acid gas has been found one of the most important materials for clearing mills and warehouses of insects. The subject of carbon bisulphide for fumigating mills and elevators containing grain in storage is also thoroughly considered. To this trade the work is indispensable and transportation companies have found it of great value for the fumigation of cars, ships and other inclosures infested with vermin.

FARMERS OF THE COUNTRY have here fully described a simple, easy remedy for gophers, prairie dogs, squirrels and other animals in the ground, and rats and mice in any inclosure.

COLLEGE AND STATION WORKERS will find it an up-to-date reference work on this subject. It is complete in every respect and is the only work of the kind ever published. It is written in a popular non-technical style, profusely illustrated, handsomely bound, covering 250 pages, price, post-paid, \$1.00.

AMERICAN FLORIST CO.

324 Dearborn St.

CHICAGO, ILL.

"THE BEST" Adjustable Plant Stands.

This is one of the most useful contrivances a Florist can have, not only for decorating but for permanent conservatory and greenhouse use.

The special merits of this stand may be briefly enumerated as follows: The three feet cause it to stand firmly on a carpet or uneven floor. The upright is of three parts telescoped, being easily adjusted to various heights, fastened by means of thumb screws which are well made. The top flange will hold any ordinary pot upright, or by using the four-pronged crotch attachment, a pot can be placed on its side at two different angles, a very useful contrivance for temporary decoration.

Where large plants weighing two or three hundred pounds are to be elevated, three stands placed close together carry them safely, although the floor itself may be uneven. While possessing a number of advantages over any other stand in the market the price is lower.

1 Stand, \$1.50; 3 Stands, \$4.00; 6 Stands, \$7.50; 12 Stands, \$14.00.

CABLE ADDRESS
"VANOAL"
PHILADELPHIA**M. RICE & CO.**IMPORTERS AND
MANUFACTURERS**LEADING FLORISTS' SUPPLY HOUSE**
918 FILBERT STREET.

Philadelphia, August 16th, 1902.

To the Delegates of the S. A. F.:

Ladies and Gentlemen: Going or coming to or from the Convention we especially invite you to stop off and visit our establishment. Our Mr. M. Rice has just returned from Europe where he has secured some decided novelties. Prominent among these is a new departure in crepe paper. It has the appearance of fine corduroy, having a velvety sheen and lustre entirely different from anything in its line. It is not waxed. It is four ply and two colored, a fine holly red on one side, being green on the other. It comes in all the popular shades and its many combinations of colors will enable the decorator to match both flowers and foliage with one piece of paper. We alone handle this great novelty. A special line of baskets will be found very attractive. There are many other specialties from these importations, things which we will be pleased to show you.

We feel sure to astonish you with the extent of our new stock of ribbons. We have invested thousands of dollars in this line, which contains all the best and most popular shades for florists' work. Every quality and width to suit the demand. An expert is at the head of this department, which is to be one of the features of our business. You will see that our line of staple goods was never in better condition. Our trade in Wheat Sheaves, Cycas Leaves, and Immortelles is second to none in this county, as the prices always favor the buyer on these standard supplies.

We will have a large display at Asheville where we hope to see those who will not find it convenient to visit our show rooms.

Yours Very Truly,

M. RICE & CO.,

Leading Florists' Supply House,

SAVES MANY TIMES ITS PRICE

THE AMERICAN FLORIST COMPANY'S DIRECTORY saves many times its price to every one who catalogues or circularizes the trade. Fully revised to date of publication, it puts the mail only to live names, avoiding waste of postage and printed matter, time and labor.

Contains 418 pages, lists of Florists, Seedsmen and Nurserymen of the United States and Canada by states and towns, also alphabetically; firms that issue catalogues, private gardeners, horticultural societies and much other up-to-date information which makes it a reference book of daily utility wherever a wholesale trade is done.

Published annually by the

American Florist Co.

J. M. McCallough's Sons.....Cincinnati, Ohio

KIND WORDS NEVER DIE.

GLENFIELD, PA.
CHAS. T. SIEBERT:—I take pleasure in expressing satisfaction in using your Zinc Glazing Points. They have outlasted all others used, therefore are better and cheaper. Their merit should result in extended sales.
Sincerely yours, THEO. F. BECKERT, Florist.

BELLEVUE, PA.
CHAS. T. SIEBERT:—Please book my order for 100 lbs. of Zinc Never Rust Glazing Points. I have used five different kinds of points in the last twelve years, and none of them gave me satisfaction like yours. They will stay in, are easy to drive, no rights or lefts, will hold the glass in place, and do not rust away like all others I have used. Your Zinc Points are easy to take out when making repairs. I have used about 100 lbs. of your Zinc Points in the last two years, and I am perfectly satisfied with them.
Yours truly, F. BURKI.

CLEVELAND, OHIO.
CHAS. T. SIEBERT:—In our 25 years' experience in glazing points of all kinds, I can say your Zinc Points are the best to date. CHAS. H. WILSON, Mgr. for Grant-Wilson Floral Co.

RICHMOND, VA.
CHAS. T. SIEBERT:—We have used the 20 lbs. of Zinc Glazing Points, and think they are the best things we have ever used for glass. If we need any more we will order from you.
Yours very truly, W. A. HAMMOND, Florist.

LOCKLAND, OHIO.
CHAS. T. SIEBERT:—I must say the Zinc Points have given great satisfaction. I have used over 100 lbs. on my houses, and feel justified in stating that they are the best point on the market.
Yours respectfully, W. K. PABTRIDGE, Florist.

CHAS. T. SIEBERT, Station B, PITTSBURG, PA.

Bargains FOR Florists.

We are headquarters for a general assortment of the necessary material and supplies that you are looking for. If you are about to improve or construct, consult us.

In connection with the dismantling of the Pan-American Exposition, we have for sale:

- 20,000,000 FEET of fine seasoned lumber, practically new, consisting of all sizes of joists, timbers, dressed and matched boards and flooring; also sash and doors.
- 50,000 FEET of roofing glass.

PIPE.

We are headquarters for pipe. We offer you: 100,000 FEET of 2 to 4-inch wrought iron, lap welded casing. We can furnish this material in three ways: Either with sleeve or jacket couplings, screwed ends and threaded couplings or with expanded cast iron flanges with bolts and nuts.

1,000,000 FEET of standard black wrought iron pipe, size 3/8 to 12-inch. It is second-hand but has new threads and couplings and is in first-class condition.

1,000 TONS of galvanized wire 9, 10, 11, 12, 13, 14 and 15 guage.

50,000 FEET of 2, 3 and 4-inch cast-iron soiled pipe and fittings.

100,000 FEET of garden hose, 3/4 and 1-in. 75,000 FEET of cotton rubber-lined fire-hose, (rubber-lined in and outside), ranging in sizes 1 to 2 1/2-inch.

- VALVES and fittings of every kind.
- BOX COILS for heating purposes.
- RADIATORS, new and second-hand.

We also offer the following bargains in

Heating Boilers

50 CAST-IRON sectional heaters, capacity from 450 to 5,000 feet.

1 NO. 2 Standard Kroeschell hot water heating boiler.

- FOUR 36x10 Horizontal Tubular.
- FOUR 36x12 Horizontal Tubular.
- FIVE 42x10 Horizontal Tubular.
- FIVE 42x12 Horizontal Tubular.
- SIX 48x14 Horizontal Tubular.
- TWO 54x16 Horizontal Tubular.
- FOUR 60x16 Horizontal Tubular complete with all fittings.

PUMPS of all Descriptions.

A carload of shovels and spades that we are selling at \$5.00 per dozen.

We carry a complete stock of hardware and farm implements, besides plumbing material of every kind.

CLUB MEETS.—ANOTHER OUTING PLANNED.
—A DOZEN IN CONVENTION PARTY.—PERSONAL DOINGS.

The regular semi-monthly meeting of the club was held last Monday evening and was very well attended. It was decided to hold another outing. The place selected by the committee is Giesen's Garden and the date Thursday, September 4. Lots of fun for old and young is promised. The trip to Asheville was discussed and from present indications upward of a dozen will go from here.

Mrs. Adam Graham has returned from her eastern trip looking well.

Mrs. Schmitt is off on an extended visit to friends in Peoria, Ill.

Leonard Utzinger is remodeling his entire plant. ECHO.

Minneapolis.

TRADESHOWS LITTLE CHANGE.—WEATHER MORE FAVORABLE FOR THE GROWERS.—PENTY OF STOCK.—NOTES.

The weather conditions have improved somewhat and the rain is giving the growers a little show for their newly planted stock. Wm. Donaldson & Company are cutting from their new planted roses. Gladioli are being received in large quantities and on account of surplus have to be sold at a low figure to be moved. There are also some fine asters and very good carnations.

John Monson, of the Minneapolis Floral Company, is very busy getting things in shape for the coming year.

"Cal." Rice has been spending a week at Lake Minnetonka. C. F. R.

MOUNT VERNON, N. Y.—Arthur Dummett has sold a half interest in his business to Henry P. Wagner, for fifteen years foreman for E. W. Weimer. The firm will be known as Dummett & Wagner.

WASHINGTON, PA.—J. B. Murdock & Company, of Pittsburg, are pushing the work on their new greenhouses at Van Eman's Station. One iron-frame house 30x400 is nearing completion and another is under way. A well 200 feet deep is good for twenty barrels of water an hour.

VIEW IN A RANGE OF

Dietsch Patent Short-Span Greenhouses

For this style of construction we claim the following advantages not possessed by any other method:

- 1st Largest bench room obtainable; all benches equally good.
- 2d Safe construction; roof a perfect truss; no high peaks.
- 3d Best ventilation; a run of ventilators to every two benches.
- 4th Least amount of shade possible with any method of roof and wall construction.
- 5th Ease of construction; greatest durability at minimum of expense.
- 6th Every requirement of modern construction fully provided for.

These advantages appeal to everyone and this style of construction has the endorsement of many prominent growers. Among those who have adopted this style of house are **Henry A. Dreer**, Riverton, N. J.; the **Nunnally Co.**, Atlanta, Ga; **L. L. May & Co.**, St. Paul; **Geo. Reinberg**, Chicago; **Rose Hill Orphan Asylum**, Chicago, and many others.

We build any style greenhouse, of best Louisiana Cypress or California Red Cedar (preferred by many to Cypress.)

We are supplying material for some of the best known growers in the country; men who would not have cheap lumber at any price, whose first requirement is quality. Let us give you an estimate: the figures will be so low they'll surprise you; the work is so good it will please you.

Piping a Range.

ED. AM. FLORIST:—I have built a range of connected houses as follows: First house 18x100, north wall nine feet, south wall seven feet, ridge twelve feet. Second house 9x100, walls seven feet, ridge ten feet two inches. Third house a lean-to 6x100, outside wall three feet two inches high. The first house is divided into three sections, the first for palms (60 required), the second for roses (70) and the third for carnations (55° to 60°). The house has a wide bench in center and narrow bench on each side, the north benches being each a little higher than the one to the south of it. The second house is used for carnations and has a wide bench in the center. The lean-to is divided into two 50-foot sections, the east one for carnations, the west for violets. The workhouse stands on the north side and is 14x46, the boiler to be set nine feet below ground. How shall I pipe the range for hot water?

M. F. C.

To maintain the desired temperatures the following number of 2-inch pipes will be required: Eighteen-foot house, palms, thirteen; roses, sixteen; carnations, twelve. Nine-foot house, seven pipes. Lean-to, carnations, five; violets, four pipes. If the heating plant is near the middle of the north side the main flow and return pipe can be carried across the houses at this point and connected with the 2-inch pipes. Without knowing more about the arrangement of the houses only general directions can be given.

L. R. TAFT.

An Old Friend.

ED. AM. FLORIST:—After sojourning in Florida for three years, seeking health, we have returned to Findlay and are ready to resume business as florists at once. We cannot think of doing business without our trade paper and the FLORIST appeals to us first of all as an old friend. Enclosed is \$1 for our subscription, formerly the Barnd Sisters, now Findlay, O. **BARND FLORAL CO.**

It Has Great STRENGTH.

Lucas Glass wears well. A prominent florist who has tried many makes says: "Lucas Glass is the best for strength and evenness of surface."

THE SARGENT STERILIZER

Pat. applied for.

HATCH EXPERIMENT STATION
 OF THE
 MASSACHUSETTS AGRICULTURAL COLLEGE,
 AMHERST, MASS.
 DEPARTMENT OF VEGETABLE PATHOLOGY AND PHYSIOLOGY

AMHERST, MASS., March 29, 1902.

Mr. GEO. M. D. SARGENT, Belmont, Mass.

DEAR SIR: I have recently used one of your sterilizers in my greenhouse and it works satisfactorily. It heated the soil to the depth of one foot (this being the depth of the soil in my beds) in 15 minutes, which is I believe what you claim it would do. The amount of steam which I had was limited and I would expect even better results with the use of a larger boiler and more steam. The greater advantage of using a sterilizer of this design is the saving of time, labor and expense in shoveling soil. Since the expense of shoveling soil is in some cases about 60 or 70 per cent of the cost of sterilization, the cost of treatment with this apparatus is much reduced. I consider it an efficient and extremely practical sterilizer.

Yours truly,
 (Signed) G. F. STONE,
 Botanist to Hatch Experiment Station.

The Asheville Convention.

MILWAUKEE FOR NEXT YEAR.

OFFICE FOR 1903:

President, John Burton, Philadelphia.

Vice-Pres., C. C. Pollworth, Milwaukee.

Secretary Wm. J. Stewart, Boston.

Treasurer. H. B. Beatty, Oil City, Pa.

The eighteenth annual meeting of the Society of American Florists is now a thing of the past. It marks a new era in the history of the organization and shows something of the rapid progress and broadening sphere of floriculture in America. A successful convention in Asheville would have been impossible ten years ago but that of last week must be recorded as one of the most satisfactory and surprising ever held by the society. It was surprising because successful beyond the most sanguine expectations. The number of visitors was quite large, there being between 300 and 400 in attendance. The gathering was highly representative of the various sections of the United States, perhaps more so than on any similar occasion. The trade exhibition was quite extensive and included an increased number of southern patrons.

Much of the success of the convention and the decorative work on the convention hall is due to the untiring efforts of Robert Bottomley, superintendent of the greenhouse department at Biltmore, whose work is all the more laudable because he is not an officer of the society. The splendid kentias and other decorative plants distributed about the hall were much admired by the numerous expert critics present and added materially to the attractiveness of the display.

Many familiar faces were missing and among those whose absence was greatly felt we find the names of John Burton, Edgar Sanders, Edwin Lonsdale, Robert Craig, John N. May, J. D. Carmody and Willis N. Rudd.

Vice-president J. W. C. Deake presided in the absence of President Burton and introduced Alfred S. Barnard to make the address of welcome. He has another of those silver tongues, like that of the other gentleman from Asheville, who

captured the convention at Buffalo last year, and said in part:

"Asheville appreciates your presence and acknowledges the favor thus conferred. That it should have been chosen the first southern city in which to hold a convention of your society, composed of members from all parts of the American continent, gives it a distinction of which it is justly proud. That her enterprising and progressive people will use their utmost endeavors to prove it worthy of this preference, I feel fully assured. The obligation for your proper entertainment has been cheerfully assumed by our entire citizenship. They rejoice at your coming and extend you a cordial welcome.

"The existence of your organization evinces the comprehensive character of modern society. It is additional evidence of the advanced state of industrial development. The occupation which it is intended to promote, is the bringing together in practical form, the combined gifts of science and art. It demands the closest alliance between knowledge and taste and fosters intimate and reciprocal relations between nature and talent. It is the science of cultivation adapted to the art of decoration.

"There is hardly a branch of trade which has undergone such remarkable improvement. The impetus given it by the wonderful discoveries in the production and modification of plant species and the corresponding achievements in every department of botany, has steadily raised it to an important position in our social economy. Its elevating and humanizing tendency is apparent wherever its practice has been introduced.

"In coming here you have made no mistake, nor could you have selected a more appropriate place. It would have been difficult for you to have visited a region surrounded by a greater wealth of natural splendor, or one which affords superior advantages for research and experiment. A gentle climate and congenial soil have brought a profusion of choicest verdure with which to clothe and decorate these majestic hills. Within the narrow compass of this mountain section Asa Gray reports a representative of every family which flourishes between the latitudes of Labrador and Wilmington.

"I shall not attempt to minutely describe that which appeals to you, companions of nature, in a language too eloquent for any tongue, or to put in words a sublime reality which is beyond the farthest reach of rarest fancy. There is not a leaf, or stem, or petal; not a calyx or corolla, which does not with inexpressible charm, unfold to you the story of its beginning, growth and consummation. May the influence of this meeting awaken within us an adequate appreciation of these attractions and inspire us to a larger application of your beautifying and perfecting skill.

"But not to our municipality alone, is your presence a source of pride and pleasure. It has the significance and a meaning far more extensive. Its local benefit and interest are secondary and incomparable to its capacity for possible good to state and nation. For these it carries an import pregnant with hope. It is a further revelation of that liberality of temper, which has done so much to consolidate and rehabilitate our country. It indicates the breaking down of another of those barriers which have too long, to the detriment of all sections, resisted and repelled every approach.

"The political orators of the day have been accustomed to ascribe our national reconciliation to the Spanish war. But they have mistaken causes and considered only a result, which that common danger brought to light. It is acquaintanceship, intercourse and contact, such as this, that has been most conducive to the process of cementation. What will so quickly remove and so permanently eradicate every trace of sectional animosity, prejudice and jealousy? Welcome the day when even the memory of such feelings shall have been forever extinguished, when all Americans inspired by a common patriotism, shall work together to construct upon this western hemisphere, a commonwealth, which for its freedom and generosity, its justice and its magnanimity, shall stand an enduring example to every race and every generation.

"In this spirit, and with this faith, we welcome you. I express the sentiment of those for whom I speak, when I pledge you nothing will be left undone, nothing will be withheld which can add to your comfort, or may tend to make your stay a pleasant one."

Ex-president O'Mara responded on behalf of the society. He said the visitors showed in their countenances, their appreciation of the cordial reception given them. Even the brooks, beautiful with beds of rhododendrons, azaleas and kalmias, seemed to bubble a hospitable southern welcome. The grand mountain scenery and many other visions of natural grandeur had realized the promises made by Asheville's representative, Mr. McLeod, last year, when he extended the invitation. That gentleman had declared, however, that the place was so near to Paradise that one might reach up and tickle the angels' feet, but this was the only declaration that the visitors had not found substantiated. But the society had a more serious motive in coming to the south, that they might cross the imaginary line, hold out their hands to their southern brethren and show that the organization, in fact as well as in name, is a national one. He said the members are glad to be in the sunny south, where Flora is to be seen at her best and where she dwells in every vale and upon every mountain top.

Mr. O'Mara next referred to the good accomplished through the instrumen-

ality of meetings of national organizations in eliminating sectionalism. He spoke of the patriotic memories revived by the names of Sumpter, Marion and other Revolutionary heroes of the south. He said that, in the recent Spanish war, the gallant "Joe" Wheeler was the first to spring to the front, and "the rebel yell" was as fierce and as soul stirring on the hills of Cuba as it was, years ago, in defense of what was believed to be right. Referring to the importance of aestheticism in floriculture, he maintained that the development of an educated taste is essential to success in the business; that the grower must feel an enthusiasm born of a love of the beautiful, as otherwise he cannot know the needs of a plant nor supply its wants.

The address of President Burton was then read. It was as follows:

President Burton's Address.

TO THE SOCIETY OF AMERICAN FLORISTS—LADIES AND GENTLEMEN:—It is customary for the president to address a few words of greeting to the members on the occasion of the opening of the annual convention and, although I regret being unable to be with you, I take the opportunity to call your attention to some matters pertinent to the welfare of the society.

The year just passed has, I believe, been a very prosperous one for the great majority of those engaged in commercial floriculture. A large amount of new building has been going on and that notwithstanding the increased cost of glass and other building materials. This, I believe, shows our business to be in a healthy condition and is a state of affairs on which we have every reason to congratulate ourselves.

The wisdom of the founders of the Society of American Florists in giving it the widest scope, instead of making it a close trade organization, has been often called in question. To many it has appeared inconsistent and unnatural to try to combine commercial and amateur gardening under one head. An amateur florist or gardener is interested only from an aesthetic standpoint and cares little as to whether gardening as a business be profitable or the reverse. The commercial florist, on the other hand, is in it for a living, or to increase his income. How, then, could any good be accomplished by trying to combine these two contradictory elements, and why not let the commercial men confine themselves strictly to the business end of the problem and by combination safeguard and promote the interests of the trade only?

To many of us the latter seemed the better course, and many think so still; but the die was cast in the beginning for good or ill and what we have to consider now is the practical results. To all appearance no harm has come of the liberal provisions as to membership. On the contrary the society remains practically a trade organization for the preservation and promotion of commercial floriculture, while welcoming within its ranks the amateur who desires to aid in the promotion of floriculture for its own sake, and the two elements seem to have worked together in entire harmony. A realization of this fact leads to the thought that perhaps we have not given as much consideration as to how we might utilize the patron or connoisseur, as we should have done.

The commercial florist and the amateur are both marching towards the same goal; namely, to make every part of North America blossom like the rose.

They march towards this goal for radically different reasons, it is true, but so long as they are going the same way they might as well join forces and get the benefit of co-operation. A beginning in this direction has already been made by offering the society's medals for meritorious new plants exhibited under the auspices of amateur organizations, which move is highly commendable and should be so extended as to include cultural skill on any class of plants, taste and skill in the arrangement and care of flower gardens and grounds, and for conspicuous service in relation to improving by selection or otherwise of any class of plants.

Recalling the pride with which prominent men in gardening matters exhibited their Victorian medals while visiting our country suggests to us that services of a similar nature here might be suitably rewarded in the same way and serve also to stimulate and encourage the younger element. When we remember the labors of such men as Paul, Barr, Baker, Elwes, Burbridge and Wallace, on the rose family, the lily family, the daffodil family, etc., we can readily see a vista opening out before us in this country where the efforts of the amateur as well as the commercial florist might be stimulated and encouraged by such a body as ours.

There are many families of plants, as for instance the phlox and the peonia, that from various causes are not cultivated as much as they deserve and which by concentrating on them the efforts of expert committees might be made extremely popular over a wide section of the country to the great delight of the amateur and the great profit of the commercial florist. In most sections of this country, particularly in the west, the peonia thrives greatly and is a far more satisfactory plant than the rose for outdoor planting. A vast number of inferior forms of this fine family have been disseminated and the nomenclature of same is in a state of great confusion.

Our society could do a good work by appointing an expert committee, say on the peonia, as a starter. A collection of all the named sorts now in commerce could be brought together at little expense, as most growers would gladly donate, for so laudable a purpose, and the synonyms, the good, the indifferent and the bad forms could be recorded in an authoritative way. Such a record would be of untold value and would prove a great stimulus to the popularity of the plant. An outgrowth of such a collection might be a peonia exhibition at some central point during the height of the flowering season. The funds for carrying on the work of such a committee might be secured partly by appropriation and partly by donation or subscription. The committee should have power to add to its number where desirable and to raise funds for the furtherance of the work under the sanction of the executive officers of the society.

The peonia is only one of many hardy plants, but it is a representative one, and eminently suitable as a subject to commence with. Too much stress cannot be laid on the point that a commencement should be made, for hardy plants are rapidly coming to the front and less and less trade is to be expected in soft-wooded stock for carpet bedding, which has for so many years been the mainstay of a large section of the trade. The question is not whether we approve of the change; we have to make the best of it, for the new order of things is already with us.

And in this connection we must observe

JOHN BURTON, OF PHILADELPHIA.

(Unanimously Re-elected President of the Society of American Florists at the Asheville Convention.)

the vast advance in the laying out and planting of grounds in recent years. The quantities of hardy stock required have been immense and there is every indication that the demand will be on the increase for a long time to come. Every commercial florist who does what is termed "a general trade" and who has as a rule considerable land, or can readily get same, should study this phase of the business and secure his share of the trade in hardy plants.

The recent additions to our original title of the words "Ornamental Horticulturists" has published the broadness of our work. The laying out of grounds, or landscape gardening, is a most important section and we cannot do too much for this branch of gardening. We should deprecate the custom, which is common among many of our florists and jobbing gardeners, of calling themselves "landscape gardeners." To be able to look after a greenhouse and plant a flower bed may warrant the title of florist but certainly not that of "landscape gardener." We should also set our faces sternly against the abuse of the word gardener.

A person who milks the cows and mows the lawn is a laborer, or man of all work, and the looseness of expression in common use of calling him a gardener is mainly responsible for bringing an ancient and honorable calling into such disrepute that horticulturists, floriculturists, landscape architects and a host of other titles have been resorted to, which

are not nearly as accurate nor appropriate as the old word. Gardening has been in all ages the inclination of kings and the choice of philosophers and, as the Prince de Ligne has it, "is the only passion that augments with age." Our best efforts should be put forth in maintaining the old title in its true significance.

CLOSER RELATIONS.

Ten years ago President Dean pointed out that the custom of forming out of our own membership so many auxiliary societies was likely to become so pronounced that there would be danger of greatly weakening the parent body. The chrysanthemum society, the carnation society, the rose society, and talk of an orchid society, a dahlia society, a fern society and divers others sufficiently indicated, even then, the tendency towards disintegration. Ever since that time efforts have been made to stem this tide and to inculcate correct principle of procedure in an opposite direction.

Various plans have been put forward but nothing definite has yet been accomplished excepting the ripening of sentiment in favor of closer relations with these existing independent bodies and of managing such matters in future, either by committees or sections. The committee plan seems to be the most simple, flexible and natural, but an opportunity will be given for a full and free discussion of the merits of various suggestions and no doubt the best will be selected. Sev-

eral of the brightest minds in the business have been studying the subject for a long time and will put the concrete results before you at this meeting.

MISSIONARY WORK.

Missionary work among the children, we should continue to preach the importance of this in season and out of season. We should keep everlastingly at it and endeavor by every means in our power to establish ways and means of interesting the young in gardening. On the continent of Europe they are in advance of us in this direction and it is highly desirable that we should have a full account of the system so that we may be guided by practical experience.

This subject was agitated by President Smith, at St. Louis, in 1893, and at that same meeting Robert Farquhar read an able paper on the subject and it was also advocated then by George C. Watson, in his paper "How to increase a love of flowers among the people." The impressions received in youth are deep and lasting and the training of the young should form a part of every horticultural or floricultural society. Our society ought to have a strong standing committee to attend to this work.

NOMENCLATURE.

Years ago we had an active vigilance committee on nomenclature. They did good work for a while but of late they seem either to have been asleep or non-existent. We need these watch-dogs all the time to prevent careless or ignorant dealers from taking advantage of us with old things under new names. A little timely barking from the committee now and again has a powerful deterrent effect and preserves a healthy moral tone in the trade on this subject.

CONVENTION CITIES.

We have wandered all over a great part of North America in our annual gatherings of the past, mostly in the east and north, as is natural from the density of our trade in these localities, and sometimes have gone west, and this year we have come south. This meeting may not be the largest in point of attendance, but it has several compensating features and its influence both on ourselves and on the south cannot fail but be beneficial.

Whenever we go from home we learn something, whenever we receive a visitor we learn something, not so much in the routine business of the society, perhaps, as in keeping our eyes and ears open. When a boy goes to a shop, a factory or a farm, it is not so much by being told about every little thing that he gets a grip on the business, but by keeping a bright lookout and absorbing as he goes along. If he cannot "catch on" in this way no amount of telling will ever do him any good.

To many of us the annual convention is our only chance of seeing distant places, and for that reason it seems a wise thing to select a new locality each year. But we ought to make some provision in the near future for the time when no invitation shall come to us from a desirable locality. In other organizations similar to ours the matter is left in the hands of the executive committee, and perhaps that would be the best plan to adopt. That method would certainly give ample opportunity for mature consideration. Of course under this method all obligations, implied or suggested, as to local entertainments would be waived and the place selected would be entirely absolved from any burden in that direction.

EXECUTIVE COMMITTEE WORK.

A number of matters of importance received the careful consideration of the executive committee at its annual meeting in February last, and the action taken then will appear in the reports of the executive officers. One thing that gave the committee cause for much anxious thought and discussion was the lack of a local florists' club to take charge of the exhibition at Asheville. After looking over the ground carefully from all sides and canvassing the merits of various plans and suggestions, it was finally decided to put the exhibition in charge of the secretary, giving him power to get such local assistance as would be necessary. Looking back with the light of experience of the past few months the wisdom of this action has been amply demonstrated.

Another thing that gave the committee some trouble was the society's medal for the best plant or flower. The committee has been criticised for the way the medal is offered. The burden of much of this criticism is the assumed impossibility of judging a plant and a flower in the same class. Such an assumption is largely imaginary and, not only that, but if a separate class is made you will at once hear a cry that a chrysanthemum should not be judged in the same class as a carnation, and so on without limit.

Looked at in the proper light the action of the committee is really the only method possible under the circumstances. The number of societies having the privilege of offering the medal has been increased and there is every reason to believe that much good will result, as the medal is looked upon as a most unique and valuable distinction from a general floricultural standpoint.

The subject of bulb culture in our southern states received the best thought of your executives, and an invitation was extended to all growers of bulbs in the south to submit samples at this convention for testing under the auspices of the society. It is hoped that much good may result from this and an impetus be given to a new industry in our country, it being felt that we have the soil and climate for growing such stock and with encouragement from the society it would soon be unnecessary to send abroad for supplies of that nature.

LIFE MEMBERSHIP.

It is noted with satisfaction that there has been a considerable increase in the list of life members. There is nothing that can add to the stability of the society better than a large life membership, and it is sincerely hoped that many more will avail themselves of the privilege.

EXHIBITIONS.

When we reflect that our society was formed to encourage floriculture and that an exhibition of flowers is one of the most potent methods of spreading a love of flowers among the people we must admit that it is our duty to encourage exhibition by every means in our power. We who make our living by commercial floriculture should never lose sight of the fact that the more people who take an interest in flowers and plants there are, the better will be the florists' business in general.

Too many of us are apt to be indifferent and even hostile, sometimes, to exhibitions because, as we say, they do not pay. That is, we are short sighted enough to consider the box office to be the only criterion. That attitude is a very great mistake. We ought to take a broader view and consider the general

effect on the public and its reaction from them to our business in course of time if we keep persistently at it. We should be emphatic in our approval of the flower show at all times.

It now becomes my duty to perform the saddest part, namely, the recording of the deaths of seven of our members during the year just passed. Most of them you were familiar with, they having been active in the society almost since its institution, and one of them, indeed, was elected to the highest honor in your gift. Their wise counsels and genial personalities, will be sadly missed and it will be a long time before we can adequately fill their places in the future.

Report of the Secretary.

One year ago the Society of American Florists and Ornamental Horticulturists met at Buffalo, N. Y., amid the excitements attending a great exposition; to-day we hold our eighteenth annual convention in this peaceful mountain city of the south. Almost a thousand miles

C. C. POLLWORTH.
(Vice-President-elect of the S. A. F.)

removed from the scenes of our recent activities, our banner floats in unfamiliar territory and we appeal to a new constituency. True, the steadfast friends who have stood in our ranks, unflinchingly loyal, in the days of prosperity and adversity alike, are here in goodly numbers, and we know that many others, unavoidably absent, are thinking of us, reviewing with the mind's eye the events that are here transpiring, and hearts warm with good wishes for the society they love, but many new faces greet us here to-day as we present our plea and invite our brothers of the south to join with us in a united effort to open up new channels of industry, that will bring in the coming years prestige and material advancement to American horticulture.

To meet in a place so remote from the scenes of our earlier labors, and yet retain without serious interruption the adherence of the rank and file of our membership, would not have been believed possible a few years ago, in the days when the location and accessibility of the annual convention was the gauge of our fluctuating membership roll. A steady trend towards a more permanent membership, the desirability of which has been fre-

quently referred to by your secretary, now seems happily inaugurated, and, as indicating a faith in the society's usefulness and approval of its methods by our conservative business and scientific men, is one of the most hopeful signs in our career at the present time.

The whole number of members in good standing as recorded in the annual report was 931, fifty being life members and 881 annual members. We have lost seven of these by death since the last meeting, and 144 members have either resigned or forfeited their membership by non-payment of dues for the year 1902. The list of deaths is as follows: Edmund M. Wood, December 12, 1901; Charles Common, January 25, 1902; Thomas J. Winters, January 31, 1902; James Comley, February 1, 1902; Conrad Eichholz, March 23, 1902; A. Whitcomb, August 24, 1901; W. G. Bertermann, June 29, 1902.

During the year 192 new members were added, of whom six are life members, and twelve annual members have changed to life membership by payment of the requisite fee. The new members are severally credited to the various states as follows: Florida, Iowa, Louisiana, Minnesota, New Hampshire, Oregon, Virginia, Hawaiian Islands and Australia, one each; North Carolina, Rhode Island and Canada, two each; Colorado, Connecticut, Indiana and Kentucky, three each; Wisconsin, four; District of Columbia, five; Missouri, seven; New Jersey, eight; Maryland and Michigan, nine each; Illinois, fourteen; Ohio, seventeen; Massachusetts, twenty-two; Pennsylvania, twenty-six; New York, forty-two.

It is unnecessary here to refer at any length to the proceedings of the convention at Buffalo, as this is fully recorded in the annual printed report. It was in every respect a creditable and successful meeting and the sessions were generally well attended, notwithstanding the attractions of the Pan-American Exposition. The principal enactments of the society were the acceptance of the national charter, the transfer of the assets to the new corporation and the adoption of a new constitution practically as reported by the incorporators, with the exception of the clause in reference to co-operative relations with other organizations. This matter is again before us for consideration at this convention. It is to be hoped that every member here will make it his duty to be present and assist in settling wisely this important question so that not alone individual, sectional or corporate benefit may accrue but that the advancement of American ornamental horticulture in its broadest sense may be hastened.

Besides a full account of the proceedings, the printed report contains valuable contributions on the "Red Spider," by Prof. F. H. Chittenden, and "Thrips in Greenhouses," by Prof. W. E. Hinds, reports of local progress from the various state vice-presidents, reports of exhibition committees, list of plants registered, list of plant introductions in America in 1901, state laws, and regulations of foreign governments regarding inspection and transportation of plants, special express rates on plants, bulbs and seeds, report of superintendent of sports, the charter and constitution of the society, list of members and accounts of summer meetings of auxiliary societies. The number of plant introductions for the year included eight cannas, twenty-five carnations, thirty-two chrysanthemums, eleven roses and forty miscellane-

ous. The widespread demand for copies of the volume is the best indication of its value as a book of reference.

The following named new plants have been registered by members during the year:

- August 13, 1901, Rose Climbing Clothilde Souper, by P. J. Borchmans Company.
- August 21, 1901, Rose Freedom, by Arthur Griffin.
- August 22, 1901, Cattleya Harrisonia superba, Cattleya speciosissima lilacina and Cattleya speciosissima striata marginata, by Lager & Hurrell.
- August 26, 1901, Cattleya Gaskelliana Mrs. Hugh J. Grant by Lager & Hurrell.
- August 30, 1901, Rose Philadelphia and Canna Mont Blanc, by Conrad & Jones Company.
- August 31, 1901, Rose Queen Victoria, by Good & Reese Company.
- September 27, 1901, Rose Mrs. Theodore Roosevelt and Rose Mark Twain, by Peter Henderson & Company.
- October 10, 1901, Carnation Dr. W. Seward Webb, by J. B. Trudo.
- October 14, 1901, Rose Lady Gay, by M. H. Walsh.
- November 1, 1901, Canna President Roosevelt, by C. W. Ward.
- November 15, 1901, Rose Dorothy Perkins, by Jackson & Perkins Company.
- November 16, 1901, Rose Nestor, Rose Young America and Rose Atlas, by Schmidt & Botley.
- December 7, 1901, Canna Duke of York, Duchess of York, Eastern Beauty, Evolution, Brandywine, Striped Beauty, Niagara, Queen of Holland and Cherokee, by Conrad & Jones Co.
- December 20, 1901, Sweet pea Christmas Comtes and Sweet pea Christmas Captain, by A. C. Zvolanek.
- January 14, 1902, Rose Miss Alice Roosevelt, by American Rose Company.
- February 25, 1902, Zonal geraniums J. D. Eisele, Jas. Davidson, Jupiter and Venus, by Henry Eichholz.
- March 3, 1902, Carnation Seth Low, by E. G. Hill Company.
- March 8, 1902, Carnation White Layde, by A. L. Thorne.
- May 10, 1902, Rose The Farquhar, by R. & J. Farquhar & Company.
- May 14, 1902, Zonal geranium Harriet Cleary, by J. M. Hortsburgh.
- May 15, 1902, Rose Queen Madge, by C. S. Fitz Simmonds.
- July 2, 1902, Dahlia Uecla Sam, Dahlia Alex, Wallace and Dahlia Mrs. E. T. Poyle, by H. Beaulieu.
- July 26, 1902, Dahlia Wm. Scott, by H. Beaulieu.
- July 28, 1902, Cattleya Hardyana Mrs. Geo. Schlegel, by Lager & Hurrell.
- July 31, 1902, Rose Wedding Bells, Rose Princess and Rose Urania, by M. H. Walsh.
- August 1, 1902, Carnation Miss Aimee, by J. B. Trudo.
- August 2, 1902, Hydrangea hortensis superba, by M. H. Walsh.

Medals have been awarded as follows during the year:

- Through the American Carnation Society, a silver medal to R. Witterstaetter for Carnation Adonis; a bronze medal to R. Witterstaetter for Carnation Albatros.
- Through the Horticultural Society of Chicago, a silver medal to The Chicago Carnation Company for Carnation Barlowarden.
- Through the Pennsylvania Horticultural Society, a silver medal to John N. May for Rose Mrs. Oliver Ames; a bronze medal to Edwin Lonsdale for Cypripedium Wymdmooreanum.
- Through the New York Florists' Club, a silver medal to J. N. May for Rose Mrs. Oliver Ames.
- Through the New Jersey Floricultural Society, a silver medal to John N. May for Rose Mrs. Oliver Ames.
- Through the State Florists' Association of Indiana, a silver medal to H. W. Roman for Chrysanthemum Majestic; a bronze medal to John Hartje for Carnation Snowdrift.
- Through the Newport Horticultural Society, a bronze medal for Cypripedium Gardnerianum (insigne - barbatum).

The executive board convened at Asheville on March 4, 5 and 6, 1902, all the members except three being present. Matters considered, in addition to the general programme and arrangements for this convention, were the identity of the rose Helen Gould with the old Baldwin, the auditing of the treasurer's report, proposed legislation in congress regarding the inspection and fumigation of nursery stock, the method of awarding the society's medals through other organizations, the testing of American-grown bulbs for forcing purposes, the proposed plant breeding conference at New York city and the question of closer relations with kindred societies. Owing to the fact that there is no florists' organization

A Gay Collection.

Among the advices of members who intended to join the Asheville delegation received by the Philadelphia committee was the following:

COMMITTEE ON TRANSPORTATION.

Florists' Club of Philadelphia.

Gentlemen:

I beg to advise you that I expect to go with the Philadelphia delegation to Asheville on August 18, 1902. Accompanying me will be the following:—

There were a few "warm babies" among the Philadelphia crowd, but so far as heard from at this writing, nothing quite so varied, vociferous and haleyn as the above, appeared in any "three berths" on the trip. Let us give thanks. G. C. W.

in Asheville to whom the work of arranging for the trade exhibition could be delegated, as has been customary in recent years, this duty was intrusted to the secretary with instructions that the maximum charge for exhibition space should be 20 cents per square foot, instead of 25 cents as heretofore. It was decided to recommend to the society the re-establishment of the nomenclature committee.

The programme for the meeting as outlined by the executive board and published in the preliminary bulletin has undergone some alterations necessitated by the recent sad bereavement sustained by our president and the inability of one of our speakers, Mr. Carmody, to be present and fill his' assignment on the programme. At the last moment, we are apprised of the sudden illness of another of our essayists, Mr. Edgar Sanders, but fortunately Mr. Sanders had prepared his paper before he was stricken down and it will be presented in due time.

The various committees and, as a rule, the state vice-presidents, have done earnest, thorough work for the society, and have been at all times ready and willing to respond to any call made upon them from the secretary's office. To them and to the members generally your secretary is indebted for considerate co-operation and friendly counsel in the many emergencies and perplexities that have arisen during the year. Never before has the interest in the society seemed so widespread and earnest among its members and this fact augurs well for the future of the old, yet ever young, S. A. F.

Treasurer's Report.

The report of Treasurer H. B. Beatty showed the society to be in a most prosperous condition. Following is a summary of the figures:

Balance Jan. 1, 1902.....	\$2,111.11
Receipts.....	753.00
Interest.....	21.40
	<hr/>
Disbursements.....	\$2,885.51
	454.95
Balance on hand.....	\$2,130.56
	<hr/>
LIFE MEMBERSHIP	
Balance on hand Jan. 1, 1902.....	\$1,574.68
Receipts membership dues.....	190.00
Interest.....	32.13
	<hr/>
Balance on hand.....	\$1,766.81

A number of state vice-presidents' reports were presented and a numerously signed paper was handed up and read by the secretary. It suggested that a resolution be passed and a petition drawn and sent at once to President Roosevelt, urging him to convene an extra session of congress "for the purpose either of settling the strike of the coal miners forthwith or of letting bituminous coal come in duty free, from October 1 to March 31, so that our trade may not suffer for want of coal. If speedy action is not taken we are afraid that many florists will be ruined in business by an exorbitant price for coal or by the supply being so short that coal cannot be obtained. We think it is our duty to ourselves and our families to forestall calamities of this kind."

On motion, the paper was referred to a special committee, which was instructed to consult with the executive committee of the society. Messrs. Scott, Ward, Harris, Pierson and Reuter were constituted the special committee. Special committees were appointed on obituary notices and the president's recommendations.

Wednesday's Proceedings.

On the morning of Wednesday, the second day, C. W. Ward's report on fertilizers was followed by brief remarks by the author and H. A. Siebrecht and P. O'Mara, to the effect that the beneficial use of chemicals is still a mooted question and that the grower will have to determine for himself, from the soil and conditions in his individual case, as to their comparative economy. Mr. Ward remarked that lime is beneficial with fertilizers containing phosphoric or other soluble acids.

The reports of the exhibition judges were read and filed.

Adam Graham, E. G. Hill and C. W. Ward, of the committee to which was referred the recommendations in the president's address, not having had time to prepare a report, made verbal statements approving the recommendation to create a praeonia committee and also the recommendation to empower the executive committee of the society to select the annual convention place and defray the expenses of the convention. Mr. Hillebrand

pioned the latter proposition because of what he called a great waste of money in entertaining the society. He said he thinks this expense too burdensome upon the small cities and that better results could be attained by some measure to increase the funds of the S. A. F. Mr. Ward disagreed with his colleagues upon details, and in view of the diversity of opinion in the committee, the convention, after a discussion which occupied the greater part of the morning session, voted to lay the whole matter on the table.

Papers were then read by Fred. R. Mathison, of Waltham, Mass., on "The Needs of the Commercial Florist in the North," and by Wm. R. Smith, superintendent of the Botanic Garden, Washington, D. C., on the bulb situation. There was no discussion.

The selection of a meeting place for 1903 produced an exciting struggle. The main competitors were Milwaukee and Baltimore, and Milwaukee finally won with 140 votes in a total of 238. Baltimore received seventy-three and Washington twenty-four.

J. C. Vaughan, of Chicago, then nominated President Burton for re-election. C. C. Pollworth, of Milwaukee, was named for vice-president, Messrs. Stewart and Seidewitz, for secretary, and H. B. Beatty for treasurer.

In presenting the name of Mr. Burton, Mr. Vaughan said: "Mr. Chairman:—I believe the facts will bear me out in claiming that in no commercial organization of our class has the consensus of opinion of the best element interested been more generally carried out than in ours during the seventeen years of the existence of this society. Throughout its history, and in all its councils, its work has been carried forward with wise judgment, actuated by the most unselfish and disinterested motives and it seems that almost without exception the right man for the year and the hour has been chosen. I may say that on every occasion this honorable office has sought the man, rather than the man the office.

"If upon any one occasion more than another this fact was forcibly demonstrated, and it was conceded that the office had sought the man, that occasion was at Buffalo last year, when our last president was chosen. Those familiar with the workings of this organization, the men who have been prominent in it since its inception, will agree with me, one and all, that on that occasion the office did seek the man. The man then selected so appreciated that honor that he could only accept when it came to him unsought and by a unanimous vote. His name was used by his silent, rather than definite, assent and, happily, his selection was, in the outcome, really unanimous.

"You all know of the severe afflictions under which our president is now suffering. One of those mysterious dispensations of Providence which human reason can neither attempt to explain or understand has kept him from our midst.

"When told that our president would not be present I remarked that it was impossible, that he is not made of that kind of material, that I knew he would be here, but of course when informed of the critical condition of his family, as a result of their sad bereavement, I fully appreciated the reason for his absence. I ask, therefore, gentlemen, that such a man be given a re-election, or at this time a unanimous nomination, which would be equivalent to an election, that he may

preside over our meetings and receive in our presence those honors which it has been our pleasure and delight to accord him.

"I feel that I voice the opinion of all who hear me, of those who study the best interests of our society, in asking of you this re-nomination. No man in this or any other society is better entitled to this compliment at our hands than 'Honest John' Burton."

Adam Graham seconded the nomination and on motion the meeting closed with Mr. Burton the only nominee.

An illustrated stereopticon lecture on "Scenes in Foreign Bulb and Plant Markets" was delivered on Wednesday evening by J. K. M. L. Farquhar, of Boston. The lecturer led his audience through the hyacinth-growing fields in Southern

JAMES W. DUNFORD.

(President-elect St. Louis Florists' Club.)

France and described particularly the nurseries of Antoine Crozy and his specialties. In passing to the north he traversed Belgium and Russia, returning to Germany and Holland and explaining meanwhile the extent and character of the horticultural industry in the countries visited. He then crossed the Pacific to the flower gardens and markets of China and Japan and the products of Hawaii. He spoke of the opportunities in the United States for the growing of bulbs that are now imported. He denied that cheap foreign labor is an obstacle, as it has been demonstrated that gladioli can be produced more cheaply in this country than in Europe.

Thursday's Proceedings.

At the opening of the morning session for the third day, the judges filed their report on florists' supplies, which had been deferred from the day before.

A paper by Prof. W. F. Massey, of Raleigh, N. C., entitled "Possibilities in Bulb Culture in the South" was then presented and, Prof. Massey not being present, ordered printed.

Geo. W. Wienhoeber, of Chicago, presented and read a paper on "Marketing Cut Flowers at Retail." The same subject from the standpoint of the wholesaler was treated in a paper forwarded by Edgar Sanders, of Chicago, who is ill at home. In response to a message of con-

dolence from the convention he wired the following: "Thanks regarding my absence; spirit willing but flesh weak; am getting better."

Closer relations between the S. A. F. and its auxiliary societies was the theme for discussion to-day, the question being upon the two proposed amendments to the constitution. The main proposition was criticised as cumbersome, impracticable and revolutionary, as engendering controversies between secretaries of different associations in the collection of dues, as savoring of coercion rather than co-operation, and so forth. A simpler plan, proposed as a substitute, was to give the S. A. F. charge of the registration of new varieties and permit the minor organizations to have representation in the governing board.

The discussion brought out a general interchange of views and various suggestions looking to a possible method of union and consolidation, but without result. Mr. O'Mara favored a conference by committees but objection was made that this had been repeatedly tried and failed. He also suggested the holding of a grand exhibition by the S. A. F., in February or March, as he thought this should cause all interests to gravitate to a plan of united action. Messrs. P. O'Mara and H. A. Siebrecht advised that the subject be dropped summarily and buried, as no agreement could be reached. J. K. M. L. Farquhar argued that the auxiliaries would gain by becoming branches of the great trunk organization, as their work would be more valuable with the endorsement of the S. A. F., for it would then receive international recognition.

Adam Graham, in summing up the discussion, said all were agreed, first, that it was desirable for the society to bring the auxiliary societies into closer relationship with itself; second, that no practicable scheme for attaining this object had as yet been devised. He believed that continued agitation would finally evolve a means to the accomplishment of the end, which could only be attained gradually. C. W. Ward, W. J. Stewart, Wm. Scott, J. N. Lamb and H. B. Beatty also participated in the discussion.

On motion of Mr. Pierson, the matter was referred to a new committee of nine members, to be appointed by the president, and to have upon it one representative from each auxiliary society.

On motion of Mr. O'Mara, a paonia committee of nine members was also provided for in accordance with President Burton's recommendation.

The following officers were then elected by unanimous vote: President, John Burton; vice-president, C. C. Pollworth; treasurer, H. B. Beatty. For secretary Wm. J. Stewart received 140 and E. A. Seidewitz 67 votes.

The Trade Exhibition.

The trade exhibition was a most gratifying success. While the display was neither so large nor so diversified as that at Buffalo last year, it was more extensive than some of those in the recent history of the society and was admirably staged. The exhibitors and their specialties were:

W. J. Cowee, Berlin, N. Y., gladioli and wired toothpicks.

J. G. & A. Esler, Saddle River, N. J., hose.

Mrs. H. Rehder, Wilmington, N. C., carnivorous plants.

A. T. De La Mare Printing and Publishing Company, New York, books.

Wreath of orchids, Beauties, valley, adiantum and leucothoe.

Wreath of gloxinias, lilies and miscellaneous foliage.

THE SIMPLEST YET MOST DIVERSIFIED FLORAL ARRANGEMENT IS THE WREATH.

Dayton Paper Novelty Company, Dayton, O., boxes.
 H. M. Altick, Dayton, O., labels.
 J. A. Peterson, Cincinnati, O., begonias and pandanus.
 Sunnyside Floral Nursery, Fayetteville, N. C., carnivorous and miscellaneous plants.
 Schloss Bros., New York, ribbons.
 L. H. Foster, Dorchester, Mass., *Neprolepis Anna Foster*.
 Lemuel Ball, Philadelphia, Pa., decorative plants.
 Pinchurst Nurseries, Pinchurst, N. C., plants and sash.
 Empire Printing and Box Company, Atlanta, Ga., boxes.
 J. Stern, Philadelphia, Pa., supplies.
 Chas. D. Ball, Philadelphia, Pa., palms and pandanus.
 H. Eichholz, Waynesboro, Pa., geraniums.
 P. J. Berckmans Company, Augusta, Ga., nursery stock and decorative plants.
 Geo. M. Garland, Des Plaines, Ill., iron gutter.
 Geo. Wittbold Company, Chicago, Ill., decorative plants.
 Robert Craig & Son., Philadelphia, Pa., decorative plants, including new *Croton Craighii*.
 H. Thaden, Atlanta, Ga., wire supports.
 F. R. Pierson Company, Tarrytown, N. Y., *Neprolepis Piersoni*.
 Siebrecht & Son, New Rochelle, N. Y., decorative plants.
 Henry A. Dreer, Philadelphia, Pa., decorative plants and bulbs.
 H. Bayersdorfer & Company, Philadelphia, Pa., supplies.
 S. S. Fennock, Philadelphia, ribbons.
 Jos. Kift & Son, Philadelphia, Pa., adjustable vases and cacti.
 Michigan Cut Flower Exchange, Detroit, Mich., insecticide.
 W. C. Krick, Brooklyn, N. Y., letters, tree and plant stands, pot hanger.

A. C. Oelschig, Savannah, Ga., ficuses.
 J. L. Banner & Company, Montezuma, N. C., galax leaves and leucothoe sprays.
 Jessamine Gardens, Jessamine, Fla., crinum.
 Brooks Sisters, Sorento, Fla., seeds.
 L. B. Brague, Hinsdale, Mass., hardy cut ferns, etc.
 Seegers Bros., Lisse, Holland, bulbs.
 H. J. Smith, Hinsdale, Mass., hardy cut ferns, etc.
 Vaughan's Seed Store, Chicago and New York, bulbs.
 W. H. Ernest, Washington, D. C., pots.
 Lucas & Boddington Company, New York, bulbs and oncidiums.
 Stump & Walter Company, New York, bulbs, jardiniere, etc.
 Henry F. Michell, Philadelphia, Pa., bulbs.
 I. N. Kramer & Son, Cedar Rapids, Ia., adjustable tubular greenhouse construction and pot hangers.
 Anders Rasmussen, New Albany, Ind., ventilator.
 Quaker City Machine Works, Richmond, Ind., ventilating machine.
 H. Beaulieu, Woodhaven, N. Y., dahlias (cut blooms) and tools.
 Lord & Burnham Company, Irvington, N. Y., greenhouse construction materials and boiler.
 Chadburn Manufacturing Company, Newburg, N. Y., automatic ventilator.
 Dillon Greenhouse Manufacturing Company, Bloomsburg, Pa., greenhouse construction materials.
 Central Foundry Company, New York, greenhouse pipe.
 United States Botanic Garden, Washington, D. C., miscellaneous plants.
 Misses Wilson, Montgomery, Ala., narcissus bulbs, home grown.
 Griffin Bros., Jacksonville, Fla., *Lilium Harrisii* bulbs, home grown.
 G. W. Vanderbilt, Asheville, N. C., fine specimen palms for decoration only.

M. Rice & Company, Philadelphia, made their display of supplies at the Battery Park hotel.

Committee on Fertilizers.

C. W. Ward, for the committee on fertilizers, presented the following report:
 The experiments referred to at the last annual meeting of this society have been in a measure continued, although I have been interfered with by frequent absences from home, consequently am not able to give definite data or calculations as to results obtained. I have, however, continued the feeding of various plants with chemical fertilizers, and have come to the conclusion that such may be profitably used by those having proper knowledge and experience. When we consider that fertility of soil is practically measured by the available or soluble plant food elements which it contains, it will be readily seen that fertility may be preserved by introducing into the soil these plant food elements in the same proportion as they are being exhausted by the growing plants.
 It has been found that the productivity of soils is largely influenced by their physical character. This has proven particularly true in the experimental work of using chemical plant foods, and it has been found that in order to get the best results with the use of chemical fertilizers it is necessary to employ soils containing considerable vegetable fiber. Soils in which this element is lacking easily become compacted, hardened, and impervious to heat, water and air, and to a considerable extent soured, and when in this condition plants do not make a healthy, strong growth in them.
 Last year at Buffalo I mentioned a work upon fertilizers, by Edward B. Voorhees, which may be obtained from

the McMillan Company, of New York; also another work entitled "Fertility of the Land," by Roberts, published by the same firm. These two books I would recommend to any one interested in floriculture as being well worthy of careful study.

The principal elements necessary for plant growth are stated as nitrogen, phosphoric acid, potash and lime. Nitrogen is probably the most essential of these elements. It is also the easiest lost and the most costly to replace. It is removed not only by the crop, but is also lost by drainage and evaporation, especially in cases where certain classes of crops are grown upon lands that are especially rich in nitrogen.

The principal sources of nitrogen are from natural manures, such as horse, sheep, cow and bird manures. The growing and plowing under of nitrogenous gathering crops, such as the various clovers, cow peas and soy beans, will also add to the nitrogen of the soil. The chemical sources of nitrogen are nitrate of soda, sulphate of ammonia, nitrate of potash, ground dried blood, as well as the refuse from slaughter houses known as "tankage."

Inasmuch as nitrogen is easily lost by evaporation and drainage, it will be readily seen that nitrogen should not be introduced into the soil much in excess of what the plants require; nor much faster than it is needed for immediate use.

The next most essential element of plant growth is stated as phosphoric acid, which most soils contain in considerable quantity. It may be advantageously applied in connection with potash and nitrogen. The principal sources from which phosphoric acid are derived are raw ground bone, steamed or boiled bone, or the refuse bone from glue factories; also bone black or animal charcoal. The most common source of acid phosphate is that which is generally sold as super phosphate or dissolved Carolina or Florida rock. Phosphoric acid is peculiar in this respect, that large quantities of it may be introduced into the soil where it will combine and remain until required by the plants. An excess of phosphoric acid does not seem to injure plants.

The third most important plant constituent is potash, but this is considered of less relative importance to plant growth than either phosphoric acid or nitrogen. In America most good soils are naturally very rich in phosphoric acid and potash and in many instances the addition of nitrogen alone or the plowing under of nitrogenous gathering crops will revive the fertility of the land for a considerable period. Potash is, however, considered a necessary fertilizer constituent by the authorities, and essential upon light sandy soils or peaty meadow lands. It is considered valuable for the building up of worn out soils and is thought to contribute to the growth of nitrogenous gathering plants.

The various sources of potash are sulphate of potash, muriate of potash, nitrate of potash, Kainet and wood ashes.

In the growth of greenhouse plants under glass the most convenient form in which chemical fertilizers can be employed is by watering the growing plants with solutions which are termed liquid fertilizers. While many formulas have been from time to time given out by different authorities, there does not seem to be any fixed formula which would be applicable under all conditions. The following formulas have been used by me with suc-

cess, but I would not be able at the present time to state which will give the best results, all conditions considered. So far as my practice has gone I have found it safe to use all of them in soils that are not deficient in fibrous material. In making up these formulas the materials are thoroughly pulverized and ground and mixed together. The solution is made by generally dissolving the chemicals, after mixture, in water in the proportion of about one ounce to one gallon of water. Plants are watered about once to twice each week, or once in two weeks, according to the strength of the solution and the vigor which the plant shows:

FORMULA A.

250 lbs. super phosphate
75 " nitrate of soda
50 " sulphate of potash.

Use one ounce to one gallon of water.

FORMULA B.

50 lbs. nitrate of soda
30 " nitrate of potash
20 " phosphate of ammonia.

Use one ounce to 12 gallons of water and apply twice each week.

FORMULA C.

250 lbs. super phosphate
30 " nitrate of potash
20 " phosphate of ammonia
50 " nitrate of soda

Use one ounce to 12 gallons of water when applied weekly, or one ounce to two gallons of water when applied every two weeks.

FORMULA D.

250 lbs. super phosphate
100 " ground dried blood
50 " phosphate of potash.

Applied every two weeks at the rate of one ounce to one gallon of water.

FORMULA E.

300 lbs. bone black
50 " sulphate potash
75 " nitrate of soda.

Use the same as Formula D.

The following formula has been used with considerable success for the purpose of reviving exhausted soils:

500 lbs. super phosphate
75 " sulphate of potash
300 " ground sheep manure.

This is sown in drills before planting at the rate of 300 to 500 pounds per acre, according to the character of soil. It is thoroughly stirred in and incorporated with the soil before setting the young plants in. It also may be sown broadcast upon the land and harrowed in at the rate of 1,000 to 2,000 pounds per acre, according as the soil is exhausted.

Wm. Stewart, of the Indiana Agricultural Experiment Station, has recommended the following general formula for use in rose growing:

Super phosphate, 130 lbs.
Sulphate of ammonia, 13 lbs.
Nitrate of soda, 31 lbs.
Sulphate of potash, 26 lbs.

Use at the rate of one ounce to one gallon of water and applied once each week at the rate of two quarts per square yard of bench surface. This is done until the plants have taken on a heavy growth, at which time the quantity and time of application is regulated according to the needs of the plants.

It may be stated as a general principle that in applying liquid chemical fertilizers the plants should have become well established and in full growth before the application is begun. The first applications should be rather light in strength and at considerable intervals apart, until active growth shows that the fertilizers are being assimilated. At this time the quantity and frequency of the applications may be increased. Where soils are dense and lacking in vegetable fiber chemical fertilizers should be used with great caution. The results obtained in such soils may prove quite different from those

obtained in soils with an abundant supply of vegetable fiber.

Wherever natural fertilizers can be obtained at reasonable prices they are without doubt more safe for ordinary florists' use than chemical fertilizers, as unless the grower has more or less knowledge of the action of chemical fertilizers there is considerable danger of injuring the plants. Natural manures should be well composted before being used in soils destined for the growth of plants indoors. The drainage from stables may be collected in a tank and used when largely diluted with water. At first thought it would seem that liquid manure water made from such source would be less dangerous than that made from manufactured chemicals, but in our practice this has not proved the case, as we have found it quite as easy to injure plants by over-doses of these natural manure waters as with the chemical liquids.

In conclusion, I would say that the physical condition of each grower's soil and the amount of plant food which it contains must determine his practice in the use of chemicals or other plant foods, and a knowledge of this can only be obtained by each individual's experimental practice. In the problem of using chemical fertilizers success is something that every florist must work out in his own locality under the particular conditions with which he is laboring. As an example, a grower having a rather light but poor soil, well filled with vegetable fiber, might be able to use considerable quantities of chemical fertilizers, while another grower having a dense, heavy, mineral soil deficient in vegetable fiber but not a poor soil might not be able to use them at all. But as I have before said, we have found no serious difficulty in using chemical fertilizers after we have once become familiar with the conditions and needs of our soil.

Wholesaling Cut Flowers.

BY EDGAR SANDERS, CHICAGO.

[Read before the Society of American Florists at the Asheville convention, August 19-22, 1902.]

When I accepted the invitation of Secretary Stewart to say something on the conditions and growth of the business of the wholesale florists of this country, to use a homely expression, I thought it would be as easy as "falling off a log." Of the Chicago end of the efforts I had no doubts, and supposed all I had to do, outside of printed authorities, was to apply to the proper parties and the thing was done. In a measure this did not fail me, but the stumbling block I struck was in what is called co-operative concerns. This failed me; and yet, in my humble opinion, this is a field, rightly conducted, that is fraught with much good, especially in cities of moderate size, and, as it has proved, even of the largest size, as witness New York; and yet in no way disparaging the value of the regular commission and wholesale grower-dealers as we find them to-day. You cannot get back to the old ways if you would, nor would a thoughtful business man do so if he could.

The general tendency of the day in the price of florists' products, including staple flowers, like other products of labor, averages lower and lower. To meet this condition greater combinations of capital are invested, more and more is given for the dollar. In the growing and the selling, smaller profits and larger sales are the rule. If the output of the wholesale man has enormously increased, so have his expenses. He could not make his salt did he sell no more at present day prices than he sold in the early stages of the business. Out of his 15 per cent has to come heavy rentals, expensive cold storage appliances, boxes, carefully ice-packed packages, secure against heat and cold, with no charge therefor, large advertising and labor bills, besides no end of sundries he finds

absolutely necessary through severe competition.

The old order of things changes, giving place to the new, in the florists' business no less than in others. Time was (and that within my time) when there was but one stage in the entire business: The man with the greenhouse took an order for bouquets, sometimes made them up on speculation at his greenhouse, then delivered to his customer direct, or peddled, as the case might be. Next came the flower store, first with a greenhouse attached, then simply a store, and the retail florist as we know him to-day came into existence. As the demand increased those who had no stores began to supply such as had, either with or without greenhouses. Then the "grower" became another division.

For many years, if this store man wanted extra flowers, he had to send to the greenhouses for them, often scattered long distances apart, and a sorry job he found it in hunting for his supplies. Presently the grower employed a carrier, who began to make the rounds of the stores with baskets or wagons, peddling the flowers he had to sell. Stems of the flowers in early days were no object; the bouquet maker made his own stems, so the grower or his agent could carry quite a supply in a pretty small package and make the round of the retail stores with such flowers as he had to sell.

In the course of time some growers began to be noted for choice stock. On the way to the market the retail men began to meet the grower at a half-way house and lighten his load. This, it seems, was notably so with John Henderson's stock of Flushing, N. Y., and "Jem" Johnson, Mr. Henderson's carrier, became a noted person. Other carriers followed Johnson's method of lightening their loads, and the Thirty-fourth street market, in New York, became a regular rendezvous, and ultimately a co-operative concern of many growers. In Boston a similar condition of things led to similar results.

But I am anticipating. The increased use of flowers grows apace, and growers make great effort to meet the demand. The short-stemmed flowers give place to the long-stemmed; they require better handling and are more burdensome to carry around, to say nothing of the great expense and inconvenience of this system and its peddling nature. Some shrewd men buy outright of these growers and sell to the retailer. Then others hold unsold stock and sell on a commission, but this proves unsatisfactory, and it is not long before the advent of the wholesale florist; dealer or commission man finds his opening. He opens a store, solicits consignments and sells on a commission basis of 15 per cent of what he sells, and we come to the latest factor into which the word "florist" is now divided, who, however, at this later day, has assumed many forms, as may appear as we get farther along.

Modest as this wholesale man was in the first inception as an entity, he is by no means so now. In the flower trade the grower may be likened to the farmer; the wholesale florist to the board of trade, or counting house, that sets up the machinery to move the crops. The middleman, if you will, and like all middlemen, whether they deserve it or not, sometimes, as the old saying goes, "gets more kicks than ha-pence." But you cannot now dispense with his services if you would. The busy wholesale centers, like New York and Chicago, particularly, would convince any man of this fact. The wholesaler has two distinct classes to deal with, the local or home buyer, who sees, or may see, the flowers he purchases, and the out-of-town buyer, who depends upon his shipper for the quality of the flowers he orders.

This shipping trade, brought to the system it is now by shrewd business men, cuts a very important figure in the florist industry, and that never could have been handled or worked up in the way it is now without the aid of the middleman. To make a lively wholesale market, it needs abundant growers to draw supplies from, and retail florists doing business within easy distance to look to it for their supplies. Second, a contributory region for shipping purposes, and the less this region is interfered with by other large cities or centers (where other wholesalers will start if they can), the better and faster the trade will grow. In this respect, Chicago,

as a center, now and for years to come, stands without a peer, not excepting New York and its vast contiguous population, that has Boston on its east, and Philadelphia south, almost within the distance that Chicago draws its supplies from. The east looks populous and is so, but is a narrow strip of land on the Atlantic slope compared to the country that Chicago represents, which is actually four-fifths of the people of the United States. Is it any wonder, its phenomenal growth in the flower industry?

WHAT WHOLESALERS STAND FOR.

The wholesale florists, as a body, although numbering all told in all the chief cities of the country at the present time under 100 firms, to be exact, just eighty firms, from the very conditions of that business are more in evidence and make a greater noise in the florists' world, use more strenuous means to find customers and a sale of flowers grown in the country, than all other florists or means combined. In 1896 there were 9,528 firms in divisions as shown by the Florists' Directory of that year in all classes. There are at least 12,000 at the present day, and in large cities an army of fakirs or street peddlers and the like, that, in case of glut, dispose of a large proportion of the cut flowers sent to the market. Many of these, however, are not listed in either city or Florists' Directory.

How many millions of dollars is the cut flower product of this country? Who knows? Do you? It might be answered that the census report for the year 1890 tells us the total cut flower sales then were \$14,175,328.01, figuring it down to a very fine point, surely.

But ten years later, according to the next census, as given us by Dr. B. T. Galloway in the Yearbook of Agriculture for 1899, and at the New York convention in 1900, the estimate was but \$12,500,000. Are those figures estimated on the same basis, representing, first, cost of the flowers, say, returned to the grower only, or does one represent the profits added of the wholesaler and retailer to the end. Ordinarily there is a wide discrepancy, in the very nature of the business, between what the grower gets in cold cash for his flowers and what the consumer pays in the final round-up. I will further say, from first to last—there is now an army of people engaged in making profit in selling flowers alone—that they will continue to increase as long as the country grows, and that there is money in it for those who keep abreast of the times. Every country and every city has its own ways of doing business, differing more or less from each other. It is so in the wholesale-flower trade. There is but one Covent Garden, coster and its cost, but one Paris flower market, but one New York and one Chicago.

THE WHOLESALER FLORIST'S BIRTH.

The wholesale florist is but a little more than a quarter of a century old, New York having the honor of starting about the year 1875. Boston and Chicago followed suit three years after, in 1878 or 1879. Farther back than a quarter of a century we have no good data to go by. It was ten years before the S. A. F., this now prosperous society, was organized. The first trade paper was established at the same time, and the American Florists' Directory came three years after that, in 1888. From this on we have some tangible records to go by as to the growth of each of the divisions of the florists' calling.

In the year 1899, or twelve years ago, New York was credited with fifteen wholesale florists, Boston with four, Chicago and Philadelphia with three each, Brooklyn, St. Louis, New York, New Jersey, Cincinnati and Milwaukee one each, a total of thirty-one firms. In 1896 the total had increased to half a hundred, while the present showing is eighty firms occupying bona fide stores, and excluding individual growers who have stands and sell their own flowers wholesale with others, or who rent the stores as co-operative bodies. In the last decade New York has doubled its number from fifteen to thirty, Chicago has risen from three to sixteen, Philadelphia to nine, Boston seems to have settled down to four; other cities like Denver, Detroit, Minneapolis, Buffalo, Cincinnati, Pittsburgh and Providence, all going through the early stages of established wholesale or co-operative stores.

The ratio of city population to wholesale flower stores is: in New York, one in 114,573; Chicago, 106,161; Boston, 112,-

172; St. Louis, 119,746. Baltimore, with its population of 508,957, gets along with one, and that co-operative. Pittsburg with 352,387 has one. Then comes Minneapolis, with 101,351, and Detroit, with 282,091, this, by the way, being co-operative also. The cities of Philadelphia and Baltimore have the credit of continuing in the old order of things later than any of the larger cities, in that a large part of the best growers are still selling direct by wagon and their own carrier. But there are signs of a change in Philadelphia, I understand, to a new order of things, either in the form of a market, or, perhaps, co-operative, or both.

EACH CITY'S STORY.

In what I will say on this, let it be understood, I claim no originality, hence expect no suits for plagiarism, as was the case of S. E. Gross, of my city, against the doughty French author of "Gyano." I am no millionaire and could not stand the title, so that if sundry persons in different parts of the country find what follows has a sort of familiar sound, it is explainable in my inability to clothe the information in better words than I received it. I make this acknowledgment in place of giving the names of my informants, so he that runs may read.

Greater New York, now Manhattan, the Empire City, then, let me begin with. As I before stated, the year 1875 seems to be settled on as the year when the actual wholesale commission man made his appearance in New York, or the country, but prior to that, one William Russell, of Jersey City, bought up large quantities of cut flowers from several growers, also receiving consignments from Connecticut, and held the stock for orders in Wilson's flower store, on Fourteenth street, selling directly to the retailer. A year or two later, Jas. Hart, still in the business, began to sell carnations for Gabriel Marc, of Woodside, L. I., on a 25 per cent commission, afterwards being employed by the largest rose growers in the vicinity to dispose of their stock in a similar manner, thus showing in an unmistakable manner the need of the middleman who was about to appear. As the next step, it seems, the late Jas. S. Allen started in, selling the flowers raised by his father, C. A. Allen, and those of Wm. C. Wilson and others, and who is considered to be the first man to reduce the cut flower commission business in New York city to a systematic basis.

In 1890 we find the following firms designated in the wholesale florist class as soliciting custom: J. K. Allen, 196 W. 24th street; W. S. Allen, 36 E. 23rd street; A. A. Copin, 11 W. 14th street, Copin Bros., 84th avenue and 35th street, Hammond & Hunter, 51 W. 30th street, Jas. Hart, 111 W. 39th street; Edw. C. Horan, 36 W. 29th street; John Muller, 113 W. 30th street; John B. Nugent, Jr., 53 W. 24th street; J. J. Perkins & Co., 43rd street and 6th avenue; Jas. Purdy, 109 W. 41st street; Theo. Robers, 153 W. 31st street; Ross & Millang, 1168 Broadway; W. F. Sheridan, 50 W. 30th street, and Thos. Young, Jr., 20 W. 24th street.

Of these names, both the Allens and Messrs. Copin, Hammond, Hart, Horan, Perkins, Purdy, Sheridan and Young are among the thirty firms still doing business on the same lines at the present day. In the early days, when old Bon Silene, or "Boston birds," were known from one end of the country to the other, a thousand roses in the market were more thought of than a hundred thousand now, and New York wholesale florists are supposed to turn over stock to the amount of between two and three million dollars, as against \$400,000 in 1867.

The center of New York city's wholesale flower trade to-day is between Twenty-seventh and Thirty-fourth streets, inclusive, between Broadway and Sixth and Eighth avenues. Of the thirty firms, eleven are now on Twenty-eighth street, eight on Thirtieth, four each on Twenty-sixth and Twenty-ninth, two now as high up as Thirty-fourth, and one as low as Twenty-seventh street, a wide distribution when compared with Chicago, with its concentrated wholesale center.

THE CO-OPERATIVE PLAN.

The wholesale florists' business of New York seems mainly done on the consignment or commission basis, and the regulation 15 per cent commission basis, except the co-operative Cut Flower Exchange that grew out of the restaurant

headquarters near the Thirty-fourth street ferry, where the growers' carriers congregated until the year 1892, when a corporation was formed and a building secured in the same locality, stands being rented at the rate of 65 cents per lineal foot to members, 75 cents to others. The average sales are near \$100,000, the sales over mostly by eight o'clock in the morning. There are 150 members of the exchange, fifty others who rent stands only, with a number of commission men who do business here in the early hours of the morning. These pay an entrance fee of \$15 each, besides the rental. The exchange has paid 10 per cent dividends on the investment.

In 1891 the New York Cut Flower Company was formed by a number of prominent growers selling their own product and some producers on commission, at the time of starting. This company was claimed at the time to represent a yearly output of \$750,000 worth of cut flowers, and were the first to grade roses as known now, into fancy, special, extra, No. 1 and No. 2, respectively. Both these co-operative concerns in May, this year, moved into the Coogan building, corner of Twenty-sixth street and Sixth avenue, and the memorable headquarters so long known, at the Thirty-fourth street ferry, is left to A. Herrmann and a few others of the Long Island growers, who still stick by the old stand.

CHICAGO STARTS AT WHOLESALING.

Chicago comes next to New York in the time of starting, and in the number of wholesale firms doing business. To J. C. Vaughan, the seedsman, must be given the credit in starting. It had its origin in some of Mr. Vaughan's customers sending in some boxes of flowers for him to try and sell. He, sending one of his young men to the retail stores, found it easy to do so. The news spread, other consignments came, and pretty soon O. W. Presc, his young man, was making regular daily visits, first with a basket, then, as supplies increased, with a horse and buggy, when regular rounds were made by this carrier all over the city. In short order it was found that these supplies were the very thing the retail stores were after, that the retailers would go to the store for them, and a wholesale flower department was added to his business. This was run very successfully until the year 1889, when the late E. H. Hunt bought it out and started on East Lake street. The business is still in existence, with a large supply department added.

In 1884 the Kennicott Brothers opened the first exclusively wholesale flower store, in a space eight feet square. This business grew apace, and in 1892 a stock company was formed, the name changed to Kennicott Brothers Company. The Plesers became interested, and the firm now has 7,000 feet of salesroom and is doing one of the largest wholesale commission businesses in the city, if not in the country.

Since Chicago's first start then, it, like its sister cities, has seen lots of changes in the men who essayed the way, as well as the method under which the business is now conducted. Some men and firms in the fourteen years have dropped by the wayside altogether, and some of the men once in the swim are now managers for others in the survival of the fittest. The wholesale district has now centered in and near the corner of Wabash avenue and Randolph street, the Atlas block having no less than eleven of the firms, all with large, fine stores for doing business. This is a great advantage in every way, for both seller and buyer.

Twelve years ago Chicago had four wholesale florists, C. H. Fisk, Kennicott Bros., E. H. Hunt and M. Olson; all there were up to December, 1891. There were noises in the air about this time, and outcries against the commission man by some growers, besides which, some of the latter day leviathans of the trade, noted in this city, seemed to want to handle their own flowers and money. It resulted in a stock company called the Chicago Florists' Exchange, which started and opened for business on Lake street, November 15, 1892. It lasted but two years, however, and had no success.

The number of wholesalers at the present day is somewhat smaller than a couple of years ago, but these survivors are stronger than ever and the business harder for new ones to break into. Only a part of the wholesalers are commission houses, pure and simple. They may

be divided thus: Bassett & Washburn, Peter Reinberg, George Reinberg, Wieter Bros. and Poehlmann Bros. are grower-dealers, selling their own monster output from at least 2,000,000 feet of glass. J. A. Budlong sells his own and several neighbors' stock. John Muno and Weiland & Risch operate on the same lines. Benthey & Company sell their own cut from New Castle, Indiana, and some on commission. Frank Garland sells mainly his own and the growth of three brothers, with but little on commission. E. C. Amling, E. H. Hunt, A. L. Randall, Kennicott Bros. Co. and McKellar & Winter-son are the only bona fide wholesale commission florists in the city.

There is another peculiarity worth noting in Chicago and the west. The fast-growing trade in all kinds of florists' supply goods is being handled almost exclusively through these commission houses. That, in eastern cities, we find entirely separate. The enormous amount of wire work still used in the west is almost exclusively made and sold by the wholesale florists. The amount of money turned over by Chicago wholesale florists in a year is probably near one and a half million dollars.

THE BOSTON STORY.

P. Welch, about the year 1879, first started, subsequently forming a partnership with his brothers, David and Edward, as Welch Brothers. Shortly after this the Waban Rose Conservatories opened an office in Boston for the sale of their own products and that of any other growers who might consign to them. W. J. Stewart, then a retail florist, disposed of this to take charge of the Waban Rose Conservatories' city business. After two years Mr. Stewart purchased this, continuing the same for about ten years, when he sold out to Peck & Sutherland, employes of his. Mr. Peck dying a year after, was succeeded by his partner, Geo. A. Sutherland. Prior to Mr. Stewart's retirement, another employe, N. J. McCarthy, started into business as N. J. McCarthy & Co., who, however, does not claim now to be a commission man. His usual method is to buy outright from growers, taking his chances of selling out at a profit, and he claims to make more money that way than he could on commission sales.

The Boston Flower Growers' Co-operative Association is composed of a number of growers, who, in old times, peddled their flowers from store to store, instead of through commission men. From congregating in a near-by saloon on Tremont street, like the Thirty-fourth street ferry case in New York, was evolved the housing of themselves in a sort of a market. They are now incorporated, grown considerably, pay good dividends, and are an established feature in the Boston trade.

AT PHILADELPHIA.

In 1878, W. E. Meehan started, and closed out in 1880. In 1881 Chas. E. Pennock started; he was succeeded in 1887 by Samuel S. Pennock, who still continues, and does the largest business in this line in the city. His cold storage is very complete and he does a very large shipping business. In 1885 Wm. J. Baker started, making a specialty of carnations, and now does a general business. In 1884 W. J. Stewart, of Boston, opened a branch store in Philadelphia, with N. J. McCarthy in charge, mostly used for exchange of stock between Philadelphia and Boston; in operation two and a half years. In 1886 La Roche & Stahl started a wholesale branch, confined to a few growers; in 1890 succeeded by Chas. B. Stahl, still in business. In 1889 Fred Ehret opened a store in the up-town district, and is still in the business. In 1892 J. De Forest Ely, seedsman, opened a wholesale cut flower department, lasted two years, managed by Edward Reid, who afterward started for himself and still continues. In later years Dumont & Co., Leo Niessen (formerly with S. S. Pennock) and W. J. Moore started in the business. None handle supplies; a few handle plants on commission at the holidays. There is no flower market, and around this city all the large growers still sell their own product direct to the retailers, so that the commission man gets very few near-by growers.

AT CINCINNATI, OHIO.

More than fifty years ago Cincinnati had the proud distinction of being the Queen City of the West, in the gardening line as well as others. It had its horticultural journal, a very vigorous horticultural society, a good horticultural library and fine flower shows for the time.

It also had some first class nurseryman florists, who did the bulk of the trade in plants and flowers west of the Alleghenies. If Chicago and other smaller cities of the time had a call for fancy floral work, Cincinnati supplied them, as did New York east of the slope.

As time will not allow me to give a general history, I come at once to the wholesale cut flower business, past and present. The first to make the venture was one Frank Church, a well-known figure now in Chicago, who started in 1887, but the business had a short life. In 1887, M. J. McCullough & Sons telegraphed E. G. Gillett, then in Springfield, Ohio, to come on and take charge of a wholesale cut flower department the firm had opened on a very small scale. At first the only consignor was McFadden, then the largest grower in the city. Afterwards the cuts from C. C. Mitchell and others were added. A few months after this the late H. L. Sunderbruch opened to sell cut flowers at wholesale. At his death the business was sold to Albert, a brother, William Mann and Frank Ball, who ran it for about a year, when a stock company was formed under the name of the Cincinnati Cut Flower Co., which still does a good business on a regular commission basis from consignors from Ohio and nearby states. E. G. Gillett continued manager for McCullough for five years, but in September, 1896, started for himself in a small room at 113 East Third street. The business has greatly increased, requiring more and more space, with a good outlook for its continuance.

Mr. Gillette is one of the trustees of the Jabez Elliott Flower Market, the only building of its kind in the United States, exclusively used for the sale of plants and flowers. The market is considered a benefit to the trade and does no injury to the retail store business, as those having stands mostly cater to a different class of customers, who, market-like, carry away their purchases, and as a general thing, of a cheaper grade than is handled by the regular retail store men.

ST. LOUIS ENTERS THE LIST.

In November, 1889, John M. Hudson opened the first wholesale cut flower store in St. Louis. Two years after he sold to Andrew Brandenburg, who in six months sold to S. Mount & Co., the "company" being Geo. Osterberg, who moved the store to 109 West Twelfth street.

In 1890 Wm. Ellison and C. A. Kuehn started up at 1122 Pine street, opening a general supply store for florists. In three years they separated. C. A. Kuehn continues at the old stand, doing a fine business. Wm. Ellison opened in 1893, S. Mount & Co. sold out to Fleckenstein & Co., who opened up at 1325 Pine street, handling cut flowers exclusively. A year after W. C. Wors opened at 2728 Olive street, to supply the West End florists. In 1894 E. H. Michel opened what was known as the St. Louis Cut Flower Co., at 1620 Olive street. The same year Wm. Ellison gave up, two years after W. C. Wors, leaving the three. Then the Fleckenstein Company sold out to the Mound City folks, composed of Albert Bauer and the Fleckenstein Brothers. W. G. Berning bought the St. Louis Cut Flower Co., handling a limited amount of supplies. There is at the present time in St. Louis C. A. Kuehn, who carries a complete line of supplies and makes all the wire work for florists in the city. H. G. Berning is also in a large way, with six regular hands. S. M. Ellis handles a limited quantity of supplies, but is noted for good shippers of flowers.

No co-operative stores have ever been tried in St. Louis. Most of the shipments coming to St. Louis come from Illinois, Indiana, Ohio and Iowa, as well as Missouri.

MILWAUKEE, WIS.

The inception of the wholesale business in Milwaukee was in 1878 and took the form of an exchange with C. B. Whittall as president. It was incorporated in 1889, under the name of The Wisconsin Cut Flower Exchange. The stockholders were not confined to home men and it was considered advisable to include the purchase of bulbs, seeds, putty, paints, etc., for the reason it was desired to spread over considerable territory. But it drifted into the ordinary commission business in flowers and florists' sundries, in stock for sale. Mr. Whittall says "the consignors soon got to be specialists, and there has been a steady division going on for years, until now the florist is not a grower and the grower not a florist, and the commission house is paid 15 per cent

A DINNER DECORATION BY WALTER KREITLING & CO., OHIOAGO.

for taking the 'kicks' of both." The Exchange flourished for a while, became insolvent and in 1897 was sold out to Holton & Hunkel, at the old stand, 457 Milwaukee street, where they are still doing a good commission business. This firm the present year have bought out C. B. Whitnall's greenhouse business, who is retiring, so like other western houses, the firm will join the growing brigade of grower dealers.

In 1896 Ellis and Pollworth, both old employes of the Exchange, formed a company under the firm name of Ellis & Pollworth and opened a commission house, including supplies, at 137 Oneida avenue, where it continues to the present time. Three years after its start, C. C. Pollworth bought out his partner's interest, ran a short time under his own name, finally branching largely into greenhouses in an up-to-date condition of things, and incorporated, thus forming another of the grower-dealers in the wholesale class. Milwaukee wholesalers have always depended largely on consignments from other states.

BALTIMORE, MD.

The city of Baltimore, although one of the old ones, has no wholesale florists, and is at present looked after in this line by the Florists' Exchange, which is cooperative for mutual benefits. No mem-

ber can hold more than three shares, entitling the holder to one vote. It was established in 1892, has about forty growers and does a business of from \$37,000 to \$40,000 a year. A large part of the flowers grown in and about Baltimore are yet delivered to retailers in the old style.

Two efforts have been made to start commission stores, but they could not find business enough to exist.

DETROIT, MICH.

This city did not enter the list of wholesale florists until the first year of the twentieth century, when the Michigan Cut Flower Exchange came into existence under the management of Wm. Dilger, but owned by John Breitmeyer's Sons as a wholesale depot for the sale of their own stock and consignments from outside sources.

The Retailing of Flowers.

BY GEORGE WILLIAM WIENHOEBER, CHICAGO.

(Read before the Society of American Florists at the Asheville convention, August 19 22 1902.)

Early this spring I went to Milwaukee to see what our close relatives, the nurserymen, were doing at their convention. I learned much and looked wise, but there was one incident which made me feel a little uneasy. One of the older and

more successful looking men leisurely got up to address the assembly, in which time my close friend, Mr. Sanders, had time to whisper to me: "Very droll old-timer; listen." And I did. He began with an allegory, made classical allusions and I pricked up my ears not to miss anything so good, for it really was. Suddenly and without warning, and I believe he was looking directly at me, he said: "Gentlemen, the worst enemy that the nurseryman has to contend with, is the young 'bugger.' The entomologist, bugologist, 'bugger,' if you please. His alarms are enervating and we stand aghast as we read of the new insect pests which he has discovered and describes at length in the journals, and which are about to ruin us. We study the matter over and what we discover is the codlin moth or woolly aphis, which you and I have successfully combated this past score of years. But," he continued, "once in a while this young 'bugger' does find a new spot on the butterfly's wing and of course he helps some."

I am not a "bugger" before "bugologists," but a newly initiated member in the Society of American Florists, and, although my position comes dangerously near to that of the young "bugger," I still have courage to say what is to follow, and if I err in the minds of those

of experience please remember the proverbial grain of salt.

Mr. Sanders has said much in his paper on marketing of flowers at wholesale and now that we are about to consider the marketing of flowers at retail the first thought that occurs to us is what a vast difference there is between the grower of flowers and the one who finally prepares them for the reception table. The one is close to nature, practical and scientific, and the other unfortunately, in many cases, is a specialist in decorating with flowers. To market flowers to him means the catching of people's fancies and stimulating them to buy what he has to sell.

The retail florist deals with people who not alone are demanding fresh and beautiful flowers, but also a "service" which will bring to them the flowers in the most attractive manner. The wholesaler knows nothing about "service" in the retail sense, but to the retailer it is part of his stock in trade, good will of the business, and it is the factor, the quality of flowers being equal, which gives him rank in the estimation of flower lovers.

To some "service" means style; to others, courteous business relations with patrons, or artistic taste, when in fact it includes these and every other feature in the retail trade outside of the paying of dollars for stock and the receiving of dollars in return. It is the essential feature in the marketing of flowers at retail and grows out of the sentiment which the retailer has or must acquire.

With florists it is especially true that prices are seemingly arbitrary, since they vary with a hundred conditions and then not simultaneously throughout the trade in all cases. If the prices, then, are not a fixed standard of comparison, what is left but the "service" to determine whether we are a more desirable firm to deal with than our competitor, whose prices are equally fluctuating. The retailer must find a market for his flowers, not alone by selling the best flower at acceptable prices, but he must increase it by winning his patrons' good will and confidence, and by a disposition which is generous and leans to the beautiful.

In considering the leading retail florists of the country, we have this generous way of doing business exemplified. They realize the necessity of education in every direction possible, for how are they going to sympathize with a patron's wishes or tastes if they have but one point of view, the business man's. Furthermore the florist is expected to be original and not a copyist, and how can he be so if he does not learn to study the beautiful in all he sees, thereby cultivating his taste and imagination.

Let him become interested in the styles of architecture of country homes that he may make himself interesting to his client who wishes to have a border of herbaceous perennials planted so that they may be seen from the loggia on the east side of the house. Let him cultivate a taste for colors by strolling through the art galleries occasionally, where suggestions for color, design, and it is not stretching the point to say that a technique in the handling of flowers may be learned. The florist has read in the papers recently that at King Edward's coronation the programmes were so designed in color that when the thousands of people in the observation stands used them they unconsciously became a scheme in the grandly planned decorations. Again, he has eagerly looked over the last number of "Country Life in America," and that article in a spring number of "Atlantic Monthly" on Rhododendrons, did not escape him.

But you are thinking that I have gotten off from my subject of the marketing of flowers, and I assure you that I have not. Every time that you get a new impetus of thought from the many subjects which stir the imagination you begin to work with renewed interest. These thoughts are the heaven which lighten the sogginess of a purely business life. It assists you personally, and what is a tradesman who does not make himself felt in what he sells or who does not arouse admiration in those with whom he comes in contact. An Italian inscription on a sun dial in a garden which I saw in France, translated, read thus: "Life is short, art is long." How easily this can be remembered, and what a consolation it is.

The florists of to-day and those of tomorrow will widen their horizons if they

wish to anticipate their customers' wishes. Those who wait until customers force ideas onto them will soon find themselves forsaken as dead weight. Florists must be initiative and not content to follow. And in what field could a man find a better chance to derive pleasure and enjoyment than in the florist business? He has business relations with people of most cultivated tastes and they are willing to award his good taste with generous support and appreciation if he is deserving. In many cases they make the business almost ideal by waiving money considerations entirely. Florists should be associated with all that is beautiful, and what a pleasure it is to establish a business which will not mar this illusion.

Essentially, the retailer of flowers is the one who distributes them for final use. He is the fakir surrounded by his dense masses of flowers which brighten the streets in spring, or he is the established florist of undisputed reputation whose establishment we have known for the past twenty years. Both do a legitimate business; both sell commodities, have receipts and expenditures and both have profits. They are the extremes of a trade which disposes of vast quantities of flowers daily. How interesting these extremes are, and what a vast number of enterprises rank between them.

I have said that the fakir does a legitimate business, but why, then, are city ordinances passed periodically to prevent him from hawking his wares? It is because these ordinances do not reflect the true fakir question. These ordinances state under what conditions flowers may be sold, but in no case do they touch the essential point, that of selling flowers at prices which the florists believe are damagingly low. After the fakir has complied with the city ordinance, he is governed by the same business principles as is any other tradesman and he should be allowed in trade competition unmolested. The store man sees him and he ought to reason philosophically this way:

Is it possible that florists should have ever considered this poor fellow seriously in their business competitions by their trying to interfere with his earning a livelihood? Is it possible that we envy him a cent of what he has earned by his persistent efforts of halting every passer-by with a bunch of flowers? Think of it! He makes many persons happy in a small way and he is able to gratify many wishes with his flowers for a penny.

We florists are not always generous. The very fact that the fakir disposes of enormous quantities of flowers is proof of his standing in the community. On a Saturday afternoon what a pleasure it is to see the streets voluntarily decorated with bright flowers, which make us forget that we are rushing along and know not why. For a moment we think of the Cafe de la Paix, in Paris, where we buy nose-gays from the flower girls, and straightaway our appetite is better. Be generous with the fakir, for he never was your competitor, and, although alarmist florists talk of overproduction of flowers, due to the fakir trade, do not believe that that is significant, because every time that a trade exigency arises business relations soon solve the problem.

At the other extreme is the distributor of flowers who is successful, up-to-date and progressive—the retail florist. His prices are an afterthought, and his aim is to cultivate business integrity and to keep the best flowers only, which he presents attractively. As a business man he instills courtesy into his assistants and he is generous in all his dealings. His transactions are principally with women, and he learns that to count pennies is poor economy. In case of mistakes, he makes every endeavor to correct them. If in any way he has been at fault or his customer thinks that he has, he graciously makes amends.

Nor is he hereby humbling himself, but on the contrary he is liberal. We inspire in others the sentiments which we ourselves feel, or, in other words, your customer won't be liberal if you are short-sighted, obstinate and ungenerous. Consider each customer's patronage as capital invested, which annually pays you interest, and you will guard this customer's wishes just as jealously as a cash investment. The florist is always willing to please, no matter how exclusive his position is, for he is not in business this year alone, but for many more to come.

The practical handling of flowers for

retail distribution has its many points for consideration. The keeping of stock is governed by local conditions. Flowers may be put aside from which orders are filled, or they may at the same time become part of a display in a window or refrigerator. At all events they must receive the very best of care, although often in the commission house, they have received more injury than you can repair. In establishments where the trade comes largely from regular customers, it is well to get them accustomed to order their flowers in advance, where it is possible. This will enable you to put their orders aside or you can fill them directly from the stock as it comes in, thus obviating unnecessary handling. This class of trade is very desirable, for its demands may be calculated quite definitely, and the handling of expensive flowers ceases to be a source of speculation.

The delivering of flowers is as important as is the selling in the first place. If you send a special messenger, let him be intelligent and neat. Attire him as trade demands and have him reflect the character of your business until the florists are finally at their destination. Florists' delivery wagons should be made attractive by their excellence in design and workmanship and not flashy, so as to suggest vulgarity. Have good horses and plain harnesses.

Think of the beauty of the flowers which you are sending and the people who are to receive them and the wagons which might be advertised, used to advertise chewing gum, will seem cheap and tawdry. People on receiving flowers should feel that they are truly beautiful, so don't put the flowers to shame with rocco surroundings.

The presentation and arrangement of flowers at retail is an art in itself and the florist who does not employ the best talent possible will soon discover his error. People entering the florist's store expect to be refreshed and enthused, for the few minutes that they are in it, by the artistic display of flowers and plants. They expect to see the surroundings executed in the best taste possible.

The decorations must be artistic and the furniture and wares must be of good design and color. All details will be noticed, even the stationery on the writing table. Your appointments should not be costly and elegant, but well chosen and good. People of to-day do not want extravagantly elaborated stores but want to go to a florist "shop." To them a shop is a place where the business is purely a specialty in its line, in distinction from the department store, and the shop's chief advertisement is good taste and originality.

In such a place people feel that their orders are receiving personal care and they like to become acquainted with the clerks and the proprietor so that they may confidentially tell them how they may improve the business in this or that way. The shop accordingly becomes rather a small place to our notion, but as the underlying ideas are so good let each customer think of it in this way and try to win their confidences. These people travel much, see much and their ideas may, in many cases, be of real value to you. But there are other branches in the business which you must impress upon them in a professional way. As a decorator your work has a professional merit, and in gaining a reputation for laying out city gardens and courts you become an Ornamental Horticulturist.

Make others feel the enthusiasm which you have in your business, and especially those who work for you. Make them feel some of your energy, so that they will feel that they are associated with a progressive house. Your men should also have ideas, so that your daily criticism won't be necessary. Give your reliable men an interest in the business, as most business houses to-day do. People will soon notice this spirit, which is characteristic of your business, and in their interest will tell others that roses coming from your place "are so much fresher than those from" elsewhere. They will not challenge the way you do things as regards correctness. Let them feel that you are unrivaled and don't let any suspicions arise to the contrary.

Consistency is another factor in presenting your flowers. Fix a standard for your business and then live up to it, not in one branch alone but throughout, so

that your reliability won't be doubted in any part of your work. An expensively engraved bill head sent out from your office will not offset a package carelessly put up. It were better to have less elaborate engraving and a better shipping clerk. Don't astonish people with extremes of lavishness or of thrift.

Just a word about advertising before I conclude. As a member of the widespread commercial system in the United States in this year of our Lord, 1902, I am forced to say, advertise. But first take an invoice of your wares, facilities, experience and ideas, and what remains of these as salable commodities advertise before the community. Be honest and advertise only such things which you really have. Study all the text books on psychology for ways in which you can impress the human mind, but first have something and then tell about it honestly.

The florist should avoid broadcast advertising. Don't destroy the sweeter associations with which flowers are generally sent by undue publicity. There are so many ways of getting up winning advertisements that it is unfortunate that any of the commoner ways should be used. The florist has a dignified business, so let his advertising appear accordingly. Many mistake eccentricity and bizarreness for originality and that which is artistic.

The mailing list should rather be small than large. Each person on the list should feel that he is personally in touch with the business and not one of ten thousand. You make him feel this by sending such matter only as is carefully gotten up. By having a small list, you can afford to raise the standard of your advertising, your paper is better and your engravings used are the best and are faultlessly printed. The best is good enough. If your competitor gets out a calendar lithographed in fourteen colors, don't send out one in sixteen colors, but improve on his "ad" by distributing something more original. Have you ever thought how hackneyed the custom of sending calendars on the first of January has become?

In the business with which I am associated, I have tried to make the advertising feature seem as an undercurrent not to be felt at once, but gradually. First of all our building, which is devoted entirely to the business, is rather quaint in design and built of an English brick. Golden arbor vitae in the window boxes in winter and dwarfed begonias and ivies in summer help to give it a distinctive air. Signs have been avoided and commercial earmarks are scarcely to be seen. The store is treated in a colonial tone, and the show rooms for pottery and other wares are in Flemish oak and are treated vigorously. In the photographic studio, photographs of creditable work and those for illustrative purposes are made. From the photographs and from original sketches printing plates are made for folders and attractive sheets, which are printed in our print shop. By doing our own printing we are able to carry out the feeling which we are trying to establish in other branches of the business. We are not endeavoring to be aggressive in our advertising but are employing such means which will have a stimulating effect, so to speak.

To close, I wish to say that although I have taken liberties with the subject for discussion, I have had but one point in view, and that is the broadness of the retail florists' field. The details are only added to carry out certain lines of thought, I argue that the florist's market grows in proportion as his horizon of ideas and ambitions enlarges. So if by any means his imagination is brightened, his ideas increased, or his executive ability is strengthened, the market will take care of itself. Practical details I have purposely avoided.

Needs of the Northern Florists.

BY FRED. B. MATHISON, WALTHAM, MASS.

[Read before the Society of American Florists at the Asheville convention, August 19-22, 1902.]

A year ago the Society of American Florists was cordially invited to meet in convention in the "Land of the Sky." As an inducement we were told the angels would be near to us. We see them now. We feel very much at home in their presence, knowing them to be loyal friends of the society, who at all times are endeavoring to do something for the

beautiful, yes, for the angels and for the advancement of horticulture and floriculture in every state, town and hamlet in the Union. The society feels confident of the hearty co-operation of its members in the south and the ladies and gentlemen present.

The subject allotted to me by the executive committee relates to some of the wants of the north, east and west, in the line of plants, trees, shrubs, vines, bulbs, tuberous, stocks for budding, grafting, etc., by the commercial florist, the landscape architect, the park and cemetery superintendents, the private and the jobbing gardener. Their wants and requirements to successfully carry on their various lines of horticulture are varied and many. The usual way of supplying these wants is by importing from foreign countries, European countries in particu-

JAMES H. MITCHELL.

lar, at great cost and much risk, and frequently with unsatisfactory results in general.

Without going into details, the imports into the United States of plants, trees and bulbs, and other horticultural products, seeds not included, from January, 1901, to May, 1902, reached in round numbers to the value of \$1,500,000. I am informed by a gentleman who is in a position to know that the imports in horticultural goods would average over \$1,000,000 a year for the past four years, with imports on the increase, but the exports were less than \$100,000 per year.

Now, my friends of the south, is it necessary that the florists of the United States should continue to pay out so much money for imports and receive so little for exports? With this great country at our feet, it has been said that about everything we import can be produced between Virginia and Texas.

Without going into items, some of the principal imports are azaleas, bay trees, spiraeas, rhododendrons, trees and shrubbery. These heavy and bulky goods cost about 50 per cent freight and customs duties alone. Hybrid roses in great quantities, Manetti stocks by the million, palms in variety, lily of the valley pips by the million, bulbs and tuberous are imported in unlimited quantities at an advance on their original cost of not less than 50 per cent for freights and customs duties.

I do not know of any good reason why this country should not become a great exporter, horticulturally, as well as a large importer. A free interchange of merchandise is the very life of our business. The government at Washington is doing a good work on the right lines by organizing the Bureau of Plant Industry. Already good results have been secured by following the policy laid down thus, and important plant problems are being studied.

A foreign visitor to Massachusetts, who

is connected with the Royal Netherlands Nurseries, Hillegom, Holland, an authority on tulips, says twenty-five of his countrymen connected with the bulb exporting business are about to visit the United States in connection with that industry. He is reported as saying that Holland annually sends to this country \$1,000,000 worth of bulbs, from which the United States gets \$250,000 in duties. I think the above goes to show that the gentleman from Holland thinks favorably of some part of this country for the growing of bulbs.

A clipping from a Dutch correspondent to the Horticultural Trade Journal says: "Seldom, if ever, has the month of May kept us in such a continuous wintry temperature as this year, and bulb crops are very likely to show the results. This refers more especially to tulips, which must have their principal growth in the month of May. Hyacinths have not suffered quite so much; their growth is made later. It will greatly depend upon the weather we get in June if we get a fairly good crop." I think the gentlemen from Holland have some good reasons for looking up new and more favorable locations where climatic conditions play such an important part in the bulb industry.

What is the south doing on these lines? What are the prospects for American grown bulbs? Mr. Beuchi, Buffalo, has for several years successfully grown white-Romans. His stock of 10,000 were equal in all respects to the French bulbs delivered in 1901 and will force fully as well as the French stock. They can be produced in this country at less cost than the imported ones. He grows them in muck land, and the richer he makes it the better.

State Vice-president Lillenthal, of the S. A. F., San Francisco, is in receipt of a communication from the Department of Agriculture in Washington containing a valuable amount of information relative to the bulb industry which he is anxious to see introduced into California. Owing to its climatic advantages as a bulb producing section, Secretary Wilson, Department of Agriculture, announces his active sympathy with the horticulturists of California in their efforts to enter this profitable field of commercial gardening.

There are other states in the Union that can justly claim genial temperatures and congenial soils, that can produce almost anything from peanuts to a full-grown, stately pine. The state of North Carolina is one of the oldest of the colonies and one of the original thirteen states, but her history horticulturally is not so generally known as some of the other states. Still it is said to be the greatest botanical state in the Union. On her soil was the first settlement in the United States, on it the first white child of English parentage was born, and the white people of this state probably represent to-day the purest type of American citizens in the Union.

But it is not the history of the state I will speak of, but some of the resources of the state and the south in general, as they exist in the present, and the great possibilities for future development horticulturally.

No other one thing contributes so much to satisfactory results in horticulture as a favorable climate, which this state has. There are none of the extremes of heat and cold, nor in rainfall or drought. The geographical position and topographical features of North Carolina afford a variety of soil and climate hardly to be found elsewhere within the same range of territory. This variety of soil and climate makes it one of the richest in the American Union. There is no section of the state in which some variety of fruit, vegetables or flowers cannot be grown profitably, strawberries, peaches and apples, not forgetting the peanuts, for not less than 100,000 acres were planted in the year 1900, with a production of about 4,000,000 bushels. Another profitable field is the production of plants and bulbs. While this industry has received but little attention, whenever experiments have been made very satisfactory results have been shown. The above are a few extracts from the Congressional Record by Mr. Small, of North Carolina, June 28, 1902.

It is generally understood by gentlemen in active business, and well versed in everything pertaining to horticulture, that a great many plants, trees, shrubs, bulbs and things too numerous to mention here can be grown on the American

continent that are at the present time being imported from foreign countries at great cost and much risk, with satisfactory results in many instances.

I do not pretend to tell the florists and nurserymen of the south what to grow, or what not to grow, for I am not well enough acquainted with the conditions and conveniences to give such advice in any particular state or locality, but I do know some of the wants and needs of the east and west in the line of horticultural products.

This state is making rapid progress in some lines, notably in raising fruit. In 1890 there were in the state in round numbers 1,250,000 apple trees, in 1900, 6,500,000. Peaches increased in the same time thirty per cent. Plums, prunes and pears increased more than threefold in ten years. The value of manufactured tobacco in 1890 was \$4,750,000. In 1899 7,000 acres were devoted to small fruits alone. There were 5,600 acres of strawberries; the total yield for 1899 was 10,500,000 quarts. This business was started only twenty-seven years ago and is increasing rapidly.

Large areas of this section of the state are within a belt where frost is seldom seen, but the horticultural establishments are not keeping the pace set by market gardeners. By the census statistics for June, 1900, only fifteen establishments are given with ninety acres of improved land. Value of land, buildings and implements, only \$27,000; value of the products, \$25,000; expended for labor, \$4,000. This is a small showing for such a large and fertile state.

It is earnestly hoped, and it is confidently predicted, that the gathering of the S. A. F. in the south will be of inestimable value, not only to the south in general, but to the horticultural world at large. It is up to the florists and nurserymen of the state of North Carolina in particular, and to the south in general, to take advantage of the present opportunity by putting their shoulders to the wheel and proving to the florists of America and to the world what they can do, and will do, for the advancement of the noblest and grandest work, horticulture.

It has been proven that this state can grow tuberose to perfection. The choicest kind of dahlias will increase threefold faster here than in any other known place. Lily of the valley is indigenous to the state. No doubt but that it can be successfully grown and be much better ripened than that which comes from Europe. The demand for first-class pips the past five years has been enormous. A gentleman, an acknowledged authority, says all kinds of tulips, narcissi, freesias, tuberose and the general collection of Holland bulbs can be grown in this state successfully for commercial uses. Rhododendrons are native here, and they luxuriate in the ravines and dells of the mountains.

The foundation is right here with water in unlimited quantities, and it seems as though the grandest collection the world ever saw could be raised here, but we still keep on importing at high cost, with sixty per cent added freight and customs duties, with a shortage at the present time in Europe. Millions of Manetti are imported yearly at a cost of not less than \$12 per thousand on the average, to the consumer. They can be grown and are, to a limited extent, in South Carolina, and are as easy to grow as watermelons.

Again, we are buying from Holland large quantities of H. P. budded roses anywhere from three to eight inches from the ground, taken from wet land in an unripened condition, not even losing their foliage in some cases, before being packed for shipment. They lay around the vicinity of New York till spring, are then sent broadcast to auction rooms, department stores, and other places to be distributed to the public, usually with such unsatisfactory results as to be a positive injury to this branch of the business.

In numerous instances clematis and other vines, Indian and Ghent azaleas, and a general collection of shrubbery are kept in storage so long that they are practically useless for ornamental or any other planting, and a sure disappointment to the last purchaser. Ordinary kinds of shrubs and the native evergreens in suitable sizes for immediate planting were not easily found two or three years ago. Red oaks and pin oak could not be found in the eastern part of the country to plant a boulevard in Massachusetts, and

this is the kind of hard-wooded trees, North Carolina.

Low budded H. P. roses can and are grown in South Carolina. Samples sent to Massachusetts last winter were all right, nice plants well ripened, and forced for Easter satisfactorily to those concerned. A consignment of Crimson Rambles from the same state arrived in Massachusetts in the pink of condition, wood well ripened, clear out to the joints; the best forcing plants we had for the spring of 1902.

The lilies are another class of bulbs we have been importing of late years at heavy cost and little profit, with little prospect of getting anything better. The Bermudas are unreliable. The Japanese are decidedly worse this year. From press reports the outlook in Japan is very discouraging. One grower in my section forced about 60,000 bulbs for last Easter with over 100 per cent loss by disease partly, and apparently by no care being given to selection. The Department of Agriculture at Washington has been carefully looking into the matter and says some of the causes are indiscriminate propagation and in a great measure lifting out of the ground before they are ripe.

Here is an opportunity for the bulb grower of the south. Now what will the florists and nurserymen of the south do? The S. A. F. is here to talk and advise with you on many important matters in regard to this great and growing industry. We here and we feel confident that a new impetus will be given to the business with the south. We want to receive your bills of lading and some of the products of this vast territory at our feet, the sunny south. We hope for more and closer business relations with our friends and co-laborers from the great south. Let progress be the watchword in horticulture and horticulture in every branch.

I believe most firmly in the future greatness of American horticulture. Our markets are unlimited. I see no reason why we cannot become a nation of exporters as well as importers, and compete with Europe and Japan. In the past five years horticulture has advanced more rapidly in the United States than at any period in history and is exciting the admiration and wonder of the horticultural world. In round numbers June 1, 1901, the number of florist establishments in the United States was more than 6,000 with 43,000 acres of improved land. The value of land, buildings, and implements was \$25,000,000; value of the product about \$18,500,000. At the same date the number of nurseries, was 750, with 52,000 acres of land, value of land and buildings, \$8,000,000. The value of florists' and nurserymen's establishments combined, was \$61,000,000; value of product combined, \$12,000,000. The imports of seeds for the first five months of 1902 were valued at \$1,639,139; the exports to the same date were \$1,695,250. So the florists, nurserymen and seed growers in America are importing more than is exported in the same line of goods. This is not as it should be.

Bulb Culture in North Carolina.

BY W. F. MASSEY, RALEIGH, N. C.

[Presented to the Society of American Florists at the Asheville convention, August 19-22, 1902.]

As is well known, eastern North Carolina, along the Coast Line railroad, has for a number of years been the source of supply for tuberose bulbs in this country. The culture of these bulbs was for years quite a profitable one, and the work is still carried on, though with a decreased demand and lower prices.

A few years ago, as part of my work as horticulturist at the North Carolina Agricultural Experiment Station, I began to experiment with other bulbs in the hope of extending the bulb industry and adding something of a more profitable character, and capable of greater extension than the culture of the tuberose alone. Knowing the immense quantities of Roman hyacinths and candidum lilies imported from France and elsewhere, and the large amount of importation of the Bermuda lily and sundry of the narcissus family, I began work mainly with these. I wish, however, to state that whatever of success I have had in these experiments has been due to the liberality of the trade, and especially the house of Peter Henderson & Co., in furnishing me

with stock for the work, since not a cent has been appropriated by the North Carolina station for the work, and the sales, though small, have always paid the labor bill.

I have also been handicapped by the fact that all my work has been on a soil poorly adapted to the cultivation of these bulbs. Our hilly clay soil about Raleigh dries out with greater rapidity during the summer than any soil of a clayey nature I have ever seen, and the long periods of drought to which we are subjected makes the culture of bulbs a very uncertain matter. Hence one of the chief facts I have ascertained is that the section about Raleigh and all that known as the lower Piedmont country, east of the Occaneechee hills, furnishes few, if any places for the successful cultivation of bulbs, with the exception of the narcissi and the Italian hyacinth, though in the moist and fertile bottom lands the candidum lily will make fine bulbs.

In my first experiments at the North Carolina station I was furnished with quite a lot of candidum lilies and when these were returned to New York they were pronounced the finest bulbs ever sent there. Since then I have been endeavoring, with poor success, to get up a stock of the candidum lily. Soil, or method, or both, have been against me, for I find it hard to increase them with any rapidity.

My first experiments with the Bermuda lily were very badly handicapped by the presence of the disease prevalent in the island, and I have been mainly engaged in getting rid of that. I have now succeeded in clearing my stock of this disease, and had none this year, though the crop is a failure by reason of the drought and the great heat. This will be shown by the size of the bulbs I have brought for exhibition, which are here to illustrate a failure, and not a success. Still I am not discouraged about the future of the Bermuda lily in North Carolina, except in the section where I have been working, in which I am sure they will never be a success. That the climate is not unfavorable was shown a few years ago.

I received in December a large number of bulbs of this lily, which were left over the season's sales. They had started in the cases and had long white shoots on every bulb. Of course, in planting them at that season of the year I had to plant them deep enough to cover these stems. They lived and grew and so far as the tops were concerned they looked extremely well until ripening time. When lifted, I found that the original bulbs had not increased in size, if they had not really decreased, and above the bulbs were long rows of offsets which the plants had been mainly engaged in making.

At this time I had gotten possession of far better soil on my private grounds, and I moved the lily and other bulb work on to my own grounds and abandoned it at the station farm, which was manifestly too poor and stiff for the work. With soil of fine fertility I hoped for better results. But here again I have been met with the ever-recurring drought, and have finally come to the conclusion that the Bermuda lily, while destined to become a success in North Carolina, must be grown in the same section where the tuberose are grown. We have in this section black, peaty soils that can be well drained, and in many places are well drained and planted in large fields of strawberries, which will make ideal soils for the lily, being in the mild winter climate, and a soil perennially moist.

Some years ago the Department of Agriculture in Washington became interested in the Bermuda lily culture, and the secretary asked me to experiment with bulbs sent me from the department. I replied that I probably had already more stock than the department had, but that I thought it would be well to try an experiment in the soils I have indicated in the eastern coast plain. I cautioned them, however, not to have the bulbs planted until November, so as to avoid an untimely growth, though I had had them five here all winter with green tops. I named a man to make the experiment and one of the men from the department came down to show him how to plant. The bulbs were set the first of October and at once mulched with pine leaves. The result was a lot of blanched white stems, under the mulch, before cold weather set in, and destruction later.

JOSEPH TAILBY'S NEW YELLOW CALLA.

(Richardia Elliottiana R. albo-maculata.)

Had the bulbs been planted later, and without this mulch, this tender and timely growth would not have taken place. Our soil never freezes deep enough to injure the lilies if allowed to be in natural condition, and mulch is always fatal. I am sending bulbs to Florida this fall for planting, to a gentleman who even there lost his under similar conditions. I have grown even at Raleigh better Harriah lily bulbs than those I have shown here to-day, these being, as I have said, an exhibit of a failure. Still one learns, even by failure and, in fact, often more than by success.

I have found that while the lily does not tolerate animal manures in contact with the bulbs, the commercial fertilizers can be used as heavily as in the growing of the onion crop, and the same may be said of all the other bulbs, except that the narcissi do not object to well rotted manure, and the hyacinths like it about as well as fertilizers. Finally, on the lily, there is not in my mind the slightest doubt that candidum can be grown here to as great perfection as anywhere, and that on the moist, peaty soils of the eastern section the Harriah and the longiflorum can be grown to as great perfection as elsewhere, and the first who invest in it will be able to establish a remunerative business with these and other bulbs.

All the narcissus family thrive in North Carolina to perfection. The polyanthus and Tazetta section are not tender here when planted at the right time. When

set too early these grow at once, and the tops are subjected afterwards to our coldest weather and will be cut down. Planted in November or December they grow with the advancing springtime and do well.

Several years ago I remarked to a New York dealer that we could grow the Chinese sacred lily as well as the imported ones. "But," said he, "they will not bloom in water like the Chinese, for we had some grown in Bermuda that would not do so. The Chinese seem to have some secret art about it." I did not agree with this statement and asked him to let me have a few Chinese bulbs to take home and test alongside of mine. I placed the Chinese bulbs and mine in water the same day and set them in the greenhouse. Mine were in full bloom before the Chinese had opened a flower, and I sent a photo of the two to New York. Still, at the price these bulbs are imported, I am not sure that there would be much profit in trying to compete with the Chinaman.

The double Von Sion narcissus, which when first received from abroad some years ago made nothing but greenish abortions of flowers, has gradually been improving, till now in the open ground, the blooms are nearly clear from the green and under glass are perfect. The Paper White narcissus, as will be seen from the bulbs shown by me, does exceedingly well here, and this, with all the others of the narcissus family, will do still better in the moist soils of the east.

One of the most uncertain bulbs in this part of the state is the Roman hyacinth. In some seasons, when the winters are cold we can grow them quite well, but in our ordinary mild winters it is hard to grow them well. Late planting is to some extent a preventive of damage, but not always. If cold weather sets in early, and we miss the warm spells in winter, they do exceedingly well, but ordinarily the bulbs are in bloom by Christmas, or sooner, in the open ground, and then the growing tops are exposed to our most severe weather in January and February, and it sometimes gets cold enough to freeze the tops off. The fertile bottom lands of the mountain section, like those along the French Broad, are, I believe, the lands for the Roman hyacinth. Planted there in November they would not show growth until spring, and would have the long cool spring of the mountains to mature their growth. Candidum lilies would do well in the same localities.

The white Italian hyacinth, on the contrary, does finely here, since it never makes the precocious growth of the Roman. I have a few of these as well as the Roman to show. The last winter was unusually favorable to the Roman. Cold weather set in in December and the winter was not characterized by the usual warm spells, which at some times force our fruit trees into bloom in January and February. It was uniformly cold for the latitude and the Romans did not bloom until late February, and ripened fairly well.

Some years ago I tried to grow the Roman hyacinth in the dry sandy soil of Southern Pines. They came through the winter all right, but hot weather set in early and the sandy soil got very warm, so that the bulbs ripened prematurely. When sent north it was found that in forcing they came into bloom some time ahead of the imported bulbs, but the spikes were small. The reason for this was evidently the premature ripening in the hot, sandy soil. A grower of tuberoses in eastern North Carolina, some years ago, tried the Romans. I happened to be at his house in the late spring, and he showed me the bulbs. They were as fine as I ever saw. But he had allowed the tops to decay on the bulbs, before lifting and, as I said to him at the time, I feared he had spoiled them and they would gum. And gum they did and the grower was so discouraged that he never tried any more Romans.

I have never failed to have excellent results with the gladioli. Corms of one season from the seed uniformly bloom. This spring I planted a large lot of offsets from the base of the bulbs of a lot of Groff's Hybrid gladioli. These bullets, averaging the size of peas and smaller, have bloomed to a very large proportion. Still the development in the north in the production of gladioli is such that it is hardly worth while for our people to undertake it.

Cannas, though not properly bulbs any more than the gladioli, are being grown to a very considerable extent, on contract, by the tuberose growers, and the production of Caladium esculentum has rapidly increased with the same growers, and the culture has been found more profitable than that of tuberoses.

Sternbergia lutea, which I also show, will do well if planted at the proper time in August or early September. But the dealers very generally put them in their fall catalogues. Since these and the narcissus bloom in late September and October, before the foliage appears it is easy to see that the bulbs planted in October or later are sure to fail and disappoint the buyer. The sternbergias are hardly all over the country.

The nettes, or Chinese lilies, are very satisfactory here if properly treated. They, like the sternbergias, must be planted in August for the best results. A clump of these allowed to remain in the same place for years in the herbaceous border, will make a very interesting display of bloom in the fall when its only companion, among the bulbs, is the sternbergia, or the colchicum.

One of the plants for which there is some demand but which I have never yet been able to meet, is the spotted-leaved calla. The plant is perfectly hardy with us, and we commonly cut the lily-like potatoes or caladiums and plant them in the fall. There is no particular advantage in the fall planting except to get

them out of the way, and the dealers can easily keep them till spring for sale.

In the same moist soils of the eastern section where the lilies would do best we believe that the ordinary calla would thrive and perhaps compete with *Calliflora*. *Arum sanctum* is also perfectly hardy here, and whatever demand there is for it can be easily met.

But of all the bulbs I have ever grown none has ever given me greater satisfaction or more profitable results than the *Amaryllis Johnsoni*. Being naturally evergreen bulbs, we find that those used for blooming in the greenhouse in winter and planted out in the spring make the finest bulbs in the same length of time. But ordinarily the bulbs left in the ground and protected by a good mulch will grow magnificently. I have bulbs now blooming profusely in the open ground which bloomed freely in the greenhouse last winter. For the small number I had to start with, the increase of stock of *Amaryllis Johnsoni* has been very rapid.

Crinum Americanum makes immense clumps in the old gardens, where it has been undisturbed for a generation, and it may well be grown in a general collection. There are doubtless many others of the hippeastrums, as the section in which the *Johnsoni* belongs is more properly called, which could be grown here with us with much success.

Another point in the possibilities of bulb culture in North Carolina is the production of flowers far more cheaply, in winter, than in the north. The Roman hyacinth, and most of the narcissus varieties of the earlier class, bloom here in the open ground from Christmas to March, often in full bloom in February. But these blooms are liable to sudden injury by the return of frost. But it has been found in my experience that a simple sash, with a mat for the coldest weather, will keep entirely out any frost we have. In such a frame we can bloom any of the early narcissi, the freesias, tulips and I have cut very fair crops of carnations from such a frame, made a little higher than for the bulbs.

The ease and cheapness with which these flowers are produced, and the rapid transportation now at hand, will enable the North Carolina grower to produce the blooms for a price with which the grower in heated houses north cannot compete. The good shape in which flowers are often sent south by commission men in New York shows that freshly cut blooms can be sent in fine condition from here, and that the northern florists may in the future find it to their advantage to use the southern bulbous blooms rather than grow them. But there would here also be the same danger that the grower of bulbs in the south would be competing with his own customers, as have the Bermuda men, and if he is growing bulbs for the north he should not try to grow the flowers in competition. But nevertheless there is certain to arise a trade of this sort in the hands of those whose sole interest is in the cut blooms. In the growing of bulbous flowers in our frames we have an advantage over the former under artificial conditions in the fact that we can have surplus frames, and after the flowers are cut the sashes can be removed for other uses and the bulbs left to fully mature, and thus annually improve instead of being thrown away.

In conclusion I would say that while the cultivation of some of the florists' bulbs is still in the experimental stage here, enough has been shown to prove that with many things there is a wide field for profitable culture in North Carolina. While all the bulbs will not do equally well in one locality there are other sections where some of the bulbs can be grown to perfection.

The bulb that is exciting the greatest interest, the Bermuda lily, will yet be produced commercially in North Carolina. I feel sure. I shall transfer these this fall to the coast plain, and believe that full success will soon be attained there. The humid climate of the low coast region will have a far better effect on the bulbs than the dry air and soil about the city of Raleigh. This characteristic of the coast climate is shown with other things as well as bulbs. In all the coast plain and considerably north of the latitude of the city of Raleigh *Gardenia florida* attains almost a tree-like stature in the open, while in Raleigh it barely survives

the winter when protected by green pine boughs. Still there will not be two degrees difference in the actual temperature. Snow is more common near the coast than in Raleigh and the protective influence of the snow is well known, and the reason for its greater abundance in the coast plain is the greater humidity of the air.

Predicting merely from what has been ascertained, I venture to say that in the future eastern North Carolina will be largely devoted to bulb culture, and in greater variety than now. The culture of Roman hyacinth and candidum lilies will center in the elevated mountain valleys where the conditions of the soil and climate are all favorable to these.

It may be wondered that I have said nothing in regard to the Dutch hyacinths. These will naturally seek the same regions as the Roman, though very good bulbs have been produced in the warmer parts of the state. They have been produced in the north, too, but until we are willing to devote the same intense cultivation to the soil that the Dutch do, we will always be surpassed by them in this particular line. Climate and soil have a great deal to do with the products of a country, but the skill of the cultivator has a great deal more to do with it, for this will render a cultivation a success often under unfavorable natural conditions.

The Almighty has done so much for the soil and climate of eastern North Carolina, and it is so easy for the cultivators of the soil to make a living, that they have not the same incentive to intensive cultivation as those who have had to fight through great natural obstacles to success. With the investment of capital, accompanied by skilled cultivators, the growers of eastern North Carolina will be found quick to learn and adopt improved methods. While I have said little that is perhaps especially encouraging I trust that those who are patriotically interested in developing the industries of our country will take hold of this industry and carry it to success.

The Bulb Situation.

By WM. R. SMITH, WASHINGTON, D. C.

Read before the Society of American Florists at the Asheville convention August 19-21, 1902.

To help find a commercial home for bulbs that can be grown in this country instead of being imported has been in my mind for some years. This is a matter I consider of great importance, and worthy of careful consideration by this society. I have made an effort to obtain information as to the value and quantity of Roman hyacinths, tulips, narcissi and lily of the valley pips, imported annually, but have failed. I addressed a letter to the Secretary of the Treasury, which he promptly referred to the Bureau of Statistics. O. P. Austin, chief of the bureau, furnishes the following table of values of orchids, palms, dracaenas, crotons and azaleas, tulips, hyacinths, narcissi, valley, etc., imported for consumption in the United States, by principal customs districts and all other districts, for the year ending June 30, 1901:

Districts.	Imports.
New York, N. Y.	\$415,101
Boston, Mass.	41,555
Philadelphia, Pa.	137,651
Chicago, Ill.	40,363
All other districts.	129,788

Total.....\$764,458

Mr. Austin, in a letter addressed to me, says that he had requested of the collectors of customs at New York, Philadelphia, Boston and Chicago any further information they could give, but owing to the classification they could not furnish separate information on the articles asked for. We beg here to acknowledge the kind courtesies of Mr. Austin.

Mr. Powers, chief statistician of the census office, also kindly endeavored to secure information for me on the same subject from leading firms in the various cities, but for the same reasons, and others, he failed to elicit reliable information. Enough, however, was obtained to make it an object that those bulbs of easy culture, not requiring extra skilled labor, can be grown successfully somewhere in the United States, and the quantity used can be doubled, and made an object of interest.

There are numerous other bulbs imported that can, and will before long, be

grown by enthusiastic experts in this country. We have the advantage of cheap lands as against cheap labor. Already gladioli, freesias and tuberose are exported. Of the latter the large output of \$45,000 is not all for florists' purposes, I am informed. Grease and glass, at Grasse, near Nice, consume an immense quantity of the tuberose flowers, and a monopoly, from natural causes, secures this, and will secure others, as exports. An interesting and instructive article on this subject can be found in Appleton's "Popular Scientific Monthly," of November, 1897. In the same article Kruger is stated to have discovered an artificial violet perfume in the iris root.

Whether the *Lilium longiflorum*, and its variety *Harrisii*, can be grown for market purposes in the state of Washington and in the state of Texas, as intelligent correspondents seem to think, is still an open question. With 6,159 intelligent heads of commercial florists' establishments scattered over the whole land, representing, as they do, an investment of \$50,708,671, urging them to vigilant care for their best interests, it is not to be doubted that a commercial home, in some of the various states and territories, will be found for those articles, so valuable in developing the aesthetic soul of the American people.

The discussion that will follow to-day, and in the trade papers on this subject will soon disseminate all useful and interesting information, and will thus add another wreath to the good old S. A. F., which has, in my opinion, been an important factor in improving our profession in all its various co-relations.

The following extract from an advance sheet, kindly furnished by L. G. Powers, agricultural division census office, shows the magnitude of the commercial florists' business: "The annual income from cut flowers is estimated at \$12,000,000 to \$14,000,000. Upon this basis the sale of roses averages \$6,000,000 annually with an annual production of 100,000,000. The violet is third, with sales of \$750,000 and an annual production of 75,000,000. The chrysanthemum sales equal \$500,000, the season for the sale of this flower being short." In another part of the report it is stated, the total product was \$18,422,522, and the retail value would be \$30,000,000, since between the grower and consumer there is sufficient expense and waste to nearly double the value.

A Chicago Dinner Decoration.

The illustration on page 143 is from a flashlight photograph of a decoration at the Chicago Club, by Walter Kreitling & Co., Chicago. The table is set for eighteen and the decoration is one of the most elaborate of the summer where so few were served. The flowers on the table were fancy gladioli and around the fountain American Beauties were used. *Adiantum* conceals the metallic parts of the fountain. The chandelier was removed to make place for the large canopy over the table, which was a wire frame covered with ferns. The flowers used here were light asters. There were not fewer than fifty electric lights on the canopy and the effect was very pleasing.

A New Yellow Calla.

The plant shown on page 147 was awarded a medal on July 5, by the Massachusetts Horticultural Society, and this fact induced the writer to pay a visit to the raiser, Joseph Taibly, of Wellesley, Mass., to see it as it grows in his field in quantity. The sight was a revelation of which the illustration does not convey an adequate idea.

This plant is the result of a cross between *Richardia Elliottiana* and *R. albo-maculata*. Out of the batch of seedlings one plant showed special merit and was propagated by offsets and seed and it has been proved that the type is well fixed, for the seedlings prove to be perfectly true to the original. The color is a beautiful soft primrose yellow, with

Photo by Chas. Poppelbaum.

BALL PLAYERS AT CHICAGO FLORISTS' CLUB PICNIC, AUGUST 12.

flowers equal in size to those of *R. Elliottiana*, borne on stout stems, the leaves being beautifully spotted with pure white.

Mr. Tailby's method of cultivation is unique and should make this one of the most valuable summer decorative plants we have, as they are never inside a greenhouse. On May 26 the bulbs were set out in the open ground and were then perfectly dormant, and in less than eight weeks the growth of leaves and flowers was most remarkable, many single bulbs having four expanded blooms with many more to follow.

The method of maturing the bulbs in fall is simple, as they are harvested like potatoes, the tops being mown off with the scythe, the bulbs lifted and perfectly ripened. After this they are kept in a cellar and re-set in May. *R. albo-maculata* has evidently imparted great vigor to the plant as it is exceedingly vigorous as compared with *R. Elliottiana* planted among it for comparison, and there is no doubt that Mr. Tailby has a novelty of sterling merit that will be waited for by those who have been privileged to see it as it is grown by the raiser.

E. O. ORPET.

J. H. Mitchell.

J. H. Mitchell, the superintendent for the Salt Lake Floral Company, Salt Lake City, Utah, whose portrait appears on page 145, is one of the men whose name is inseparable from the brief history of the upbuilding of floriculture in the west. Born in Noble county, Ohio, in 1870, he began his career as a gardener under his father, who was both farmer and gardener. His first position as foreman was at the Juanita Greenhouses, Crestline, Ohio, under Nicholas Amos, and to him, more than any one else, Mr. Mitchell says he owes whatever success he may have achieved as a florist. In 1893 he went to Montana as manager for Mrs. D. J. Knox, the pioneer florist of Butte. From 1896 to 1898 he was engaged in business for himself. In 1899 he accepted the position of manager of Columbia Gardens for the street railway company. At that time there were not a half dozen people in Butte who believed lawns and flower beds possible to that city. Sulphur smoke from the ore reduction works had long since killed all vegetation where the high altitude made it impossible to grow anything but the hardiest plants. In two years Mr. Mitchell and his assistants removed all the old buildings from the gardens, erected handsome new ones,

built a modern greenhouse and had lawns and flower beds that any city might be proud of. They found, however, that no month was free from frost. That the park is appreciated by the citizens of Butte is attested by the liberal patronage. During the season of four months over 400,000 people visited the gardens, but it is only justice to add that the Columbia Gardens is the only breathing place Butte has. It was made possible by the liberality of Senator W. A. Clark and the enterprise of J. R. Wharton, manager of the street railway. In the spring of 1901 Mr. Mitchell resigned his position at the gardens to take the position he now holds. During the past year he has erected and stocked over 42,000 square feet of glass and is now putting up an addition that will give them, when completed, 70,000 square feet of glass. The concern is backed by the Clark interests at Butte and, under Mr. Mitchell's direction, has already assumed a leading place in the flower business of the west.

C. W. S.

Chicago.

SHIPPING BUSINESS GOOD AT THE ENDS OF THE WEEK.—FEW WARM DAYS BRING IN AN UNWIELDY ROSE CUT.—QUALITIES IMPROVING BUT STOCK ACCUMULATES.—CARNATIONS MORE PLENTIFUL.—GOOD PARTY FOR CONVENTION.

The week's business opened with a very good shipping day. Local trade does not yet show the stimulus of approaching autumn but now and then, particularly on Mondays, the out-of-town buyers need a great deal of stock. But Tuesday has come to be known as the dullest day of the week, and it was so for a certainty during the period just past. The warm weather of the few days previous brought in a very large cut from the young rose plants, and on Tuesday there was no outlet whatever. Since then there has been a gradual improvement and the market has assumed a better tone. The young rose crop came on all of a sudden, but the qualities are very good for so early in the season. Of course stems are not long, nor heavy, but the buds are of excellent substance and color, with no mildew on the foliage. Beauties are undoubtedly the best selling item in the list, also best in quality but *Mme. Chatenay* goes well, and Peter Reinberg has a big cut coming on, having planted it very largely this year. He also planted several thousands of *Sunrise*, which promises to take well as a novelty. *La France* is also a goodseller

at present, and *Liberty* is doing nicely where cut from plants grown for summer bloom. The week has seen increased supplies of carnations, the field plants of additional growers having come into crop, and others are already cutting a few from early planted houses, however it may affect the general result of their season. The aster crop shows no diminution and there is some very good stock in market, too. *Gladioli* are not coming in nearly so heavily as a few weeks ago, possibly because the growers have realized practically nothing at all on the ordinary run of material. It has taken a good *gladiolus* to find a fair buyer this season. The *arratum* lilies, too, seem to be on the wane, but water lilies are coming in more heavily than heretofore this season. There is a general impression that the cool weather will cause the season to open earlier than usual this year and that increased activity may be looked for within the next week or two. The fashionable retailers are not yet doing anything, but the smaller dealers, in the neighborhoods where summer outings are not in vogue, have found this a very good summer and are looking for big things this fall.

Albert Fuchs, Fanny Fuchs and John Hrudka, creditors of Walter Retzer, on August 18 petitioned to have him declared a bankrupt. The total liabilities, according to the creditors, are about \$20,000, while they assert the assets amount to about \$5,000. In April, 1900, Albert Fuchs sold his business to Mr. Retzer. His claim is \$13,500. Henry L. Wilson was appointed receiver with \$8,000 bonds. It is understood that he will continue the business under Mr. Retzer's management pending the action of the court.

The Chicago party to the convention numbered thirty-five, re-enforced by a number from the north and west. They filled two sleepers nicely and had a very enjoyable trip. Philip J. Foley, of the Foley Manufacturing Company, was the heavy-weight of the party. He weighs 295 pounds.

Weber Brothers are drying off their plants and resting them up for a while, so that they are cutting very little, but they expect a fine crop in early fall.

J. A. Bndlong's place is in very fine shape, the roses never having looked better. They are making good progress on their new houses for carnations.

Kennicotts have fitted their office windows with the Luxfer prisms and it is wonderful the light they throw into the place.

Henry Wiator and family left on Wednesday for a visit with relatives at Fond du Lac, Wisconsin.

Peter Reinberg has built six blocks of cement walks along the Robey street ends of his greenhouses.

Miss Grace Todd, of Amling's, has returned from her vacation at Wakeman, Ohio.

Henry Muno celebrated a birthday anniversary on Tuesday.

Walter Kreitling is on a trip to the Wisconsin lake resorts.

Wm. N. Campbell, of Vaughan's, leaves to-day for New York.

Visitors: O. Will, Minneapolis; J. D. Carmody, Evansville, Ind.; H. Glenn Fleming, Fairmount, W. Va.; C. L. Brunson, Paducah, Ky.; Wm. H. Englehart, Memphis, Tenn.; Thomas Chapman, Denver; I. N. Kramer, Cedar Rapids; A. S. Swanson, St. Paul; H. G. Smith, Detroit; Arthur Newell, Kansas City; enroute home from England.

THE AMERICAN FLORIST

EIGHTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.
Subscriptions accepted only from those
in the trade.

Advertisements on all except cover pages.
10 Cents a Line, Argue; \$1.00 per inch.
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive inser-
tions, as follows—6 times, 5 per cent; 13 times,
10 per cent; 26 times, 20 per cent;
52 times, 30 per cent.

Cover space sold only on yearly contract at
\$1.00 per inch, net, in the case of the two
front pages, regular discounts apply-
ing only to the back pages.

The Advertising Department of the AMERICAN
FLORIST is for florists, seedsmen and nurserymen
and dealers in wares pertaining to those lines only.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to
secure insertion in the issue for the following
Saturday. Address

AMERICAN FLORIST CO., Chicago.

VERY little butted glass has been laid
on this season's greenhouses.

NEPHROLEPIS PIERSONI received the
first gold medal ever awarded by the S.
A. F.

THE present plans are that fifty car
loads of fruit will go into cold storage to
keep up the displays at the St. Louis
exposition.

PARTICULARS of this year's convention
of the Canadian Horticultural Association
appeared first in the AMERICAN
FLORIST and we again wish to remind
our readers that this event will take
place at Hamilton, Ont., September 3-4
inclusive.

Convention Hospitalities.

At Asheville Friday 350 participated
in the excursions arranged for the day,
the afternoon being given to a tour of the
grounds of the Vanderbilt estate. The
weather was perfect.

Florists' Hail Association.

The Florists' Hail Association met at
Asheville, August 21. The report of the
past years' business will be found in this
issue. Officers elected were: President,
J. C. Vaughan; vice-president, E. G. Hill;
secretary, J. G. Esler; treasurer, A. M.
Herr; directors, H. H. Ritter and Geo. M.
Kellogg. It was ordered that the
thirteenth assessment be levied March 1,
1903. The directors made a proposition
to amend section one of article seven of
the by-laws so that members will be given
fifteen days to file claims, instead of five
days, and sixty days in which to file proof
of loss with the secretary, instead of ten
days. The directors also recommended
a new section as follows: A failure to
file proof with the secretary within sixty
days from date of loss shall release the
association from all liability.

Stem Rot of Roses.

ED. AM. FLORIST:—Quite a number of
our Bride and Bridesmaid roses are dying
off with the stem rot. Can you give
cause and remedy? Samples have been
sent you under a separate cover. P.

The sample plant received has been
girdled just above the roots by a grub, I
presume the large white fellow with a
brown head, which is the larva of the
chafer or commonly called the June bug.
If the grower will watch his plants care-
fully and immediately he sees that the
young foliage shows the least sign of
wilting on any plant, stir up the soil all
round the plant, I think he will find the fel-

low that is doing the damage. I need not
here tell him what to do with him when
caught. This pest is more troublesome
some seasons than others. It is usually
brought into the greenhouse in the com-
post and is much more likely to be in the
soil if it has been collected from anywhere
in the neighborhood of trees. There is
no known remedy to exterminate the
pests other than to catch and kill them.
A little careful study of the "critters"
habits when working on the plants will
enable anyone to quickly detect their
presence and also the best way to hunt
and catch them. As a precaution against
introducing them into the genial tem-
perature of the greenhouse studiously
avoid collecting any soil anywhere in the
proximity of trees. JOHN N. MAY.

Canadian Horticultural Association.

The fifth annual convention of the
Canadian Horticultural Association,
which will be held at Hamilton, Ont., on
Wednesday and Thursday, September 3
and 4, will show a marked advance
over any of its predecessors. From its
near proximity to Buffalo and other
American cities there is likely to be a
good sprinkling of those who have not
found it convenient to attend the S. A. F.
meeting at Asheville. The flower fete
arranged by the Hamilton Horticultural
Society and Gardeners' and Florists' Club
will be an innovation which cannot but
have a beneficial influence. The trade
exhibit, too, under the management of
C. M. Webster, is an assured success.
Already space has been applied for by a
large number of firms. Customs arrange-
ments for the free entry of goods for ex-
hibition have been made.

The programme has been arranged to
cover a range of subjects that will give
ample scope for instructive discussion.
Following the mayor's address of wel-
come, the president's address and miscel-
laneous reports will be an address on
"The Hardy Perennial Border," by
Andrew Alexander, Hamilton; "The
Relation of the Professional Florist to
the Local Horticultural Societies," by
Prof. Hunt, Guelph; "Winter Flowering
Plants for Private Greenhouses," by C.
A. Smith, Montreal; "Heating Green-
houses," by an engineer with Gurney &
Company, Toronto; "Advantages of
Cold Storage of Plants to Gardeners and
Florists," by Roderick Cameron, Niagara;
"Latest Facts About Carnations," by
Mr. Webb, Sr., Brampton; "Summer
Flowers for Florists," Prof. Hunt, Guelph;
"Latest Facts About Roses," Edward
Dale, Brampton.

The hospitality of the Hamilton mem-
bers is well known, and visitors are
assured of a very pleasant time. One of
the features will be a trolley ride through
the Niagara fruit district to Winona and
Grimsby; another to the mountain, the
view from which is one of the best in
Canada. From there can be seen the
Niagara fruit district lying in the valley,
with Lake Ontario on the one side, and
the mountain range on the other, the
numerous steam and electric roads wind-
ing in and out, and at the foot of the
mountain lies the city of Hamilton bor-
dered by the Burlington bay.

Worth Its Weight in Gold.

AM. FLORIST Co.:—Enclosed please find
\$1 for which renew my subscription.
Your esteemed paper is second to none,
and worth its weight in gold to any
florist. I could not get along without it.
HENRY MUELLER.

Chrysanthemum Society of America.

The Chrysanthemum Society of Amer-
ica held a meeting at Asheville, Thursday,
August 21, President Herrington in the
chair and M. Barker acting as secretary
pro tem. Among others present were C.
H. Hune, F. R. Pierson, J. C. Vaughan,
Jas. Hartshorne, E. G. Hill, Alex. Wallace
and E. A. Seidewitz. The annual meet-
ing will be held in November, as provided
in the by-laws. W. N. Rudd, M. Barker
and Emil Buettner were appointed a
committee to arrange for the convention
in connection with the exhibition at Chi-
cago. It was resolved that a sum not to
exceed \$150 be expended at the discretion
of the executive committee for expressage
in procuring adequate exhibits of chrys-
anthemum plants.

Report on the Trade Exhibit.

The judges of the trade exhibition at
Asheville were:

Class A, plants: Harry Papworth,
Wm. Scott, Lewis Ullrich.

Class B, cut blooms: Louis Reuter,
Geo. Wittbold, W. Critchell.

Class C, boilers: H. A. Hart, Jas.
Hartshorne, Geo. M. Kellogg.

Class D, greenhouse appliances: J. S.
Wilson, Jas. Taylor, C. H. Hune.

Class E, supplies: E. J. Bush, John
Westcott, Wm. Lindsay.

Class F, bulbs: W. F. Gude, J. T. Tem-
ple, J. Schultz.

Class G, miscellaneous: Richard Vin-
cent, J. L. Dillon, J. M. Lamb.

Following is the report of the judges:

Henry A. Dreer, for collection of palms,
decorative plants and small ferns for jar-
dinieres, especially good araucarias, cer-
tificate of merit.

A. C. Oelschig, collection of ficuses, well
grown, including the variegated type,
highly commended.

P. J. Berckmans Co., collection of conif-
ers, evergreens and well grown camel-
lias, highly commended.

Pinehurst Nurseries, group of hardy
shrubs, highly mentioned.

Charles D. Ball, collection of excellently
grown palms and other decorative plants,
well worthy a certificate of merit.

Henry Eichholz, collection of zonale
geraniums, honorable mention.

L. Ball, collection palms and decorative
plants, highly commended.

Mrs. H. Kheder, collection of sarracenia
and dionaea, honorable mention.

James M. Lamb, collection sarracenia,
dionaeas and native orchids, honorable
mention.

J. A. Peterson, Pandanus Veitchii and
Begonia Gloire de Lorraine, certificate of
merit.

Geo. Wittbold Company, collection of
palms and decorative plants, honorable
mention.

Robert Craig & Son, decorative plants,
including full display of crotons, certifi-
cate of merit.

Siebrecht & Son, decorative plants,
including a well grown *Stevensonia*
grandifolia and *Ananas sativus* variegatus,
certificate of merit.

Jessamine Gardens, collection, honor-
able mention.

Clucas & Boddington, unestablished
orchids, *Oncidium varicosum* Rogersii,
also three varieties of Lorraine begonias,
honorable mention.

Robt. Bottomley, magnificent collec-
tion of kentias, many specimens the finest
the committee has ever seen and which
have been a grand feature in decorations,
society's silver medal.

Wm. R. Smith, National Botanic Garden, collection of new and rare plants among which was a fine specimen of *Pandanus Veitchii*, *Platyceerium Hillii*, *Maranta Smaragdina* and a fine collection of well pitched nepenthes, society's silver medal.

L. H. Foster, fine specimen *Nephrolepis Anna Foster*, certificate of merit.

F. R. Pierson Co., group of *Nephrolepis Piersoni*, the committee considered this the finest decorative fern introduced in recent years and strongly recommended it be awarded a gold medal.

Certificate of merit to Arthur Cowee for three sections of gladioli of the latest introduction of Mr. Groff, also for the Meadowvale mixture of gladioli.

The committee recommend a certificate of merit to Lord & Burnham for round steam boiler, on account of convenience of handling, all parts accessible for cleaning; large fire box in proportion to grate surface; cast in one piece from base to top, thus doing away with the possibility of leaking joints.

Certificate of merit awarded to H. Thaden for Thaden's wire tendril for roses and carnations.

Kramer & Son, non-freezable galvanized iron valley gutter and drip conductor; Kramer's patent adjustable tubular greenhouse construction, also Kramer's wire pot hangers, certificate of merit.

Detroit Flower Pot Company, ingenious device for manufacture of flower pots.

Anders Rasmussen, new self-balancing cast iron ventilator.

Honorable mention awarded to the following exhibits: J. L. Dillon, for composition for gutters and pots; zinc caps and system of subirrigation. Central Foundry Company, cast iron post and greenhouse putty. Quaker City Machine Works, Evans' Challenge ventilating apparatus and iron pipe hangers and brackets. George M. Garland, iron gutter.

Other notable exhibits were: Wm. H. Ernst, flower pots; W. J. Cowee, wired toothpicks; H. M. Altick, pot labels; J. G. & A. Esler, rubber hose; Stump & Walter, hose, thermometers, syringes, putty bulbs, etc.; Siebrecht & Son, patent greenhouse shading device; H. Beaulieu, hotbed sash and garden tools.

Brooks Sisters, highly commended for large and interesting exhibit of seeds; Jassamine Gardens, highly commended for bulbs of *Crinum Kirkii*, which were very fine; Vaughan's Seed Store, for large assortment of seasonable bulbs, including *Lilium longiflorum* from cold storage; Segers Bros., especially fine assortment of tulip and hyacinth bulbs; H. A. Dreer, *Lilium Harrisii*, also Roman hyacinths; Siebrecht & Son, *Lilium Harrisii*; Stump & Walter, very fine display of seasonable bulbs; Clucas & Boddington, fine lot of *Lilium longiflorum* from cold storage.

SITUATIONS, WANTS, FOR SALE.

TRADE AVERAGES AHEAD OF LAST SUMMER.—ROSES FROM YOUNG STOCK.—OUTDOOR FLOWERS SERVE FOR WINDOW DECORATION.—PLANTING NEARLY FINISHED.—NOTES.

Business conditions are about as good as can be expected at this season of the year. So far the summer trade will average up better than that of the same period of last year. Stock in general is improving in quality, although quantity is limited. Some very good Brides and Bridesmaids from young stock are coming in, and while the stems are short the flowers are fairly good. Some good Beauties are coming in from the Essex Greenhouses, cut from old stock replanted. This firm is also cutting some good Bridesmaids from old stock replanted. Indoor asters are to be had in quantity and the quality is good. Great quantities of hardy phloxes, rudbeckias, hydrangeas and other outdoor flowers are received by the retailers daily. While there is not much demand for such stuff, yet they serve the purpose of making a good window display.

The J. M. Gasser Company has completed the new range and the last of the rose stock has been benched. Two new eighty horse-power boilers are in position. The new 100-foot stack is considered one of the best in Cleveland. They have completed benching their carnations and 45,000 chrysanthemums are in good condition. All the early varieties have their buds well advanced.

Carnation planting is about over. Those fortunate enough to have the stock in well drained, sandy soil reaped a rich reward in having extra fine plants for benching. This has been an ideal season for growing where conditions were favorable.

The F. R. Williams Company has completed remodeling its range. Stock has been all planted and is very promising. This firm had great success last year with Bride and Bridesmaid.

Harry B. Jones, of the J. M. Gasser Company, has returned from his vacation.

Visitors: J. A. Peterson, Cincinnati; Walter Mott, Jamestown, N. Y.

ECHO.

Utica, N. Y.

SYRACUSE ENTERTAINED AT A CLAM BAKE.—BOWLING AND BASE BALL.

The Florists' Club of Utica entertained the florists of Syracuse on Monday, August 11, with a clam bake at Well's Grove and a good time was experienced by both visited and visitors. After the bake there was a base ball game, which was won by the Utica team. "Joe" Beard, of the Syracuse team, knocked the ball over the fence. In the evening there was a bowling contest, which was won by Syracuse. The score was 1147 to 1123. The party from Syracuse returned home early Tuesday morning.

NARRAGANSETT PIER, R. I.—Peter S. Byrnes, of Wickford, has opened a flower store in the Hazard block.

PARKERSBURG, W. VA.—J. W. Dudley is beginning to cut from his new house of American Beauties, which is in good shape for fall. Mr. Dudley is sheriff of Wood county.

OSKALOOSA, IA.—Work is progressing satisfactorily on the rebuilding of the Kemble greenhouses, but it will require some tall hustling to get ready for the opening of the season.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

WALTER P. STOKES, Pres.; C. N. PAGE, First Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

VISITED CHICAGO: A. J. Brown, Grand Rapids, Mich.; R. Drumm, of the Drumm Seed Company, Fort Worth, Tex.

WALTER MOTT, of Jamestown, N. Y., passed through Chicago Friday, on his way to Waterloo, Neb., to inspect seed crops.

L. F. JONES, of Grand Rapids, passed through Chicago Thursday on a visit to his old home at Paw Paw, Ill., where he has not been for twenty years.

Size of Seed In Relation to Produce.

It is a very generally accepted opinion that the size of seed has very little influence in determining the weight of a crop. How little this opinion is borne out by facts, has been very clearly demonstrated by the experiments which have been carried on for some six or eight years past at the Ontario Agricultural College, at Guelph. With the object of ascertaining the effect on the crop produced by sowing large, medium and small seeds, good average seed was procured from the usual local sources and carefully graded into three sizes. In selecting the seeds great care was exercised and nothing but apparently sound grains were used. The crops experimented upon were mangels, carrots, sugar beet, swede, and "fall" turnips, and the average yield for three, four or five years was taken.

The results arrived at were very striking, showing an average variation between the crops from large and small seeds, of no less than thirty-nine per cent. The following table gives details of the experiments, in tons per acre:

YIELD OF ROOTS PER ACRE.

Seeds.	Mangels average 5 years.	Carrots average 5 years.	Sugar beet average 3 years.	Swede turnips average 4 years.	Fall turnips average 3 years.	Average yield per acre for all classes of roots.
Large plump.	33.19	24.47	20.32	13.97	22.79	21.95
Medium sized.	29.6	22.3	19.79	14.39	19.45	20.70
Small sized.	21.52	16.23	14.45	5.66	11.97	13.97

This table shows that for all classes of roots during the number of years through which the experiments were conducted, that large seed produced a yield of nine tons per acre more than small seed, and over two tons more than medium sized seed. It would appear therefore that the question of the relative size of the seed is one of considerable importance and every effort should be made by growers to separate and discard the smaller seeds, even though this may increase the cost of production.

It will be observed that these investigations were only conducted on "root crops," and it is an interesting question whether the size of the seed is of so much importance in the case of other crops, such as cabbage, cauliflower, peas, etc., when portions of the plant other than the root are used.—W. F. Gunn, in Horticultural Advertiser.

Visitor—"Are you fond of flowers, Agnes?"

Agnes—"You bet! Doesn't papa go over to the park after dark every night and steal a lot of em?"—Chicago Daily News.

Sir Dan De Lion.

Sir Dan De Lion rode forth one day,
With his horse-Lound at his heels,
His mettlesome Col'd-foot and the turf,
And the Blue-bills raog glad peals.

And many a lady fair rode too
Her sorrowlith t beautiful day;
There was P m er Nel and little Prim-Rose,
And Violet, Whin and May.

A Man Drake told them the Mountain-Thyme,
So they ate Bread-and-Cheese on the spot;
And Creep ng J nny came up and cried,
"I pray you, Forget-me-not!"

They saw the Bull-rush down to the lake,
And they saw the Cow-slip up;
And they sat on Toad stools and drank bright
mead
From a goldeo Butter-cup.

They heard the Crocus, and donned their
Furze
To the rosky Aseho-d l;
And they all rode home to their flower-beds,
As the ghosly Night-shade fell.

—Chicago Tribune.

The Everett B. Clark Co., Milford, Conn.

MASTERPIECE.

MIGNONETTE, TRUE MACHET. Trade pkt., 10c; 1/2 oz., 25c; oz. 50c; 2 ozs., 75c; 1/4 lb., \$1.25.

CALCEOLARIA HYBRIDA, choicest mixture, pkt. 50c.

"Vaughan's International" Primrose Mixture. Unquestionably the best mixture of Chinese Primroses. It contains the largest variety of the best selling colors. Flowers large, beautifully fringed, borne in large clusters well above the rich green leaves. Pkt. (250 seeds) 50c; 5 pkts. (1250 seeds) \$2.00.

CHINESE PRIMULA, Chiswick Red; Alba Magnifica, white; Blue Pink Striped. Each per pkt. of 20 seeds, 50c; 1000 seeds, \$1.75. **DOUBLE CHINESE PRIMULA,** white pink red, mixed, per pkt. 50c.

Cineraria VAUGHAN'S COLUMBIAN MIXTURE. A mixture of the best English and German strains unsurpassed. Pkt. (1000 seeds) 50c; 3 pkts. \$1.25.

Cineraria HYBRIDA, large flowering, white, blood-red or crimson, double white or best double mixed, each, per trade pkt., 50c.

PANSIES.

VAUGHAN'S "INTERNATIONAL"

Received the only reward for Mixed Pansies at the World's Fair. It is to-day better and more complete than ever. It contains the cream of the stock of 10 Pansy specialists. There is no better mixture in existence, as all the florists who saw or used it can tell you. Price per oz., \$10.00; 1/2 oz., \$5.00; 1/4 oz., \$1.50; trade pkt., 50c.

VAUGHAN'S "GIANT MIXTURE."

This mixture is specially made by us from all the separate colors of Giant Trimardeau the Giant Bugnot and Cassier and several special strains which cannot be had any other way. If your demands large flowers there is no better mixture. Price, 1/4 lb., \$14; oz., \$4; 1/2 oz., 60c; td. pkt., 25c.

MASTERPIECE--New Giant Curled.

This strain comes nearer to "Double Pansies" than anything ever introduced under that name. In reality the number of petals is the same as that in other Pansy flowers, but they are crimped and curled in such a fashion that the flowers appear double. The flowers are of enormous size, of 3 inches across, and the color variations and combinations are odd and striking. Pkt., 50c; 1/2 oz., \$1.50.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.
 CHAS. A. ILGENFRITZ, PRES.; D. S. LAKE, Vice-PRES.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y.
 Twenty-eighth annual convention, Detroit, Mich., June, 1903.

THE mulberry is a seldom planted tree but a number of nurserymen report calls for the Downing last spring.

THE Charlton Nursery Co., Rochester, N. Y., has bought two acres of land upon which to build packing sheds.

H. E. VAN DEMAN says that the Monocacy apple, grown in Western Maryland, is well worth a trial in other places.

PROF. BAILEY says that the long rotation of crops in growing nursery stock burns the humus out of the soil and interferes with its mechanical character, rather than taking the life out of it.

Philadelphia.

GOODLY NUMBER IN CONVENTION PARTY.—GIVEN ROUSING SEND-OFF.—MARKET PROJECT MAKING GOOD PROGRESS.—BUSINESS QUIET.—VARIOUS NOTES.

The most important event of the week was the departure of the conventionites for Asheville. There was quite a crowd of the stay-at-homes gathered at the station to see them off and wish them a pleasant journey. It was a merry party and the predictions of the committee were fulfilled, in that the number reached over fifty, which, considering the distance, was a good showing. There were many admonitions to bring that Lord & Burnham cup and another back with them. Captain Moss said they would try and have something good in charge on their return from the "sky land." The only shadow was the knowledge that Mr. Burton was not to be one of the party, and many expressions of sympathy were heard. Finally at 12:29 the train pulled out, the New Yorkers having shown themselves for a minute or two on the platform. There were cheers and waving of hats and a last admonition about the silverware and the train pulled out of sight.

We are glad to be able to report that the market project is moving along and that considerable progress has been made. It is proposed to form a stock company under Pennsylvania laws and issue 500 shares of stock at \$20 per share, this making a capital of \$10,000. Quite a number of shares have already been subscribed, the first deposit of \$5 on which will not be due until October 1. The price of stalls is to be \$50 per annum, or about 16 cents per day, which sum should surely not embarrass any one. We are glad to see that the project is meeting with such success and hope before the chrysanthemums make their appearance the market will be an accomplished fact.

Business has been very quiet the past week. There are signs of improvement in the flower supply, as the new crops of roses are getting better and more growers are cutting. A few nice eighteen-inch Beauties are seen and some fair Bridesmaids. There are quantities of gladioli, but \$1 per hundred will buy good stock, so there cannot be much in it for the growers. Lily of the valley is very pale and weak. Last year at this time it was very fine. What is the matter?

Myers & Company, the horticultural builders, are much pushed at present, having four large operations on hand and others in prospect. K.

James W. Dunford.

James William Dunford, whose portrait appears on page 138 was born in London, England, in 1870. At the age of thirteen years he entered the employ of Sutton & Sons, the noted seedsmen at Reading, Berkshire. After being with them nearly five years, he left England for the United States. Here he attended the School of Agriculture of the University of Minnesota during the winter months and worked in the horticultural department of the Experiment Station during the summer. He was graduated in 1890. Mr. Dunford then spent two years at the Missouri Botanical Garden, St. Louis, as assistant head gardener and was for one year landscape gardener for the Illinois Northern Insane Asylum. He then put in one season with John H. Taylor, the well known rose grower at Bayside, L. I., and in the spring of 1894 started in business for himself as a rose grower at Central, Mo., with one house 20x100

and limited capital. After a year or two roses were dropped and carnations substituted. In 1901 F. B. Call entered as partner in the business, which from that time became known as the St. Louis Carnation Company. At present the place consists of about 45,000 square feet of modern greenhouses, a well equipped machine shop and packing house, flower cellar and boiler shed that are models of their kind.

More Than His Money's Worth.

Convention Bowling Contest.

The team bowling contest was on the alleys of the Albemarle Club, which were perfect in every respect. The scores were not high, however, as for some reason the strain or extra earnestness put into the work seemed to interfere with the judgment of the players and some good men made poor showings. Baltimore and Chicago were first up. After a spirited contest Baltimore managed to win the last game by two points, Chicago getting the first two by good margins.

They gave way to Philadelphia and New York. In this struggle Philadelphia soon drew away and, obtaining the lead, kept it to the finish. The second game, 883, proved the highest single of the match and with this they get the Detroit hotel prize, which is now their property, as they had won it once before, in Detroit. They also won the Hitchings cup, for high last game, with 863, and the Lord & Burnham prize, for high total in three games, with 2,580. This is now theirs absolutely, as they had one win in Buffalo last year.

Detroit and Cincinnati were to follow, but Detroit rolled alone, as Cincinnati did not then show up, having had trouble getting together. Detroit played a good score by themselves and would likely have done better had they been pushed.

The individual prizes for players in the tournament went, first for high single game (188) to Robert Halliday, of Baltimore; for high total in three games (494) to B. Starkey, of Philadelphia; second high total (467) to George Moss, and same player first for highest number of strikes (12). Wm. Robertson, of Philadelphia, won the prize for the greatest number of spares (15). So it may be said that Philadelphia made a clean sweep, for with the exception of the highest single game they got everything else in sight.

Convention Gunners' Contest.

The shooting contest took place at the grounds of the Asheville Gun Club on Thursday afternoon, August 21, and proved a most successful event. A team composed of shooters from the S. A. F. met the citizens of Asheville and after the contest was over it was remarked what a pleasure it was for the florists to lose to such a lot of perfect gentlemen as the Asheville representatives.

The shoot was run off without a single hitch and after the smoke had cleared away it was found that the S. A. F. were short nine birds in 300 and had to bow gracefully to the superior skill of the mountaineers. The prizes for each member of the winning team consisted of gold scarf pins, which were presented on behalf of the shooters by Wm. Scott, in his usual happy and appropriate style. Major McKissick accepted the prizes and deputized Colonel Lush to reply. The Colonel was in happy vein and stirred

the hearts of his hearers in true southern style, complimented everybody and spread a radiant oratory over the mountain top that warmed the hearts of the visitors. The scores follow:

FLORISTS.		ASHEVILLE.	
Hammond	41	McKissick	44
Harris	47	Cox	42
Allick	46	Carrier	45
Cartledge	46	Miller	44
Anderson	39	Binham	48
Reid	37	Lush	45
Total	559	Total	268

In the individual shoots which preceded the main event the first was at fifteen targets and resulted in a tie by four for first place, with total of fourteen. This tie was settled in the next, which was at twenty-five birds, in which Hammond made 24 and Anderson and Harris 23 each. Mr. Anderson retired in favor of Mr. Harris for second place and took third.

Several informal events were run off subsequently, completing a delightful afternoon's sport. In one of these informal affairs mixed teams captained by McKissick and Anderson did some very fine scoring and wound up in a tie, which was won in the shoot-off by the McKissicks and the penalty was gracefully paid by the Anderson aggregation at the Battery Park buffet the same evening. One of the features of the shoot this year was the fine form of the veteran, William K. Harris. He received the congratulations of his friends in general and was one of the happiest of mortals and glad he came to Asheville. Much credit is due the committee, Messrs. Cartledge and Halliday, for the excellent arrangements made for the shoot. They worked hard and had the satisfaction of seeing everything go off smoothly.

Capacity of Boiler.

ED. AM. FLORIST:—We now have 2,000 feet of glass and are adding 1,500 feet more. Will a ten-horse-power boiler supply hot water to heat that amount? We have an Economic boiler in good condition, located in the basement to give good circulation. The houses are sixteen feet wide. How many 2-inch pipes will be required in each? J. J. M.

While the boiler might answer if fully up to its rating, it will not be as satisfactory as a larger one and will not be as economical in either fuel or care. Nothing is said about the temperature desired. For 60° eleven 2-inch pipes will be necessary and for 50° eight will answer, if there is no glass in the side walls. L. R. TAFT.

“Something Doing” at Kansas City.

The plans for the Kansas City Flower Show have been approved, and \$7,000 appropriated by the Directors of Convention Hall to pay premiums with. A thousand of Kansas City's hustling business men have been appointed on Committees, and with characteristic Kansas City spirit are working out the details of the

All-American Flower Show

to be held in Convention Hall, Nov. 3, 4, 5, 6, 7 and 8, and which will go down in history as the greatest Flower Show of 1902.

Kansas City Offers:

The greatest hall in the world to exhibit in.
The largest premium list ever offered to exhibit for.
The largest special premiums ever offered.
A guarantee that every award will be paid in full.

SOME NEW WRINKLES.

Hundreds of store windows beautifully decorated in plants and flowers in friendly rivalry, in competition for special premiums offered by local florists.

The Home of Washington at Mount Vernon, faithfully reproduced in Convention Hall, even to the old-fashioned flowers.

A Charity Sunday, Nov. 9th.

The Flower Show Ball, Nov. 10th, with 2,000 couples dancing at one time on the polished floor—the largest dancing floor in the world—in the only hall where this sight could be possible.

A hundred thousand visitors to see and be seen.

PREMIUM LIST OUT IN A FEW DAYS.

Montreal.

TRADE GOOD AND WHITE FLOWERS IN BRISK DEMAND.—OUTDOOR STOCK GOOD.—VARIOUS NOTES.

Trade in Montreal is fairly good, with white flowers for funeral work in brisk demand. The cool and wet weather has been favorable to dabbias. Sweet peas and asters are also better than formerly. Carnations in the fields are good all around. Chrysanthemums are showing well, but some growers are troubled with the white fly on them.

There will be a good many of the Montreal boys at the convention at Hamilton September 3 and 4.

Everybody is busy building or rebuilding. G. V.

The Oak and the Squash.

When the late President Barrows, of Oberlin, college was asked by a student if he could not take less than the regular four years' course, Dr. Barrows looked the applicant over thoughtfully and replied:

"Why, certainly, my lad. A short course if you like, but my advice to you is to take the longest course possible. The length of time you wish to devote to study rests with you entirely, and should depend on what you intend to become. Just remember that when God wants to make an oak he takes a hundred years, but when he wants a squash he takes six months."—Chicago Inter Ocean.

LYNN, Mass.—The greenhouses of Mrs. Henry Young have been leased to Frank J. Dolansky.

BERLIN, CONN.—Carl Mechant has gone to New Haven, where, it is reported, he has bought some greenhouses.

SAN ANTONIO, TEX.—The P. D. Hauser & Sons Floral Company is making extensive improvements this year in its greenhouses. They will have over 60,000 feet under glass when completed. They are also making improvements at their South Heights nurseries.

The Greatest Victory Yet

THE PIERSON FERN Nephrolepis Piersoni, Awarded S. A. F. Gold Metal

Asheville Convention, August 20, 1902 Read what the judges say: "Many magnificent specimens were staged, of various sizes, both in pots and pans. The committee considers this the finest decorative fern introduced in recent years. Among Nephrolepis it represents what Farleyense is among the Adiantums and the committee strongly recommends it be awarded a gold medal."

Signed, HARRY PAPWORTH, WM. SCOTT, LEWIS ULLRICH.

THE ONLY GOLD MEDAL EVER AWARDED BY THE S. A. F.

Will be introduced to the trade in spring, 1903 Demand is sure to be enormous Place your order at once in order to secure early delivery, as orders will be filled strictly in rotation. **Prices:** \$9.00 per doz; 50 plants at 60c each; 100 plants at 50c each; 500 plants at 45c each; 1,000 plants at 40c each.

Toronto.

BUSINESS GOOD FOR THE SUMMER SEASON.—WEATHER FAVORABLE TO STOCK.—ALL GOOD MATERIAL SALABLE.—MUCH INTEREST IN CANADIAN TRADE CONVENTION.—VARIOUS PERSONAL NOTES.

Summer trade is good. The cool weather is keeping many of the best people in the city and society is very active for this time of the year. There is a good demand for stock and anything at all salable is easily disposed of. The cool weather has been very favorable to roses. The new crop of Meteors is longer in the stem and well colored. Kaiserin is again in crop and Beauties are advancing in quality. Bridesmaids and Brides are not so good, but an improvement is expected within the next few days. Carnations are smaller and there are very few around. The young plants in the field have made good progress and are in excellent shape for planting. Some good lilies, both longiflorum and auratum, are seen. Cool, wet weather has been very favorable to gladioli and dahlias, as there were never better flowers on the market than are seen this season. Asters still hold predominance in the cut flower market.

The Hamiltonians are keeping up the interest of the Canadian Horticultural Society's convention, which will take place in the ambitious city on September 3 and 4. Visitors are assured a rare treat. A very interesting delegates' guide book has been published. Those going via Toronto can get cheap rates to this city, one fare for the round trip, good from September 2 to 12 inclusive, which will be charged by all railroads.

D. J. Sinclair, of the commission house, reports a good summer business. He has worked up a good trade in supplies and wire designs.

Miss Cairn, who has lately started a retail store in Montreal, was a visitor this week.

Geo. Mills has gone to Lake Nippissing for a few weeks' sport with the fish.

James Milne, of Dunlop's, has gone to Maine to visit relatives.

Painters are just redecorating Dunlop's King street store. H. G. D.

BROCKVILLE, ONT.—J. Hay & Son made an assignment August 12 to George A. Dana.

DECATUR, IND.—J. A. Ernshberger, of Delphos, O., is to build a good-sized greenhouse establishment here.

WHITEHALL, MICH.—Thomas Rogers, the eleven-year-old son of Thomas C. Rogers, was accidentally drowned July 29.

GREAT NECK, L. I.—William Gould Browkaw is planting a Japanese garden on his estate here. A force of seventy men is engaged on the landscape work.

New Scarlet "ORIOLE" Carnation....

Strong and healthy field plants, \$12.00 per hundred; \$100 per thousand.

ENCHANTRESS

QUEEN OF CARNATIONS.

Of all Varieties it is the **Largest and Best**

Light pink, deepening toward center, deeper than Daybreak at its best, outclassing all others

Lawson stem and calyx that never bursts, exceeding four inches when full, a free bloomer like the Lawson.

ENCHANTRESS is a Lawson seedling, originated by Peter Fisher, who says: "I consider **ENCHANTRESS** the best seedling I have ever raised, as far ahead of Lawson as Lawson was ahead of everything else when sent out." Delivery of rooted cuttings begins January 15, 1903.

TRADE SHOWS LITTLE CHANGE.—THE APPROACH OF AUTUMN PROMISES GOOD BUSINESS.—GROWERS NEARLY PLANTED UP.—NOTES.

My last report on trade conditions would suffice for this week, but the heated season is nearing an end, and from present indications the coming season will keep us out of mischief. The early asters are about finished, so the surplus is diminished. The heavy funeral trade is falling off. Tea roses and carnations are in limited supply and quality not the best.

S. T. Hopper is reconstructing his range of houses, and his plans are now to build two modern greenhouses. His business has paid handsomely the last season.

Carl Johnson, who has charge of the floral department of the Powers Mercantile Company, reports his trade as holding up in great shape during the summer.

E. Nagel has been quite busy in the store the last week, "Ted," under whose charge this is, being on a vacation.

W. Pier, of the Hilliker Greenhouses, has his roses all benched and carnations nearly all planted.

R. Will has just finished planting three of his carnation houses and they are looking prime.

Frank Kindler, of St. Cloud, has completed the construction of his range.

Otto Will left Saturday for Asheville, also D. O. Pratt, of Anoka, Minn.

C. F. R.

Washington.

VISITORS ENTERTAINED ENROUTE TO THE CONVENTION.—A NICE TRAIN LOAD.

The Washington Florists' Club, rejuvenated for the occasion, met the visitors enroute for the convention and dined them at the National Hotel. The Philadelphians and the New Yorkers, with others, arrived at about four o'clock and 160 enjoyed the club's hospitality. The entire party got off for Asheville at 5:30 on a fine special train of Pullman sleepers.

P. G.

Begonia Rex

Thirty named varieties; strong plants, from 2½-inch pots, \$5.00 per 100.

Carex Japonica Var.

One of the most useful decorative grasses. Makes a pretty plant for the table or conservatory. Now is the time to get your supply for winter. Fine 2½-inch pot plants, \$2.50 per 100.

Cyperus Alternifolius

Bushy, outdoor grown plants in 3-inch pots, extra strong, ready for a shift, \$4.00 per 100.

Violets—Princess of Wales.

Large, field-grown clumps, free from disease. Plant now to get best results, \$5.00 per 100.

14 BARCLAY STREET, NEW YORK.

GREENHOUSES, WESTERN SPRINGS ILL.

Dreer's Offer of Cibotium Schiedei

If you have never tried this beautiful Fern in fine decorations or as a house plant, you should become acquainted with it at once. Its points of merit are so many that you cannot afford to be without it. It possesses a graceful, delicate habit unlike any other plant and while its appearance is that of being very soft, it is really as hardy as any of the commercial Palms. We have a fine stock of it this season and offer heavy plants as follows:

- 5-inch pots, \$1.00 each; \$10.00 per dozen.
- 7-inch pots, 1.50 each; 18.00 per dozen.
- 9-inch pots, 3.00 each; 36.00 per dozen.

The 7 and 9-inch pots are beautifully finished plants, suitable for decorative work.

Special Offer of Araucarias.

We have in stock about twelve thousand Araucarias, on which we are in a position to offer special values. It will pay you to procure your next winter's supply now and not only gain the benefit of the summer's growth, but also cheap transportation rates, as these plants can be safely shipped by fast freight during the summer months.

ARAUCARIA EXCELSA.

Westerly, R. I.

REUTER PRACTICES EARLY PLANTING.—TWELVE CARNATION HOUSES PLANTED WITH STOCK FROM POTS.—ESTABLISHMENT TO BE ENLARGED AND REBUILT.

At the Westerly greenhouses of S. J. Reuter the planting of carnations is being rushed along as fast as possible. Early planting is considered the best and whenever it is possible a house is emptied in the spring and planted from pots. This year twelve of a range of twenty-eight carnation houses are planted with stock from pots. When it is possible to plant early this seems to give the best satisfaction. The entire plant is now devoted to roses and carnations. A full assortment of pot plants and stock for the retail trade is raised in New London, where a branch business is carried on. On account of the new white carnation which will be sent out from this place this year the larger part of the glass is devoted to carnations, with Lillian Pond in the majority.

The summer trade at Watch Hill, a growing fashionable watering place some five miles from Westerly, is on the increase from year to year, making it necessary to run a store there. Recently Mr. Reuter purchased a tract of land comprising twenty seven acres, adjoining his property, which is admirably located for greenhouses, having a gentle slope to the south. On this land a model range of houses for roses will be erected. The old houses in the main range will be taken down and in their place new ones erected for carnations.

There are seven 200-foot houses devoted to roses, including Bride, Bridesmaid, Golden Gate, Ivory, Liberty and Meteor. The stock in these houses is looking in the best of condition and promises well for the coming winter. R. I.

ALEDO, ILL.—Charles McChesney has his new greenhouses practically completed and is moving in the stock.

CLINTON, IA.—John R. Bather is building a new house 25x75 in front of his other houses on Comanche avenue.

JACKSON, MICH.—Wencel Cukierski, former superintendent of parks at Grand Rapids, will likely have charge of the landscape work soon to be undertaken by the park commissioners here.

HAMMOND'S PAINT AND SLUG SHOT WORKS, Fishkill-on-Hudson, N. Y.

Sing a song of summer,
 A pocket full of kicks;
 Four and twenty florists
 In an awful fix.
 Fill their store each season
 With goods they cannot sell;
 Indignant and disgusted--
 Customers rebell.

Sing a song of profit,
 A pocket full of cash;
 Four thousand happy florists--
 Not a bit of trash.
 The stock they show each season
 Is the newest and the best;
 'Tis Harry's own selection
 And Paul--he does the rest.

Harry is over in Europe now. He knows the kind of stock the American trade requires and will take nothing else. Paul was at Asheville and showed there what a first-class florist's supplies should consist of. The display included the usual comprehensive collection for which this house has become noted at the annual S. A. F. Conventions and was in itself a liberal education in the development of the florists' trade. If you were unable to go to Asheville or to visit our store, send us your address for an Illustrated Catalogue.

CLUB HOLDS SUCCESSFUL MEETING ACROSS THE GREAT RIVER.—OFFICERS ELECTED.—HOST HAS ROSES PLANTED WITHOUT GLASS.—GOOD STOCK.—A PLEASANT EXCURSION.

The August meeting of the St. Louis Florists' Club was held in Edwardsville, at the home of J. F. Ammann, with twenty members and nine visitors present. The annual election was held, with the following result: President, J. W. Dunford; vice-president, George B. Windler; secretary, Emil Schray; treasurer, J. J. Bencke; trustees, John Steidle, C. A. Juengel and F. M. Ellis. Some of the ballots were very close and caused considerable amusement. It was decided to leave the flower show question open until next meeting, but several members are favorably inclined. F. W. Weber, J. W. Dunford and F. J. Fillmore spoke on this subject. The treasurer repaid the second payment on the World's Fair stock to those who had come in. The committee which was appointed to see the telephone companies and have the wholesalers names dropped from the classified list reported that it would be done in the future by both companies. The secretary's report was read and showed that the average attendance had been fifteen, maximum twenty-six, minimum seven, for the past year. Nine meetings were held in the hall and three outside. The treasurer's report showed a surplus in the bank. P. T. Barries will show lantern slides of the Missouri Botanic Garden past and present at the next meeting.

Mr. Ammann has about 25,000 feet of glass, six houses which he is rebuilding this summer using the Dietsch short-span patent. He has two tubular boilers of about thirty-five horse-power which heat his range. The roses have been planted on the benches all summer without glass and they are fine, stocky plants. The Beauties suffered some from rain and weather and have some black spot but he thinks they will come out all right as soon as he has them under glass, which he is having put on by a force of men at present. Mrs. Ammann served refreshments for all.

The St. Louis party to the convention, via Cincinnati, included F. C. Weber, Herman Weber, Geo. Waldbart, John Connon, Mrs. F. C. Weber, Miss Adele Weber, Miss Clara Moss, Miss Rose Windler and Miss Frances Berry, Geo. M. Kellogg, of Pleasant Hill, and J. T. D. Fulmer and Miss Fulmer, of Des Moines. R. J. M.

FUMIGATION METHODS

By PROF. W. G. JOHNSON

Formerly State Entomologist of Maryland

A Practical Treatise and timely work on cheap
and effective means of destroying insect pests and
other vermin in various places. This work is the
outcome of practical tests made by the author, to-
gether with the experiences of others, and is one of
the most important books published this season and
is much needed at this time. It will be of particular
interest to

FRUIT GROWERS AND NURSERYMEN
owing to the widespread prevalence of the notorious
San Jose scale. Hydrocyanic acid gas is the only
practical remedy for the destruction of this pest, and
is being used more extensively than ever before by
nurserymen and fruit growers. The perfection of
the apparatus for fumigating young orchard trees is
outlined in this work. The methods can be easily
applied in orchards and nurseries for many danger-
ous pests at very small cost. The writer is consid-
ered the best authority on this subject in this country
and has left nothing undone to make this the most
complete work of the kind ever published.

GARDENERS AND FLORISTS
have found that vegetables and flowers cannot be
grown under glass without frequent fumigation for
the destruction of insect pests. Hydrocyanic acid
gas has solved this problem. The methods of pro-
cedure are fully described and every detail is given
for generating and applying the gas.

MILLERS AND GRAIN DEALERS
have been looking forward to the publication of this
work, as hydrocyanic acid gas has been found one of
the most important materials for clearing mills and
warehouses of insects. The subject of carbon bis-
ulphide for fumigating mills and elevators con-
taining grain in storage is also thoroughly consid-
ered. To this trade the work is indispensable and
transportation companies have found it of great
value for the fumigation of cars, ships and other
inclosures infested with vermin.

FARMERS OF THE COUNTRY
have here fully described a simple, easy remedy for
gophers, prairie dogs, squirrels and other animals
in the ground, and rats and mice in any inclosure.

COLLEGE AND STATION WORKERS
will find it an up-to-date reference work on this sub-
ject. It is complete in every respect and is the only
work of the kind ever published. It is written in a
popular non-technical style, profusely illustrated,
handsomely bound, covering 250 pages, price, post-
paid, \$1.00.

PHILADELPHIA

M. RICE & CO.IMPORTERS AND
MANUFACTURERS**LEADING FLORISTS' SUPPLY HOUSE**
918 FILBERT STREET.

Philadelphia, August 16th, 1902.

To the Delegates of the S. A. F.:

Ladies and Gentlemen: Returning from the Asheville Convention we especially invite you to stop off and visit our establishment. Our Mr. M. Rice has just returned from Europe where he has secured some decided novelties. Prominent among these is a new departure in crepe paper. It has the appearance of fine corduroy, having a velvety sheen and lustre entirely different from anything in its line. It is not waxed. It is four ply and two colored, a fine holly red on one side, being green on the other. It comes in all the popular shades and its many combinations of colors will enable the decorator to match both flowers and foliage with one piece of paper. We alone handle this great novelty. A special line of baskets will be found very attractive. There are many other specialties from these importations, things which we will be pleased to show you.

We feel sure to astonish you with the extent of our new stock of ribbons. We have invested thousands of dollars in this line, which contains all the best and most popular shades for florists' work. Every quality and width to suit the demand. An expert is at the head of this department, which is to be one of the features of our business. You will see that our line of staple goods was never in better condition. Our trade in Wheat Sheaves, Cycas Leaves, and Immortelles is second to none in this county, as the prices always favor the buyer on these standard supplies.

Our grand display at Asheville attracted the attention of every visitor, and was voted the finest there.

Yours Very Truly,

M. RICE & CO.,

and is now The Parker-Bruen Mfg. Co.

**The Model Extension
Carnation Support.**

Flushing, Long Island,
Dec. 11th, 1901.

MR. THERON N. PARKER,
Brooklyn, N. Y.

Dear Sir— I have used your Wire Carnation Support the last two years. In all about 12,000. They fill the bill in every particular. Nothing could be more satisfactory and would give me a great deal of pleasure if I can bespeak a good word for you to the trade and you are at liberty to refer to me at any time.

Very truly,
A. L. THORNE,
La Fayette, Ind.,
July 8th, 1902.

MR. THERON N. PARKER,
Harrison, N. J.

Dear Sir— After using your Model Carnation Support in two of our houses the past winter, we have come to the conclusion that it is perfectly adapted to supporting carnations, and shall use them on all our plants the coming season. We were much pleased with the simplicity, strength and neat appearance of the support.

Yours truly,
F. DORNER & SONS Co.

Los Angeles.

BUSINESS UNUSUALLY ACTIVE FOR THE SUMMER SEASON.—STOCK NONE TOO PLENTHFUL.—PERSONAL DOINGS OF NOTE.—GOTTINGS HERE AND THERE.

In the way of cut flowers everybody expects business to be dull from the time June commences are over until our society people return from the various beaches, but this city is now large enough to keep something doing all the time and this year particularly there is no cause for complaint. Asters and Amaryllis Belladonna are coming in freely. Roses are scarce on account of hot weather. Carnations are rather scarce and, while the blooms are good, most varieties are short-stemmed.

Oliver C. Saakes, proprietor of the Central Park Floral Company, has been in the California Hospital for several weeks suffering from an affection of the eyes. Total blindness was feared for some time but a decided improvement gives hope for entire recovery.

W. A. Peschelt will supervise the grounds and parks of the Southern Pacific Railroad at all their stations on the Los Angeles division. He was head gardener for Senator J. P. Jones at Santa Monica.

F. Edward Gray has finished moving his greenhouses from the nurseries at Alhambra to his city location, corner Main and Adams streets, and expects shortly to have all in first-class running order.

J. F. Mendenhall, at present superintendent of Los Angeles city parks, has announced he will not be a candidate for re-election to that position, but aspires to be city assessor.

The city of Pasadena, having voted bonds and secured property for parks, is now offering a prize of \$400 for the best plan for improving the grounds.

J. W. Wolfskill reports his stock progressing finely on his Boyle Heights property, where his new range of greenhouses is nearly completed.

Rees & Compere, the bulb growers, have purchased eight acres of land near Long Beach and are moving to that place.

The Germain Plant and Seed Company reports this the most prosperous summer season on record.

C. A. Hovey, of South Pasadena, is exhibiting some remarkably fine gladioli. D. R. W.

CUT FLOWER BOXES

WATERPROOF. Corner Lock Style.

The best, strongest and neatest folding cut flower box ever made. Cheap, durable, handy. To try them once is to use them always.

DON'T USE OLD STORE BOXES.

FOR
Florists.**

We are headquarters for a general assortment of the necessary material and supplies that you are looking for. If you are about to improve or construct, consult us.

In connection with the dismantling of the Pan-American Exposition, we have for sale:

20,000,000 FEET of fine seasoned lumber, practically new, consisting of all sizes of joists, timbers, dressed and matched boards and flooring; also sash and doors.

50,000 FEET of roofing glass.

PIPE.

We are headquarters for pipe. We offer you:

100,000 FEET of 2 to 4-inch wrought iron, lap welded casing. We can furnish this material in three ways: Either with sleeve or jacket couplings, screwed ends and threaded couplings or with expanded cast iron flanges with bolts and nuts.

1,000,000 FEET of standard black wrought iron pipe, size 3/8 to 12-inch. It is second-hand but has new threads and couplings and is in first-class condition.

1,000 TONS of galvanized wire 9, 10, 11, 12, 13, 14 and 15 guage.

50,000 FEET of 2, 3 and 4-inch cast-iron soiled pipe and fittings.

100,000 FEET of garden hose, 3/4 and 1-in.
75,000 FEET of cotton rubber-lined fire-hose, (rubber-lined in and outside), ranging in sizes 1 to 2 1/2-inch.

VALVES and fittings of every kind.

BOX COILS for heating purposes.

RADIATORS, new and second-hand.

We also offer the following bargains in

Heating Boilers

50 CAST-IRON sectional heaters, capacity from 450 to 5,000 feet.

SUMMER SEASON SEEMS DULL BUT SALES EXCEED LAST YEAR'S RECORD.—DOINGS OF THE GROWERS.—MANY ON VACATIONS.—NOTES.

In general, summer business is dull but the month of July and the three weeks of August will show a satisfactory increase over the same period of last year. The seed and bulb dealers say that the spring and summer business surpassed their anticipations, and the same sentiment is expressed by nurserymen and growers of bedding plants.

J. W. Dudley & Son, of Parkersburg, W. Va., will add 20,000 feet of glass to their plant. They operate four boilers and use both coal and natural gas for fuel. They are going in strong on Beauties this year and have also planted 20,000 carnations, mainly Lawson, Hill and Nelson.

"Billy" Lowe spent a few days at Atlantic City and then went to Asheville to attend the convention. Mr. Burke, Mr. Reineman and Mr. Nelson are also in attendance at the convention.

Walter Carney, of Homestead, has been offered the chieftainship of the Whittaker volunteer fire department.

Edward McCallum and Wm. Potter, of the Pittsburg Cut Flower Company, have returned from Green county.

The florists now in Atlantic City are Miss McKinley, L. I. Neff, John Orth, John Boldinger and Oliver Beet.

Julius Ludwig went to Rochester and Buffalo on business. He will visit Atlantic City, New York and Boston.

Mr. and Mrs. Elliker, of Homestead, have returned from New York.

E. L. M.

WICHITA, KANS.—A. Ellis, who has been visiting at his former home, Keene, N. H., returned early in the week.

SO. BETHLEHEM, O.—Charles Vorkeller, formerly of Allentown, Pa., has rented the place and bought the stock of R. B. Williams, who will retire and probably visit his old home in Wales, after an absence of thirty years.

WEEK OF BRISK BUSINESS SUCCEEDED BY DULL SPELL.—WEATHER VERY COOL.—STOCK LOOKING WELL.—PERSONAL AND TRADE NOTES.

Last week there was business all along the line but now there is nothing doing and with the thermometer standing at 65° most of the time it is pretty hard to keep warm. The cool weather is keeping the lawns in beautiful shape. Just now there is a tremendous supply of rudbeckias, which have no selling value. Gladioli and asters are still pouring in by the thousands and the latter are very good. Sweet peas are in large supply and do not sell above \$1 per thousand. Roses are short in stem, but the buds are good and the price is small, so that even matters up.

The oldest flower store in town, established by E. Sheppard & Sons, will soon be a thing of the past. C. L. Marshall, who has been occupying it for several years, will vacate to make room for the gas light people, who will use it for their down town office. Marshall will locate on Central street.

During Patton's absence his store has been made spick and span, having been subjected to several coats of white paint, touched up here and there with a dash of gold. Burt, who is located next door, has done likewise.

One of the questions of the day is as to where we will get coal this winter, and how to pay for it at \$10 per ton. One grower has been talking of changing his fuel to oil.

Thos. Waterworth, gardener at the Ayer estate and for E. H. Allen, is now assistant superintendant at the Lowell Cemetery.

After spending several weeks in England, John Haynes arrived home last week, looking the picture of health.

P. R. Burt has gone to Caanan, N. H., to look at a sixty-acre farm he contemplates buying.

Whittet & Company are very busy rebuilding two of their carnation houses. A. M.

Profitable Greenhouses
"Gurney" greenhouses are profitable greenhouses because they're operated under the most economical conditions.

"Gurney" Heaters

maintain an even heat with the least amount of care, burn a minimum amount of coal to maintain the desired temperature, require no brick setting, and are without question the most efficient constructions on the market.

A host of nurserymen already use the "Gurney." If you're not on the list, send for catalogue and find out more about it. **Gurneys** promote the greatest hothouse success.

Seasonable Plant Notes.

The month of September is an important one to the plant grower, whether he be a grower of flowering plants or handling those that depend upon the beauty and grace of their foliage to secure them a place in the plant market. This month may be termed high tide in the season of growth of many of our commercial plants, and it also marks the beginning of the season of selling in quantity to those who grow plants for the wholesale trade.

There is a great difference in the atmosphere as the nights grow longer, the air usually containing a large proportion of water, or rather the great difference in temperature between day and night makes the condensation of the moisture more apparent, and in consequence it is good practice to have all watering in the greenhouses done earlier in the day, so that the surplus water may be evaporated before night. After September 1 we find it most satisfactory to have the watering done between 9 a. m. and noon, and also that plants in general do not require nearly so frequent waterings at this season as are found necessary in the early summer. This rule holds good until the fires are started for the winter, after which the plants will naturally dry out much more. We also find it best to keep the shading in fairly complete condition over the palms and other foliage plants at this time, for the sun still has much power, and while one is now safe with comparatively light shading on the east side of a house of foliage plants, there is still danger from the west side of the house, for there are very few houses built with perfect glass.

It is a well-known fact to those who handle many palms that a plant that has been grown in a comparatively light house, given a reasonable amount of sunshine and plenty of fresh air during the summer has much more enduring foliage than one that has been grown under heavy shade, but the buyer will take the shade-grown plant in nine cases out of ten on account of its rich, dark green color, and as a natural result the growers are governed accordingly. A plant of *Areca lutescens* that is grown under natural conditions of light and air has quite bright yellow footstalks to its leaves, but the buyer is likely to be unappreciative of this point of beauty, and to take the green-stemmed and dark-foliaged plant in preference, regardless of the fact that the foliage of the latter is likely to be much more tender.

The Boston ferns will require only light shade now, and also an abundance of air and water, for when kept too close the fronds will grow long and thin and fall over too much, a well grown plant being not only nicely furnished around the bottom, but also having the center well filled with more upright fronds. To grow such plants it is needful to give them plenty of room to develop. Those thin, straggling plants will not produce the same profit from a given space of bench that may be had from a lot of stout and sturdy specimens, even though there may be a greater number of the thin kind produced per house.

It is the experience of those who handle old plants of *Ficus elastica* for cuttings that these stock plants gradually lose their vitality with repeated croppings for cuttings, and it is a good plan to renew the stock in the course of two or three years. Where this cannot conveniently be done, the old plants may be renewed in vigor to a great extent by planting them outdoors in the open ground for the summer, giving them a good rich soil and frequent cultivation, and if the season be a dry one it is a good plan to have them within reach of the hose so that the plants shall not suffer from lack of moisture. The ficuses may be planted out during the latter part of May or beginning of June and remain until there is danger of frost, when they should be lifted and potted up, and will have secured a fresh lease of life from their summer experience and will produce an abundance of new growths suitable for cuttings.

Old plants of *Pandanus Veitchii* may also be treated in much the same way and will frequently start a fresh crop of cuttings by autumn from the dormant eyes of the stem, and as one seldom gets more cuttings of *pandanus* than are needed, this extra crop may prove valuable.

Easter lily bulbs will soon be in the market, the early deliveries coming to hand during the month of September, and while it is frequently said that "the early bird catches the worm," it is also sometimes said that the early bird among lily growers catches too many worms for the welfare of his bulbs, and that it would pay him better were he not to insist on too early delivery of his bulb order. In the light of past experience this seems to be reasonable advice, for there is but little doubt that some of these lilies are dug before they are fully matured, and the later shipments of a

reliable dealer may prove much more satisfactory.

Easter of 1903 falls upon a late date, being the second Sunday in April, and there ought not to be any great difficulty in getting in the flowers on time; in fact there may be some risk of getting them too early. The practice of potting up Easter lilies in small pots has frequently been referred to in these columns but is worth remembering on account of the saving in space and also in permitting the weeding out of any diseased or unsatisfactory plants before they are finally potted into the pots in which they are to bloom. But whatever may be the practice in regard to potting, there is one safe rule to observe and that is to pot up these bulbs as soon as they are received, for any and all lily bulbs are liable to suffer from prolonged exposure to the air.

There is still time to shift on various young palms and other decorative stock and to get them well established before winter sets in, perhaps the greatest obstacle just now being lack of space for such operations, a condition that is hard to remedy just at this season, while seedling stock is pressing for attention and the larger plants are cramped for space.

This is the time of year when an additional range of glass looks especially enticing were it not for the prices that are exacted by our various infant industries for the material required by the hard-working grower, for with the stock in the houses already crowded and lots of plants that must be lifted from the open ground and brought under shelter before frost it gets to be quite a perplexing problem for the greenhouse man.

It is taken for granted that greenhouse repairs are concluded before this, but if not there should be no further delay, for there is more difficulty in glazing and painting satisfactorily on account of moisture than there is earlier in the season. W. H. TAPLIN.

A Pillow of Summer Stock.

The aster season is at its height and in this connection there will be interest in the accompanying picture, a reproduction from a photograph of a floral design

made not long since by the George Wittbold Company, Chicago. It is a simple affair, yet an effective hot weather design. The material used is such as is likely to be at hand at any moment in almost every flower store all through the heated term. For covering the moss in the frame a few ferns were required and this was supplemented by adiantum and Sprengerii, which add much to the fresh, bright appearance of the whole. The flowers used were a few asters, a handful of open roses and a few bunches of light colored sweet peas. One of the most expert flower workers in the country says that "when the customer has no preference always sell a pillow; you can use almost anything in it with good effect." Certainly this is a good showing for little money.

The Self-Fastening Virginia Creeper.

An article appeared in the AMERICAN FLORIST, for August 16, on the Virginia creeper, which interested me very much. At Ottawa we have a native self-fastening variety growing wild in this vicinity and under cultivation here which is giving great satisfaction and which I believe to be superior to *Ampelopsis Englemanni*. The latter has been growing in the Botanic Garden here since 1895, but was not compared with the native variety as a climber until this year, when some additional plants of *A. Englemanni* were sent to us from the Agricultural Experiment Station, Ames, Ia. In the report of the Dominion Experimental Farms for 1900 a popular description was given of the native variety by the writer, under the name self-fastening Virginia creeper, *Vitis quinquefolia hirsuta*. This variety was also referred to by Dr. Wm. Saunders, before the Ontario Fruit Growers' Association, some years ago. Can this be the same variety referred to by Donn as *Ampelopsis hirsuta*, by Pursh in 1814 as *Cissus hederacea* var. *hirsuta* (Pursh Vol. I, 170), and by Torrey and Gray as *Ampelopsis quinquefolia* var. *hirsuta* (1838-40, Vol. I, 245)? Both Pursh and Torrey & Gray gave Allegheny mountains as the habitat.

The common form here has large, glossy, deep green, smooth leaves, long tendrils, and is practically without discs.

The variety *hirsuta* has smaller, rather dull green leaves, downy above and beneath, and is furnished with short tendrils and large discs which cling tenaciously to bricks and stone and on wood in shady places or where protected by the leaves. It is much neater than the ordinary form and requires practically no attention as regards training. The leaves color highly in the autumn. The principal points of difference noted here between *Englemanni* and *hirsuta* are: *Englemanni* has fewer discs in a cluster than *hirsuta*, the greater number of discs and greater clinging powers of the latter variety giving it an advantage over *Englemanni*. The dentations of the leaflets of *Englemanni* are deeper than those of *hirsuta*, and the petioles longer and usually reddish in color.

W. T. MACOIX.

Last of the Boston Weekly Shows.

The last of the free weekly exhibitions given during July and August by the Massachusetts Horticultural Society was held on August 23, when the main exhibition hall was nearly filled with exhibits. Asters were a special feature in its schedule and were shown more extensively and of better quality than for some years, the cool, damp summer having suited them. For fifty vases of large-flowered varieties, all classes admissible but not less than twelve varieties to be shown, F. A. Blake and W. Whitman were the winners. For Victoria and pæonia-flowered Joseph H. White, James Wheeler, gardener, had the best display, followed by W. Whitman and F. A. Blake. E. S. Converse, D. F. Roy, gardener, showed the best *Temple's* and W. Whitman led in the pompon class.

Hardy herbaceous plants filled three large tables, the Shady Hills Nursery Company having the best display of thirty varieties, closely followed by Carl Blomberg. Some of the best herbaceous plants shown were the following: *Helianthus rigidus* Miss Mellish, *H. mollis*, *Lilium Henryi*, *L. Wallacei* and *L. Leichtlini*, *Callirhoe involucrata*, *Liatris pycnostachya*, *Scabiosa Caucasica*, *Stokesia cyanea*, *Rudbeckia purpurea*, *Veronica longifolia subsessilis*, *Aster Novæ-Angliæ alba*, *Physostegia Virginica*, *Lobelia cardinalis* and *Chelone Lyoni*.

Numerous miscellaneous exhibits were staged and received gratuities. Arthur Cowee had 300 spikes of Groff's hybrid gladioli and received honorable mention for same. The varieties were good but spikes rather small. F. J. Rea and W. Whitman each had a fine table of gladioli. W. P. Lothrop made a grand display of cactus dahlias which attracted much attention. Geo. Hollis showed phloxes in variety and other exhibitors had promiscuous displays.

J. E. Rothwell, Emil Johannsen, gardener, showed an interesting seedling orchid, *Lælio-cattleya* *Edmond Rothwell*, (*Cattleya amethystoglossa* × *Lælia cinnabarina*) which carried a four-flowered inflorescence and was awarded honorable mention.

There was a first-class display of fruits, the apples, pears and peaches being excellent, while the celery and cauliflowers among the vegetables were very fine. The Boston Mycological Club showed over 100 varieties of fungi, and Mrs. Grinnell fifty-two varieties, the latter winning for the best display of edible mushrooms. Four large tables were filled with the fungi exhibits and they were the leading attraction in the exhibition.

W. N. CRAIG.

A PILLOW OF SUMMER FLOWERS.

HAMILTON

Where Canadian ...Florists Meet

HAMILTON, the city in which the Canadian Horticultural Association will meet next week, is almost four times the size of the Mecca whence the S. A. F. pilgrims are but just returned. It is the second city of the Province of Ontario, the third in the Dominion, and one of the most beautiful on the American continent.

Hamilton is northwest from Buffalo, almost due west from Toronto and about equally distant from each. Splendidly located on Hamilton Bay, it has made a most phenomenal growth. In 1870 the population was 26,716 and the property assessment for taxation \$9,362,152. In 1900 the population was 51,561 and the value of property returned by the assessors \$26,099,115. To-day the population is 55,000, a people of wealth, refinement and taste, who have surrounded themselves with the comforts of life and have a city of which they are proud. Here the question of municipal ownership has been practically solved, though not carried to any great extent. Some years ago the city acquired the water works, at a cost of \$1,750,000, but it has proven a good investment, for with excellent service, the surplus revenue is now taking care of the interest on the entire city debt, some little more than \$3,500,000.

The city of Hamilton has its own peculiar beauty, situated as it is at the foot of a mountain and almost surrounded by water. Its shaded streets are cool and clean. The trees are luxurious and the pavement one which has attracted widespread attention. The material is tar macadam and its use gives the streets a fine appearance, while it is at the same time durable and economical.

The mountain is the first point to which the Hamiltonian directs the visitor and the view is one not soon to be forgotten. The trip is made by rail. It is a most delightful ride and when one reaches the summit he beholds a sight not easily surpassed for loveliness. The wide streets, straight, regular and well paved, shadowed by rows of majestic elms, stretch out for two miles, from the foot of the mountain to the bay, the churches, with their tall steeples, the factories, for it is a factory town, the blocks of business houses, the mansions of luxury and the pleasant homes of the artisans, look like the ranks of chessmen on a gigantic checkerboard, while in the far eastern distance the spires of Toronto are visible on a clear day. In the valley are some of the finest fruit lands in the world, a landscape of peace, prosperity and content.

Hamilton has two markets, the largest being immediately in the rear of the city

hall, and on any Tuesday, Thursday or Saturday in summer the horticulturally inclined visitor will find here something of interest. Dundurn Castle and park are now owned by the city. The park is a beautiful spot, of thirty-two acres, and

CITY HALL, HAMILTON, ONT.

A GLIMPSE OF HAMILTON, ONT.

(Where the Canadian Horticultural Association meets.)

here may still be seen breastworks built for defense against the Americans in 1812. The city has eight other parks.

Hamilton has a live Gardeners' and Florists' Club and on its rolls are over ninety per cent of those connected with gardening and floriculture in the vicinity. The officers are: President, Fred. Turner; vice-president, J. C. Jenks; treasurer, John Connon; secretary, T. Lawson.

The Hamilton Horticultural Society is another flourishing organization. It is giving the flower show which will be a feature of the meeting next week. The officers are: President, Andrew Alexander; first vice-president, J. O. McCulloch; second vice-president, James Anderson; secretary-treasurer, J. M. Dickinson.

The first session of the convention will be held in the Hamilton city hall, at 2:30 p. m., Wednesday, September 3, when Mayor Hendrie will welcome the association and give its members the freedom of the city. After the response the president, Joseph Bennett, of Montreal, will give his address. Mr. Bennett is well known as one of Canada's most skillful men in the florist business, a versatile speaker, and practical man in every sense of the word. He will be followed by numerous other speakers to whom timely topics have been assigned.

The association headquarters for the convention will be at the Waldorf Hotel, where the rates are \$2 a day, American plan. Members of the local committee will meet all trains and supply members with badges and any information wanted. Those arriving before noon should go direct to the exhibition hall, corner Park and Robinson streets.

The trade exhibit, under the management of the Gardeners' and Florists' Club, will be a feature of the convention. Already over 4,000 square feet of space has been applied for, and it will afford

delegates an opportunity of comparing stock, and to those building, or contemplating doing so, the exhibit of heating and building material will be of much interest, as will the display of plants, florists' supplies and various accessories, be to the general florists.

The entertainment committee has a well planned programme and is desirous that every visitor should partake of the hospitality. The association invites everyone in any way connected with horticultural industry to its meeting. Its objects are to lift up, and carry forward all that tends to advance the interests of horticulture. The roll will be open for membership at the meeting, or names may be sent to the secretary pro tem, Wm. Gammage, London, Ont.

The officers of the Canadian Horticultural Association are: President, Joseph Bennett, Montreal, first vice-president, C. M. Webster, Hamilton, second vice-president, George Robinson, Montreal; treasurer, Hermann Simmers, Toronto; secretary, A. H. Ewing, Woodstock; executive committee, J. H. Dunlop, W. J. Lawrence, W. Muston, C. Johnson, T. Manton, W. Gammage, J. Wilshire, C. Scrim and J. Graham

Exhibition at San Francisco.

The first flower show given by the Pacific Coast Horticultural Society was a fine success all around. The committee of arrangements, consisting of William Eldred, T. A. Munro, H. Plath, F. Cleis, John A. Atkinson and Chas. Abraham, certainly deserves the fullest credit for the work they accomplished. The attendance might have been better, but as long as both ends met no one will object. All prizes were paid on Saturday night, which will be an assistance for the next show, the coming spring.

Beginning at the entrance, Sievers & Boland had a large table devoted to tuberous begonias, palms, carnations and ferns. They received first prize on begonias, first prize on best vase of carnations for Hannah Hobart and a certificate of merit for their red seedling, Mrs. Whitclaw Reid. The carnations drew much attention from the visitors for their size and beauty.

Fick & Faber, of San Mateo, occupied a long table and showed some thirty varieties of carnations, standard sorts and seedlings. Among the latter were Miss Louise Faber, the stems being double the length of any other variety. They received a certificate of merit for the latter and first prize for best and largest collection.

Between these two tables were the exhibits of the forty flower stores of this city, notable through their absence. Only two pieces were on exhibition the first day, a wedding bell sent by Mr. Stevenson and a "welcome" piece by F. Cleis, he receiving \$20 for first and the former \$10 as second prize. Mr. Cleis also received two more prizes the second and third days, for bridal bouquet and basket. A. Mann was second for basket.

Next in the line was a group of palms and ferns in imitation oak pots and stands exhibited by G. Gagne. Common pots and pans were covered with a mix-

ture of cement and colored so that the uninitiated could not tell the difference. He was given a certificate of merit, also a first prize for another group of palms, the best collection staged for effect.

ham was second for decorative plants and first for best single specimen.

H. Plath was first for best basket and best fern. His group of ferns and dracaenas were the best group in the show but not entered for competition.

Chas. Crockford had a wonderful display of oleander blossoms. H. Goertz-hain, of Redwood City, made a display with asters, receiving first prize. Ferrari Brothers exhibited a large vase of lilies. Servean Brothers made a fine display of ferns, coleus and palms not for competition. Golden Gate Park had very fine dahlias and tuberous begonias, perennials and annuals on exhibition but not competing.

The California Nursery Company, of Niles, had a fine display of fruit, all named, and figs showing the curious and very interesting fig wasp, alive and dead, in and out of the fruit.

The gladioli of Wm. Eldred were the best and P. Grallert had a fine table of corcopsis. Roses were not to be seen, with the exception of one small vase, but there were many novelties shown not provided for in the schedule.

GOLDEN GATE.

Beautiful Willow Grove Park.

The advent of the trolley was a great boon for the city of Philadelphia, for, in addition to the rapid transit facilities, it made possible that beautiful park at Willow Grove, on the old York road, thirteen miles out from the center of the city. The old York road from the city line to Willow Grove is a wide, well macadamized avenue which runs through a rolling country with either side bordered, for the most part, by fine private country seats, among them that of John Wanamaker, which covers a large area. When the great utility of the city trolley system was recognized, extensions were in order and suburban routes were largely patronized for the benefits derived solely

The park contains 140 acres, one-half of which was low, but which has been reclaimed and by the construction of several lakes and judicious filling and planting, has been turned into charming landscape effects. There are several winding paths and avenues leading from the main entrance through this broad stretch of lawns interspersed with lakes, while here and there a bit of color is added with a bed of coleus or bright geraniums or a subtropical mound. All are so harmoniously arranged that no devotee of the new school could find objection or have ground to criticize in any way. A public road divides this, about one-third part of the grounds, from the park proper, but as each side of the roadway is lined with well-kept privet hedge it appears as a part of the grounds. Crossing this road we are now in the part containing the amusement features. Here the ground commences to rise. In the foreground is a lake of about five acres extent, in the center of which stands the famous \$100,000 electric fountain.

On the left of the lake is situated the grand music pavilion. This is simply a roof supported on very tall, substantial columns. From the band platform and shell the ground rises so that from any of the many rows of benches a good view of the stand may be obtained. The pavilion proper seats 3,800. Adjoining these seats, extending over the lawns solidly, there are accommodations for 11,500 more, while the standing room capacity brings the number of those who may enjoy the music at one time up to 35,000 or more people. During the season, which extends from Decoration day until Labor day, there is to be heard the best musical talent the country can produce. This season was opened by Sousa, followed by Victor Herbert, of Pittsburg. The Kilties of Canada were next, they being succeeded by the American Band, of Providence. The Royal Band of Italy will close the season. The concerts take place daily, afternoon and evening. The fountain display at night is fine, the electric light effects being very beautiful. In addition to these attractions there is the usual assortment of "Midway" entertainments. The best of order is kept, there being no "barking" or other solicitation allowed.

There are two large picnic groves, well shaded with tall trees. A large number of swings are also provided for the free use of the visitors. The perfect order in which the walks, lawns and flower beds are kept is a great credit to David Joyce and his corps of twenty-five assistants. Mowers are kept going constantly and no private place shows a better lawn. The extreme edges of the grounds are bordered with irregular beds of shrubbery, in front of which are perennials and herbaceous stock.

There are some beautiful specimens of *Hydrangea paniculata*. The flowers are borne on stout stems that hold the blossoms up well. Mr. Joyce says that he gets a short, sturdy growth by liberal pruning early in the spring. He also believes in root pruning and sinks a spade well into the roots once a year. At one time he was much troubled with plantains in the lawn, but said he got rid of them effectively by lowering the mowers after heavy rains, when the ground was well soaked, and the knives cut the hearts out of them. This, of course, trims the grass severely, but as the soil is very moist it has a chance to recover before dry weather.

A range of greenhouses heated by the

HYDRANGEAS AT WILLOW GROVE PARK, PHILADELPHIA.

ture of cement and colored so that the uninitiated could not tell the difference. He was given a certificate of merit, also a first prize for another group of palms, the best collection staged for effect.

A long table of dahlias in some 150 named varieties was next, with first prize for largest and best collection. This exhibit belonged to Wm. Eldred, gardener for the Crocker estate. J. Thompson received first for best cactus dahlias. Eugene Burgle received first for best display of annuals and perennials. C. Abra-

ham was second for decorative plants and first for best single specimen. H. Plath was first for best basket and best fern. His group of ferns and dracaenas were the best group in the show but not entered for competition. Chas. Crockford had a wonderful display of oleander blossoms. H. Goertz-hain, of Redwood City, made a display with asters, receiving first prize. Ferrari Brothers exhibited a large vase of lilies. Servean Brothers made a fine display of ferns, coleus and palms not for competition. Golden Gate Park had very fine dahlias and tuberous begonias, perennials and annuals on exhibition but not competing. The California Nursery Company, of Niles, had a fine display of fruit, all named, and figs showing the curious and very interesting fig wasp, alive and dead, in and out of the fruit. The gladioli of Wm. Eldred were the best and P. Grallert had a fine table of corcopsis. Roses were not to be seen, with the exception of one small vase, but there were many novelties shown not provided for in the schedule.

AQUATICS AT WILLOW GROVE PARK, PHILADELPHIA.

exhaust steam from the boilers of the electric light plant supplies all the plants for the bedding. The several lakes near the entrance to the park are well stocked with water lilies. These came from the H. A. Dreer collection and attract a great deal of attention from the visitors, as they are growing luxuriantly. They have been a little late in flowering this season, as water in the lakes is supplied by springs in the bottom which are quite cold, and this, together with the cool season, has kept them back.

To give an idea of the popularity of the park as a pleasure resort, the daily attendance ranges from 45,000 to 60,000 on all clear days, while this is exceeded considerably on Saturdays and Sundays. Their banner day was the Fourth of July, when the attendance reached 140,000 people, a very good daily attendance for a World's Fair. The music, which this season costs the management \$46,000, is absolutely free, there being no charge for admission to the park or for reserved seats in the auditorium. The only remuneration the company has is in what is obtained from the "privileges" and the car fare, which is 10 cents each way. It has often been said that no such resort would become popular without the liquor privilege, but although Willow Grove Park is now in its seventh year, and its annual record of visitors has increased so that last season it reached over 4,000,000, not a drop of liquor has ever been sold within the inclosure. Over \$700,000 has so far been expended in the improvements and each season additions are made to make it, if possible, more attractive.

ROBERT KIFT.

Convention Notes.

Hotel arrangements might have been materially improved.

The convention papers and discussions were of much value to all florists.

The tour of Biltmore Friday afternoon was very instructive and highly appreciated.

Vice-President Deake was a very busy man and most obliging to everyone who sought his aid.

The ride to the mountains Friday forenoon was heartily enjoyed by a large section of the visitors.

It is a mistake to have the meetings and exhibition in the same room, where that course can be avoided.

Nephrolepis Piersoni was the exhibition feature that attracted most attention. The gold medal given for this fine fern,

the first awarded by the society, was well placed.

C. C. Pollworth made a plucky fight for Milwaukee and won out, vociferously helped by a large body of the Chicago delegation.

Only those who stopped off at Cincinnati, enroute to Asheville, can fully appreciate the kindness of the florists of that city and the excellence of the luncheon they served to visitors.

Many prominent members of the society, including E. G. Hill, Adam Graham and J. C. Vaughan, thought that Cincinnati could have easily secured the next convention, but the florists of that city did not feel disposed to push their claim on it.

Much valuable time and thought are given to the preparation of papers and addresses for the conventions and it seems hardly proper to disturb the speakers who deliver them by such private conversation and other unseemly noises as were conspicuous on several occasions at the late meeting.

Where many non-members listen to the

proceedings, as is always the case at the annual conventions of the society, a check list should be kept on voters in every important question decided by ballot. It sometimes happens that non-members consider themselves entitled to vote, all announcements to the contrary notwithstanding.

VICE-PRESIDENTS' REPORTS.

Eastern New York.

BY ALFRED H. LANGJAHR, BROOKLYN, N. Y.

As state vice-president it is again my privilege to make a report of the work of the past year. Generally speaking, trade has been satisfactory in all lines connected with the florists' business.

Among the greenhouse builders business is now brisk. While there has been a considerable increase in the building trade over last year, there is very little difference in New York state, the increase being elsewhere. In our section no commercial greenhouses of any consequence are being erected, but in New Jersey several contracts have been given out for large ranges. The product of these will be shipped to the New York market to be sold; in fact, most of our roses come from New Jersey. This season's building among the private estates has been exceedingly large.

There is no likelihood of a reduction in cost of building material, but it looks very much as if there will be an increase in wrought and cast iron and steel, and all articles made therefrom, before the end of this year. While the price of glass was down a little, it is now rumored prices will be advanced considerably.

In cut flowers the fall trade was very good until the chrysanthemums arrived; then business slackened up considerably. Thanksgiving day turned out the same as usual, with plenty of flowers and quantities of chrysanthemums, prices being fair. Chrysanthemums last season were cheaper than ever before, and the supply lasted far into December. Large quantities of Boston ferns and rubber plants were sold last year, some being disposed of very cheaply.

Christmas trade was satisfactory. On that day the cut flower business was very slow until after midnight; then it improved, with a rush for high-grade stock, which brought exceptionally good prices, a few choice Bridesmaid roses bringing 75 cents each. American Beauty were overstocked, and prices lower than last year. The supply of carnations was satisfactory, the fancy grades bringing high

THE LAKE AND FOUNTAIN AT WILLOW GROVE PARK, PHILADELPHIA.

figures. Christmas greens were cleaned up in most places.

The plant trade, which exceeds the cut flower trade at Christmas, was very heavy. Poinsettias, azaleas, Lorraine begonias, peppers, aucubas, dracaenas, ardisias, heaths, orchids and crotons were in evidence and sold well. Oranges and imported hollies found a ready sale. The demand for fruiting plants seems to be on the increase.

New Year's trade amounts to a good Saturday's business, no preparation being made now for this holiday.

The Easter trade, which was the best on record for the plant grower, experienced a setback through the rain on the previous Friday and Saturday. Lilies cleaned out well at good prices, as did azaleas. These two plants exceed all the others combined in quantity. There was the usual number of genistas, Crimson Rambler roses, hydrangeas, lilacs, rhododendrons, bougainvilleas, hybrid roses, acacias, hyacinths, daffodils, lily of the valley and violets in pots to be sold.

There is not much to be said about the cut flower trade, as most of the stock had been held back, and no reasonable offer was refused, although the better qualities of roses and carnations sold well. There were cartloads of violets shipped, some of which had been held back for weeks, and sold for \$1.00 per thousand. After the weather cleared and the sun came out, and the retailers felt it would remain so, good violets were called for and found to be the scarcest article to be had. Bulbous stock, cut, was a complete drag.

The florists' supply dealers speak encouragingly of the business they have done, and from all reports it is on the increase.

The auction houses have been well attended this year. While the prices were not up to those of last year, the number of plants sold exceeded that of all previous years, and the outlook is very encouraging for a good fall business. The demand for salvias seemed to be in the lead, with named cannas a good second.

demand with the leading florists. Lily of the valley was in large demand, but the sale of general bulbous stock is falling off with first-class houses.

The demand for cut carnations has greatly increased, good people refusing to buy the cheaper varieties. Rose growers have had a good, steady sale for their stock; while prices were not so high as in former years, they were firmer throughout the season. New plantings are doing well. Some rose men are growing American Beauty extensively this year, as that rose was in brisk demand the past season.

Carnation men have passed through one of the best seasons that they ever had, and are now preparing for a better one. The stock in the field is looking very fine, and by this time most of the houses are planted. The varieties that will be grown extensively next year will be Mrs. Lawson, Gov. Roosevelt, Wm. Scott, Lorna, Harry Fenn, Viola Allen, J. H. Manley, G. H. Crane, Morning Glory, Golden Beauty, Mrs. Bradt, Prosperity, Floriana, Flora Hill, Lizzie McGowan and White Cloud.

Some men who have experimented planting direct into the greenhouses have been successful in getting a full growth. The carnation center for the east is now on Long Island.

Violets have maintained a good price throughout for first quality. The crop the past season was very large. The violet center to-day is at Rhinebeck, N. Y. One builder alone got out material for 75,000 square feet. The plants are looking very well at present, and the violet men expect a tremendous crop for the coming year. We have reached a higher standard now, and the public is educated right up to the mark, and will only buy the best; so if the small grower will continue to produce inferior blooms he will surely go to the wall.

Through the efforts of the Department of Agriculture at Washington it is possible to-day to grow violets in old houses year after year by using a remedy in hydrocyanic acid gas, that destroys all in-

The New York committee of the Chrysanthemum Society of America met at its usual stated periods, and awarded certificates to the following varieties: Cremo and John R. Weir. Fewer varieties were exhibited before this committee the past chrysanthemum season than heretofore.

The New York Florists' Club will hold a grand exhibition of flowers, fruits, plants and vegetables in Madison Square Garden, October 30 to November 6, 1902. In connection with this show the American Sculpture Society will make a display of sculpture work, the combination creating an exhibition unexcelled in the metropolis. The club now publishes in pamphlet form the papers read before it during the year. Exhibitions of flowers are also made monthly. The attendance has been gratifying, and the association continues on a good working basis.

A plant-breeding conference under the auspices of the Horticultural Society of New York will be held in Manhattan in September next. Prominent scientists and practical horticulturists will read papers and a most instructive programme has been prepared.

The Brooklyn Horticultural Society was organized in June last, to carry on the work preparatory to the coming convention and meeting of the American Carnation Society, which will be held in Brooklyn in February. A grand display of the divine flower will be forthcoming. The Horticultural Society will be a permanent institution.

The death roll includes the following names: Charles H. Downie, prominent seedsman; John Fitzgerald, wholesale florist, New York City; M. J. Lynch, of Poughkeepsie, violet grower; A. C. McConnell, retail florist, New York; Victor Derval, salesman.

The New York Cut Flower Exchange has taken quarters in the Coogan Building, Sixth avenue and Twenty-sixth street. The market is now opened at 6 a. m. The East Thirty-fourth street market is still continued.

Northern Ohio.

BY LEWIS ULLRICH, Tiffin, O.

Another year has passed around since the Society of American Florists met in convention at Buffalo, N. Y. I, as your state vice-president for northern Ohio, am pleased to say that with the florists about here this year has been a prosperous one, and the twentieth century opens with prosperity for the florists who are alive and up-to-date, and who keep pace with the times. You can easily tell the florist who is not prosperous by his surroundings. Enter his establishment, and we find everything topsy-turvy, old wire designs lying around, broken glass, old boards, piles of broken pots, etc. His makeshift of a desk is covered with old papers, letters, books, catalogues, etc., and all this covered with dust and cobwebs, and with barely room enough on which to write an order when he gets one; tools lying about, with no special place for them; they are dropped wherever the person using them happens to be, and the next one wanting the tools will have to spend half of his time hunting for them.

This kind of a place reminds one more of a second-class junk shop than a prosperous greenhouse establishment, and indicates a slovenly, shiftless business man. We have many such in our ranks, and I hope if any of this class read these lines they will take the hint that they are meant by these remarks to profit by the same, and will try to bring themselves and their business up to the standing at which they ought to be in the commercial world, in the foremost rank. For is he not the cultivator of the beauties of nature? Therefore he should by his surroundings show the truth of this, and that he appreciates the fact that the florist business is one of the most elevating and refining of all occupations.

There was a marked increase in the demand for first-class flowers during the holidays. Nothing was too good, and stock brought an equivalent price. The holiday business, in fact the florist business during the whole year, has been much better than formerly. I think I can with safety say that there has been an average increase of twenty-five per cent over that of any previous year.

At a farmers' institute held in Tiffin by the Agricultural Society of Seneca county, under the auspices of the state agricultural department, an article on floriculture was delivered by your humble servant, in which particular stress

WATERMELON PARTY ON THE MOUNTAIN, ASHEVILLE, N. C., AUGUST 22, 1902.

The seedsmen report a brisk spring business. There appears to be a special demand for shrubs and hardy plants; also seeds of the latter. In suburban gardens the tendency is to plant shrubs and hardy herbaceous plants which do not require to be transplanted each year. The prospects for the fall seem bright, advance orders are being placed more freely for all lines of bulbous stock, and in most cases at higher prices than formerly. The demand for hardy lilies has been especially noticeable; among these are all the native lilies of California.

The retail trade has had its share of prosperity. The Bridesmaid is still the most popular and best-selling rose. American Beauty and orchids are in greater

sect life. Violets will not stand tobacco in any form. With plenty of new sod and your houses so arranged that you can ventilate from the outside, you ought to have no trouble to get the quality.

The American Rose Society held its annual show at the Berkeley Lyceum, New York. It was a creditable show, with a fair attendance. The society meets in Philadelphia next year, where its exhibition will also be held.

The Horticultural Society of New York, in conjunction with the New York Botanical Garden, held an exhibition in the museum of the garden in June last, where the \$50 award of the society was made to Nephrolepis Personi, a sport of the well-known Boston fern.

BANQUET TENDERED C. C. POLLWORTH, MILWAUKEE, ON HIS VICTORIOUS RETURN FROM THE ASHEVILLE CONVENTION.

was placed on beautifying the grounds surrounding farmers' homes. Among other things mentioned were rose beds, in which the plants from the benches of our rose houses were recommended. This proved very fruitful. We succeeded in selling about 2,500 of Bride, Bridesmaid, Golden Gate and Perle des Jardins, which paid very well for the time it took to get up the address before the institute. We sold the plants at the rate of 15 cents each, whether one or more was taken; and selling the number we did in so short a time, it paid much better than throwing the plants on a heap and burning them up. I have made it a point to inquire as to the result, and universally the buyers are well pleased, as the roses are blooming profusely. This sale of stock, which is usually considered worthless, assisted very materially in replanting our rose houses for the coming season.

There is an increased demand for perennials, especially among the farming community. The season was very backward, cold and rainy weather prevailing, which, when it did let up, brought the work all into a bunch. Everybody wanted his bedding done first. The increased demand for porch and window boxes, hanging baskets and general bedding made the florist who had a good deal of that kind of work to do exert himself in order to please all his customers. The demand has been so brisk with most of the florists in this section that by the first of July they were all pretty well sold out of bedding stock, getting better prices, and having less trouble to collect outstanding accounts.

Those of the craft who grow cut flowers more or less extensively have at this date nearly all of their rose houses planted, and some are making preparations to house carnations. So far as I have heard, the carnations in the field are looking well, with few exceptions, where they were planted on low land, and were covered with water caused by the overflow of streams swelled beyond their capacity by the rains. In such places the growers are losing some plants by stem rot. With me, the overflow took the soil from one end of the field, leaving the plants upon stilts, as it were, and burying them at the other end, so that after the water had receded one could see only an occasional leaf sticking through the mud. These had to be uncovered, and the surplus soil hauled back to where the water had brought it from and put around the plants from which it was taken. Doing

this work promptly and carefully, my loss was but slight. Had the sun shone my loss would have been greater; but for three days following this severe rainstorm the weather was cloudy, so that the plants which had their roots exposed did not suffer. I lost a few plants which were covered with soil too long; we could not handle them until the water had drained off, which was a slow process in some parts of the field, and the plants rotted.

Quite a number of florists about here are very much troubled with thrips on their roses and carnations, principally the latter; we never before have known the pest so destructive as this season.

Nebraska.

BY LEWIS HENRIKSON, OMAHA, NEB.

Trade during the past year has shown a steady improvement over previous years. The demand for our products has been greater and as a result of this the cut flower market during the year has been steady. There was never much of a surplus, consequently prices did not greatly fluctuate.

Chrysanthemums held their own as fall flowers, but noticeable was the falling off in the demand for extra large blossoms and an increased demand for medium-sized blooms of good color. Carnations, if possible, are increasing in popularity. Roses, the old standby, have not lost any of their popularity, the American Beauty having an increased demand, as well as Liberty and Golden Gate.

Christmas business netted good returns in all departments, especially plants, for which there seems to be a greater demand every year. Trade kept up well all winter. St. Valentine's day and Washington's birthday seem of later years to be coming to the front.

Easter trade was excellent, but the longiflorum lily was an entire failure in this section a reverse from previous years. Plants sold out well during the spring months. The weather has been very favorable, although a little wet, and as a result the outdoor stock is getting along nicely.

In this state new buildings to the extent of 100,000 square feet of glass have been put up this past year, with a very small percentage of breakage by hail.

The Nebraska State Horticultural Society held its annual fall exhibit at Lincoln last fall, with a very fine display of plants and cut flowers, where always a good-natured rivalry exists among the florists

as to who can make the most attractive display.

The Nebraska Florists' Society has added many names to its list of members the past year, with headquarters at Omaha, where it meets the second Thursday of each month, each meeting bringing a closer relation between our florists, with the exchange of ideas covering improved methods, uniformity of prices and a generally more friendly and fraternal feeling between the members.

There have been no deaths among the florists of our state during the year, to my knowledge, with the exception of one who, while not a florist, still occupied a place among the leading horticulturists of the country, J. Sterling Morton, who promulgated the idea of Arbor day, the day for planting trees, from this state, and which has been copied by other states and incorporated into their laws until it is generally recognized as a holiday throughout the United States.

The prospects for the future of our state are bright. With its central location, large surroundings, multitude of people, its fertile soil and abundant sunshine, truly in the prophecy of Thomas B. Reed, "Every wise man agrees that beyond the Mississippi lies the great wealth of the days to come."

Canada.

BY U. U. GROFF, SIMCOE, ONT.

It is with pleasure that I report the most marked advance in the florists' business over any former year, the Christmas and New Year holiday trade being fully 15 per cent better than ever before in our leading city, as well as country trade. The public seemed willing to pay any price for first-class stock, thus strongly supporting my contention that good work and service will always find appreciative and profitable recognition. This happy condition of affairs will be an incentive to the trade to make quality the first consideration.

The supply of Begonia Gloire de Lorraine in pans fell far short of the demand in Hamilton, Ottawa, Toronto, London and Montreal. Pans of primulas, three or four plants each, sold well, also all staple lines in cut flowers and decorative plants. Palms, azaleas, ferns, cyclamens, primulas and bulbous stock sold well, and larger sales were made at advanced prices for high quality in roses, carnations and chrysanthemums.

The trade during January continued most satisfactory. Mignonette, sweet peas

and bulbous stock were in small quantity, with an unusual supply of freesia, and plenty of violets and carnations. In Toronto, Hamilton and Ottawa the supply of orchids was much under the demand.

Toronto trade was not affected by the Lenten season, and St. Valentine's day created exceptionally heavy demands for violets. With the advancing season greater activity and hopefulness were manifested in all lines. Retail trade was good, with a plentiful supply of roses, carnations, violets and bulbous stock.

Montreal trade was dull after Easter, with an ample supply of all stocks, particularly bulbous, which was overabundant. Violets sold well; asparagus and smilax were scarce.

Toronto business after Easter was good. Stocks were plentiful, except violets, which were scarce and in good demand. Roses ruled somewhat cheaper. Sweet peas were coming in early in April. All Toronto florists rejoiced over the Easter business, the aggregate sales in which were 12 per cent higher than last year, and never before had an Easter season shown better stock. Carnations were not overplentiful, but the fancies were splendid. Lily of the valley sold well and violets at good prices. In plants there never was a better variety, and the appearance of the stores was never excelled.

Ottawa's Easter trade was very good, with the supply of stock equal to the demand and all of which was of a satisfactory character. With the opening season for outdoor work the sale of bedding plants was very satisfactory, but I regret to report serious damage by late frosts to carnations in the field, as well as other stock. On the whole, the season was backward, the severe late frosts being followed by continued cool and showery weather all through the month of June.

While not able to report any building of special note, I am able to refer to a general improvement and extension in existing plants, showing a general tendency toward increased facilities and production, with a healthy and hopeful progress all along the line.

Wisconsin.

BY C. C. POLLWORTZ, MILWAUKEE.

The past year seemed to be one of general progress in the florists' trade. Nearly everything which was well grown found a ready market. The most noticeable increase was in the bedding line. Many of the smaller localities, where formerly little outdoor work was done, are now following ideas laid out in larger cities, and the demand for plants was in excess of supply. Growers and retailers all had a profitable season; and many new names appear in the list of florists. New establishments have been opened in cities where formerly there was no florist. The increase in glass throughout the state may foot up about 200,000 square feet. The continued high price of glass, however, deters many from making new additions.

Blooming plants are being called for as well as palms and ferns at most of the holidays, almost in excess of cut flowers, especially when prices for the latter are high. The outlook for next season is prosperous.

Colorado.

BY J. A. VALENTINE, DENVER.

Trade has been satisfactory in nearly all lines, with a moderate increase in the total volume of trade over the year previous, with collections generally good. There has been a noticeable tendency toward a more careful grading, which has resulted in better prices and less fluctuation for the best grade. The poorer grades have sold at less prices, and this has probably had something to do with the establishment of two or three concerns dealing almost entirely in the cheaper grades. Spasmodic attempts have been made to establish a street trade by fakirs, but without success. One department store has made a persistent effort for several years to sell plants and cut flowers, but without any appreciable effect on the trade of exclusive florists.

The retail trade is becoming more critical each year, and the better class of this trade now demands a strictly first-class article. This is especially true in regard to blooming plants, and the quality now produced by the florists of Denver and Colorado Springs will compare favorably with any other section of the country. The sale of palms and ferns is not what might reasonably be expected, the

public showing a lack of appreciation of this class of plants. There has been a noticeable falling off in the demand for ficus and araucaria. Dracaenas and pandanus have never sold in this market to any extent. Owing to climatic conditions which make irrigation necessary, the sale of bedding plants has never been as important as in eastern states. This is especially true as regards window boxes, which are hard to keep looking presentable during the hot, dry summer months, when it is almost impossible to keep down the red spider. Still there has been quite a noticeable increase this year in the call for the more common sorts of bedding plants, such as geraniums, for both lawn planting and window boxes.

The increased demand for shrubs and for hardy herbaceous plants has been very marked. This has been almost altogether from owners of small places, as there are very few private places in this state where extensive planting is done. Probably we will have to wait years for any considerable development in that line, until those who have amassed large fortunes have died and the money has passed into the hands of the younger generation.

The public parks have, in the main, been under able management, and, although hampered somewhat by the usual political interference, good results have been obtained, and the parks have really been an educational feature creating a demand for plants from private parties.

No very extensive building has been done in the state during the year. N. A. Benson has erected about 20,000 feet in South Denver; Ed. Hubbard, of Boulder, has torn down and rebuilt his place of about the same size, and William Clark, of Colorado Springs, has made some additions to his already extensive place. Several diminutive places have been erected in the mountain towns. In Denver and vicinity there are at present about 400,000 feet of glass devoted to the florist business, at Colorado Springs 150,000 to 200,000 feet, and in the state outside of these two points less than 150,000 more.

The question of the establishment of some sort of a wholesale market in the city of Denver has received considerable attention, but nothing definite has been determined upon. Several attempts have been made in the past to establish a commission house, but these attempts have always failed. It is doubtful whether the volume of business will yet justify such a venture. The nearest sources of supply from abroad are 500 miles to the east, on the Missouri river, with the supply at those points uncertain, and the shipment of 1,000 miles from Chicago is attended with many disappointments. The result is that very little in the way of cut flowers is shipped in from outside the state. American Beauties form the only noteworthy exception. The quantity of cut flowers grown has been sufficient to supply the demand in the main all through the year. The trade in blooming plants has reached such proportions that the demand for cut flowers at Christmas and at Easter has been very materially reduced.

Most of the newer varieties of carnations are to be found in the market, but the variety of roses grown is not as large as it is around eastern centers of population. Beauty, Bride, Bridesmaid, Perle, Liberty, Meteor, Wootton and Mme. Chateau have been in the market the past year, and this summer's plantings show that Helen Gould will be added to this list the coming season.

There is no state organization of florists and but few local societies. In Denver the Denver Floral Club is in existence and holds meetings at stated intervals, but the interest shown is not very great. No fall show was held by the society last year, but a spring show was given in the city park, with free admission. The attendance was large, but the display of bedding stock was rather disappointing. In Colorado Springs the El Paso County Horticultural Society is very active, and great efforts are made to interest the school children by the distribution of seeds and the offering of suitable prizes. Prizes are also given for the most attractive dooryards and lawns, and competition for these prizes has been quite active, resulting in a decided benefit to the appearance of the city at large. The State Horticultural Society and State Board of Horticulture are both doing good work and, while their efforts are not directed along the lines of work most directly interesting to the florist, the indirect benefit to the florists' trade is considerable.

The distance is so great and so much time and money are consumed in attending the annual meetings of the S. A. F. that the society has not much of a membership in this state, and it is doubtful whether this condition of things can be materially changed unless at some future time the society should see fit to establish district conventions for different sections of the country, in addition to the annual national conventions, and it is doubtful whether the time is ripe for such a move, so far as this section is concerned, even if it should ultimately be deemed advisable.

West Virginia.

BY GUSTAV OBERMEYER, PARKERSBURG, W. VA.

I have the honor as well as the pleasure of making the first report from our small but prosperous mountain state. This state has passed through one of the most prosperous years in the history of horticulture, and all florists seem to be well satisfied with the business done the past year. Bedding plants were sold out cleaner than ever before. Cannas are taking a leading part in bedding plants. Prices have also been satisfactory.

In cut flowers this state has never been able to supply the demand, and a great many are shipped here from adjoining states. Carnations take the lead and bring good prices. During the holidays good carnations bring as high as \$2 to \$2.50 per dozen, the average price during the winter being 75 cents to \$1 per dozen. There was a big demand for cut flowers until late in the spring. Easter trade was very good. There was a great demand for potted plants and everything in that line was sold out.

There has been a great deal of glass added by several firms this season, one firm alone adding about 10,000 feet. Chrysanthemums are looking well at this time. There seems to be a better sale for them in the last few years than there has been. Carnations are doing finely this season; it seems to have been just right, with a good rain about once a week.

There has been hail all over this section this summer, but the florists have been lucky enough not to be damaged much by it. Brother florists, better look your stable before the horse is stolen.

I would like to mention that this state shows good opportunity for some enterprising young men who would like to start in business for themselves, as the state is growing very rapidly, and many small towns could and would support a florist, for each new greenhouse in a new town creates a demand for more flowers.

It is very hard to get new members for the S. A. F., but I think we have some of them stirred up, and by keeping at them may yet succeed in lining them up and bringing them into the society, that they may be benefited by our organization.

Rhode Island.

BY LOUIS REUTER, WESTERLY, R. I.

Trade in general has been up to the average, the prevailing feeling being that we have had a prosperous year. Although business was dull during the early fall, after Thanksgiving it kept up quite well. Chrysanthemums came in during their season in fine shape, but the market was overstocked with them and consequently the prices were not as high as they ought to have been.

After Thanksgiving business took a start and kept up well, even through Lent. Christmas trade was very good, with a scarcity of finer flowers and an overabundance of bulbous stock. The plant trade showed an increase over last year, and anything with fruit or flowers sold well. After the holidays there was not as much of a check in business as in former years, and with a steady supply of first-class stock business held up well through Easter.

The weather conditions before Easter were very fine and consequently the market was supplied with first-class stock. Lilies, in pots as well as cut blooms, sold very well. Had it not been for a stormy Saturday preceding Easter there would have been still more business done, but, thanks for so many orders being taken in advance, stock was pretty well cleaned up during Sunday morning.

The spring trade started late on account of cold weather, but when the warm weather did come plants sold very well. On Decoration day there were a great amount of bouquets, ready made up, sold in the city of Providence on an advance over the price of former years.

This was brought about by the retailers combining and arranging a price which was fair and which allowed them to make a creditable bouquet.

Trade held up well into the summer, and our numerous fashionable shore resorts still take care of any good stock to be had. American Beauty and Liberty roses find a better market than in former years and the Boston fern is still a great favorite.

The florists' business is on the increase in "Little Rhody." There is an abundant supply for our own state and still enough of first-class stock left to ship into other states. Before another year, if material is in reach, we expect to have some additions as well as new places to report.

Kentucky.

BY ALBERT R. BAI MEER, LOUISVILLE.

To arrive at a reliable knowledge of the trade conditions in our state I mailed a circular letter to every florists' establishment in Kentucky whose address I could obtain, asking for all information they could give regarding trade. From the answers received, and from personal observation, it is again my pleasure to report satisfactory conditions in the florists' business generally. Nearly all the retail florists report satisfactory business, with good returns for both cut flowers and plants. The growers seem pleased with the returns for cut flowers, but think better prices should be obtained for plants, especially blooming stock.

As far as I can learn, all of the Kentucky members of the S. A. F. have renewed their membership for this year, including one life membership. There has been a limited increase in the interest in the state society, but not nearly as much as should be. This fall a chrysanthemum and floral exhibition will be held in Louisville under the auspices of the Louisville Business Women's League, but under the management of one of the local florists.

While new glass is going up only in limited quantity, many establishments are rebuilding old houses into modern structures.

District of Columbia.

BY PETER BISSET, WASHINGTON.

The past year has been extremely satisfactory to the florists of the District of Columbia in many respects. All report business for the past year as very satisfactory, and all are busy preparing and planning to handle the expected increase of trade during the coming season. Several growers are adding new houses to their present ranges this year, and others are rebuilding old houses in order to keep up with the demand for cut flowers and plants.

Extensive alterations are going on at the White House greenhouses at present. Nearly all of the old houses will be pulled down and a new range of houses erected at another location of the grounds. This was made necessary by the building of new offices for the president, which will occupy the ground where part of the greenhouses were located. The removal has caused Mr. Pfister, the head gardener, considerable trouble, as he had no other houses into which to move his splendid collection of plants, but had to stand them around the grounds underneath trees, etc., until suitable quarters can be completed to house them.

Florists who have handled the Queen of Edgely rose report sales as good and think that there is a place for it. Killarney is another new rose that has been much admired by ladies of good taste, and the florist who grows for the better class of flower buyers should give this rose a trial. It is a fine shell pink, shaded silver, with a good stem and of fine lasting qualities. Some object to it because of its being a semi-double rose and not quite full enough, but here lies one of its good qualities. It is a departure, or, if you prefer, a retrogression from the florists' rose of the present day, but this is what we need, greater variety of flowers in color and shape, and I believe this is a break in the right direction.

The new white rose, Ivory, is one of the finest forcing roses that has ever been introduced. It is a sport from Golden Gate and is identical with that variety in growth and free blooming qualities, but the color is a fine ivory white, hence its name.

Another rose that will be introduced soon by the same firm which introduced Ivory is Alice Roosevelt. This rose made its debut in Washington last winter and

has been much admired by the elite of Washington society. It is a sport from Mme. Abel Chateau, with all of this variety's good points and, being of a glowing pink color, is especially desirable for night work.

In new climbing roses of recent introduction Dorothy Perkins stands out prominently. It is a hybrid between Rosa Wichuriana and Mme. Gabriel Luizet; it has the climbing or trailing habit of Wichuriana, with the beautiful lustrous pink of Luizet. It flowers in clusters of from twenty to forty, the individual flowers averaging one inch in diameter. It is of similar habit to Crimson Rambler and will prove an excellent forcing rose as a pot plant.

Another new plant of recent introduction is Philadelphus Boule d'Argent, or double mock orange. This will prove to be a desirable plant for winter forcing. It is dwarfier and more spreading than P. coronatus, with smaller leaves, flowering in terminal corymbs of four or more flowers, each about one inch in diameter.

Prognosis have been coming rapidly to the front during the past few years. Blooming, as they do with us, about Decoration day, they prove very acceptable at that time. Several of the florists are adding to their collections of this desirable plant.

An interesting and successful experiment was made here last spring in the shading of hybrid perpetual roses in the open ground. The aim was to keep off our hot suns that prove such a drawback to the successful culture of the rose in the open ground around Washington. A framework of pipe was erected and over this cheesecloth was stretched, and by means of ropes and pulleys the cloth could be rolled up or down at will. The results were larger flowers, longer stems and very much better color. The experiment was so successful that more roses will be covered next year in the same way. The first cost of the material is trifling, compared to the fine results obtained, and the cloth will evidently last for several seasons. I would strongly advise florists to give this method a trial, and I am sure they will be well repaid in the finer blooms obtained.

In dahlias a few of our growers have been growing Standard Bearer with good success, and have never been able to fill the demand for this variety. This is one of the true cactus type, flowers of brightest scarlet, and seems to quite capture the ladies' fancy. You hear exclamations of delight wherever this variety is shown. It succeeds very well here, flowering continually, and, unlike most cactus dahlias, the flowers are borne on long stems and therefore prove a good florists' flower. A fine companion to the foregoing is Mrs. Peart, also a true cactus dahlia, color creamy white, a very satisfactory sort. A fitting companion to the preceding two, but of the decorative dahlia type, is Grand Duke Alexis, of large size and distinct form, color pure white, delicately tinged with pink; it proves a fine selling flower.

No report from the District of Columbia would be complete that omitted mention of the great work being done by the Department of Agriculture for the benefit of the florists. I am indebted to Prof. A. E. Woods, pathologist and physiologist of the bureau of seed and plant introduction, for the following synopsis of the work of the department on the nematode of the rose and violet:

For the past year the pathologists of the department have been endeavoring to find some method of fighting the eel worm, or nematode. After testing a great many substances supposed to kill these worms, it has been found that the best material to use is a dilute solution of formaldehyde, about 1 per cent solution being sufficient to very quickly kill any nematode touched by it. An extensive experiment in the treatment of the root nematode of roses, carried out by J. Louis Loose, of Washington, in accordance with the directions furnished by the department, was very successful. The treatment was made on February 10, including plants of several varieties, namely, The Bride, Kaiserin Augusta Victoria, Mme. Abel Chateau, Nephotos, American Beauty, Liberty and Meteor. The solution was made up on a scale of four pounds of the commercial formaldehyde to fifty gallons of water. Fifteen thousand plants were treated, requiring about 200 pounds of formaldehyde, costing 18 cents per pound. The mixture was applied with a hose connected to a force pump. While at first all the young feeding roots that the plants

had, as well as the nematode galls and nematodes in the soil, were killed, the treated plants soon grew out of the setback and formed fine new feeding roots, while the untreated plants remained stunted and diseased.

For land nematode of the violet they have found that this nematode is also very easily killed by formalin, although it is not practicable to use formalin on the plants. About all that can be done in order to fight this pest is to carefully throw out of the stock every plant showing any sign of bad nematode. It should be pulled out and destroyed; otherwise the disease will spread from plant to plant. It does no good to cut out the diseased part. The nematode is easily killed by drying and it is therefore suggested that houses in which the disease has appeared be run rather dry, especially permitting the surface soil to dry and keeping it in the form of a dry mulch. Heavy shading is undesirable in cases where the disease has appeared, as under such conditions nematodes getting upon the surface of the soil and on exposed places on the leaves will not be destroyed, whereas, if they are exposed to the sunlight, they are likely to become dried up and die.

I am very glad to be able to say that at a meeting of the florists of the District of Columbia, held on July 31, the Florists' Club, of Washington, D. C., was once more brought to life and started on what we all hope will be a long life of usefulness and prosperity for the good of the trade in general and the welfare of its members in particular.

Iowa.

BY W. A. HARRETT, DUBUQUE, IA.

The reports from a large per cent of the florists, covering nearly all sections of the state, show the past season to have been a prosperous one, averaging better than 1901. The greatest gain was in the cut flower department, the increase from reports now in being about 27 per cent in sales, with some advance in prices. There has also been an increased demand for palms and ferns, and bedding plants show some gains, while miscellaneous plants barely hold their ground.

Carnations in the field are generally reported in excellent condition, with a few losses from the heavy rains of the past three months. Other growing crops are also in good condition generally.

The losses by hail are very light so far, but Brother Esler will know better about this. The amount of new building reported is about 100,000 feet of glass, but this will probably be doubled, besides considerable will be used in remodeling and repairing. However, the high price of glass and iron will prevent some from enlarging their plants for the present.

New Hampshire.

BY BERNARD MORRIS, PORTSMOUTH, N. H.

I take the keenest pleasure in doing a duty to the S. A. F. or any member of the same. As state vice-president it devolves upon me to perform a duty in making a report which I am in no wise competent to do; first, as a gardener on a private place, I am not in close touch with the ups and downs of the trade. Second, to numerous letters of inquiry I received but one reply, which is disappointing to me, and a bad handicap besides; still it goes far in showing us the "spirit" of the New Hampshire florist of to-day.

Within a short space of time, perhaps a little over a year, there has been considerable glass added. Manchester, Nashua and Dover take the lead in this respect. With the increased glass area, suffice it to say, the trade must also have increased to support it, and trade is. I am happy to say, largely in excess of previous years in most localities, if not in all. A step in advance was taken by some of the largest places in this section last spring, by allowing eight hours to constitute a day's work every Saturday, instead of ten hours. And to my way of thinking, the florist and his men could accomplish more by working shorter hours and devoting more time to reading the trade journals, the daily papers and such literature, or, as Oliver Goldsmith has once said:

"For just experience tells in every soil,
That those who think must govern those
that toil;
And all that freedom's highest aims can reach
Is but to lay proportion'd loads on each."

There is not a florists' society or club of any kind in this state outside of the New Hampshire Horticultural Society. But I think it would be an easy matter to secure a goodly number of members if such an organization were formed. And I will say with a reasonable assurance that we will have a lot of the New Hampshire boys woke up, ready to join you when you meet again on the New England end of Uncle Sam's domain.

Western Pennsylvania.

BY WILLIAM LOEW, ALLEGHENY, PA.

The past season has been a highly successful one in every particular. Flowering and bedding plants sold away beyond expectations, with red geraniums and French cannas in the lead. In the decorative line palms and bay trees of larger sizes held first place. John Bader, of our city, having a large importation of both, sold out completely, as did numerous other firms here.

I may mention that of the commonly called rubber plant the sale reached such proportions as to make one think this plant has become almost a household necessity.

Philadelphia.

REVIEW OF THE RECENT CONVENTION.—ALL QUAKER CITY PEOPLE ARE WELL PLEASED.—DRIVE TO BILTMORE THE FEATURE OF THE WEEK.—WONDERFUL VIEWS.—EXPERIENCES NOT ON THE PROGRAMME.

All home from the convention, safe and sound, Ed. Reid being the last to arrive, on Tuesday morning. Everybody seems delighted with the trip and from the various expressions of satisfaction one hears it is safe to say that it was one of the most interesting meetings that has yet been held. Vice-president Deake was much in evidence and did all he could to make the stay of the visitors pleasant and profitable. The ride to Overlook Mountain, at the invitation of the Idlewild Floral Company, was very much enjoyed, the view from the top being inspiring. The ride to beautiful Biltmore was of course the great event and a personal visit showed that although much had been said, yet the half had not been told. The winding drives through the artistic borders of trees and shrubbery, a new combination presenting itself at every turn, called forth exclamations of wonder and surprise and when, at last, the palatial mansion came into view the grandeur of the scene left the visitors speechless. The view from the plaza in front of the mansion is delightful. The grounds fall away gradually until they seem to fade into the surrounding landscape. A beautiful artificial lake lies at the extreme foot of the slope, while just beyond flows the Swannanoa river. To complete this scene, arising as a background, are the grand and impressive tree clad mountain ranges, which extend in every direction as far as the eye can reach. This combination of the best that man can do, united as it is with nature's great handiwork, cannot help but impress itself on the mind of all observers and instills a feeling of awe that lifts one out of the ordinary walks of life and makes an impression that will never be forgotten. Robert Bottomley deserves great credit for the order in which everything is kept, the ivy trellises especially being the admiration of every one.

What with the sessions of the convention, the shooting, the bowling, both team and individual, the trip to Overlook and the great Biltmore ride, the delegates certainly put in a busy week. There were various other little things that attracted them. One day W. J. Baker was passing the U. S. public buildings and noticed that the flag was displayed union down. This was too much for the old veteran,

who immediately repaired inside and insisted that this be righted at once. Those in charge said it would be attended to and the doughty William said "All right, the sooner the better, and I will wait until I see it done," which he did. A little fracas in the public square about midnight was noticed by a knot of the boys, who were waiting for the last car. A policeman arrested the offender and one "W. J. B.," who followed the crowd to the lock-up found, when he tried to go out, that the key was turned, and when finally released he had the pleasure of walking home by himself. The 20-cent fare to ride across the lawn of the Battery Park Hotel and then the cold "turn-down" will not soon be forgotten.

There is about the usual August business doing. Simple asters are now in full supply and make a great show. Beauties can now be had to supply the demand and with good length of stem. Prices range from \$1 to \$2.50 per dozen. There are a few fair carnations at from \$1 to \$1.50 per hundred. We have not heard the latest about the market, but we understand that the movement is progressing and it is almost certain to be opened on or before October 1.

S. S. Pennock has gone to spend a few weeks in the Pocono mountains and incidentally nurse his hay fever.

Robert Craig is again under the care of Dr. May, at Summit, N. J. K.

Cleveland.

CONVENTIONITES WELL PLEASED WITH THEIR TRIP.—PRAISES OF ASHEVILLE AND BILTMORE.—CLUB LISTENS TO TOURIST.—PICNIC NEXT WEEK.—VARIOUS NOTES.

The Cleveland delegation to the S. A. F. convention have all returned safe and sound, and all speak well of the trip, and the enjoyable time spent while in Asheville. At the last meeting of the club Adam Graham gave a very interesting account of what occurred at the convention, also a very minute description of Asheville and the beautiful scenery surrounding it. The beauties of that palace of the south, Biltmore, came in for a generous amount of praise. The only regret expressed by those present was their inability to get a glimpse of the interior of Biltmore's famous conservatories. The display in the convention hall from those large conservatories was sufficient to create a desire to see what remained, but it was ordained otherwise as far as the Clevelanders were concerned. Credit is due Mr. Bottomley for his efforts on behalf of the society. Robt. Kegg, F. C. Witthuen and Wm. Stade were elected to membership at our last meeting. Don't forget the picnic; it will be held at Geesen's gardens on September 4 from 2 until 10 p. m. Prizes will be awarded for the best bowling, both ladies and gentlemen. Music and dancing will be in order and the club will pay the piper.

Fred. Moritz has been exhibiting a new style wheel hoe, invented by himself, which is considered a good thing, the old order of construction in this class of machine being reversed. The knife is fastened by two arms in front of the wheel instead of the rear.

L. F. Darnell has returned from a week's vacation to his old home in Maryland. Mrs. Darnell was unfortunately called to the bedside of a sick brother in Kansas City.

Business is about the same old sing song; not much doing; weather cool, thermometer hovering around 50° at night. ECHO.

Chicago.

VERY HEAVY SUPPLIES ON A NONE TOO ACTIVE MARKET.—ASTERS IN UNPRECEDENTED QUANTITY.—QUALITIES REMARKABLY GOOD.—ROSES IMPROVING BUT LOW GRADES GO TO WASTE.—VARIOUS LOCAL AND TRADE NOTES.

The aster crop is still on the increase and the lower grades are going to waste, but quite a little of the stock now coming in will compare favorably with the best ever offered in this market. This class of goods moves fairly well, the price ranging from \$1 to \$2 per hundred. Some of the Comet and Semple's are as large and as useful as will be the early chrysanthemums, which are not now many weeks away. The light colors in asters are still the most salable, for funeral work continues to be the stand-by. Gladioli are not worrying the wholesalers so much now. There are some big heads of hydrangea coming in and the retailers find them useful for window decoration. Carnations continue to increase in supply and to lengthen in stem, but asters fill the bill for less money. Roses have shown a continued improvement in quality but the cut has lately been above requirements and in some of the houses the lower grades have gone to waste in considerable quantities. Nevertheless, there is a fairly good sale for the first quality stock, \$3 to \$4 being the prevailing price, with an occasional lot at \$5, for Brides and Bridesmaids, the stems being long and strong and the buds large and firm. Perle is also very good. Beauties still lead the demand and the supply is not above the requirements. With most of the growers this item is good for so early in the year.

George Collins is well pleased with the prospects for Liberty at Peter Reinberg's this season. The planting was largely increased, for all the one-year-old plants were dried off a very little and replanted. Mr. Collins thinks they are at their best in the second year.

Charles P. Hughes, formerly with J. B. Deamud, has returned to this city and will take charge of the shipping department of the Chicago Carnation Company, at Joliet.

Brant & Noe are pushing work on their new houses, four of them, 20x195. Mr. Brant is looking for an excellent season and the stock is in fine shape.

E. E. Pieser has returned from his outing with some big pickerel and bass as evidence of his skill in handling the rod and trolling line.

D. S. Heffron is in feeble health. He is now 86 years of age and has failed rapidly since the death of his son, Walter S. Heffron.

Miss M. A. Hammond, daughter of Benjamin Hammond, Fishkill-on-Hudson, N. Y., is staying with friends in this city.

C. H. Reed, of the Amzi Godden Company, Birmingham, Ala., with wife and daughter, left for home August 28.

Early closing is at an end for the season. Beginning Monday the wholesalers will be open to 6:30 p. m. again.

Walter Kreitling and wife have been spending a few days at Milwaukee this week.

John Pochlmann was very well pleased with his trip to Asheville.

Visitors: W. A. Reiman, Vincennes, Ind.; C. R. Paater, New Orleans; J. L. Graver, of Shotwell & Graver, Fargo, N. D.

ALEXANDRIA, IND.—The business of the Alexandria Greenhouse, E. W. Marland, manager, is in the hands of a receiver.

New York.

WHOLESALE DISSATISFIED WITH SUMMER BUSINESS.—CASH RECEIPTS LESS THAN IN RECENT YEARS.—FAIR STOCK IN MARKET.—VARIOUS NOTES.

In the wholesale cut flower trade dissatisfaction is still expressed as to the amount of business being done. Buyers are few and their purchases small, even for August days. No doubt the unfavorable comparison of present trade with that of a few years ago is largely due to the ability of the florist to-day, when located where he can have the use of even a small patch of ground, to produce for himself much of the material required for the funeral design work which is necessarily the main reliance of the retail florist in summer time. The coming of the Simple aster and the cheap gladiolus bulb, added to the cultural information so widely disseminated by the trade papers, has had much to do with the curtailment of the suburban summer trade once enjoyed by the wholesale houses, and the same causes have also had a corresponding influence on the fancy summer-resort trade, the supply of flowers for which is now generally obtained from local sources. The quality of the material offered this week in the various wholesale markets is up to the average for the season, roses being naturally small in size, coming, as the most of them do, from young plants but with acceptable color and clean foliage. Mildew weather is about due, however, and escape from the customary afflictions is not to be expected.

It is gratifying to be able to report that Mrs. A. S. Burns, who was so badly injured recently in a trolley car accident, is improving and hopes for her ultimate recovery are now entertained.

Mrs. Savin, Traendly & Schenck's faithful bookkeeper, has just returned from a two-weeks' vacation to Canada and Niagara Falls.

G. E. Bradshaw has taken a partner, J. R. Hartman, and the firm will now be known as Bradshaw & Hartman.

A. Schultheis is suffering with a sprained ankle and moves about for the present on crutches.

Siebrecht & Sons are remodeling their store at 509 Fifth avenue.

Milwaukee.

CRAFTSMEN HOLD A MEETING ABOUT BANQUET BOARD.—PLAN FOR NEXT YEAR'S CONVENTION.—NEW OFFICERS ELECTED.—NOTES.

The largest and most enthusiastic gathering of Milwaukee florists around the banquet table took place on the evening of August 26, when C. C. Pollworth was made the guest of honor in appreciation of his successful efforts in securing the S. A. F. convention for 1903. A number of the craft who were hardly luke warm on the subject until now, have enthused remarkably since it has become an established fact that the convention will surely come here. Although the meeting was arranged by Messrs. Holton and Kennedy as a social gathering complimentary to Mr. Pollworth, the favorable opportunity of making a start to business was not overlooked. Wm. Currie, who was toastmaster, managed very nicely to sandwich in between the humor and sentiment enough parliamentary practice to elect the necessary officers for the Milwaukee Florists' Club for the ensuing year. They are: President, C. C. Pollworth; vice-president, John Dunlop; secretary, Herman V. Hunkel; treasurer, Wm. Currie. The officers were constituted a tem-

porary committee to prepare a general plan of procedure to be submitted for consideration by the next general meeting, to be called at an early date by the president. Walter Kreitling, Philip Foley and several telegrams, all from Chicago, helped to fan the flames of enthusiasm.

There are no less than three florists who are making arrangements to take care of "boarders" since the closing of Whitnall's greenhouses to the retail patronage, he having made a specialty of boarding plants for several years. Those who are going into this branch are Ben. Gregory, Wm. Edelsen and Alex. Klökner.

Sweet peas are still poorly done in this market, while asters are overdone. Beauties and Meteors are now quite satisfactory. C. B. W.

Detroit.

CONVENTIONITES ALL AT HOME AGAIN AND GREATLY PLEASED WITH THEIR TRIP.—SCENERY A REVELATION TO MOST.—HOSPITABLE GREETINGS EVERYWHERE.—RAIN NEEDED AND STOCK POOR.

The visitors from this town to the convention at Asheville have all returned except John Dunn, who left the party at Knoxville, Tenn., to continue on to Natchez, Miss., to visit his sister there. Mr. Dilger separated from the party at Cincinnati and later visited Dayton and Columbus, returning home Tuesday night. Long before the Detroit delegation reached Asheville expressions of delight at the beautiful scenery along the route were often heard. We were met at the depot at Cincinnati by Mr. Peterson, who escorted us, with several members of the Cleveland party, to his greenhouse establishment and home on the heights of the city. Although the hungry visitors were a surprise to Mrs. Peterson, they did not find her unprepared, for she quickly had them surrounding the breakfast table and partaking generously of their first taste of southern hospitality. An hour was spent in the inspection of the greenhouses, interest centering upon the extensive stock of Gloire de Lorraine for which this place is noted. The convention itself, so successful in all respects, was a surprise to many and the various, enjoyable features connected with it make the stay-at-homes regret very much that they did not also participate.

We are greatly in need of rain and outdoor flowers of all kinds are poor. A fairly good demand in retail channels easily exhausts the daily supply of roses and carnations.

Visitors: A. G. Boehringer, Bay City; Mrs. Rene Cline, Logansport, Ind.

J. F. S.

St. Louis.

PLANS FOR HORTICULTURE AT THE GREAT EXPOSITION.—A SPLENDID BUILDING.—TRADE SHOWS LITTLE CHANGE BUT STOCK IMPROVES.—NOTES HERE AND THERE IN THE TRADE.

Geo. Kessler, of Kansas City, landscape gardener of the World's Fair, was in the city this week. Work in this department is expected to start in the near future. The plans proposed for the horticultural building give promise of a structure that will fully meet the requirements. It will be erected on the hill to the southeast of the administration building, known as Skinker Hill, and will command a fine view of the fair. The building is to be octagonal, with two square wings. The main edifice will be crowned by a lofty dome and the wing buildings will prob-

ably have a dome treatment also. The wing on the south end of the building will be of glass and will be used as a greenhouse. The main building will house the exhibitions of fruits and will have an area of about 160,000 square feet. Between the horticultural and the agricultural buildings will be Horticulture avenue, a terraced garden filled with flower beds and shrubbery.

The wholesale market has made a marked improvement within the last two weeks, as far as quality is concerned, but the prices have raised very little. American Beauties bring \$2 per dozen for 24-inch stemmed blooms, but not many are coming in. Asters are very plentiful and have a fairly good run. A few gladioli are still to be seen. Greens are quite plentiful. Retail business is reported as very quiet, but funeral work is quite plentiful in some sections of the city.

C. C. Sanders' new house is being partly glazed with the glass he took from the two houses that he tore down. The chrysanthemums are coming on nicely, with good prospects for some very large flowers in a couple of months. The cyclamens and Gloire de Lorraine begonias are very fine.

Theodore Miller is building an addition to his store. It will be used as a show house. Mr. Miller is fast becoming one of the leading florists of the city and commands some of the best trade.

Will Young started for the east last week. He will go to Atlantic City, N. J. for a rest. John Young and family have been at this resort for some time.

Fred. C. Weber, jr., will take an extended trip through the east on the return of his father and mother from the convention.

The Tesson base ball team will play the Bernings on September 7, on their home grounds. A good game is promised. R. J. M.

Minneapolis.

BUSINESS AND STOCK BOTH IMPROVING.—ROSES GOOD AND SELLING WELL.—VARIOUS PERSONAL AND TRADE NOTES.

Trade conditions are improving and young stock is being cut in large quantities. In tea roses Bridesmaids and Brides are abundant, while Meteor and Liberty are limited. Beauties of fair quality are in market and find ready sale. Carnations are yet outdoor picked but the flowers are good and stems fairly long. Gladioli are of excellent quality but the call for them is small. Asters are troubled with rust caused by excessive rains, so good stock is in demand. The weather conditions have improved and the later asters will probably be better.

Thos. Lynes is back from his European trip and says he had a very interesting as well as a pleasant journey.

H. Sauer & Son, of the East Side Floral Company, have added another house to their range.

Rice Brothers have been getting their store and office into shape for a busy season.

Thos. Hall will try grafted roses this year. They are looking prime now.

John Vasatka has completed his greenhouse plant on Chicago avenue.

TERRE HAUTE, IND.—Cowan Brothers & Company have rebuilt and enlarged three houses and added a new rose house 22x100, using 14x16 glass and cypress from Moninger, Chicago. Business is good and prospects are bright, for Terre Haute is booming, many new factories locating here.

THE AMERICAN FLORIST

EIGHTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.
Subscriptions accepted only from those
in the trade.

Advertisements on all except cover pages,
10 Cents a Line, Azate; \$1.00 per inch.
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive inser-
tions, as follows—6 times, 5 per cent; 13 times,
10 per cent; 26 times, 20 per cent;
52 times, 30 per cent.

Cover space sold only on yearly contract at
\$1.00 per inch, net, in the case of the two
front pages, regular discounts apply-
ing only to the back pages.

The Advertising Department of the AMERICAN
FLORIST is for florists, seedsmen and nurserymen
and dealers in wares pertaining to those lines only.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to
secure insertion in the issue for the following
Saturday. Address

AMERICAN FLORIST CO., Chicago.

In purchasing and planting bulbs for
spring bloom, remember that Easter falls
on April 12 next year, nearly two weeks
later than last Easter.

L. E. MARGUISEE says that if bugs are
eating one's asters let him try hellebore.
It is effective, applied with a common
barrel syringe when the plants are wet
with dew or rain.

RICHARD WITTERSTAETTER, of Cincin-
nati, calls attention to the fact that
several of his recent carnation seedlings,
of Lawson parentage, produce yellowish
flowers, much to his surprise.

LEO NIESSEN, of Philadelphia, wishes
to correct the statement in Edgar San-
der's convention paper, where it is said
that Mr. Niessen is a former employe of
S. S. Pennoek. Mr. Niessen writes that
he was never at any time in the employ
of anyone in the cut flower commission
business.

We note that the paper on "Wholesale-
ing Cut Flowers," prepared by Edgar San-
ders for the Asheville convention of
the Society of American Florists, makes
mention of nearly all the Chicago whole-
salers, omitting John B. Deamud, one of
the earliest and most successful commis-
sion men in that city. It seems to us
that Mr. Deamud is too long and favor-
ably known to be ignored in an essay of
such pretensions as that by Mr. Sanders.

A Three-Quarter-Span House.

ED. AM. FLORIST:—I wish to build a
three-quarter-span house twenty feet
wide, with the long slope to the south.
I can only make the south wall three feet
six inches high. How high should the
north wall be? What should be the
length of the sash bars? D. G.

The height can vary according to con-
ditions, but it is well to have the north
wall about two feet higher than the
south one. With the north wall five feet
six inches, and the ridge ten feet six
inches, the north sash bars will be about
eight feet and the south ones fifteen feet
six inches. L. R. TAFT.

Society of American Florists.

DEPARTMENT OF PLANT REGISTRATION.

J. B. Trudo, Alderband, N. Y., registers
Carnation Wingold, result of a cross
between Mrs. Lawson and an unnamed
white. Color Lawson pink with wide
white lengthwise stripes, sometimes
white-tipped; lower petals half white,
transversely. Size, three to four inches,
very double and fragrant. Height two
feet.

The name Miss Alice Roosevelt as

applied to a carnation raised by J. B.
Trudo has been withdrawn, there being
another carnation to which the name
had previously been given. The name
now substituted by Mr. Trudo is **Bilt-
more**. It is described as a seedling from
Mrs. Lawson × Eldorado, color white,
dotted and splashed with carmine.
Flower three and one-half to four inches
in diameter, full, fringed, clove fragrance;
foliage glaucous; stems stiff; height two
feet. WM. J. STEWART, Sec'y.

Greenhouse Building.

& Son, house 20x120.

Mellenville, N. Y.—G. J. Alexander, one
house.

Buffalo, N. Y.—W. J. Palmer, three
houses.

Stockbridge, Mass.—F. S. Aymar, one
house.

Haddam, Conn.—W. A. Kinner, carnation
house.

Pepperell, Mass.—W. A. Shepardson,
one house.

Detroit, Mich.—G. W. Davis, three
houses 15x85. Robert Watson, house
18x75.

New Albany, Ind.—A. Rasmussen, one
house.

Bloomington, Ill.—W. T. Hempstead,
one house.

Louisville, Ky.—E. G. Reimers, four
houses.

North Adams, Mass.—A. J. Schmutz
house 58x75.

Hartford, Conn.—C. H. Marey, house
10x40.

Shrewsbury, Mass.—Philip W. Moen,
conservatory 20x150.

Stoughton, Mass.—Robert Hutcheon,
rose house 20x60.

Des Moines, Ia.—W. L. Morris, one
house.

Cleveland, O.—Lars Andersen, range
of vegetable houses. Robert Kegg, four
houses 22x100. Andrews Bros., two
houses 20x100.

Wilmington, Del.—Simons Bros., four
houses 24x200.

Piping a House.

ED. AM. FLORIST:—I wish to heat a
greenhouse 24x200, even-span, thirteen
feet to ridge. The house runs from north-
east to southwest, partly protected from
west wind, no glass in walls but one end
is glass. The boiler will be at the south-
west end. I have enough 1½-inch pipe
for two runs and enough 1¼-inch for
eight runs. Will the 1½-inch do for the
mains, one on each purlin and feeding
two 1¼-inch returns with 1¼-inch at the
gutter and return under the side benches?
There are two side benches three and one-
half feet wide and two center benches five
feet wide. The temperature must be 55°
when it is 15° below zero outside. Will
I need to let out the drip at 100 feet or
will it work all right for 200 feet? What
size of boiler would you advise for steam
heat without a fireman? W. H. M.

Two runs of 1½-inch pipe will hardly
be enough for this house, and the amount
of radiation described will hardly be
sufficient for economical heating. If two
runs of 2-inch pipe are put in for flows
and the pipe now on hand is used for
returns, a very effective system will be
secured. If the two 1½-inch pipes are
placed at the bottom of the wall coils,
and they are so arranged that they will
take the water from the flows, there will
be no occasion for drip pipes. A twenty
horse-power boiler, with ten feet of grate
surface, is desirable. L. R. TAFT.

Scale in Boiler.

ED. AM. FLORIST:—How shall I clear
my boiler from scale. It is a tubular fire
box boiler, used as a hot water heater.
The water is very hard and a scale has
formed all the way from one-sixteenth to
one-eighth of an inch thick. Is there a
chemical preparation either to prevent
the scale or to loosen it? Would such a
chemical in the water weaken the cement
packing in the piping in the houses?
L. M.

There are several anti-scale compounds
for use in boilers, but any that act upon
the scale would also tend to soften the
cement joints, provided they are made of
hydraulic cement. If the boiler is a large
one, so that a man can get inside, the
best thing is to knock off the scale with
a hammer and chisel. L. R. TAFT.

Flows for Hot Water.

ED. AM. FLORIST:—For hot water heat-
ing to 50° with 20° below zero outside
how many 2-inch flows will be required
under the following conditions? House
19x65, three-quarter span. Rear wall
two and one-half feet higher than south
wall. South wall sixteen inches of glass
under plate, north wall fifty-six inches
glass. Ten feet to ridge; south rafters
fifteen feet two inches long. Gable ends
glass. The flow will have to pass
through a rose house to reach this house.
What size should the flow and return be?
P. F. C.

To give a quick circulation four 2-inch
flows should be used, and with twelve
returns there will be no trouble about
securing the desired temperature. The
main flows and returns should be 4-inch.
L. R. TAFT.

Oil for Greenhouse Heating.

ED. AM. FLORIST:—On account of the
coal famine which seems likely to make
trouble this fall I should like to inquire
as to the various burners for oil under
boilers. Taking a well built range of
8,000 feet of glass, what would a burner
cost and how much oil would it consume,
say, in a twelve hour run? What kind
of oil would be required and how much
would it cost? How much attention
would such a heating apparatus require
and would it be satisfactory? B. J. P.

What is commonly known as crude
petroleum is used for fuel purposes. The
price varies with the amount used and
the distance from the oil fields, but the
average expense as compared with that
when steam lump coal is used is nearly
double, but this does not take into
account the saving in firing and atten-
tion. With oil this is practically noth-
ing, although the boiler should occasion-
ally be examined. Crauc & Company,
Chicago, can probably supply fixtures
and estimates. L. R. TAFT.

A Question of Draft.

ED. AM. FLORIST:—I had intended plac-
ing my boiler about thirty feet from
where the chimney stands, twenty-five
feet high, but I am told that I shall have
to either raise the chimney or put the
boiler closer to it to get any draft.
Please advise me. G. K.

Had the size and kind of boiler to be
used been stated it would have been pos-
sible to give a more definite answer.
However, it may be said that the condi-
tions named will be very unfavorable for
a good draft. With a direct draft in the
boiler, a large smoke pipe and a large

chimney, fairly good results might be secured. If the boiler can be placed near the chimney the height named may answer for a small boiler.

L. R. TAFT.

OBITUARY.

W. A. BOCK.

On Tuesday, August 19, Wm. A. Bock passed away, after a lingering illness, at his home in North Cambridge, Mass. Mr. Bock was a native of Hanover, Germany. He came to Cambridge in 1866 and started, in 1870, the business which he has conducted so successfully ever since. His age was 58 years. He leaves a widow and one son by his former marriage. The funeral, on Friday, August 22, was attended by many sorrowing friends in flower trade circles. Mr. Bock was kindly and hospitable and visitors at his home always found an open handed welcome.

JOHN BATHER.

John Bather, son of Mr. and Mrs. Andrew Bather, of Clinton, Ia., was drowned while swimming in the Mississippi on August 21. In company with his parents and a party of relatives and friends, the young man, for he was 23 years of age, was enjoying a few days' outing at Camp Sunnyside, on the Iowa shore, a few miles below Comanche. On the fatal afternoon a party of nine rowed across to the big bar on the Illinois shore and went in bathing. John was carried beyond his depth in a swift current and drowned before relief could reach him. The remains were recovered and interred at Clinton on Sunday, August 24. The deceased was a book-binder by trade and a most popular young man.

Boston.

SUMMER SEASON GENERALLY BELOW AVERAGE OF RECENT YEARS.—GOOD STOCK NOT OVERPLENTIFUL BUT VALUES BELOW NORMAL.—OUTDOOR STOCK VERY ABUNDANT.—NOTES AND VISITORS.

The cut flower situation has shown a certain improvement during the past week, slight but very gratifying, and some grains of comfort are the result, after a rather disappointing summer. There is a fair call for good roses and lily of the valley locally, but prices are below genuine values on most things. Kaiscrins with 18-inch stems at \$5 a hundred will not make their growers rich in a day. American Beauty had fair success last week, but this week the quality offered has deteriorated and it would seem that the demand at Newport, which has been very heavy, has had the effect of lowering the grade that reaches the Boston buyers for the time being, the cream going to the fashionable resort. There are quite a number of small roses afloat, from young bushes, which bring but little and spoil the general market, and might with wisdom be thrown away by their growers. These, at least, are clean, and this much cannot be said for most of the product from older stock, which comes in now badly mildewed and not easy to dispose of. Meteor and Liberty are also very inferior just now and have no specified value in the market. No doubt when they develop better they will resume their wonted popularity. The market for white carnations is good, notwithstanding the surfeit of white asters available, and the quality of the flowers coming in is exceptionally good. This much can-

not be said for the colored sorts, which run to an inferior brand as a rule. The market for asters, peas and the common sorts of gladioli is as dead as it can be and the enormous supply of outdoor material is not absorbed with any regularity or satisfaction. Shakespeare gladioli continues, however, to retain a goodly popularity and is really the leading variety in this market.

The annual auction sale of stalls at the Co-operative Growers' Market will be held on Saturday, September 13.

The pilgrims to Asheville are all home again, well pleased.

Visitors: Paul Berkowitz, Philadelphia; W. J. Halliday, Baltimore.

DUNKIRK, IND.—James R. Johnston has filed a petition in bankruptcy, scheduling assets of \$4,430 and liabilities of \$3,042.70.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

SITUATION WANTED—By an experienced and successful mushroom grower; is at liberty to put in beds; now is best time. Address: J. P., care American Florist.

SITUATION WANTED—By private gardener. Fully understands growing vegetables and flowers either in greenhouse or outside. Aged 35, married. J. A. H., care American Florist.

SITUATION WANTED—By young man's hand-scaper gardener to take charge of park or cemetery; new work preferred. Good references. FRED A. WALZ, Foreman of Lincoln Park, Cincinnati, Ohio.

SITUATION WANTED—By capable florist and gardener; age 27, married; 14 years' experience; last six years in park work; in charge at present; good references. Address: B. S., care American Florist.

SITUATION WANTED—By a competent gardener, on a private place; 26 years' practical experience in all departments; married; references as to ability and character. Address: M. DALLACHIE, 21 Anson St., Jamaica Plain, Mass.

SITUATION WANTED—By a practical English gardener and florist; five years' apprenticeship from 1881 to 1886; been through all branches of the profession, both in England and America. Eastern states preferred. Address: W. DAYSON, (EXPT. STG.), Amherst, Mass.

WANTED—Man to do firing, potting, etc.; room with or without board. GIFT FLORAL CO., Richmond, Ind.

WANTED—Competent storeman. Must be sober and reliable. References required. CENTRAL GREENHOUSES, Sandusky, O.

WANTED—An assistant florist for general stock; state experience, wages expected with board and room and send references. J. L. PILLSBURY, Galesburg, Ill.

WANTED AT ONCE—Two good men, one good all-around man to grow stock and assist with day firing, and a good night fireman. Apply C. S. FOOTE, Downers Grove, Ill.

WANTED—Man for greenhouse work; carnations, chrysanthemums, etc. Wages \$10 per week. PAUL GAERTNER, West Tenth Ave., near Western Ave., Rogers Park, Ill.

WANTED—A single all-around greenhouse man, one who understands growing ferns, palms, carnations, etc. Address: J. M. GASSER CO., Euclid Ave., Cleveland, O.

WANTED AT ONCE—Thorough, all-around greenhouse man, to act as foreman, 45,000 feet of glass. Only first-class man need apply. Address: W., care American Florist.

WANTED—Second-hand steam boiler to heat 250 feet radiation; automatic regulation; must be in good repair; state lowest prices with description. G. GUY SWANGER, New London, O.

WANTED AT ONCE—A good young florist with references, to grow cut flowers and plants; also one with less experience; state wages with board. WHEELING GREENHOUSE CO., Wheeling, W. Va.

WANTED—Propagator of roses, carnations, etc. must be thoroughly first-class, no other need apply. Also a few growers of roses and carnations for sections. Good wages and steady work. LAKELAW ROSE GARDENS, Jamestown, N. Y.

WANTED—A working foreman to take charge of 22,000 square feet of glass, where first-class roses and carnations are grown, also one house of poinsettia; also one assistant. State age and wages expected, with board and washing. Apply to: JOHN L. WYLAND, De Haven, Pa.

FOR SALE—Good 15 horse-power stationary boiler, perfect order, reasonable. STAFFINGER, Springfield, N. Y.

FOR SALE—Well established greenhouse business, 12,000 feet of glass; steam heat, 100 miles from Chicago. INDIANA, AMERICAN FLORIST.

FOR SALE—First-class florist business; best location in city of 100,000, well established, no greenhouses; sickness; must change climate. Address: STORE, care American Florist.

FOR SALE—In central Massachusetts, florist and market garden place, 25 acres near new house, barn, 7,000 feet of glass, good local market and fine shipping facilities. Address: FOSTER, care American Florist.

FOR SALE—A great bargain, 3 greenhouses, 6,000 ft. of glass, well stocked with carnations, minims, roses and general bedding stock, in a live growing town in Western Pennsylvania. Address: BARGAIN, care American Florist.

FOR RENT OR SALE—At Highlands, N. Y. Three greenhouses 200 feet long, 4-story propagating house 100 feet, large potting shed, dwelling and stable; city water; steam heat. Immediate possession. Apply to: GEO. R. BINSTON, 206 Broadway, New York City.

Situation Wanted.

A young Dutchman, having been eight years in a bulb business in Holland, as book-keeper and correspondent in French, German, English and Dutch; having had experience in bulbs and plants, and also travelled this spring through the U. S. A., seeks a situation in a large seed store. Excellent references. Address: DUTCHMAN, care American Florist.

WANTED

A night fireman, single. One who has had experience in greenhouse work; must be trustworthy and of good habits. Steady job and good wages for the right man. Reference required.

J. B. HEISS, The Exotic Nurseries, Dayton, Ohio.

Wanted...

Experienced young lady to take charge of cut flower store in the Northwest; one who is thoroughly versed in all branches of the trade. State experience and salary wanted.

Address: A T K, care American Florist.

For Rent or Sale Greenhouse

(about 7,000 feet of glass), dwelling and stable, Evanston, Ill., two blocks from C. & N. W. station. Good established trade direct from greenhouse. Rent reasonable. Address:

Worcester, Mass.

TRADE SHOWS STIMULUS OF APPROACHING AUTUMN.—GROWERS MOSTLY IN SHAPE FOR NEW SEASON.

Trade is gradually improving, as the vacationists are returning to the city, and bids fair to start in as early as usual. Roses are improving in quality and we are getting about all we can handle. Asters, gladioli, sweet peas and so forth are plentiful and make the color in most of the window displays. Carnations are nearly all housed and nearly double the quantity of last year has been planted. Violets in the house and field are looking fine and give promise of bountiful crops this winter.

The coal situation is worrying the growers considerably. Hard coal is now bringing from \$9 to \$10 a ton and bituminous from \$5.25 to \$5.75, and no relief in sight.

The Worcester Agricultural Society holds its fair September 1 and 2 and a large display of plants and flowers is promised.

H. A. Cook, of Shrewsbury, has torn down two of his old houses and is erecting a modern iron house for carnations. A. H. L.

LOUISVILLE, KY.—Jacob Schulz and wife celebrated their silver wedding August 23.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

WALTER P. STOKES, Pres.; C. N. PAGE, First Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Secy and Treas.

VISITED NEW YORK: Mr. Stephens, the Bermuda lily bulb man.

REPORTS on Saginaw pea crops are for lower percentage than first expected.

ALBERT McCULLOUGH, of J. M. McCullough's Sons, Cincinnati, is visiting Baltimore and Washington on business.

J. OTTO THILOW, with Henry A. Dreer, Philadelphia, passed through Chicago August 28, enroute to Denver, Colo., where he will spend his vacation.

THE Caladium esculentum crop in the south, while retarded by the drought, is above the average in acreage and should produce enough to go around.

ALBERT DICKINSON, Chicago, has given \$500 to the Rural Home and School for Boys, at St. Charles, Ill., in which John W. Gates and many prominent Chicago men are interested.

THE New York Market Gardeners' Association, Richmond Borough, New York, has issued a circular asking support for H. R. Resolution No. 249, asking particulars relating to purchase and distribution of seeds for the past four years.

C. H. WALKER has severed his connection with the Springfield Seed Company, of Springfield, Mo., and gone to Oklahoma City, Okla., where he will establish a wholesale and retail seed business.

In reply to a recent inquiry, W. Atlee Burpee states that the seed trade, in all three branches, promises to be extremely good for the season of 1903. In fact this year it will not be a question of demand, but altogether one of supply. Many items, notably peas, certain beans, all vine seeds and probably tomatoes will be in such terribly short supply as to amount practically to a famine.

Nebraska Seed Crops.

The reports from the Nebraska vine growing section are going to be more discouraging. The latest report we received this week reads as follows: "Vine seed crops are looking worse and worse although the melon louse or aphid seems to have been killed by the cold weather. Crops are too far gone to recover. There are a few crops of cucumber that may make something yet, but many of the crops are just as thoroughly cleaned out as though they had been ploughed up."

Californians Claim Too Much.

A recently issued seed circular from a newly established firm at Los Angeles, Cal., quotes from Mr. Burpee as noted below and elicits the following pointed letter from that usually mild gentleman:

Of course you are perfectly right in doing all that you can consistently to boom California, but I must protest fully as to the quotation you give in black-faced type as coming from me. I never made such a statement and such a statement is not true. I should like very much to know what authority you have when you state that I "was recently frank and honest enough to state in public print as follows: We depend almost wholly on California for seeds."

There are certain varieties of seeds produced extensively in California which we never under any consideration handle, as our experience has shown that good as California is in other lines these varieties are not nearly equal to seed grown elsewhere. You will find one statement of this nature on page 27 of this year's catalogue.

I anxiously await your answer as to in what

"public print" you found such a statement purporting to come from me and I shall of course rely upon you to withdraw such a statement when I tell you, as I do, that it is entirely without foundation.

The seed business would be comparatively simple in its character if we could rely "almost wholly" on any one section for our seed supplies.

Very truly yours,
(Signed) W. ATLEE BURPEE.

Lenox, Mass.

HORTICULTURAL SOCIETY HAS A FINE SHOWING OF SUMMER FLOWERS.—NOTES OF AWARDS.

At the regular meeting of the Lenox Horticultural Society on August 16 an exhibition of annuals and perennials was held. J. Dallas was first for a collection, staging over 100 vases, which made a magnificent display. His vases of Groff's

hybrid gladioli, phloxes, dianthus and asters were especially fine. A. H. Wingett was second, with a smaller group. In his collection excellent vases of Newport scarlet larkspur and sweet peas were shown. Miss H. Parish was first for gladioli.

There was a large attendance of members and an interesting evening was spent. The society has decided to hold a two days' exhibition in October, also to hold a field day in the first week in September for the benefit of members and friends.

A diploma was awarded to R. A. Schmidt for collection of fringed begonias, and vote of thanks for pentstemons. L. Carlquist staged *Cercus grandiflora* and an excellent collection of dahlias.

Lilium Harrisii.

We have a splendid lot of late dug bulbs that have just arrived. On account of late digging bulbs are splendidly ripened and are unusually fine. The season has been very favorable, and it is a long time since we have been able to offer such fine stock. Bulbs are plump and hard, and that bright golden yellow color which denotes a well ripened and healthy bulb. Bulbs run unusually large and are in the best possible condition. We offer them as long as unsold as follows: 6 to 7-inch bulbs, \$17.50 per case of 850 bulbs; in less quantities, \$6.00 per 100. 7 to 9-inch bulbs, \$30.00 per case of 200 bulbs; in less quantities, \$11.00 per 100. 9 to 11-inch bulbs, \$22.00 per case of 100 bulbs; in less quantities, \$22.00 per 100.

We also have a fine lot of BERMUDA-GROWN LONGIFLORUM

Late dug bulbs, shipped by last Bermuda Steamer, which arrived this week. This is an extra fine lot of selected bulbs. 7 to 9-inch bulbs, \$20.00 per case of 200 bulbs; in less quantities, \$11.00 per 100.

CALLAS.

We have a grand stock of these splendidly ripened bulbs ready for immediate shipment.

Extra quality bulbs, 1 1/4 to 1 1/2 inches diameter \$5.00 per 100	\$40.00 per 1000
Selected bulbs, 1 1/4 to 1 1/2 inches diameter 6.00 per 100	60.00 per 1000
Mammoth bulbs, 1 1/2 to 2 inches diameter 8.00 per 100	70.00 per 1000
Exhibition bulbs, 2 to 3 inches diameter 10.00 per 100	

We can also ship immediately on receipt of order the following:

WHITE ROMAN HYACINTHS Finest quality bulbs, 12 to 15 cm. in circumference, \$3.00 per 100; \$26.00 per 1000.

NARCISSUS PAPER WHITE GRANDIFLORA \$1.00 per 100; \$9.00 per 1000.

BERMUDA BUTTERCUP OXALIS 75c per 100; \$6.00 per 1000.

FREESIAS Selected bulbs, 1/2-inch and up in diameter, 75c per 100; \$6.00 per 1000.

MASTERPIECE.

"Vaughan's International" Primrose Mixture.

Unquestionably the best mixture of Chinese Primroses. It contains the largest variety of the best selling colors. Flowers large, beautifully fringed, borne in large clusters well above the rich green leaves. Pat. (25) seeds 50c; 5 pkts. (1250 seeds) \$2.00.

Cineraria VAUGHAN'S COLUMBIAN MIXTURE. A mixture of the best English and German strains unsurpassed. Pkt. (1000 seeds) 50c; 3 pkts. \$1.25.

Cineraria HYBRIDA, large flowering, white blood red or crimson, double white or best double mixed, each, per trade pkt., 5c.

MIGNONETTE, TRUE MACHET. Trade pkt., 10c; 1/2 oz., 25c; 1 oz., 50c; 2 ozs., 75c; 1 lb., \$1.25.

CALCEOLARIA HYBRIDA, choicest mixture, pkt. 50c.

PANSIES

VAUGHAN'S "INTERNATIONAL"

Received the only reward for Mixed Pansies at the World's Fair. It is to-day better and more complete than ever. It contains the cream of the stock of 10 Pansy specialists. There is no better mixture in existence as all the florists who saw or used it can tell you. Price per oz., \$10.00; 1/2 oz., \$5.00; 1/8 oz., \$1.50; trade pkt., 50c.

VAUGHAN'S "GIANT MIXTURE."

This mixture is specially made by us from all the separate colors of Giant Trimardeau, the Giant Bugnot and Cassier and several special strains which cannot be had any other way. If your trade demands large flowers there is no better mixture. Price, 1/4 lb., \$14; oz., \$4; 1/2 oz., \$6; td. pkt., 25c.

MASTERPIECE--New Giant Curled.

This strain comes nearer to "Double Pansies" than anything ever introduced under that name. In reality the number of petals is the same as that in other Pansy flowers, but they are crumpled and curled in such a fashion that the flowers appear double. The flowers are of enormous size, often 3 inches across, and the color variations and combinations are odd and striking. Pkt. 50; 1/2 oz., \$1.00.

	Trade Pkt.	1/2 oz.	Oz.
GIANT WHITE , very large, with violet eye.....	10	20	20

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.

CHAS. A. ILGENFRITZ, Props.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y.
Twenty-eighth annual convention, Detroit, Mich., June, 1903.

An innovation in cemetery management is the advertising now being done by the Elmwood Cemetery Company, Chicago. Eight-sheet lithographs are shown on the bill boards announcing "Beautiful Elmwood, the new park plan cemetery" and inviting all interested to "send for booklet." George H. Scott, for fifteen years at Rose Hill Cemetery, Chicago, is superintendent of the new tract, which includes 350 acres eight and one-half miles northwest of the city hall.

American Cemetery Superintendents.

The sixteenth annual convention of the Association of American Cemetery Superintendents was held at the Copley Square Hotel, Boston, Mass., August 19 to 21, visiting Lynn and Salem August 22.

The convention was called to order Tuesday morning by the president, Frank Ulrich, and prayer was offered by Rev. C. H. Spaulding, D. D., after which the president read his annual address and the secretary and treasurer, Jas. H. Morton, submitted his report for the year. Twenty new members were enrolled. J. J. Doyle, chairman of the board of aldermen of the city of Boston, on behalf of Mayor Collins, extended a cordial invitation to the members of the association to visit the places of interest in and about Boston. The president appointed the following committees: Auditing, E. L. Kimes, Henry Church and W. Perry Goodwin; general resolutions, Wm. Salway, G. W. Painter, H. C. Chamberlain; location, A. W. Hobart, J. W. Keller and Robert Scrivener. A general discussion followed.

The entertainment for the afternoon consisted of visits to King's Chapel, Granary and other noted burial grounds, to Boston Common and the Public Garden.

The convention in the evening was held at the same place at 8 p. m. Leonard Ross delivered an impromptu address relative to "Old Cemeteries of Boston," followed by J. H. Morton on the same subject. A. W. Hobart read a paper entitled "Respect for the Dead and Justice to Their Descendants," after which there was a general discussion. Mr. Hargraves, superintendent of Forest Hills Cemetery, addressed the meeting. The secretary reported the demise of two members of the association during the past year, namely, Ezekiah Hume, of Brighton, Pa., and B. B. Morehouse, of Cortland, N. Y., and a committee to pass resolutions on the deaths of said members was appointed, consisting of T. H. Wright, George Van Atta and George W. Voorhees. The meeting then adjourned.

Wednesday morning visits were made to Harvard College and to the Botanical Gardens, at which place the curator, Robert Cameron, read a very interesting paper on "The Herbaceous Border." In the afternoon Mt. Auburn and Newton cemeteries were visited and return to the city was made by way of the Commonwealth avenue boulevard.

The evening session was held at 7:30. H. D. Litchfield read a paper entitled "From the Undertaker's Point of View;" W. B. Van Amringe read a paper entitled "Progress of the Cemetery Memorial Industry During the Past Twenty Years;" C. W. Ross' paper entitled "Road Build-

ing" was read by his son, H. Wilson Ross; and Oscar L. Stevens, of the *Boston Transcript*, read a paper entitled "Cremation." All of the papers were exceedingly interesting and called forth a general discussion. The meeting then adjourned.

Thursday morning the convention was called to order at 9 a. m. A paper by W. N. Rudd, entitled "Some Mistakes," was read and Thomas White read one on "Extremes in Cemeteries." The papers were excellent and a general discussion followed. The meeting then adjourned.

In the afternoon a very beautiful drive was enjoyed. Carriages were taken at the hotel and the members were driven through the park system of Boston. Visits were made to Arnold Arboretum, Franklin Park, Forest Hills Cemetery and Forest Hills Crematory, after which Mount Hope Cemetery, under the supervision of J. H. Morton, was inspected. The members were then driven back to the hotel.

The evening session was called at 7 p. m. Archibald Smith read a paper entitled "Grasses" and J. A. Pettigrew one entitled "Notes on Tree Planting." A general discussion followed. At this meeting the following officers were elected for the ensuing year: President, H. Wilson Ross, Newton, Mass.; vice-president,

J. C. Dix, Cleveland; secretary and treasurer, J. H. Morton, Boston. It was decided to hold the next convention, that of 1903, at Rochester, N. Y. The executive committee appointed by the president for the ensuing year consists of J. W. Keller, Rochester; John Meisch, of Rochester, J. H. Sheperd, Syracuse, and Frank H. Sheard, Rochester. The meeting then adjourned.

Friday morning, August 22, the members assembled at the North Union Station at 9:30, where special cars were taken to Lynn, where Pine Grove Cemetery, in charge of William Stone, was visited. The cars were then taken for Salem, and Harmony Grove Cemetery, in charge of George W. Cressy, was inspected. The electrics then conveyed the members to Salem Willows, where a shore dinner was enjoyed and an excellent view obtained of the Atlantic ocean, which to many was a novel and interesting sight. Return to the city was made by car, it being reached about 9 o'clock p. m., and the convention in Boston was at an end. Everyone seemed to have thoroughly enjoyed the visit to Boston and voted it an excellent convention city.

WARE, MASS.—Chas. F. Clark will open a new store as soon as building is completed.

Dreer's Offer of Cibotium Schiedei

ARAUCARIA EXCELSA GLAUCA.

- 5-inch pots, 8 to 10 inches high, 2 tiers \$.75 each
- 6-inch pots, 12 inches high, 2 to 3 tiers 1.00 each
- 6-inch pots, 15 inches high, 3 tiers 1.25 each
- 6-inch pots, 18 inches high, 4 tiers 1.50 each

If you have never tried this beautiful Fern in fine decorations or as a house plant, you should become acquainted with it at once. Its points of merit are so many that you cannot afford to be without it. It possesses a graceful, delicate habit unlike any other plant and while its appearance is that of being very soft, it is really as hardy as any of the commercial Palms. We have a fine stock of it this season and offer heavy plants as follows:

- 5-inch pots, \$1.00 each; \$10.00 per dozen.
- 7 inch pots, 1.50 each; 18.00 per dozen.
- 9 inch pots, 3.00 each; 36.00 per dozen.

The 7 and 9-inch pots are beautifully finished plants, suitable for decorative work.

Special Offer of Araucarias.

We have in stock about twelve thousand Araucarias, on which we are in a position to offer special values. It will pay you to procure your next winter's supply now and not only gain the benefit of the summer's growth, but also cheap transportation rates, as these plants can be safely shipped by feet freight during the summer months.

ARAUCARIA EXCELSA.

- 5-inch pots, 8 to 10 inches high, 3 tiers \$.50 each
- 6-inch pots, 10 to 15 inches high, 3 to 4 tiers75 each

THE Gardeners' Chronicle.

A Weekly Illustrated Journal.

ESTABLISHED 1841.

THE GARDENERS' CHRONICLE has been FOR OVER SIXTY YEARS THE LEADING JOURNAL of its class. It has achieved this position because, while specially devoting itself to supplying the daily requirements of gardeners of all classes, the information furnished is of such general and permanent value that the GARDENERS' CHRONICLE is looked up to as the STANDARD AUTHORITY on the subjects of which it treats.

Subscription to the United States, \$4.20 per year. Remittances to be made payable to H. G. COVE.

OFFICE:—
41 Wellington St., Covent Garden, London, England.

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and sporting readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

Convention Gunners' Contest.

My attention has been called to an error in the scores of the team shoot at Asheville, no doubt due to the haste with which it had to be gotten off to be in time. W. A. Hammond is credited only with 44 broken targets when he made the fine score of 47, and Reid is credited with 37, which should have been 33, making our total 258.

A. B. CARTLEDGE.

Syracuse, N. Y.

STATE FAIR TO HAVE LARGE HORTICULTURAL DEPARTMENT.—FLORIST TO BE SUPERINTENDENT.—UTICANS TO COME.—PIGEON FANCIERS.—NOTES.

Syracuse florists are just now occupied with thoughts of their exhibitions at the New York State Fair, which will be held here from September 8 to 13. Robert H. C. Bard, of P. R. Quinlan & Company, is superintendent of the horticultural department. His opinion is that the exhibits of flowers and plants will be unusually large and of superior quality. The judges are William Mathews and F. J. Baker, of Utica. The prizes offered run as high as \$75 and the classes are much the same as last year.

R. H. C. Bard is a crack shot and can teach Syracuse sports something about the use of a gun. His latest fad is a splendid loft of homing pigeons and he means to equal Henry Bellamy, of Marquisee's, also a great pigeon fancier. Mr. Bellamy has a famous strain.

During the week of the fair, the Syracuse florists will entertain for a day the florists from Utica, returning the compliment which the Utica men paid them a couple of weeks ago by giving them a bang up good time in the "pent-up" city.

Knoxville, Tenn.

NORTHERN FLORISTS STOP ENROUTE FROM THE CONVENTION.—GREENHOUSE ESTABLISHMENTS VISITED.

After the adjournment of the convention at Asheville, a large party of the tourists came to Knoxville, spending several hours in visiting different points of interest in and about the city. Among the party stopping over in Knoxville were E. G. Hill, of Richmond, Ind.; Mr. Good, of Good & Reese, of Springfield, Ohio; E. G. Gillett, of Cincinnati, O.; James Hartshorne, of Joliet, and others. A number of the visiting florists were accompanied by their wives and families.

After a ride around the city, visiting many points of interest and vantage the whole party visited the establishment of Charles Crouch, on the Danville pike, where they found thirty-three greenhouses and were surprised at the extent and efficiency of the place. Some of the party drove out to Charles Baum's greenhouses, at Wildwood, and there they found many large houses.

Messrs. Charles Crouch and Charles Baum, the leading florists at Knoxville, were in attendance at the convention at Asheville. Mr. Crouch speaks in excellent terms of the meeting.

Newport, R. I.

SOME ELABORATE DECORATIONS FOR DINNERS AND DANCES.—BEAUTIES THE FAVORITE FLOWER.—MANY WATER LILIES USED.—VARIOUS NOTES.

The first dinner dance of the season was given by Mr. and Mrs. E. J. Berwind, at "The Elms." When 300 guests, with an orchestra, find space in a mansion an idea may be formed as to the part a florist has to assume in the arrangements. The west terrace on this structure measures 193 feet, the ball room 50x45. The interior floral decorations were in charge of Bruce Butterton, the gardener on the estate, assisted by the Hodgson Company. American Beauty roses were used exclusively in the ball room. The extensive greenhouses of the estate not being equal to the demand, Carl Jurgens supplied 1,000 Beauty roses. In the dining room on each table was a centerpiece of white and red roses.

Another recent ball deserving of notice was given by Mr. and Mrs. Pembroke Jones. The elaborate floral decorations were by Hodgson, American Beauty roses being used by hundreds in the several rooms. In the ballroom over 10,000

water lilies were arranged in streamers on the side walls and ceilings, while white roses and tall stalks of hollyhocks in profusion were banded from the floor to the stage proper. Gardenias were supplied to the ladies.

Butler & Son executed the floral work at the Hazard Memorial School on the occasion of the reception to Cardinal Gibbons. The display of the papal colors, yellow and white, proved a striking addition.

The Newport Agricultural Society has elected officers for the current year. Its annual fair will be held September 23 to 26, in the new hall, Portsmouth.

F. L. Ziegler, formerly with the Geo. A. Weaver Company, and now hustling for "No. 1" at 18 Broadway, reports a fair business as seedsman and florist.

John H. Cox, formerly of Boston, a veteran in the seed business, now stands behind the counter of the Geo. A. Weaver Company. C. J. M.

BRANDON, MAN.—Fred. Mansoff was flooded out at his old location, saving little stock, but is building two new houses 20x100 up town.

Buffalo.

TRADE STILL CONFINED TO FUNERAL WORK.—ROSES MOSTLY POOR.—DOINGS OF THOSE IN THE TRADE.

Palmer is progressing finely with his new store, and, with the management of a Thorley man, wonders should be worked. But I think that a branch store should be more than five blocks from the main office, although it certainly is a good location.

Good weather prevails but trade is very quiet, funeral work about all there is at present. Stock is up to the average, carnations good but roses poor, excepting a few Kaisersims. Gladioli are very plentiful and fine.

Everyone is pleased at the re-election of John Burton as president of the S. A. F., and the selection of Milwaukee for the next convention.

South Park never had as many visitors as this year, and everyone appreciates the work of Prof. Cowell.

W. H. Grever, of Bullock & Company, is now nicely located on Lemon street.

J. B. Wiese has returned from abroad, leaving W. F. Kasting to come later.

S. B. Smiley, at Lancaster, is getting things into good shape since the fire.

C. G. Gunther, of Hamburg, is hard at work getting in his stock.

J. H. Rebstock is still at the Beach.

TRADE DULL BUT WEATHER VERY FAVORABLE TO STOCK.—CONVENTIONITES WERE PLEASSED.—A VARIETY OF PERSONAL AND TRADE DOINGS.

Business continues to drag but carnations have been much better than usual, owing to sufficient moisture and cool weather. Gladioli were very much in demand on several occasions this summer. Asters are now in their glory. White and pink are the finest, purple scarce. Roses continue to improve.

E. C. Reineman speaks glowingly of the pleasures and the picturesqueness of his trip to and from the convention, of the excellence of the arrangements for the entertainment of visitors, and of the interest displayed in the discussions and readings during the sessions.

W. J. Fitzsimmons, of Randolph & McClements, will spend two weeks on Lake Erie.

Phil. Langhans has returned from Chatauqua and Danville after a month's absence.

Miss Janey M. Coard and A. W. Smith, Jr., were united in marriage on Thursday, July 21.

John Boldingier, of U'lam & Co., is on deck again after two weeks at the sea shore.

Frank Schoen, of A. M. Murdoch's, has recovered from his long seige of fever.

E. L. M.

GERANIUM BARGAIN

2-inch pot plants at \$1.50 per 100.

JEAN VIAUD and M. de CASTELLANE at \$2.00 per 100 and less than 25 of a variety will be at the rate of \$2.50 per 100.

Twenty varieties all correctly labeled, they are not carried over stock but good big cuttings potted up for fall sales. They should be reported now, order at once.

S. A. Nutt, Buchner, La Favorite, Bonnot, Castris, Perkins, Jaulin, Poitevine, Castellane, Viaud, Acteon and Heteranthe in quantity.

Rooted cuttings in the same assortment ready now at the same price.

SMILAX

A few thousand left at \$1.25 per 100.

PANSIES

You all know the quality of the strain that I seed out. It is not a cheap one, but a high-class strain—the only kind that it pays you to buy. The plants are good little seedlings at 70c per 100 or \$1.00 per 100.

BONE MEAL

The best for Florist's use at \$3.50 per 20 lb. bag or \$32.50 per ton.

NOTICE.

THE MODEL PLANT STAKE COMPANY,
formerly of Brooklyn N. Y., has removed
to 208 Jersey St. Harrison, New Jersey,
and is now The Parker-Bruen Mfg. Co.

**The Model Extension
Carnation Support.**

Flushing, Long Island,
Dec. 1th, 1901.
MR. THERON N. PARKER,
Brooklyn, N. Y.

Dear Sir - I have used
your Wire Carnation Sup-
port the last two years. In
all about 12,000. They fill
the bill in every particular.
Nothing could be more
satisfactory and would
give me a great deal of
pleasure if I can bespeak a
good word for you to the
trade and you are at liberty
to refer to me at any
time.

Very truly,
A. L. THORNE.
La Fayette, Ind.,
July 8th, 1902.
MR. THERON N. PARKER,
Harrison, N. J.

Dear Sir - After using
your Model Carnation Sup-
port in two of our houses
the past winter, we have
come to the conclusion that
it is perfectly adapted to
supporting carnations, and
shall use them on all our
plants the coming season.
We were much pleased
with the simplicity,
strength and neat appear-
ance of the support.

Yours truly,
F. DORNER & SONS Co.

San Francisco.

TRADE SHOWS STIMULUS OF PYTHIANS PRESENCE.—GOOD STOCK MOVING WELL.—VETERAN GROWER TAKES UP NEW SPECIALTIES.—A DEATH.—VARIOUS NOTES.

The city has been given into the hands of the Knights of Pythias and business is ahead of last year for this time. Good stock in roses and carnations is very scarce and quickly disposed of but asters and amaryllises are moving rather slowly, owing to immense quantities coming in. Lilies (auratum, album and rubrum) are good and sell accordingly. It is certainly surprising that some large growers of roses do not go in a little heavier for summer stock, as there has always been a ready sale for good flowers in August and September.

E. Leedham, of Santa Cruz, has been on a visit to San Francisco in connection with an exhibit of dahlias, which consisted of some seventy-five varieties and some very fine seedlings. Mr. Leedham went into the flower business only three years ago, which is a little unusual for a man 73 years of age. He is going in very heavily on daffodils and has planted some 400,000 bulbs.

E. E. Uslar who has been connected for a period of fifteen years with the California Nursery Company, in Niles, is dead, of heart failure. Mr. Uslar was a native of Rochester, N. Y., 42 years of age and one of the best known persons in the business, he having been a director of that large concern.

E. Ludeman, Jr., has embarked in matrimony and settled down in Milbrae, where he has taken charge of the large place belonging to the Pacific Nurseries, of which his father is the head.

H. H. Lilienthal has founded the "Pacific Florist," a magazine on orchards and gardens. GOLDEN GATE.

MANCHESTER, MASS.—The North Shore Horticultural Society held its annual summer show at the town hall on August 20. As usual, there were large displays of choice garden flowers from the many summer residents of the town, prominent among the exhibitors being Mrs. H. L. Higginson, who received a silver medal, and T. Jefferson Coolidge, who was awarded certificates. The Blue Hill Nurseries made a display of over 100 varieties of hardy herbaceous flowers.

CUT FLOWER BOXES

WATERPROOF. Corner Lock Style.

NURSERY SEED FLORISTS' CATALOGUES

87-91 Plymouth Place, CHICAGO

Bargains FOR Florists.

We are headquarters for a general assortment of the necessary material and supplies that you are looking for. If you are about to improve or construct, consult us.

In connection with the dismantling of the Pan-American Exposition, we have for sale:

20,000,000 FEET of fine seasoned lumber, practically new, consisting of all sizes of joists, timbers, dressed and matched boards and flooring; also sash and doors. 50,000 FEET of roofing glass.

PIPE.

We are headquarters for pipe. We offer you:

100,000 FEET of 2 to 4 inch wrought iron, lap welded casing. We can furnish this material in three ways: Either with sleeve or jacket couplings, screwed ends and threaded couplings or with expanded cast iron flanges with bolts and nuts.

1,000,000 FEET of standard black wrought iron pipe, size $\frac{3}{8}$ to 12-inch. It is second-hand but has new threads and couplings and is in first-class condition.

1,000 TONS of galvanized wire 9, 10, 11, 12, 13, 14 and 15 gauge.

50,000 FEET of 2, 3 and 4-inch cast-iron soiled pipe and fittings.

100,000 FEET of garden hose, $\frac{3}{4}$ and 1-in. 75,000 FEET of cotton rubber-lined fire-hose, (rubber-lined in and outside), ranging in sizes 1 to 2 $\frac{1}{2}$ -inch.

VALVES and fittings of every kind.

BOX COILS for heating purposes.

RADIATORS, new and second-hand.

We also offer the following bargains in

Heating Boilers

50 CAST-IRON sectional heaters, capacity from 450 to 5,000 feet.

1 NO. 2 Standard Kroeschell hot water heating boiler.

FOUR 36x10 Horizontal Tubular.

FOUR 36x12 Horizontal Tubular.

FIVE 42x10 Horizontal Tubular.

FIVE 42x12 Horizontal Tubular.

SIX 48x14 Horizontal Tubular.

TWO 54x16 Horizontal Tubular.

FOUR 60x16 Horizontal Tubular complete with all fittings.

PUMPS of all Descriptions.

A carload of shovels and spades that we are selling at \$5.00 per dozen.

We carry a complete stock of hardware and farm implements, besides plumbing material of every kind.

Write for Catalogue No. 47.

PLATE AND WINDOW GLASS

Greenhouse Glass a Specialty
205 Randolph Street, CHICAGO.

Lowell, Mass.

TRADE GOOD FOR THE SEASON.—MANY ASTERS USED FOR FUNERAL WORK.—STORM INJURES OUTDOOR STOCK.—NOTES.

Considering the time of year, business is fairly good. The supply of asters has shortened up, and so have supplies of other outdoor material. One of the most severe thunder and hail storms experienced in Lowell in a number of years began early on the morning of August 23 and played havoc with outdoor stock. It knocked asters and sweet peas flat to the ground and perforated cannas, ricinis and other tall growing stock. Both Bride and Bridesmaid roses are steadily improving and are forging to the front again. Funeral work has been quite brisk the past week and at the obsequies for a prominent physician over twenty solid wreaths of asters were counted.

Gilbert Wentworth, formerly with M. A. Patten, but more recently of Bucksport, Maine, has gone to work for A. Roper.

W. A. Patten and wife have returned, after spending a very enjoyable vacation at their summer cottage on Plum Island.

After an absence of ten years, James Mackin, of Greenwich, was in town last week renewing his old acquaintances.

Otto Bourdy is cutting some very fine straw colored asters, which are something of a novelty.

Harvey Green and family have returned from a sojourn down in Maine.

A. M.

Washington.

PARTY WELL PLEASED WITH CONVENTION TRIP.—MOUNTAIN CLIMBERS ARE STILL ABSENT.

The Washington delegation to the Asheville convention were much pleased with the trip to the land of the sky. Everybody was pleased with the trolley ride up Sunset Mountain, from which we had a fine view of the city and the surrounding mountains, also with the carriage ride to Biltmore. The drives and landscape are grand but most of us were disappointed with the garden and bedding. Most of the party came home Saturday morning by the special train. Peter Bisset and John Clark will spend another week tramping over the mountains botanizing. George C. Shaffer and Otto Baur intended going to the summit of Mount Mitchell and then return home.

WATER.

If you want water only when the wind blows a windmill will do your work and cost less money than our Rider and Ericsson Hot Air Pumps, but if you want water every day while your flowers are growing and do not want your pump blown down when the wind blows too hard, no pump in the world can equal ours. We have sold about 20,000 of them during the past twenty-five years, which is proof that we are not making wild statements.

Our Catalogue "A 3" will tell you all about them. Write to nearest store.

CROP INSURANCE.
Life insurance is valuable because it guarantees the outcome.

"Gurney" Heaters

"BRIGHT IDEA," "DORIC" and "400 SERIES" do the same thing for your hothouse: **THEY GUARANTEE THE CROP.** First of all they save 30 per cent on the coal bill and so keep expense at a minimum. Next, they produce an even heat and so do not imperil the life of the plant. Next, they are simple to operate and so require least attention. Lastly, they wear longer than others and thus perceptibly reduce the capital invested. Don't buy or exchange until you've investigated them.

Convention Reflections.

That the conventions of the S. A. F. invariably prove to be pleasant events in many ways to those fortunate enough to participate in them is so well known that it needs no special argument to prove the case, and this state of affairs was patent to a large majority of those who attended the Asheville meeting.

In the first place, it was a new experience to many members to travel through the rugged and storm-scarred lands of North Carolina, to note the primitive farming and peculiar types among the population, the many modest dwellings so guiltless of paint that were seen along the line upon which we traveled, and finally to climb over that surrounding wall of mountains into the "land of the sky." Regarding the town itself in which our meeting was held, it is not necessary to go into details here beyond saying that it is a place of great possibilities from a landscape gardeners' standpoint, and one that will doubtless be greatly improved within a few years.

One feature that is lacking to northern eyes is good grass, but this is in all probability largely due to climatic conditions, and therefore is difficult to overcome, though a careful selection of grasses adapted to the climate may work wonders among the lawns of Asheville as the march of improvement goes on in the next few years.

The enterprising citizens of Asheville comprising the Board of Trade display a most commendable spirit in providing so fine a public hall for convention and exhibition purposes, and those taking part in the trade exhibition found a very able and courteous representative of the Board of Trade in the person of its secretary, Mr. Randolph, a gentleman to whom the amenities of life seemed to be a second nature.

At the first glance one may be impressed with the idea that it is a good plan to have the meetings of the society and the trade exhibits in the same room, thus keeping the members together, but in practice it is not quite as satisfactory as to have the two in separate apartments, for meetings are likely to be disturbed by discussions between merchant and customer, and on the other hand possible business deals may be ruthlessly broken off by the vigorous rapping of the presidential gavel. And it must be remembered that exhibitors do not pay for space on these occasions simply with a view to beautifying the meeting place and adding to the prestige of the society,

but rather to display their wares and extend their trade. This, dear brethren, is not the ill-natured growl of an unsatisfied soul, but is just a bald statement of fact, and facts we are told are stubborn things.

The trade exhibition as a whole proved to be a better one than was expected, for we can readily recall the many dismal predictions that were made after the meeting place for 1902 had been announced in Buffalo last year, and whether this change of heart on the part of the exhibiting contingent was due to southern eloquence, southern "moonshine," or to natural benevolence is not definitely known.

That the south would be represented in the exhibition was expected, and this expectation was carried out in some lines, the evergreens shown by a well known Georgia firm being one of the notable exhibits, while some bulbs of North Carolina production were of good size, very clean and well prepared for the market, and would appear to give much promise for that industry in the future.

Biltmore is famous in many respects, and one notable feature by which the Vanderbilt estate and Robt. Bottomley will be long remembered was found in the magnificent kentias that were provided for the decoration of the Auditorium. The big *K. Forsteriana* at the back of the stage was a noble specimen, carrying about eighteen perfect leaves, the total height of the plant being fully twenty feet, and the tub in which it had been growing for the past five years was only about twenty inches in diameter.

Two other remarkable kentias stood at the right and left sides of the stage, one of them labeled *K. Belmoreana* bearing a strong resemblance to the form that was known as *K. australis*, a form that seemed to be intermediate between *K. Forsteriana* and *K. Belmoreana*.

A handsome plant of one of the dark-stemmed varieties of *K. Belmoreana* was also shown by Mr. Bottomley under the name of *K. Belmoreana rupicola*, the latter plant being displayed in the vestibule of the hall, and in common with those noted above was in admirable health and condition.

The wisdom of going to Asheville and the results achieved were topics that were frequently discussed on the return trip, and a consensus of opinion, so far as may be briefly gathered by one observer, seems to be that it is "up to" our brethren of the south to show by a continued and growing interest in the affairs of the

society that there has been benefit derived from the visit of the society to that part of our great country.

This does not mean that the south may be the only portion of the trade that is benefited by the Asheville convention, for we of other sections have also learned something of the capabilities of that region, and of some of the difficulties of climate with which the southern florist must contend.

Speaking of sections brings to mind once more that knotty problem of "closer relations" on which so much oratory was expended during the recent meeting, a problem that evidently needs more consideration than has yet been given it, and at the same time demands dispassionate consideration.

It would seem a good plan to organize special sections of the S. A. F. for the promotion and consideration of special lines of work, the reports of these sections to be embodied in the annual report of the parent society. The power to grant medals and certificates might be vested in the parent society rather than in the sections, in order that such action may have some weight with similar associations in other parts of the world.

The sections could meet in committee form at such seasons as would be most favorable for the plant or plants each represents, and by such division of labor as would be secured by the section plan each specialist might devote his best energies to the consideration and promotion of his own specialty, while the annual volume or volumes of proceedings of the S. A. F. would become much more valuable and interesting.

Of course there will be objections offered to this, but let us hope that when the report of the committee shall be offered next August in Milwaukee it will be not an innocuous report, but rather a kind of condensed milk and beef tablet document that will provide the national society with a good supply of rich red blood of progress in the future.

W. H. TAPLIN.

Canadian Horticultural Association.

The fifth annual convention of the Canadian Horticultural Association was opened in the city hall, Hamilton, Ont., by Vice-president C. M. Webster, September 3 at 2:30 p. m. There were in the neighborhood of 100 in attendance at the opening session. In the absence of Mayor Hendrie, Alderman Burkholder addressed some words of welcome to the visitors, concluding by requesting them to take everything they liked but to leave the mountain.

President Bennett made suitable reply and then read his address, which was of a very hopeful nature. He referred to the very bright outlook for horticultural interests and he particularly emphasized the need of a Canadian paper. The reports of the secretary and treasurer followed and were very satisfactory. A general discussion ensued about establishing a trade paper and a committee was appointed to consider the matter and advise the association with regard to it. Exhibition judges were then appointed as follows: T. Manton, Toronto; E. Mepsted, Ottawa; A. C. Wilshire and James McKenna, Montreal.

At Wednesday evening's session C. A. Smith, of Montreal read a paper entitled "Winter Flowering Plants for Private Greenhouses." Edward Dale, of Brampton, discussed the "Latest Facts About Roses" and Mr. Webb, of Brampton, the "Latest Facts About Carnations."

There was no session of the convention on Thursday morning but the visitors were taken by the local entertainment committee, headed by T. Lawson and E. J. Townsend, down the H. G. & B. Railway, to E. D. Smith's nurseries at Winona. The party returned to the city by noon and were taken to the Mountain View Hotel for luncheon.

Roderick Cameron, of Niagara, read a paper on "The Advantages of Cold Storage of Plants to Gardeners and Florists, and John H. Dunlop read one on "Hybridizing," by George Hollis, of Bracondale. Andrew Alexander, of Hamilton, discussed "The Hardy Perennial Border" and Prof. Hutt, of Guelph, the relations of local horticultural societies and professional florists. Edward Gurney's paper on heating was read by E. J. Brewer.

The following officers were elected: President, Thomas Manton, Toronto; first vice-president, Geo. Robinson, Montreal; second vice-president, E. Mepsted, Ottawa; secretary, A. H. Ewing, Woodstock; treasurer, H. Simmers, Toronto; members executive committee

A. W. WILLIAMS.

(See New York letter, page 222.)

C. M. Webster, Roderick Cameron, A. C. Wilshire, Wm. Algie. The next meeting will be held at Toronto.

THE TRADE EXHIBITION.

There was an excellent trade exhibition, the following being represented:

John A. Bruce & Co., Hamilton, bulbs and sundries; A. T. De La Mare Printing and Publishing Co., books; Van Thof & Blokker, Haarlem, Holland, bulbs; F. A. Carpenter & Co., Hamilton, valves and fittings; Robt. Evans Seed Co., Hamilton, bulbs and sundries; Clucas & Boddington Co., New York, bulbs; John A. Campbell, Simcoe, gladiolus blooms; Dale Estate, Brampton, rose blooms; R. Jennings, Brampton, carnation blooms; Wm. Holmes, Hamilton, wire designs; D. J. Sinclair, Toronto, supplies; Walter Colt, Hamilton, plants; S. S. Bain, Montreal, plants; Webster Bros., Hamilton, plants and cut flowers; Grimsby Mfg. Co., Grimsby, fruit baskets; Foster Pottery Co., Hamilton, pots; J. Gammage & Sons, London, plants; Joseph Bennett, Montreal, adiantums; F. G. Foster & Son, Hamilton, plants; E. G. Brown, Hamil-

ton, plants; King Construction Co., Toronto, greenhouse building materials; R. G. Olmsted, Hamilton, iron vases; Walter Holt, Hamilton, plants; Hall & Robinson, Montreal, plants; L. H. Foster, Dorchester, Mass., Nephrolepis "Anna Foster;" F. R. Pierson Co., Tarrytown, N. Y., Nephrolepis Piersoni.

The judges awarded certificates of merit to F. R. Pierson Co., for Nephrolepis Piersoni, to the Foster Pottery Company and to the King Construction Company.

Among the other numerous exhibits some good varieties of cactus dahlias were noted from Queen Victoria Park, Niagara, Roderick Cameron, superintendent; coleuses from John Fox, Hamilton; specimen adiantums from John Stuart, Hamilton, Robt. Bailey, gardener, and tuberous begonias from Andrew Goodall, gardener at the Hamilton Asylum for the Insane, who also had on exhibition a number of fine hanging baskets which proved exceedingly effective suspended from the balconies.

The school children's display of asters was a very interesting feature of the exhibition. Some 2,000 packets of seed were distributed among the children in the spring and as a result between 200 and 300 vases of very good blooms were staged. Among the principal prize winners in the amateur classes were J. C. McCulloch, James Anderson, Mrs. Caffrey, James Ogilvie and A. O. Heir.

Latest Facts About Carnations.

BY T. A. WEBB, BRAMPTON, ONT.

[Read before the Canadian Horticultural Association at the Hamilton convention.]

I received a letter from Mr. Gammage a short time ago asking me to prepare a paper to be read at this convention on "Latest Facts About Carnations." I was and am still at a loss to know just what was desired; therefore I know of no other way out of the difficulty than by going over the old routine, commencing with the cutting bench.

Now that rust and spot are almost diseases of the past, anthracnose (stem rot) is troubling growers to an alarming extent and it is to so grow our plants that we will not be troubled with disease that I offer my help, trusting that others, by following in the path in which I have been successful as a grower, may be benefited.

The two most important things toward success are a proper cutting bench and a healthy stock to propagate from. When possible I would advise that the cutting bench be the north one in the house, preferably so because it can be kept cooler and more easily shaded than other benches. The bench must be enclosed and piped sufficiently to maintain a temperature of 60° to 65° in the sand. The sand should be about four inches deep in the bed, thoroughly wet and firmly packed down; a brick is a good thing to use to do the job right.

For shades I would use cheesecloth tacked on strips of lath, which you can make the desired size to reach from the front of the bench up to and under the glass at the back of the bench. Such shades are light and easily and quickly put up and taken down as necessity requires. To keep the cuttings healthy and to give them more air than is afforded through the ventilators I would advise taking out a pane of glass every fifteen or twenty feet over the cutting bench to give additional air when the temperature in the house is higher than 60°. To close these openings go to the

hardware store and have sheet iron cut to size that will easily slide up or down in a frame nailed to the bars.

I do not wish to be understood that by giving much air I advocate a current of air, for it would prove most disastrous. Plants as well as people need plenty of air to keep them in a healthy condition. To illustrate: A man requires 250 cubic feet of air every hour to furnish him with a healthy supply of oxygen. A plant requires a proportionate amount to supply it with its needed supply of carbonic gas. To shut off this needed supply of air means that a smaller percentage of cuttings will root and those that do root will be debilitated and are the more susceptible to disease.

Now that the cutting bench is ready, the shades made, and extra ventilation in, we are ready to select cuttings. Before proceeding any farther it is well to bear in mind that between the early and late blooming kinds there is some four months difference in time of flowering; therefore in order to have blooms from late blooming kinds for the holidays it will be necessary to commence taking cuttings the last week in October, and so on each month after, until you have a needed supply.

The early and constant bloomers may be taken in November, December, January and February with good results. During these four months cuttings root better for the reason that the plants are vigorous for not having been forced. In selecting cuttings I would advise taking them from flowering stems. On these stems there may be from one to four cuttings. The upper one will be too weak—leave it—the lower one may be too hard, and if so, leave it. The middle ones, usually strong, are just right.

With the thumb and index finger take them out sidewise. I would never use the knife on a cutting for the reason that a cutting taken out sidewise has not been wounded and is the better fortified

against the attack of disease by having left on it the tough leaves at its base, and further I claim such a cutting has one or more well defined joints already formed and will be from three to four weeks in advance of a pulled cutting.

When you have a quantity of cuttings gathered and the sand in the bench well wet through, insert in rows two inches apart, one inch apart in the row and three-quarters of an inch deep. Firm the sand on either side of the cuttings, after which water again to settle the sand. Spray each day after they are set, keeping close watch that they are not too wet, also that they do not get too dry along the side of the bench.

There is this difference between watering and spraying. We water to wet the ground; we spray to close the stomata (or mouths) of the leaves. This stops exhalation and the water that the roots absorb remains in the plant or cutting and a perfect equilibrium is maintained, there being no difference between absorption and evaporation. Leaves of a plant do not absorb water.

If the above plan of operating the cutting bench is strictly adhered to, it is my firm belief that out of every 100 cuttings taken over ninety-five per cent will strike root. Should the sand in the cutting bench become green, there is danger of the cuttings damping off by what is known as the fungus of the cutting bench. To keep the sand in a pure state I would advise the use of ammoniacal solution. The formula: One pound sulphate of copper and three quarts strong ammonia; dissolve the sulphate of copper in hot water, then add the ammonia; use one pint in a barrel of water. You can make a smaller amount using the same proportion of ingredients. Put in bottles and cork tightly, as the ammonia will evaporate. Fill your watering pot with water and add enough of the solution to make the water quite blue. Sprinkle the sand before putting in the cuttings, and

once each week after and you will have no trouble in your bench.

Once more, before leaving the propagating bench, I want to impress the importance of rooting the cuttings in as low a temperature as I have advised, for I believe that more injury is done carnation plants by rooting them in a high temperature than from any other cause. Joshua Ladley exhibited cuttings rooted at a little over 36° before the Chester County Carnation Society. It is better that, after being rooted, they be carried at a low temperature, for there is quite a winter's growth in all perennial plants at any temperature above that which produces death. Therefore I believe that by rooting them cool and growing them on cool until planting in the field, we will be free of disease to a marked extent.

When the cuttings are rooted and ready to be transplanted, have your soil ready, using only old, well-rotted manure, and whether you use pots, flats or a bench to plant them in, do not plant deeper than they stood in the sand; when planting in the field do not plant deeper than they were in the house; and when you bench them in the house in August or September do not plant deeper than they were in the field, for the reason as given by another that the epidermis of the stem above and below the ground is as different as the epidermis of the cheek and the mucus membrane of the mouth.

As we are battling against stem rot we must not deviate from this rule of planting, for should the plants be set deeper in the house than in the field, the soil old, the manure spongy, a dark spell of weather ensues and too much water at the base of the plants, stem rot will prevail to a greater or less extent.

When ready to plant in the field the ground should be so mellow that only the hands would be needed, but if too hard or lumpy use a garden trowel. By so doing, if the ground on top is dry, it is quickly brushed off and the hole for the plant made in fresh soil, with fresh soil to cover the roots, and if well done not a plant should die. On the other hand, if a foot dibber is used the hole is usually made too deep and when the dibber is removed dry earth falls into the hole, there is nothing in sight to cover the roots of the plant but dry earth and many plants die.

As it is now out of season for pinching back, field work, I will pass over this period of the season's work to the lifting of them for planting in. I would advise that in lifting you get all the roots for the reason that if you get but a part of them, nature will just so surely sacrifice a proportionate part of the leaves to maintain a balance; hence so often so many dead leaves on the plants in a short time. Then comes extra work in picking them off, and again, if the leaves are not perfectly dead, in stripping them down and off fresh wounds are made on the stems and disease has another chance to get in its work.

Early planting, as early as July and August, is being advocated by our leading growers. Some say that the plants become the better established and others give no reason, only claiming it is better. I advocate early planting for the reason that in plants that have made a good growth by August the joints are firm, the stems upright, and leaves leathery, are in what is called a ripened condition, filled with a compound already crystallized necessary to modify their leaves into flowers (flowers are but modified leaves) and if not lifted early a period of

A HOUSE OF MURPHY'S WHITE CARNATION PHOTOGRAPHED AUGUST 12.

WM. MURPHY'S FIELD OF CARNATIONS JUNE 17, 1902.

wet weather might set in and hold long enough to release this compound and a weak, watery growth be the result instead of bloom.

Young men, you who are working and educating your minds in this great work, it is in your interests that my thoughts have been directed in preparing this paper. Read books by acknowledged authorities, read the florists' papers of the day, attend the florists' conventions when possible, be progressive, learn much by observation, be industrious, be temperate, be men. Let your motto ever be "onward."

Wm. Murphy's Success.

The accompanying illustrations show that the season has not been unfavorable for the stock of some of the carnation growers in the vicinity of Cincinnati, certainly not for Wm. Murphy. One of the pictures shows his field shortly after planting and another shows the growth made under the influence of the copious rains which in other places were heavy enough to cause much injury to the plants. In the foreground in the pictures of the field is Murphy's White, the variety of which the owner thinks so highly as a commercial sort. It is a cross of Bridesmaid and Lizzie McGowan. It originated five years ago with C. C. Murphy, of Cincinnati, who last season sold the stock to its present owner. The interior view shows a house of this variety benched July 1 and photographed August 12.

CHRYSANTHEMUMS.

TAKING THE BUD.

Crown buds are now forming rapidly and for a little while the work of taking the buds must claim our closest attention. The buds of all early varieties should be taken as fast as they make their appearance. Early planted stock expected to produce fancy or exhibition blooms, and which have been treated accordingly, should at this time be four to four and one-half feet high. To have brought them to this height will mean that two and in some cases three buds have been removed. With this class of stock the bud now forming is the one that we are looking for. They will come along at different periods from August 15 to September 15, according to their season of blooming.

may be applied, but only in weak doses to start with, gradually increasing the strength as the plants are able to take it, being careful not to water with manure when the beds are in a dry state; better to water with clear water first. Do not neglect the tying but keep the plants up, so that there will be no chance of crooked stems.

C. W. JOHNSON.

Sweet Peas in England.

Since the bicentenary celebration, the sweet peas have come much more in favor and the national society seems likely to further stimulate the interest. Their second annual show, which was held a few weeks ago, was full of interest and fully illustrated the usefulness of these fragrant flowers for various kinds of decorative work. The bouquets and other artistic arrangements lasted well through the first day, although the second day, with the unusually hot weather, they looked rather sad.

In regard to new varieties, one of the most interesting was a very fine white, of the same size and substance as the pink, Miss Willmott, which caused such a sensation, but a curious point about this variety is that it has occurred as a sport from Miss Willmott, or at least has been found with this, in several different localities and has already been given three different names. Dobbie & Company showed it as White Queen and gained a certificate. Hobbies' had it as White Wings, but it transpired that Mr. Eckford's name for it was Dorothy Eckford, and it was suggested that some seeds had been accidentally mixed with those of Miss Willmott, which would account for its appearing in so many places the same season.

Of other new varieties worthy of note, Britannia, and Jessie Cuthbertson were very fine and gained the coveted award, a first-class certificate. These came from Dobbies'. In H. J. Jones' collection those grown in pots were the great attraction. They certainly make fine decorative plants and last quite as well as many other flowering plants.

In Hobbies' group was a grand display of their new white *Lathyrus latifolius grandiflorus*. This is certainly a great advance, the flowers being of the purest

Some of the pink, red and bronze varieties will give a better colored flower if the terminal bud is selected, but this will greatly depend on how varieties of this color have been cared for. If they are timed to throw a bud September 1 to 10, in almost every case the bloom from this bud will give best results.

Do not let the growths get too large before removing them, else it will be all over with the bud so far as producing a fine bloom. If the bud is not taken as soon as big enough to do the work without damaging it, it would be safer to let the plant go on to the terminal. As soon as buds are taken the suckers will begin to be quite troublesome and must be removed as they put in an appearance, to keep all the strength in the plant.

Beds that are mulched should receive extra care in watering to guard against their getting too wet, as the foliage is much more dense than a few weeks ago. The syringing should be done early enough in the afternoon to give time for drying before nightfall. Also avoid too much dampness during cloudy days.

After the buds are set liquid manure

WM. MURPHY'S FIELD OF CARNATIONS FOR SUMMER BLOOM.
(Photographed August 12)

white, almost as large as an ordinary sweet pea, borne in long racemes of from sixteen to twenty blooms on a stem. Too much cannot be said of this grand variety. It is three years since it was exhibited and gained an award from the Royal Horticultural Society, but it was not until this season that they were able to offer it and even now the stock is limited. We do not often get such a decided improvement as this, and I am told it is the result of twenty years' careful selection.

Countess Spencer, a distinct and beautiful variety, was again shown by the raiser. I understand it will be distributed in the coming season, the stock having been secured by one of our sweet pea specialists for the sum of £100. Lord Roseberry is another fine new variety. Coccinea is rather disappointing. It is a pretty color but does not stand the sun.

Jennie Gordon should become a general favorite. It is a flower of good substance and a delicate shade of color.

The various shades of mauve are the most appreciated and we do not get this peculiar soft color in many flowers. Such varieties as Emily Eckford and Lady Grisel Hamilton are great favorites. On several occasions sweet peas have been the only flowers used for table decorations at fashionable gatherings and they are also extensively used for bouquets. The queen has carried bouquets composed entirely of them.

The Cupid varieties have done better this season, but they can hardly be considered satisfactory, for the flowers drop so soon, and in many instances fail to open. We may yet get this section improved, but with the short growth we can hardly expect to get the same results as with the strong, tall-growing varieties. H.

Latest Facts About Roses.

BY EDWARD DALE, BRAMPTON, ONT.

[Read before the Canadian Horticultural Society at the Hamilton convention.]

I have been asked to give you a paper on "The Latest Facts About Roses." This may be the proper heading to use, but I hardly think so, as there may be many with later facts to give than I have.

I suppose the proper point to start from would be the cutting, as our whole output depends on it for the coming season. We always try to take out cuttings from the healthiest plants. Some years ago we made all cuttings with two buds. Later one was all we used, but again made a change and went back to two and sometimes more and feel safe in saying they never should be made with less. While a cutting with one bud may make a good, fair plant, a cutting with two or more is sure to make a better one. When it is rooted you have a plant worth starting with.

We generally give all cuttings four weeks in the sand, using three and one-half or four inches. We run a temperature of 70° bottom heat and the temperature of the house we keep the same as the house where the roses are growing, night 56°, day 66°. We pot them off into 2-inch pots, giving them about four weeks and sometimes longer in this size. For the first watering be sure and not overdo it; give just enough to moisten them nicely to the bottom, shading them for the first ten days when bright.

They will stand being put close together on the bench for the first two or three weeks; then move them over, being careful to sort them for size, giving the

largest some space between the pots; the smaller ones you can again place close together; this will let the air and light through them and harden them off. I think the time it takes to do this is well spent, as I feel sure it does young stock a great deal of good to be moved over, besides you get the small plants out where they will not get smothered. From the 2-inch we shift into "threes," giving a little drainage, and from this size we like to plant on the bench, for shifting into larger sizes means more work, more space to grow them in, and not so easy to plant, but if you are not ready with your benches for planting when a shift is needed, be sure and get them into larger pots. Do not let them get a check, as a check now means a loss of cheques later on, when you are wanting a big cut and a good plump bank account.

We use about five inches of soil on our benches. Plant own-root stock twelve inches one way and fifteen inches the other. Grafted stock we plant 12x18 and leave a hole around the top of the plant about the size of the top of the pot it was taken from and water only at the plant for about three or four weeks. By

to suffer from the stronger plants overgrowing them and smothering them out. By doing this you will give them a chance to hold their place and be of some use.

Some years ago we mulched the houses we intended carrying over the longest but have not done so the last few years, using manure water in preference to the mulch, starting early in January with the first planted houses and using it once in two weeks from this time on.

Watering at all times should be carefully attended to. While being careful not to overwater, do not let the bench become too dry before attending to it. Roses planted in different soils require different treatment, so that a grower has to use his judgment and find out a great deal from experience as to when is the proper time to do his watering.

Spraying should also be carefully attended to if you want to keep down the red spider. If your benches are low be sure and get down so as to catch the bottom of all the foliage and the upper surface will get all it requires. Spraying should always be done early enough in the day to allow all foliage to become dry before night.

We have just come through the worst

ROSE GARDEN OF F. S. MOSELY, NEWBURYPORT, MASS.

this time the plants will have doubled their size. We then level the soil and start to water the whole bench, but be sure not to over-water the first time, as it will sodden the soil and do a great deal of harm. Better to give too little than too much at this time.

Be sure you attend to weeding and tying as soon as it is needed. Disbudding should also be well attended to. Run over them once a week, taking off the first leaf with the bud, as you will get a stronger break than when only taking the bud.

At one time we thought planting done in July and August was early enough but now we start in April. This gives us an early house to cut from. May and June are two good months to plant in. Stock planted at this time gets into good shape for the winter months, but of course we cannot get all planted by that time, as we have to carry some houses on till our early houses are in crop.

Do not cut from your young stock too soon. Keep them disbudded until they are good, strong plants and in good shape and if some plants are smaller than others when you are leaving them to crop, go over the bench and disbud all weaker plants that you think are likely

summer I can remember for wet and cold, the thermometer registering below 50° night after night and three nights in succession registering 44°. This with rain and cold winds nearly every day up to the middle of August has taught us always to be in shape for firing, as I believe steam in the houses in such weather is necessary, not altogether for the heat, but it gives a good dry air and also gives a chance to fight the mildew which has been growing in all its glory this season. Painting the pipes with sulphur is the only remedy we have for this. I might say, when firing at this season do not run too warm; leave your ventilators open a few inches, just enough to give a good circulation of air and if you should close down to sulphur or fumigate, when through do not put your ventilators up full height at once; only put them up a few inches at a time.

Grafting I had almost forgotten to mention. Our Manetti stocks we like to get in November, pot in 2½-inch pots close together on the bench and run at a temperature of 40°, spraying them once to four times a day, according to the weather, being careful not to get them too wet at the root and when the buds begin to swell they are ready for use.

Having your grafting frame in shape and piped so that you can always maintain a temperature of 80°, cut back your Manetti as close to the pot as it is handy to work, giving a slanting cut of not less than three-quarters of an inch. Then cut your scion to suit.

If the scion should be smaller than the Manetti, place it to one side so as to have the bark of one fit closely with the other, tying it securely and placing it in the frame, keeping closed for about seven or eight days. Then give an inch or two of air for two or three days and keep increasing it for the next twelve or fifteen days, when they will stand all the air you can give them.

In three weeks from the time they are put in the frame they are ready to leave. Be careful to shade from all sun while in the frame and about a week or ten days after taking them out. We find Perle, Sunset and Sunrise will not do grafted but Bridesmaid, Bride, Morgan, Cusin and some others have done well with us on the Manetti.

As to varieties, we grow Bride and Bridesmaid, the leaders in their color. Liberty is by far the handsomest of all

along the borders. We used Rosa rugosa, R. lucida, R. setigera, R. sulphurea, Persian Yellow, Harrison's Yellow, Blanche Moreau, Mme. Georges Bruant, Mme. Plantier, Crimson Rambler, Rosa Wichuriana, R. grandiflora and the Lord Penzance sweetbriars.

On the walls are such roses as Baltimore Belle, Crimson Rambler, Yellow Rambler, Rosa setigera and R. multiflora, also Akebia quinata, actinidias and clematises, including among the latter such sorts as Jackmani, Jackmani alba, Duchess of Edinburgh, Fairy Queen and Belle of Woking. There are also wistarias, moon vines and Cobaea scandens on the wall. The season was very favorable for growth and the only trouble was from mildew on the roses.

In preparing the rose garden for planting the top spit of an old pasture was brought in during the autumn and spread over the garden to a depth of two and a half feet. As soon as frost was out in the spring this was thoroughly matted and trenched the whole depth. The beds were staked out, the grass paths sodded and the roses planted just as they were beginning to break. They grew and

the ideals of their respective colors. Then we have Baroness Schroeder, white flesh. Prince George, grand crimson; Queen Victoria, flesh white; Francois Ortegai, fine crimson; Western Beauty, lovely pink; Princess Maud, white with red tips; Duchess of Orleans, salmon pink; Magnifica, delicate pink. We do not think much of the officinalis varieties for any purpose, except for a few very early blooms. They are probably two weeks earlier than the Sinensis varieties, but even at this they are not profitable to grow, either for cut flowers or for stock, as in our soil they multiply too slowly.

JAS. HARTSHORNE.

The Best Twenty-Five Pæonias.

I was very much interested in the list of twenty-five best pæonias, as furnished by Geo. C. Watson, in the issue of June 14 and now beg leave to submit a list selected from over 300 varieties now growing on my grounds. I may possibly wish to change this list slightly within a year or two, provided a few of the newer sorts, comprising my late plantings, prove of exceptional merit. It is well known the pæonia list is almost endless, and confusion most profound exists in the nomenclature of this grand flower, and I am pleased to see a movement is now on foot, on lines that will certainly accomplish much good.

TWENTY-FIVE BEST PÆONIAS.

Festiva Maxima, large pure white, center petals tipped carmine.

Josie, very large double white, fine.

Kasane Jishi, a fine Japanese sort, large double white, slightly shaded buff.

Puginiue, an extra large rich snow white, a fine Japanese sort.

Zoe Verniory, white guard petals, yellow quilled center with red button, fine.

Chinensis Alba, fine large pure white flower.

Marie Lemoine, extra large white, very fine.

Boadicea, splendid pink, cupped, sometimes with slight carmine markings.

Golden Harvest, the nearest approach to a yellow, very sweet and showy.

Dorchester, beautiful cream-tinted pink, very double, and fragrant.

Perfection, light pink, fading to flesh, very double, often raised in center, fragrant.

Czarina, very double, compact, shell pink shading to white, very beautiful.

Amabilis Grandiflora, white, very large, double fringed petals, fine, very sweet.

Mme. de Verneville, very large, fine white.

Eben Holden, large, double, shell pink in bud, nearly white in full bloom.

Reikaizan, a Japanese variety, pale lilac, richly fringed, very good.

Grandiflora Rubra, extra large, full and double, blood red, a superb late variety.

Floral Treasure, a fine clear bright pink, very double, brilliant and perfect.

Lady Bramwell, a fine large silvery rose.

Virgo Marie, pure white, center sprinkled with carmine, very good.

Duchess de Nemours, rose pink, very large double and sweet, the best of its color.

L'Espérance, rose, very compact, high full center, early, fragrant.

Papavilora, flesh pink, very good.

Duke of Wellington, outside white, center pale yellow, the best of its color.

La Turpe, bluish white, with tulip-like markings, fragrant.

W. H. ARENDT.

ROSES IN A FORMAL GARDEN IN MASSACHUSETTS.

red roses but we have yet to find how to keep it on the move all the year around, so have to fall back on our old friend, the Meteor. For Morgan we find an increased demand, but there is very little increase in the demand for Perle, Sunset and Cusin. Mme. Hoste and a few others that paid well to grow at one time we have had to drop.

In a Massachusetts Rose Garden.

The two accompanying illustrations are from photographs taken in the rose garden of F. S. Mosely, at Newburyport, Mass. Arthur E. Chilman, the gardener in charge, says that the show the past spring was highly satisfactory. In planting the garden, the hybrid remontants were three-year-old grafted stock, purchased a year previous to planting in their permanent quarters, that they might become thoroughly acclimated. The pergola is unattractive as yet, but it will soon be draped and beautified by the roses planted at the base of each pillar, such sorts as Debutante, Sweetheart, Dawson, Crimson Rambler, Rosa multiflora, R. setigera and some seedlings of Mr. Chilman's own raising, from the old Gloire de Dijon. In the corners and

flowered splendidly. Just now the garden is enlivened by a fine showing of Groff's hybrid gladioli.

Dividing Pæonias.

ED. AM. FLORIST:—Will you kindly inform me through the columns of your paper as to the proper time to divide and transplant pæonias? How should they be cared for after being lifted and before being sold through a store? Also what are some of the best varieties.

H. H. C.

Pæonia roots may be divided either in spring or fall. However, we prefer the last week in September for dividing and transplanting. Plants that are intended for store use should be put in a cool cellar as soon after digging as possible, to prevent them from drying up. They keep better undivided than divided, therefore would suggest not to divide too many at one time. The varieties that are considered the best are, even at that, very numerous. There are probably fifty indispensable varieties, such as Festiva Maxima, largest white; Richardson's Rubra Superba, fine red; Lady Bramwell, pink. We think the above named varieties will stand for a great many years as

Pennsylvania Horticultural Society.

The August meeting of the Pennsylvania Horticultural Society was well attended and exceptionally good exhibits were on hand. From Henry A. Dreer came a good collection of perennial phloxes, twenty-one varieties of cannas arranged as cut flowers, also a vase of Stokesia cyanca, the whole making a splendid showing. John G. Gardner also exhibited a good collection of perennial phloxes and a large bunch of the rose Gras an Teplitz.

The competitions were for collection of seasonable vegetables in twelve varieties, prizes offered by S. T. Bodine. This brought out spirited competition and

was won by John Little, second to Thomas Holland. The Waterer prize for potatoes was won by John Dodds, second to John Gaynor. The John G. Gardner prize for perennial phloxes in not less than ten named varieties was won by Wm. Kleinheinz, second to Francis Canning. F. C.

A Specimen *Cycas Revoluta*.

The sago illustrated herewith is one of a pair exhibited by W. W. Edgar, of Waverley, Mass., at the last exhibition in Madison Square Garden, New York. This plant was about twenty-five years old, seven to eight feet high, and during the preceding summer made a growth of fifty perfect leaves. There is a largely increased demand for sago palms, as is evidenced by the large number of dry stumps imported in recent years from Japan. Small to medium-sized plants with well-grown and hardened leaves find a ready sale with the local florists. It is when a plant reaches the size and health of the one illustrated, however, that the best revenue is reaped from it. With people of refined taste the common dried and painted sago leaf, for funeral purposes, is a very unacceptable substitute for the perfect natural leaf, for which a good buyer is always willing to pay a good price.

Society of American Florists.

Some of the state vice-presidents reports were published in our issue of August 30 and others are presented herewith.

Connecticut.

BY THEODORE WIRTH, HARTFORD, CONN.

The reports from the leading florists of our state pronounce the year just passed a prosperous one in all respects, and the amount of cut flowers sold during the principal holidays, such as Christmas, Easter and Decoration day, is said to have exceeded by far all previous records, having demand above supply.

The carnation keeps its place as most in demand and use, and a marked improvement in quality obtained of late has advanced the price in some places. During the entire winter season the demand

for carnations in our cities exceeded the local supply, which was partly due to the fact that in spite of the healthy and promising condition of plants, flowers were not freely produced during the early part of the season. At the present time plants in the field and housed look very promising, and no complaints are heard of stem rot and other diseases. George Osborn, of Hartford, has grown the best carnations in this section of the country. His Lawson, Estelle, White Cloud, Queen Louise, Mrs. Bradt, Eldorado, California Gold, etc., were of unusually large size and simply perfect in build and color, and they commanded advanced prices. The orders received by him in advance exceeded at all times the possible output of his establishment, which clearly shows that the flower-loving public appreciate good products and qualities and are willing to pay for them.

Roses, violets and other cut flowers held their own well, and products and sales were satisfactory. Considering the advanced cost of material and labor, affecting all trades alike, there should be an all-around increase in the price of cut flowers and plants, but, generally speaking, such advance is not noticeable. Pot plants have been somewhat in increased demand, especially in rubber plants, begonias, hydrangeas and, above all, ferns, the Boston fern leading as favorite.

The sale of bedding plants has been in most places about the same as in previous years and but a small increase in that line is noticeable in some localities. On the other hand, the demand for hardy plants shows a decided advance, and the nurserymen have been doing a good business along all lines. Ornamental shrubs and trees, both coniferous and deciduous, are used profusely in the decoration of home grounds all over the country, and the homes are very few which do not show some acquirement from the nurserymen which a few years ago were little or unknown. True, such plants as *Crimson Rambler* rose, *Clematis paniculata*, *Hydrangea paniculata grandiflora*, etc., are used so universally as to justify the term of "overdoing it" by the cross-country traveler, but from a point of view of the individual owner his selection and taste are good and his progressive spirit to make his home attractive praiseworthy. The demand for herbaceous plants is steadily increasing, and the hardy flower garden is coming more and more into deserving prominence.

Greenhouse building has been going on all over the state, although possibly not in the measure which the prosperous business period just passed and the confidently expected increased demand for cut flowers would seemingly warrant.

In Hartford, J. Coombs has added another carnation house to the two built a

year ago, 27x150, and has now 90,000 square feet of glass, the output of which covers only two-thirds of the sales at his store. G. F. Heublein & Brother are building a handsome store and adjoining conservatory opposite their hotel on Gold street. The structure promises to be the handsomest building of its kind between New York and Boston. This attractive new establishment is expected to fill a long felt want in the keeping of larger palms and other ornamental plants for decorative purposes, and under proper management the undertaking is promised a bright future.

A. N. Flerson, of Cromwell, built one house, 50x60, for lilies, one 23x400 for general plant stock, and one 35x400 for rose stock, all at his old plant, where he is at present constructing a new central heating system with nine tubular boilers to take care of the whole 300,000 feet of glass. His new plant, built some two years ago, contains 200,000 feet, and the output of the whole establishment, both in cut flowers and plants, is something enormous. It might be interesting to give a few figures: From June 1, 1901, to June 1, 1902, the cut of roses was 1,077,574; of carnations, 246,913; of chrysanthemums, 70,094; of lilies of the valley, 741,867.

In Bridgeport Stephen D. Horan is rebuilding about 10,000 feet of glass, and other new houses and improvements are going on in a number of other places, showing progressive times and people.

Social organizations for the betterment and advancement of our noble profession and the creation and furtherance of good will and sociability amongst the craft, our state has but few, and the want and need of such is fully recognized by some of the leading and progressive florists and horticulturists of the state.

The New Haven County Horticultural Society is the leading society in the state, is doing good work at its regular meetings and through its exhibitions, and is at present preparing for the largest and most complete show in the history of the society, to take place this coming fall.

Out of the ruins of the once flourishing Connecticut Horticulture Society at Hartford has come a new growth of seemingly vigorous, ambitious blood, with modern tendencies and ideas, progressive qualities and intentions. This young plant has been christened the Hartford Florists' Club, and although its members are but few in number the club can look back with great satisfaction upon the work accomplished during the short period of its existence.

These two associations, it is hoped, will establish and maintain closer relationship in the future, a beginning to that effect having been made, and a notable event in the history of both societies, the memory of which will long live with those that took part, was an outing to beautiful Hubbard Park, Meriden, Conn., Meriden being half way between New Haven and Hartford. The two clubs met at the park, where they were received by Walter Hubbard, the board of park commissioners and the mayor.

Under the kind guidance of those gentlemen this magnificent mountain park, containing in all over 1,000 acres, the generous gift to the prosperous, progressive town of Meriden by its first citizen, Walter Hubbard, was inspected in all directions, and the climbing of the lofty heights of Fairview, Castle Craig and West Peak, on the famous hanging hills of Meriden, 1,000 feet above the sea level, was accomplished in good time and with the enthusiastic spirit of an advancing, irresistible army corps at the head of which was W. J. Stewart, who, by the way, acted as chaperon by bringing the New Haven boys on and the Hartford boys home. The magnificent view over the hilly country for thirty miles around, together with the attractive natural scenery of the park itself, was greatly enjoyed and admired by all those present, and the splendid and liberal hospitality shown us by our hosts could not help but overcome all feeling of tiredness and exertion of even the unexperienced mountain climbers.

This sociable outing and meeting of our two societies will lead on to combined working in the large field of possibilities before the craft in general, and the occasion very forcibly impressed on me the thought what good work florists' clubs and horticultural societies could do in interesting themselves and in taking the creating and leading part in all movements for municipal improvements, especially in the development and ornamentation of public grounds and streets.

The far-reaching educational value of

MALFORMED CALLAS CUT FROM BENCH PLANTS JUNE 15, BY VALENTIN BURGEVIN'S BONS, KINGSTON, N. Y.

parks and well developed and maintained public grounds and streets is recognized by all observing people, and our small state of Connecticut is in a position to show the beneficial influence such improvements have on the home grounds of its citizens. Hartford, New Haven, Bridgeport, New London, Middletown, Waterbury and Willimantic can give convincing proofs for this statement.

True, not many towns and cities are so fortunate as to have so public-spirited citizens as has Meriden and Hartford, for instance, where the gifts of noble men have not only opened the way for such acquisitions and improvements, but have developed them to stay and to be forever a blessing to the human race, but every city, town and village has endless opportunities and possibilities for municipal development on such lines, and it is astonishing to see how in many instances the progressive and active leadership of a few men can awaken public spirit and pride to such an extent as to make the seemingly impossible not only feasible but even easily accomplished.

The close, intimate relationship to nature which we all enjoy in the following of our chosen noble profession does not only qualify us to take a leading part in all such improvements, but strongly suggests that we take the initiative in that direction. Let us think of the good we can do by showing how to take care of our trees, at this very time when numerous devastating insects are threatening to shorten their life. Let us show what can be done for the present and coming generations by improving and planting our schoolhouse grounds, giving thereby object lessons which will surely bear fruit, since they will be started in the retentive and productive mind of what will some twenty years from now be the hopeful, progressive working element, the stay of our nation. Let us branch out of the narrow single track of progress, which has as its destination commercial advancement of our trade and personal gain in the acquirement of professional knowledge and experience, and let each society that follows the banner of our national association adopt as one of its fundamental aims the ideal purpose of being a strong helping hand in the municipal development of our communities. It will not only be to our credit and of benefit to our beloved country, but it will bear compound interest in return. I do not say that nothing is done in that direction at present, but I do say, let us do more of it.

Indiana.

BY GEORGE E. WIEGAND, INDIANAPOLIS.

The amount of glass erected this season was 89,000 square feet. The principal horticultural event was the American Carnation Society's meeting at Indianapolis, February 17 to 20.

This season has proved most remarkable in several respects: First, for the general excellence of stock grown; second, for the phenomenal amount of business done; third, for unprecedented demand for first-class stock.

Easter and spring trade was the best in the history of the state.

Maryland.

BY CHARLES L. SEYBOLD, BALTIMORE.

The trade in Maryland during the current year was more pronounced in the increase of prices than in the increase in volume of business. In consequence of the higher prices, the total sales in money value were a little larger than previous years, while the output was no greater. The Florists' Exchange, a mutual, co-operative commission house, gives the cue to the situation.

Building has been limited, owing to the higher price of material. The coal scarcity is giving the trade much concern. Those who have heretofore depended upon hard or anthracite coal are making arrangements to burn bituminous.

The large greenhouses in the different parks, erected to grow the stock of bedding plants for the different parks, have passed their experimental stage and are now supplying all the flowers needed in the different sections.

The free flower shows held under the auspices of the Gardeners' Club have proven of great benefit to the trade at large, and have increased the sales of the particular flowers so exhibited. Our carnation specialists have made great progress in their particular lines, not only in the mode of culture, but in the develop-

SPECIMEN CYOAS REVOLUTA GROWN BY W. W. EDGAR, WAVERLEY, MASS.

ing of new varieties. Perhaps to-day there are grown in this state as fine carnations as in any state of the Union, and only brought about by special effort.

We are all satisfied with this year's doing and only regret to be compelled to record the deaths of two of our most earnest workers—James Pentland, who, as a gardener of the old school, has done much in the advice and benefits of experience for the trade of Baltimore, and William McRoberts, of the newer school, whose energy, intelligence and enthusiasm were always ready for any project which was for the general good.

The Gardeners' Club has flourished and its influence is felt in every line of action. We hope to continue the good work.

Missouri.

BY CHARLES A. JUENGLER, ST. LOUIS.

I am pleased to report a prosperous year. All our local growers, as well as those of our cities and my state, have profited by the increased demand and good prices during the whole season. Our retailers, a number of them, report a most successful season, and while others are not so well off, in fact, the floricultural business all over our state, from the reports that I have, has been very satisfactory. Nearly all of the growers are adding new glass and this alone shows that the season has been a good one.

I know of nothing that would call for special mention from Missouri. I only regret that I cannot be with you in person, and that not more from our state have joined this society and that the delegation from here is so small, as we would have been pleased to have had a large attendance at the Asheville convention. I trust that you will have an interesting, pleasant and profitable meeting.

North Carolina.

BY JAMES B. LAUR, FAYETTEVILLE, N. C.

Only one new plant has come to our notice, *Abies Arizona argentea*, the silver cork fir, introduced by the Pinehurst Nurseries.

The largest increase of glass structure is at Pomona, where J. Van Lindley & Company have added two new houses, one for general stock, 16x84, and one for carnations, 16x216. There is also increase of glass at Raleigh, Wilmington and other points.

There is an increased demand for roses, evergreens and shrubbery, showing a healthy growth of the desire on the part of our people for the permanent improvement of their homes. There is also an increased demand for palms, ferns and other stock for house decoration, and a slight decrease in the demand for summer bedding stock.

The demand for cut flowers shows a healthy and steady increase, especially for funeral work. There is a call for a better quality of stock. This branch of the business in North Carolina had a long and slow struggle for existence, with a climate that gives flowers outdoors for about ten months in the year. With every home in city, town and village with more or less pretension to a flower garden, it was hard to make our people believe that flowers had any money value, but some of us have been sowing seed for the past thirty years, and the reaping has come at last and others have entered into the harvest and we will all rejoice together.

The struggle for existence among our people for the past thirty-five years has prevented very much being done in landscape gardening, but our people have met with good success in their business and are now turning their attention to building fine homes and surrounding them

with beautiful grounds. The work done at Biltmore, which we will all be privileged to see, has done very much to revive the love for this branch of horticulture. I say revive, because in the old days it was here this work flourished and we will again take our proper place in the front in gardening out of doors.

The extremely dry spring and summer, we fear, has cut short the prospect for a full crop of bulbs, and just here I would say that the desire to get cheap stock on the part of at least some of the wholesale houses at the north has done much to demoralize this branch of the business. Giving contracts to farmers without knowledge of the work has flooded the market with very inferior stock and run down prices below what carefully grown bulbs can be produced for. Be careful, gentlemen, or the goose of the golden eggs may yet be killed.

And now, lest I weary you, I will close by saying welcome to North Carolina, the only state in the Union that can fill every blank sent out by the Department of Agriculture.

Chicago.

TRADE INTERRUPTED BY A HOLIDAY.—LITTLE IMPROVEMENT IN BUSINESS.—ASTERS CONTINUE IN GREAT OVER-SUPPLY.—ROSES TOO PLENTIFUL FOR A READY MARKET.—VARIOUS LOCAL DOINGS OF INTEREST.—CHANGES IN BUSINESS.—SHORTAGE OF COAL CAUSING ALARM.

The best business day of the week was divided in half by the early closing on Labor day, there being but one or two of the houses which remained open on that afternoon, to the disappointment of a number of out-of-town buyers, whose telegraphic orders failed of delivery until the following morning. It ought to be thoroughly understood by this time that the wholesale houses close at noon on holidays, but perhaps the out-of-town people do not appreciate that in Chicago the first Monday in September is one of the most generally observed holidays on the calendar. The trades unions paraded the streets on Monday 60,000 strong. During the week demand has shown little indication of the approaching autumn. Summer supplies and summer values have prevailed, although the weather is quite cool. Asters are coming in by wagon-loads and each day's receipts are moved with difficulty, although every buyer takes more or less asters, as they are very good with a majority of the shippers and a most economical flower for funeral work. Beauties are in fair demand and such adequate supply that there is as yet no indication of advancing prices, although stems are growing longer day by day. The season seems to have been favorable for all roses, for not only Beauties but Brides and Bridesmaids are of better quality than usual in the first week of September. There are few good Meteors about and the growers are not yet cutting from the new plants of Liberty. Golden Gate is plentiful, but as yet few Ivories are coming in. It is noteworthy the way the carnation supply has increased and improved in the last two or three weeks. From being practically none in the market, there is now a plenty, including all colors. Lily of the valley is in ample supply and of excellent quality, and the same may be said of the greens. Summer flowers other than asters are in reduced receipts.

The coal situation is affording a great deal of concern to the local growers, although soft coal is used universally in this section. The advance in price because of the anthracite miners' strike means a great deal to those who use large quantities. The advance in price of bituminous is from 50 cents to 75 cents a ton, with a further rise in pros-

pect. The way hard coal has advanced is shown by the fact that last week the National Biscuit Company gave a certified check for \$9,250 in payment for 1,000 tons on the track, and in Chicago delivery is usually reckoned at 60 cents a ton.

F. L. Pruse, at Des Plaines, has retired from business and leased his range of houses for ten years to the Des Plaines Floral Company, which consists of H. C. Blewitt, Harry Blewitt and John Prickett. Harry Blewitt has been with Peter Reinberg for the past two or three years and will be the manager of the new concern. This year carnations will be grown, but next season it is the intention to put most of the houses into Beauties.

After a month's tie-up the boiler-makers' strike has been satisfactorily settled and the manufacturers are hustling to get out belated orders. The Kroeschell Brothers Company says this has been one of their best seasons in spite of the interruption to business.

There is a disposition to get out of the rut in the horticultural and floricultural displays at the State Fair to be held at Springfield the latter part of this month, and John Thorpe was called down to give the managers advice as to how to do it.

After the convention C. W. Kellar and E. F. Winterson and their wives went farther south to the Lookout Mountain and Chicamunga battlefields, which are now maintained as government parks. They speak of it as a most delightful trip.

M. Winandy is again getting a fine cut of Beauties and roses. His success has been unexcelled in the experience of the numerous vegetable growers who have gone into cut flowers in the past two or three seasons.

John Poehlmann met with a serious fall while playing ball at Morton Grove last Sunday. He strained his knee most painfully and is likely to be in bed for two or three weeks in consequence.

H. W. Rogers and R. G. Guenther have obtained a ten years' lease of the Youmans greenhouses, at Winona, Minn., and have gone into business as the Winona Floral Company.

E. E. Pieser, of Kennicotts, says he never saw the market so variable as this summer, one day feast, the next famine in salable items. Such a condition results in no stability in values.

Before the last of the lilies are out of sight new ones are coming in, Bassett & Washburn having begun to cut from plants from cold storage bulbs brought in in May.

W. W. Weil, for six years with Geo. Walther, at 535 West Sixty-third street, has resigned his position and will start in business for himself in the same locality.

Web. Randall returned this week from an outing at St. Joseph, where A. L. Randall is still busy packing the finest peaches on the top of the basket.

Leopold Koropp is administrator of the estate of Louis Gregor, the deceased member of the Harms Park Floral Company.

Frank Schram, at Park Ridge, makes bee-keeping a side line to carnation growing. He now has about thirty hives.

J. B. Deamud has gone to his farm near Caro, Mich., for a few days, to superintend some building in progress there.

Bentley & Company are rearranging their place, enlarging the ice box and getting into better shape generally.

O. W. Johnson, of the Foley Manufacturing Company, is at Toronto this week on his vacation.

A. H. Schneider, at Oak Park, will cut

from two additional houses of carnations this season.

Vaughan's Seed Store is receiving two car loads of Dutch bulbs this week.

Peter Reinberg is on his annual expedition after prairie chickens.

The first violets made their appearance the middle of this week.

Jno. S. Forster, of Evanston, is now at Colorado Springs, Col.

John Mangel is at home from his European trip.

Visitors: E. J. Fancourt and B. Eschner, Philadelphia.

New York.

NOTHING OF SERIOUS IMPORT IN THE MARKET SITUATION.—FIRST VIOLETS ARE WELCOMED.—CAME FROM UP THE HUDSON.—THE GROWER.—AN INTERESTING CLUB MEETING ASSURED.—A VARIETY OF LOCAL AND TRADE NOTES.

Place: West Twenty-eighth street.

Time: present.

Characters: An Artificial Flower Maker and Charlie Carlin, a philosopher.

A. F. M.—"What is an azalea?"

C. C.—"It's an Easter plant; shaped like an umbrella, with flowers the size of butterflies."

A. F. M.—"What color?"

C. C.—"All colors."

A. F. M.—"Why, that's what they call in Germany a Roden-doden-den."

There may be a few more serious conferences in the wholesale cut flower district than the above-quoted conversation but if so they were on the strict quiet and hence we cannot record them. But that is about how business stands at present writing. Nothing more alarming than the repainting of a few interiors, the absence of Frank Traendly on a week's trolley riding and the mysterious remodeling of the only vacant store in the block has happened in the neighborhood this week, but it is rumored that W. A. Bridgeman is soon to resume his former position at Thorley's, and it is generally known that Hicks & Crawbuck, of Brooklyn, are to open a wholesale establishment in West Twenty-ninth street.

The first violets of the season to reach the wholesale market came to Ford Brothers from A. W. Williams, on August 28, there being 300 in the shipment, and they were sold on sight. The arrival of the first violets is an event of sufficient importance to warrant the publication of the portrait of the enterprising owner, so we take pleasure in presenting the likeness of Mr. Williams (page 214) who is one of the leading violet growers of Highland-on-the-Hudson. Mr. Williams is a farmer, but two houses of violets grown three years ago paid so well that now he has about 15,000 feet of glass devoted to that specialty and plenty ground-room for more.

Monday evening, September 8, is the date of the next Florists' Club meeting and there will be abundant diversion for all who attend, for Patrick O'Mara and Benj. Hammond are to relate their experiences and impressions of Asheville and, it being dahlia night, A. L. Miller and others have promised a big display of new sorts of this popular garden flower.

George Gross, for the past three and one-half years in the employ of Henry Erickson, Brooklyn, was accidentally killed by falling from the platform of a moving railroad train at Mauch Chunk. Mr. Gross, who has been identified with the gardening business in this vicinity for many years, is highly spoken of by those who knew him and his late employer feels the event keenly.

M. Sehling, formerly buyer for E. Stewig, is opening a new store at Sixth avenue and Fifty-sixth street. Another new place is that of John Lucie, at Broadway and One Hundred and Second street.

The first chrysanthemums of the fall crop came to E. C. Horan this week, from A. C. Zvolanek, of Grand View, and the variety was Montmart.

Thos. Knight, American representative of Linden & Company, is now at Brussels, Belgium, having arrived there August 20.

Siebrecht & Sons have the steel framework in position for a fine curvilinear conservatory at 409 Fifth avenue.

Robert Kelly, son-in-law of James Hart, the commission man, died on Sunday, August 31.

Henry Siebrecht, Jr., returned from his European trip on Saturday, August 30.

Adam Laub & Sons, of Hughsonville, sent in their first violets September 1.

Visitors: J. F. Huss, Hartford, Conn.; Allan Pierce, Waverley, Mass.

Philadelphia.

MARKET PROJECT SURE OF CONSUMPTION.—MEETING CALLED.—LARGE SUPPLIES OF ASTERS.—OTHER STOCK PLENTIFUL.—GROWERS PLEASED WITH CARNATION PROSPECTS.—CLUB MEETING.—VARIOUS NOTES.

Simple asters are now at their best, many fine flowers being seen, and prices range from 75 cents to \$2 per hundred, the latter for the disbudded stock, some of which measures four inches in diameter. The bright pink, white and purple are most in demand, the Daybreak and light lavender colors being moved with difficulty. Robert Craig & Son are carrying *Lilium album* and roseum and getting 50 cents to 75 cents per dozen for long stems. Roses are more plentiful, particularly Beauties, which can now be had with thirty to thirty six inch stems. Prices range from \$1 to \$2 per dozen. Kaiserin and Carnot bring \$4 to \$6 per hundred for the best stock. There are a few fair carnations. Most of the Philadelphia growers have their carnations housed and express themselves much pleased with appearances. R. Craig & Son have a house of Lawson which looks fine. Their stock of Adonis, the new red, is in fine condition and as soon as the new range of houses being erected by the Lord & Burnham Company is completed they will be started on their winter campaign. There has been an enormous demand for the young stock which is to be sent out next spring.

The September meeting of the club was not very well attended. H. F. Michell, who has just returned from a European trip among his seed growers, is to give the club an account of his tour at the October meeting. S. S. Pennoek will also give his version of the Asheville convention at the same time. Mr. Heacock told of the convention as he saw it in a very interesting paper, while Robt. Kift gave an account of the trip up Mount Mitchell. Nominations for officers of the club to serve for the ensuing year resulted in five candidates for president, W. K. Harris, Jos. Heacock, H. F. Michell, John Westcott and Leo Niessen. This is the first time there has been anything like a contest for this office. Mr. Harris, who has served five years, begged to be excused from another term, and as all the others also declined a motion was made and carried that they all stand and let the vote decide at the next meeting. For the office of vice-president David Rust was nominated, as were Edwin Lonsdale and

J. W. Collesh for secretary and treasurer respectively.

The Philadelphia wholesale cut flower market is surely born and needs only to be baptised and clothed with the corporation garment of the law to enable it to move forward and fill that long-felt want. A meeting is to be held next Thursday afternoon, September 11, at Horticultural Hall, of all growers and florists' supply men. A temporary board of directors will be elected, whose duty it shall be to get out articles of incorporation. It is proposed to have a capital stock of \$20,000, one-third of which only is to be sold. Shares will be \$20 and each stall holder is expected to hold at least one share. A committee is looking up available sites and will probably report at this meeting. It is earnestly to be hoped that every grower of cut flowers who has this city for his market will be present and give his name and influence to this movement, which promises so much for the improvement of the trade in this community.

Fred. Ehret and Rupert Kienle have returned from their European trip and report having had an elegant time.

Boston.

LITTLE DOING IN WHOLESALE QUARTERS.—AN ABUNDANCE OF MATERIAL.—THE FIRST CHRYSANTHEMUMS.—GOOD HYBRID ORCHIDS SHOWN.—VARIOUS NOTES.

Very little stirring in the general trade thus far. There is an abundance of material in the cut flower market, of fairly good quality on an average and no special demand in any direction. The opening days of September have been the warmest of the season, but as yet outdoor bloom of all kinds is good, owing to the abundance of rain during August. The first suggestion of autumn was seen in Welch Brothers' when, on August 25, Lewis sent in a shipment of Fitzwygram chrysanthemums.

At Horticultural Hall on Saturday, August 30, there were on exhibition some very handsome plants in bloom of hybrid cattleyas raised by E. O. Orpet, gardener to E. V. R. Thayer, of Lancaster, Mass. Among the named varieties were *Laelio-cattleya* × C. G. Roebing, *Cattleya* × *interglossa*, *Laelio-cattleya* *Blechnensis*, *Cattleya* × *Patrocinii*, *Cattleya* × *Atalanta*, *Laelia* × *ingrescens* and *Laelio-cattleya* *Proserpine*. R. P. Struthers made an exhibit of over 100 named dahlias.

The Abbott Fern Company will open a place of business at 14 Brattle street on September 10.

Visitors: A. L. Thorne and Mrs. Thorne, Flushing, N. Y.; J. H. Troy, New York.

St. Louis.

MARKET STRONGER AND STOCK SHOWS CONSIDERABLE IMPROVEMENT.—NOTES BY THE TOURISTS.—JOTTINGS.

The wholesale market is much stronger this week and a slight improvement in stock is noticeable. Roses are quite plentiful, but first-class stock still remains close. Liberty and Bride are about the best sent in, with a few Bridesmaids. American Beauties are very good. Carnations are beginning to come in stronger, both in stem and bloom. Some very fine Ethel Crocker are being sent in from the neighborhood of Kirkwood. Asters are still plentiful, but it can be seen that they are beginning to approach the end of their season.

The next meeting of the St. Louis Florists' Club will be held at Odd Fellows Hall No. 2, on September 11, and an illustrated essay by Parker T. Barnes is promised. Installation of officers will also take place at this meeting.

Geo. Waldbart took a trip to Chicago and Milwaukee immediately on his return from the convention. He speaks with wonder of the large ranges of glass at Chicago and the amount of stock to be seen at the wholesale houses.

The visitors to the convention are home again. It is reported that several of the St. Louis people were ill at Asheville. J. Connon, Geo. Waldbart and Ferd. Weber were among those who noticed the changed conditions. R. J. M.

Missouri State Fair.

At the Missouri State Fair, held at Sedalia, August 18 to 23, the following premiums were awarded in the floricultural department:

For collection of greenhouse and hot house plants, first, Gelven & Son; second, Chas. Koepfen,

Collection Rex begonias, Gelven & Son, Chas. Pfeiffer.

Collection geraniums, Chas. Koepfen, Chas. Pfeiffer.

Collection carnations in bloom, Gelven & Son, Chas. Pfeiffer.

Collection palms, Gelven & Son, C. Koepfen.

Collection ferns, Chas. Pfeiffer, Gelven & Son.

Collection foliage plants, Gelven & Son, Chas. Pfeiffer.

Collection cacti, Gelven & Son.

Collection roses in bloom, Chas. Koepfen.

Best and largest collection blooming plants, Gelven & Son, Chas. Pfeiffer.

Pair hand bouquets, Gelven & Son, Chas. Koepfen.

Single floral design, Chas. Koepfen, Gelven & Son.

Display of cut roses, Gelven & Son, Chas. Koepfen.

Display of cut carnations, Chas. Koepfen, Gelven & Son.

Charles H. Gelven was the superintendent of the department and the judges were Charles Purzner, of Jefferson City, and Robert Semmler, of Sweet Springs.

NASHUA, N. H.—August Gaedeke & Company took most of the first prizes at the floral department of the Nashua Fair this week.

CONCORD, N. H.—The floral department in the Concord Fair is very extensive this year. Messrs. Wilson and Benedict are large contributors.

JEFFERSON CITY, Mo.—Chas. Purzner, of the firm of Busch & Purzner, has sold his interest to his partner, Hugo Busch, and is talking of going into business somewhere in the east.

COLORADO SPRINGS, COL.—J. W. Smith, who is the managing partner of the Broadmoor Floral Company, now a year old, reports a very prosperous start in business.

SARATOGA SPRINGS, N. Y.—This was floral carnival week, the greatest event of the summer at Saratoga. The festivities opened on Monday evening with the greatest ball in the history of the nine years of the floral fete, and culminated on Thursday with the annual parade of decorated vehicles. There were some splendidly decorated turnouts, the automobiles being conspicuous.

THE AMERICAN FLORIST

EIGHTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.
Subscriptions accepted only from those
in the trade.

Advertisements on all except cover pages.

Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, **only on consecutive inser-**
tions, as follows—6 times, 5 per cent; 13 times,
10 per cent; 26 times, 20 per cent;
52 times, 30 per cent.

Cover space sold only on yearly contract at
\$1.00 per inch, net, in the case of the two
front pages, regular discounts apply-
ing only to the back pages.

The Advertising Department of the AMERICAN
FLORIST is for florists, seedsmen and nurserymen
and dealers in wares pertaining to those lines *only*.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday
to secure insertion in the issue for the following
Saturday. Address

AMERICAN FLORIST CO., Chicago.

MANY of the western florists are busy
at their local autumn state and district
fairs.

THE aftermath of advertising that is
persisted in may be more valuable than
the first gleaming. There is wondrous
cumulative effect in persistent advertising.

IN many sections of the country the
nights the past week have been so cool
as to necessitate light firing by rose
growers. And still the question of coal
supply is not settled.

THE mailing label on your paper shows
when your subscription expires; when
you send your renewal note that the
date changes within two weeks; it will
serve as your receipt.

AN innovation, or perhaps it should be
called a reversion, at the Kansas City
flower show, will be the display of classes
for twelve, eighteen, twenty-four and
thirty-six chrysanthemum cut blooms,
mossed on boards, after the English
style.

Unpack Dutch Bulbs Quickly.

M. Van Waveren & Sons, of Hillegom,
Holland, offer the following caution
regarding Dutch bulbs:

"Owing to the exceedingly wet and
cold weather during the greater part of
August, Dutch bulbs could not dry so
thoroughly as usual. This will do no
harm, as they ripened off well enough,
but it is of the greatest importance to
unpack them directly on arrival, other-
wise they will be liable to mould. After
unpacking the next thing to do is to
bring them to a dry, warm and airy spot
and spread them out so that they can dry
quickly. On no account should bulbs be
left in cases or paper bags.

Heating a Small House.

ED. AM. FLORIST:—What will be the
most economical way, fuel and labor con-
sidered, to heat a greenhouse 10x12 and
seven feet to ridge, banked to eaves. A
temperature of 60° in zero weather is
desired and the fires can not always be
watched at night. C. H. T.

The best way will be to heat by pipes
from a coil in a furnace or a hot water
heater if near a dwelling. If this cannot be
done use a small hot water heater rated for
100 to 120 square feet of radiation. The
heating surface of the house should be
about seventy square feet. This can be
secured by running three 2-inch or four
1½-inch pipes around two sides and one
end. L. R. TAFT.

Wants Lavender.

ED. AM. FLORIST: Will you kindly tell
me where I can get lavender flowers for
putting in linen? Miss JESSIE ROSE.
Little Rock, Ark.

Steam in a Carnation House.

ED. AM. FLORIST:—I am building a
carnation house 23x70 feet and have
3-inch pipe to heat it with, using steam.
Will a 2-inch overhead flow be large
enough or would 3-inch be better? How
many 3-inch returns will be needed to
keep a temperature of 55° in zero
weather? The house is well protected
on the north and west. The house will
be about ten feet to ridge, the roof in
two short spans. C. L. V.

Ordinarily a 2-inch main would answer
for a house of this size, using small pipe,
but with 3-inch pipe for the returns it
will be better to use a 3-inch main. This,
with four 3-inch returns running across
the farther end and along the sides, will
afford the desired temperature.

L. R. TAFT.

Greenhouse Building.

Mt. Vernon, N. Y.—Chas. A. Tier, two
houses 16x90.

Bristol, R. I.—Spencer Rounds, 100-
foot house.

Hartford, Conn.—J. G. D. Newton, one
house.

Shillington, Pa.—H. M. Shilling, two
houses.

North Beverly, Mass.—Geo. W. Glines,
one house.

Cambridge, Mass.—F. C. Becker, one
house.

Westbrook, Me.—Benj. Elwell, one
house.

Reading, Pa.—Brookside Greenhouses,
two houses.

Marlboro, Mass.—W. L. Lewis, 70-foot
house.

Baldwinsville, Mass.—A. L. Paine, veg-
etable house.

Rosemont, Pa.—A. B. Johnson, one
house.

Meriden, Conn.—A. Greenbacker &
Sons, three carnation houses.

Peabody, Mass.—J. M. Ward & Co.,
violet house.

Greenville, N. J.—George Kruse, three
houses 211 feet long.

Mechanicsville, N. Y.—William Baker,
house 22x96.

Newton, Mass.—W. M. Mick, one
house.

Piping for Steam.

ED. AM. FLORIST:—I have two houses
which I wish to heat by steam to a tem-
perature of 60°, using a tubular boiler.
The pipes are to be hung on purlin sup-
ports and on the wall, as I shall use brick
and tile benches. The houses run east
and west, from a shed or boiler room,
one going out from each side. Following
are the dimensions of each: One is
22x145, south wall four feet, north wall
six feet, north bars seven feet, south bars
seventeen feet six inches, no glass in sides
or end. The other house is 30x125, with
six-foot walls, north bars fifteen feet ten
inches, south bars nineteen feet ten
inches, one row of 24-inch glass in south
wall and glass in one end. How many
pipes will it take and how large a boiler?
I would like to use 2-inch pipe for
flows, if possible, as I have a great deal
of it on hand. LOCKPORT.

The narrow house can be heated with

two 2-inch flows and ten 1¼-inch returns.
The other house will require three
2-inch flows and fourteen 1¼-inch returns
for 10° below zero. A twenty-four horse-
power boiler will answer with a night
fireman, but if to be left for a number of
hours at night, a thirty horse-power will
be better. This should have twelve square
feet of grate. L. R. TAFT.

Coming Exhibitions.

[Secretaries are requested to supply any omis-
sions from this list.]

BOSTON, MASS., September 11-14, 1902.—Annual
exhibition of plants and flowers Massachusetts
Horticultural Society. W. P. Rich, Sec'y, Horti-
cultural Hall, 300 Massachusetts avenue.

ral Society. Edw. W. Neubrand, Sec'y, Tarry-
town, N. Y.

Heating Plant Houses.

ED. AM. FLORIST:—We would like your
advice in regard to heating greenhouses.
We are now erecting two new ranges of
houses. In one range the houses will be
seventeen feet wide and in the other
range about ten feet wide. Both ranges
are to be used exclusively for growing
plants and not for cut flowers. Would
you advise using hot water or steam and
which is the most expensive? Would you
advise overhead or under bench system
of piping and how many pipes to the
house? Our previous experience has been
entirely with hot water system of heat-
ing, but we were thinking of changing to
steam. I. S. C.

The question cannot be answered very
definitely as it does not state the number
or length of the houses. If there are
only three or four houses of moderate
length the best satisfaction will be
secured with hot water, and it will be
found fully as economical in fuel as steam
when used in large ranges, besides afford-
ing an even temperature with very little
care. When the cost of the heating plant
is an object, steam will be selected for
large ranges, as the first cost will not be
more than three-fourths as much as for hot
water. If hot water is used 2-inch pipes
should be used unless the houses are
more than 200 feet long, when 2½-inch
will be better. If there are a number of
houses it will be better to connect the
main pipes with the coils at the end near-
est the boiler, and then connecting the
coils at the farther end, bring the drip

back in a common return, than to run either an individual flow or return through each house. For 60° use eight 1 1/4-inch pipes and for 50° six 1 1/4-inch pipes in the houses seventeen feet wide and for the ten foot houses take five for 60° and four for 50°. L. R. TAFT.

A Small Heater.

ED. AM. FLORIST:—I have a house 15x25, with three three-foot benches, at present heated by a flue. I wish to use the house for propagating and want to run under the side benches three rows of 1-inch pipes and 1 1/2-inch overhead and two 1-inch pipes along the sides of the sill, or seven flows and eight returns. The house stands too far from the others to heat with the hot water plant. What kind of a heater would best answer the purpose? C. W. E.

There is but little choice in the heaters manufactured by the leading firms and any of them can supply what will be needed. As neither the kind of plants to be propagated nor the temperature desired are stated, it is not possible to tell what size will be needed. One rated for 300 square feet of radiation will probably answer. The arrangement of the pipes is not stated very clearly. It is evident that there are seven flows and eight returns, but eight rows of 1-inch pipe and one 1 1/2-inch are all that are located. I would suggest that the pipe used be either 1 1/2-inch or 2-inch, and if 60° is needed, in addition to the bottom heat, about sixteen of the former or twelve of the latter should be used.

L. R. TAFT.

A Question of Piping.

ED. AM. FLORIST:—We have almost completed two greenhouses and would like some directions regarding heating same. Houses are 15x48, running north and south; no wall between. Seven feet to gutter, with three feet four inches of glass in side; remainder of sides and north ends first ship-lap lumber on end and over this a layer of sheathing paper, then drop siding. All timbers are carefully plowed and grooved, and fitted together with white lead. Sides will be banked up about two feet. North ends will be protected by shed. A bench three feet wide runs along one side of each house, and across the ends of both, a space four inches wide being left between bench and wall; three benches five feet four inches by thirty-six feet fill remainder of space. The center one of these benches is beneath the gutter between the houses. We would like to pipe under outside benches and the middle one of the wide benches. Would like to use as small pipe as is suitable, as we think the temperature could be increased or decreased more quickly, the volume of water being so much less in proportion to radiating surface. Temperature seldom falls much below zero and we desire a night temperature of 60°. Please inform us as to the capacity of boiler required, how low it will have to be placed, and the number and manner of arranging pipes.

L. H. C.

If desired the pipe for the returns may be as small as 1 1/2-inch. I would recommend that six 2-inch pipes be run as flows under the middle bench and that three of these be carried across the south end of each house to the outer corner, where they should be connected with the coils. If 1 1/2-inch pipe is used nine will be required on the outer wall of each house. Better results will be secured,

however, with seven 2 inch pipes. The boiler should be one rated for 800 to 900 square feet of radiation and the top should be a foot or two below the surface. L. R. TAFT.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

SITUATION WANTED—By young man in first-class retail store, ten years' experience. Good references. A L. care American Florist.

SITUATION WANTED—In first-class store, eight years' experience; good salesman and designer. Best of references. Address J. E. care American Florist.

SITUATION WANTED—By good worker and floral designer, in greenhouse or store, Chicago preferred; honest and steady. Address H. S. care American Florist.

SITUATION WANTED—By October 1st, by practical grower, decorator and designer, capable of taking full charge; thoroughly experienced in all branches. West preferred. A B C. care American Florist.

SITUATION WANTED—In store or greenhouses, good decorator and designer, 10 years' experience; age 27; good references. Please state wages in first letter. Address PANSY. care American Florist.

SITUATION WANTED—By good all-around florist; 18 years' experience. Specialty palms, ferns and pot plants in general; also cut flowers. Able to take charge. Address L. care Schiepan, 3455 State St., Chicago.

SITUATION WANTED—As working foreman and grower of roses, carnations, violets, mums and miscellaneous plants; 20 years' experience in England and 16 in United States; age 50; single; English. Disengaged September 18. Address GEO. H. MORRIS, Dunder Lake, Bergen Co., N. J.

SITUATION WANTED—By single German age 30, as vegetable gardener, competent to take charge or as helper to florist; temperate and industrious. Middle west preferred. Liberty September 30. Please state particulars in first letter. V G. care American Florist.

SITUATION WANTED—By middle-aged, single, temperate, Scandinavian, with good references; experienced florist, propagator, designer, landscape gardener; would prefer private place of some responsibility, Indiana, Illinois or lower Michigan. J. C. JENSEN, care Wm. Roethke Floral Co., Saginaw, Mich.

SITUATION WANTED—By a good, practical English gardener and florist, age 48, married, no family; over 25 years' experience in England and America; thoroughly understands growing carnations, roses, orchids, ferns, palms, all kinds of greenhouse plants, fruits, vegetables, etc.; 18 years good references from Messrs. J. Veitch & Sons, London, and have the best of references here. B. SILLEY, Parkersburg, Pa.

WANTED—At once, assistant rose grower and general greenhouse man. Address C. H. FREY, Lincoln, Neb.

WANTED—Competent storeman. Must be sober and reliable. References required. CENTRAL GREENHOUSES, Sandusky, O.

WANTED—First-class rose grower. Must show good references. A. L. RANDALL, 4 Washington St., Chicago.

WANTED—A young man who understands the care of palms and ferns. Address SMITH & PETERS 118 Euclid Ave., Cleveland, O.

WANTED—Experienced carnation grower. Steady employment and good wages to right party. J. D. THOMPSON CARNATION CO., Joliet, Ill.

WANTED—Good greenhouse hand. Wages \$20 per month with board. Steady work and increase of wages to the right man. Address W. L. SMITH, Aurora, Ill.

WANTED—Young man as assistant on place where good stock is grown. Moderate wages and a chance to learn. Address H. F. care American Florist.

WANTED—A good, steady, industrious man; must be good all-around grower and propagator. Married man preferred. Apply to Mrs. J. P. C. BURCH, Roswell, N. M.

WANTED—Man with practical experience in growing cut flowers and bedding plants. State age, experience and wages wanted. References required. Address B. American Florist.

WANTED AT ONCE—A good young florist with references, to grow cut flowers and plants; also one with less experience; state wages with board. WHEELING GREENHOUSE CO., Wheeling, W. Va.

WANTED—Good grower, retail place of 6,000 ft.; state wages expected with board, room and washing furnished; increase if capable. Reference with description wanted. Address JULIUS STEINHAUSER, Pillsbury, Kas.

WANTED—Night fireman, a permanent position and good wages to the right man. Must be strictly temperate and come well recommended from last place. THE E. C. HILL CO., Richmond, Ind.

WANTED—At the Sunny Woods Greenhouses (the birthplace of the Bridesmaid), another rose grower. Wages, \$40.00 per month. Address with references. FRANK L. MOORE, Chatham, New Jersey.

WANTED—Propagator of roses, carnations, etc., must be thoroughly first-class; no others need apply. Also a few growers of roses and carnations for sections. Good wages and steady work. LAKEVIEW ROSE GARDENS, Jamestown, N. Y.

WANTED—A working foreman to take charge of 22,000 square feet of glass, where first-class roses and carnations are grown, also one house of poinsettia; also one assistant. State age and wages expected, with board and washing. Apply to JOHN L. WYLAND, De Haven, Pa.

FOR SALE—Well established greenhouse business, 12,000 feet of glass; steam heat, 100 miles from Chicago. INDIANA, American Florist.

FOR SALE—Two hotwater boilers, 1 upright tubular 8 horse power boiler, \$40; 1 weathered cast iron boiler, \$35. Address L. L. PILLSBURY, Galesburg, Ill.

FOR SALE—A great bargain. 3 greenhouses, 6,000 ft. of glass, well stocked with carnations, mums, roses and general bedding stock, in a live growing town in Western Pennsylvania. Address BARGAIN, care American Florist.

FOR SALE—Five greenhouses, barn, shed and dwelling, 2 1/2 acres of land, town of 4,000 inhabitants; terms to suit buyer; or can be leased for long term; reason going to Europe. Inquire of JOSEPH CHARONNE, Deatur, Ill.

FOR RENT OR SALE—At Highlands, N. Y., three greenhouses 200 feet long, 2 1/2 span, propagating house 100 feet, large potting shed, dwelling and stable; city water; steam heat. Immediate possession. Apply to GEO. R. BRISTON, 206 Broadway, New York City.

For Sale Cheap.

One boiler 48-inch by 16 feet long, Morehead steam trap, steam pipes and fittings, 40 boxes 12x16 double strength glass, 100 boxes single strength glass, 50 boxes 12x14 single strength glass.

MRS. GEO. WALDBAUER, Saginaw, Mich.

For Rent or Sale Greenhouse

(about 7,000 feet of glass), dwelling and stable, Evanston, Ill., two blocks from C & N. W. station. Good established trade direct from greenhouse. Rent reasonable. Address

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.
WALTER P. STOKES, Pres.; C. N. PAGE, First Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

VISITED CHICAGO: F. C. Stephens, of Bermuda.

A. H. GOODWIN, of Chicago, is on an eastern trip.

CONNECTICUT growers are fairly satisfied with their onion seed crop.

ONION sets, yellow, are selling in Louisville at \$1.50 per 100 pounds. Local dealers there are reported to be storing freely.

C. P. BRASLAN wires, September 2, that onion seed is turning out thirty per cent lighter than was anticipated by growers four weeks ago.

THE outlook for tuberose bulbs, while improved by some rain in August, would indicate that the sizes of the bulk of the crop will be below the average and that the regular grade 4 to 6-inch bulbs will contain more 4 to 5 bulbs than of 5 to 6 size. Of the extra large 6 to 8-inch bulbs but few if any can be expected.

J. M. McCULLOUGH'S SONS, of Cincinnati, have made extensive additions to and changes in their warehouse fronting on the river. The railroad cars may now be loaded and unloaded in the building, under cover, and many other alterations have been made which will afford greatly improved facilities for the handling of the specialties of this house.

Pearl Tuberoses in Italy.

I wish to ask you a question that you will please answer if you can through your columns: Among our tuberose we grow few of the Pearl—only a few, because while it grows just as well and strong as the others, and makes nicer spikes, when the opening time comes the flowers go to sleep as fast as they open, in fact just before opening, and for that fault the variety is absolutely useless. We have tried every known way to overcome this defect. The soil is sandy, abundantly irrigated and richly fed, but the flowers fail to open as well as those of the old double variety. We are very mad about it, because the Pearl is much more dwarf and makes a better spike than the old variety. Water is not lacking, so the trouble must be somewhere else.

Could you kindly tell us what your American growers give their tuberose to make them bloom so well and also how the eastern growers succeed in forcing them?

PETER CROVETTO.

Cupid Sweet Peas.

Fred. Roemer, of Quedlinburg, says the British Horticultural Advertiser sent us notes on this subject last February, to which we referred in our succeeding issue. His contention was that the comparative failures commonly reported with this section, were owing to the seed having been grown in the dry climate of California, and that far better results were obtained from seeds saved two or three years in succession in Germany.

He kindly sent to us for trial some half dozen varieties which we tested beside ordinary commercial samples. The result, to a certain extent, justifies Mr. Roemer's contention; though from some unexplained cause the white failed absolutely; the others were good, especially Pink Cupid, which was much superior to

other samples sown side by side, also Beauty, which was the most attractive of all, vigorous, free and effective.

The Onion Crop.

The onion crop of the United States in 1899, according to the reports of the twelfth census, amounted to 11,790,974 bushels; the area harvested was 47,981 acres, and the total value of the crop on the farm amounted to \$6,637,413. The following table shows the states in which 500 acres or over were planted, the six states devoting greatest acreage to this crop being indicated by asterisks:

States.	Acres.	Bushels.	Value.

A Tomato Trust.

The American Packers' Association, says an agricultural contemporary which is usually well informed, has just had recorded a million dollar mortgage in courts of Maryland counties where it has acquired canning properties. It has liens also on properties in Delaware, Pennsylvania and New Jersey, and is in condition to control the market. Its object is to aid country canners, who generally operate on borrowed capital, reduce expenses in purchase of cans, solder and machinery, and prevent gluts in the

market. The canning season will soon open. Owing to high prices of canned goods early in the year, farmers everywhere planted tomatoes, and the acreage is larger than ever before known. The old rate of \$5 a ton has been advanced to \$7 and \$8, and even at these figures a large acreage is uncovered by contracts.

ST. CLOUD, MINN.—P. H. Anderson has planted 1,500 carnations, 1,500 chrysanthemums and 1,200 roses and a bunch of violets at the Campbell Greenhouses, which he recently purchased.

Wholesale Price List for Florists and Market Gardeners.

Lilium Harrisii.

We have a splendid lot of late dug bulbs that have just arrived. On account of late digging bulbs are splendidly ripened and are unusually fine. The season has been very favorable, and it is a long time since we have been able to offer such fine stock. Bulbs are plump and hard, and that bright golden yellow color which denotes a well ripened and healthy bulb. Bulbs run unusually large and are in the best possible condition. We offer them as long as unsold as follows: 6 to 7-inch bulbs, \$17.50 per case of 350 bulbs; in less quantities, \$6.00 per 100. 7 to 9-inch bulbs, \$ 0.10 per case of 200 bulbs; in less quantities, \$11.00 per 100. 9 to 11-inch bulbs, \$20.00 per case of 100 bulbs; in less quantities, \$22.00 per 100.

We also have a fine lot of **BERMUDA-GROWN LONGIFLORUM**

Late dug bulbs, shipped by last Bermuda Steamer, which arrived this week. This is an extra fine lot of selected bulbs. 7 to 9-inch bulbs, \$20.00 per case of 200 bulbs; in less quantities, \$11.00 per 100.

CALLAS.

We have a grand stock of these splendidly ripened bulbs ready for immediate shipment.

Extra quality bulbs, 1 1/4 to 1 1/2 inches diameter.....	\$5.00 per 100	\$46.00 per 1000
Selected bulbs, 1 1/2 to 1 3/4 inches diameter.....	6.00 per 100	60.00 per 1000
Mamma h bulbs, 1 3/4 to 2 inches diameter.....	8.00 per 100	76.00 per 1000
Exhibition bulbs, 2 to 3 inches diameter.....	10.00 per 100	

We can also ship immediately on receipt of order the following.

WHITE ROMAN HYACINTHS Finest quality bulbs, 12 to 15 cm. circumference, \$3.00 per 100; \$26.00 per 1000.

NARCISSUS PAPER WHITE GRANDIFLORA \$1.00 per 100; \$9.00 per 1000.

BERMUDA BUTTERCUP OXALIS 75c per 100; \$6.00 per 1000.

FREESIAS Selected bulbs, 1/2-inch and up in diameter, 75c per 100; \$6.00 per 1000.

MASTERPIECE.

MIGNONETTE, TRUE MACHET. Trade pkt., 10c; ½ oz., 25c; oz., 50c; 2 ozs., 75c; ¼ lb., \$1.25.
CALCEOLARIA HYBRIDA, choicest mixture, pkt. 50c.

10 PER CENT discount on flower seed orders amounting to \$2.00 and over for Cash with order.

PANSIES

VAUGHAN'S "INTERNATIONAL"

Received the only reward for Mixed Pansies at the World's Fair. It is to-day better and more complete than ever. It contains the cream of the stock of 10 Pansy specialists. There is no better mixture in existence, as all the florists who saw or used it can tell you. Price per oz., \$10.00; ½ oz., \$5.00; ¼ oz., \$1.50; trade pkt., 50c.

VAUGHAN'S "GIANT MIXTURE."

This mixture is specially made by us from all the separate colors of Giant Tricolor, the Giant Bugnot and Cassier and several special strains which cannot be had any other way. If your trade demands large flowers there is no better mixture. Price, ¼ lb., \$14; oz., \$4; ½ oz., 60c; td. pkt., 25c.

MASTERPIECE--New Giant Curled.

This strain comes nearer to "Double Pansies" than anything ever introduced under that name. In reality the number of petals is the same as that in other Pansy flowers, but they are crimped and curled in such a fashion that the flowers appear double. The flowers are of enormous size, often 3 inches across, and the color variations and combinations are odd and striking. Pkt., 50c; ½ oz., \$1.00.

"Vaughan's International" Primrose Mixture. Unquestionably the best mixture of largest variety of the best selling colors. Flowers large, beautifully fringed, borne in large clusters well above the rich green leaves. Pkt. (25) seeds) 50c; 5 pkts. (1250 seeds) \$2.00.

Cineraria VAUGHAN'S COLUMBIAN MIXTURE. A mixture of the best English and German strains, unsurpassed. Pkt. (1000 seeds) 50c; 3 pkts. \$1.25.
Cineraria HYBRIDA, large flowering, white, blood-red or crimson, double white or best double mixed each, per trade pkt., 50c.

VAUGHAN'S SEED STORE, 14 Barclay Street, New York. 84-86 Randolph St., Chicago.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSEYMEN.

CHAS. A. LOENFRITZ, PRes.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y. Twenty-eighth annual convention, Detroit, Mich., June, 1903.

THE Illinois State Horticultural Society will hold its annual meeting at Champaign, December 17 to 19. Plans are being made for a large fruit exhibit.

FRANK N. DOWNER, of Bowling Green, Ky., has been sued for \$5,000 by parties who say Downer wrongfully and damagingly accused them of stealing plants from his nursery.

OLMSTED BROS., of Brookline, Mass., have recently taken orders for plans for the landscape work on several private estates not far from Chicago and for the extensive work contemplated at the University of Chicago.

SWAIN NELSON & SONS, Chicago, are doing the plans for the park work at Des Moines and at the several public institutions of Iowa where the grounds are being improved. They have also recently booked the contract for the plans for and supervision of the park work to be done at Cedar Rapids.

Cleveland.

INTERESTING JOTTINGS OF DOINGS OF THE GROWERS.—GOOD STOCK EVERYWHERE IN EVIDENCE.—A CRAFTSMAN INJURED.

One always finds something interesting by taking a trip among the East End growers at this season of the year. At James Eadie's place carnation planting is being pushed rapidly to a finish. His plants are in superb condition. Especially fine were a batch of Lawsons, equal if not superior to the famous Cincinnati brand. Several new varieties are being given their first trial. Mr. Eadie, in common with the majority of Cleveland growers, is careful about handling new kinds in large quantities, but more of the Lawson type is what we are after.

F. R. Williams was recently thrown from his wagon and dragged quite a distance, sustaining injuries which will keep him confined for some time. Planting is completed at his place and the stock in the new houses erected this year is looking fine, especially two houses of Meteor, which are exceptionally good. These houses were planted in July and they are now cutting flowers with stems from twelve to twenty-four inches in length. The carnation plants suffered a good deal from too much rain and are not as large as might otherwise be.

James Wilson is adding more glass to his plant. Three new houses 120 feet long are in course of construction. These will be for ferns, violets and carnations. Mr. Wilson has given up rose growing altogether and his entire place, except the violet and fern houses, will be given to carnations. His plants equal in size and health those of Eadie. All surplus stock of carnations is potted up and kept in a cold frame over winter and planted out the following spring for summer bloom. In this way a succession of bloom is obtained the year around.

August Schmidt has his building almost complete and a model plant it is, always scrupulously clean and neat. Stock never looked better. He is growing Begonia Gloire de Lorraine outside in a frame in a mild hotbed, with evident success. This method of growing Lorraine seems to be gaining in favor in this section.

Mr. Smith, of Smith & Fetters, has returned from a month's sojourn among

friends in the east, looking well and hearty. We are happy to learn that Mr. Fetters is improving rapidly in health in his western home. His ultimate recovery is looked for.

Miss Mae Evans, of the J. M. Gasser Company, was united in marriage on September 4 to Bert. W. Collier. The bride is very popular with the trade and was the recipient of a number of handsome presents from her friends.

J. W. Ahern, of Mt. Vernon, O., was a recent visitor in town. Ecto.

LYNN, MASS.—Mrs. Geo. E. Libbey and Mrs. Henry Young have formed a co-partnership as florists and have opened a fine store at 84 Silsbee street.

Providence, R. I.

All florists look alike when the dull season comes on, and they certainly have worn an anxious expression the past ten days. There has been scarcely any semblance of business, not even a fair portion of funeral work. The growers are grumbling about coal, but the wise ones are predicting a settlement or adjustment of industrial conditions shortly, and a probable lowering of price and satisfactory supply. When the Rhode Island Briquette Coal Company begins operations in another year, coal strikes may not have much special significance to local consumers.

A VISIT TO GROWERS FINDS THEM IN GOOD SHAPE FOR THE APPROACHING SEASON. —TRADE FAIR FOR SO EARLY.—OUTDOOR SUPPLIES ABOUT AT AN END.

A trip around the growing establishments shows everyone in good shape for the coming season, which, from present indications, promises to be a good one. The growers who were hit by the hail a few weeks ago have about patched up. Quite a few more Beauties are planted than last season and evidently the growers realize that they are the best paying crop, judging from last season's sale. Chrysanthemums look especially good and I hardly think there will be any complaint over a shortage of these flowers along in November. Carnations are looking good, especially those of the Colfax Avenue Floral Company, Park Floral Company and Benson. The cut at present is very small, but there will be quantities along in two or three weeks. We seem well supplied with the newer varieties. Violets with one or two exceptions show up poorly, but one cannot always tell. They may change for the better as quickly as they go off. Maler & Denkworth, who have grown them very successfully for several years, and supplied most of the town, have them in good shape again this season.

Trade leans to good, while the supply shortens up very materially as the season advances. The outdoor supply of stock is very nearly over and grades decidedly poor. The aster crop has been a failure with nearly everyone and small prices were realized for them. At present Glauber, of Montclair, is sending in some very good Semple's grown indoors. These sell readily at good prices. Gladioli are still coming in but are of poor quality.

Ben. Boldt, who this season is growing for the Daniels & Fisher Company, at Mud Lake, is experiencing considerable trouble with the water supply, the casing giving way in the artesian well. As it is now he cannot use the water owing to the alkali that he pumps with it. Another well is being sunk.

Benson's new range of glass at South Denver is all completed and planted up. They are fine houses, five of them 21x200. With the exception of violets, his stock looks grand and well advanced. B.

COLORADO SPRINGS, COL.—A. J. Baur, formerly of Erie, Pa., is now with Wm. Clark.

CLUB HOLDS MEETING AFTER TWO MONTHS' VACATION.—BUSINESS SHOWS PROGRESS.—HURT IN A WRECK.—NOTES.

The Pittsburg and Allegheny Florists' Club held its first meeting of the new season on September 1. Vacation stories went the rounds, business intentions and desires were exchanged, and it was evident that those present were glad to get down to business again. Some geraniums, seedlings from the private collection of H. C. Prick, were exhibited and some hydrangeas from Schenley Park. E. C. Reinman outlined the happenings of the convention. Julius Ludwig also spoke interestingly of his tour of the public parks of the cities of Rochester, Buffalo, Brooklyn and New York.

While going to Atlantic City August 31 Mr. and Mrs. Thomas Ulam were the victims of a railroad wreck. Mrs. Ulam suffered serious injury, being thrown violently into the rear of the car. She has recently recovered from an attack of appendicitis. Mr. Ulam was badly bruised.

Business has advanced a few pegs during the week and the quality of roses has moved with it. Kaiserin, Liberty and Bridesmaid are better than they have been for a long while. Asters, carnations, gladioli and lily of the valley compose the general run of stock on sale.

Mrs. E. A. Williams will again make an exhibit at the Pittsburg Exposition. Her stand last year was very attractive.

John Bader has returned from two months in Europe. He had a delightful time.

W. B. Flemm and mother are visiting New York and Boston. E. L. M.

Louisville, Ky.

A SILVER WEDDING ANNIVERSARY.—VARIOUS NOTES OF LOCAL INTEREST.

Jacob Schulz and wife celebrated their silver wedding anniversary a few days ago. The Society of Kentucky Florists presented them with an elegant leather chair. Their home was beautifully decorated and several hundred of their friends were in attendance and brought many beautiful presents of silverware.

C. H. Kunzman has finished his large carnation house. It is the most up-to-date house in Louisville.

The florists from here who went to Asheville were well pleased with their trip.

Chas. Raynor's modern range of houses at Anchorage, Ky., is nearing completion.

Asters are plentiful and wholesale here at \$1 to \$1.50 per hundred.

Roses are of good quality but scarce. H. G. W.

CLINTON, MASS.—Frank P. Sawyer is about to open a commodious store in the Peirce building on High street.

Cressbrook Carnations

From field, nice strong plants, \$10.00 per hundred; \$75.00 per thousand.

Order early as I have only a few thousand left.

Minneapolis.

VARIOUS NOTES OF DOINGS IN THE TRADE.
—GOOD CUT FLOWER STOCK NONE TOO PLENTIFUL.

In front of the "New Store" are five large urns, mounted on pedestals eighteen to twenty feet high, which are filled with choice blooming plants and vines. They certainly make an attractive display. It is the first thing of its kind undertaken by one of the department stores and will probably be followed by its competitors.

Trade conditions are not much changed as yet. Some very fine new cut tea roses are in market, with good flowers but short stems. Carnations for outdoor stock are very fine, but white is scarce. Asters and gladioli are in good supply, although the latter move very slowly.

R. Wessling has some fine Boston ferns on display. His success with these is unexcelled.

Arthur Blome, of the C. C. Pollworth Company, Milwaukee, was in the city last week.

This is the week of the State Fair and a number of the trade are making exhibits.
C. F. R.

Colorado Springs, Col.

SUCCESSFUL EXHIBITION OF LOCAL HORTICULTURAL SOCIETY.—PROFESSIONAL CLASSES WEAK.—VISITORS.

The fourth annual flower show of the El Paso Horticultural Society was held August 20 to 22 and was a decided success, both in number of entries and in attendance. The entries in the flower and vegetable displays numbered 1,500. The only weak class was the professional, F. F. Crump being the main exhibitor. Most of the success of the show is to be attributed to the president and secretary, H. Harris and F. F. Horn. Judges and visitors were John Berry, Phil. Scott, E. Balmer, Ernest Flohr, Frank Rushmore, R. Kurth, of Denver; G. Fleischer, of Pueblo.

The Model Extension Carnation Support.

Flushing, Long Island, Dec. 11th, 1901.
MR. THERON N. PARKER,
Brooklyn, N. Y.

Dear Sir - I have used your Wire Carnation Support the last two years, to all about 12,000. They fill the bill in every particular. Nothing could be more satisfactory and would give me a great deal of pleasure if I can bespeak a good word for the trade and you are at liberty to refer to me at any time.

Very truly,
A. L. THORNE,
La Fayette, Ind.,
July 8th, 1902.

MR. THERON N. PARKER,
Harrison, N. J.

Dear Sir: - After using your Model Carnation Support in two of our houses the past winter, we have come to the conclusion that it is perfectly adapted to supporting carnations, and shall use them on all our plants the coming season.

We were much pleased with the simplicity, strength and neat appearance of the support.

Yours truly

.....when writing to an advertiser.

Cincinnati.

BUSINESS VERY QUIET.—SHIPPING TRADE DEAD.—PLENTY OF STOCK.—EARLY CHRYSANTHEMUMS EXCELLED BY LATE ASTERS.—LIBERAL PREMIUMS FOR FALL FESTIVAL EXHIBITS.—VARIOUS NOTES.

There is very little to be said about trade; a little funeral work and a few boxes of cut flowers is about all there is to it. The bottom has fallen out of the shipping trade all of a sudden and this accounts for the immense quantities of asters and other outdoor stock, which accumulate at the commission houses. Carl Schweizer and George & Allan are sending in some very good asters, which seem to have the call at \$1.50 per hundred. Roses are becoming more plentiful but there are too many stork-stemmed ones among them. Edward Ellison is cutting some very good La France, which are about the best roses seen around the city at present, but \$4 per hundred is the best price realized for these. Lily of the valley is to be had in limited quantity.

The premium list for the floral exhibits, to be given by the Fall Festival Association has been sent out. On Thursday, September 18, \$160 is offered in three prizes for table decorations, \$30 for boxes of flowers and \$60 for bridal bouquets. On September 25 \$160 is offered in three prizes for designs, \$30 for baskets of flowers and \$60 for vases of roses.

Julius Baer is handling the few Fitzwygram chrysanthemums coming to this city. Mr. Baer had a very fine lot of choice asters, fully as large as the chrysanthemums, for which he pays \$1.50 and \$2 per hundred, the chrysanthemums costing 75 cents per dozen.

The next meeting of the Florists' Society will be held at President Wm. Murphy's place. Wm. Rogers will read a paper, giving his opinions of and experiences at the Asheville convention.

Hardesty & Company are having their store redecorated and contemplate remodeling the entire interior. They have leased the floor above the store, which they will use for a workshop.

J. A. Peterson says that he is selling a large number of Begonia Gloire de Lorraine and that it pays to advertise when you have something good.

We regret to announce the serious illness of Herman Betz, who has been Mr. Peterson's floral worker and decorator for a number of years.

Visitors: Walter Mott, Wm. Dilger, Martin Renkauf, Phil. Breitmeyer, E. J. Fancourt and Mr. Osternatta. D.

SPRINGFIELD, O.—The Good & Reese Company is pushing work on its new range of greenhouses. Recently the office was moved across the street, into the center of a fine grove to make room for the new houses.

We are headquarters for a general assortment of the necessary material and supplies that you are looking for. If you are about to improve or construct, consult us.

In connection with the dismantling of the Pan-American Exposition, we have for sale:

20,000,000 FEET of fine seasoned lumber, practically new, consisting of all sizes of joists, timbers, dressed and matched boards and flooring; also sash and doors.
50,000 FEET of roofing glass.

PIPE.

We are headquarters for pipe. We offer you:
100,000 FEET of 2 to 4-inch wrought iron, lap welded casing. We can furnish this material in three ways: Either with sleeve or jacket couplings, screwed ends and threaded couplings or with expanded cast iron flanges with bolts and nuts.

1,000,000 FEET of standard black wrought iron pipe, size 3/8 to 12-inch. It is second-hand but has new threads and couplings and is in first-class condition.

1,000 TONS of galvanized wire 9, 10, 11, 12, 13, 14 and 15 gauge.

50,000 FEET of 2, 3 and 4-inch cast-iron soiled pipe and fittings.

100,000 FEET of garden hose, 3/4 and 1-in.
75,000 FEET of cotton rubber-lined fire-hose, (rubber-lined in and outside), ranging in sizes 1 to 2 1/2-inch.

VALVES and fittings of every kind.

BOX COILS for heating purposes.

RADIATORS, new and second-hand.

We also offer the following bargains in

Heating Boilers

50 CAST-IRON sectional heaters, capacity from 450 to 5,000 feet.

Newport, R. I.

SOCIAL SEASON AT ITS HEIGHT IN LATE AUGUST.—SOME GOOD DECORATIONS.—COAL AN IMPORTANT QUESTION.

The usual boom in balls and social entertainments is under way and some splendid floral decorations have recently been executed. One by Wadley & Smythe was unique, where the center of the table, twenty square feet, represented a farm-yard scene, filled in with all kinds of vegetables, farm buildings, horses, wagons, farm implements, etc., on the scheme of a "harvest home." This firm also executed the decorations of the McArthur-McCalla wedding and the results brought the highest encomiums from experts in floral decorations.

The Hodgson Company, as in former seasons, has a large trade. This firm decorated for the colonial ball, given by Mrs. Fish, which function, however, gained its fame because no hirsute appendages were allowed.

The topic of the moment is regarding the supply of coal. An unsettled condition of this question for over two weeks may prove damaging to the trade in this section.

Thomas Galvin, the veteran florist and landscape gardener, continues to superintend his large business and sets the younger disciples an excellent example. C. J. M.

Buffalo.

TRADE QUIET.—ASTERS VERY PLENTIFUL BUT GOOD.—PERSONAL AND TRADE DOINGS.

Trade is rather quiet but a flurry was caused last week in the downtown stores by the opening of the Kenilworth track. Every window was "horsey," with yellow, green and white. Palmer, Rebstock, Anderson and Bullock each had a display which was good. Labor day was quiet.

Asters are a glut on the market but some fine ones are coming in from Boettger, of Eggertsville.

S. A. Anderson has the repairs on his greenhouses about completed.

W. F. Kasting is expected home from Europe this week. Bison.

NEW HAVEN, CONN.—The second annual exhibition of the New Haven Horticultural Society will be held at Music Hall on November 11 to 13, 1902. Schedules of prizes are now ready and may be had of the secretary, Thos. Pettit, 316 Orange street.

CROP INSURANCE.
 Life insurance is valuable because it guarantees the outcome.

"Gurney" Heaters

"BRIGHT IDEA," "DORIC" and "400 SERIES" do the same thing for your hothouse: **THEY GUARANTEE THE CROP.** First of all they save 20 per cent on the coal bill and so keep expense at a minimum. Next, they produce an even heat and so do not imperil the life of the plant. Next, they are simple to operate and so require least attention. Lastly, they wear longer than others and thus perceptibly reduce the capital invested. Don't buy or exchange until you've investigated them.

Notes on Aquatics.

The summer of 1902 may be set down as a record breaker, at least for many of us. The month of August, when we usually experience extreme heat, with its consequent results, has passed into history with a temperature record below the normal. While this was most agreeable for man and beast, crops and vegetation in general, it was not altogether right for denizens of the tropics, hence disappointment and partial failure with tender nymphæas in some sections. But 1902 is not a criterion for 1903 and our experience next year may be just the reverse.

On the whole this has been a most satisfactory season and, with the exception of a few of the tender nymphæas, the water lilies have surpassed previous seasons. Hardy nymphæas have simply had an extended season and with the cool nights of August the flowering period has been prolonged into September and even the native varieties in natural ponds are flowering profusely. Nelumbiums were a few days later in opening their first flowers, but they have been profuse and continuous up to the first week of September and many buds are yet in sight and the plants still vigorous.

Of tender nymphæas the day-flowering varieties are all that could be desired and at this date of writing, September 4, numerous fine flowers are in evidence. Nymphaea Mrs. C. W. Ward, a hybrid of *N. gracilis*, has flowers from eight to ten inches in diameter. These are noble flowers, a grand pink in color and standing fourteen to sixteen inches above the water. Other hybrids of *N. gracilis* are equally satisfactory, including *N. Wm. Stone*, dark blue to purple and deep red. This is very floriferous and a single plant at this date has seven expanded flowers and numerous buds in sight. *N. Zanzibaricensis* and its forms are also in prime condition, as is also *N. Capensis*, but these are subjected to bearing a crop of seed and must not be compared with hybrids that produce no seed.

Speaking of hybrids, I cannot omit to mention a new hybrid of *N. coerulea* still in flower. This is *N. Pennsylvania*. The flower is of gigantic proportions, nine to ten inches in diameter, petals one and one-half inches in width. These are numerous as well as large, making a full and perfect flower. The color is blue, a few shades deeper than *N. pulcherrima*, and like the latter, it is ever-blooming. There are others of this class that will be heard of later.

The tropical night-flowering nymphæas are the only ones that have not come up to their usual standard. The temperature of the water during August has frequently been near the 70° mark and occasionally below; nevertheless we have had a number of flowers ten inches in diameter on such varieties as *N. George Huster*, *N. O'Marana* and *N. dentata*, but the plants have not made such vigorous growth, consequently fewer flowers.

Here in the same pond is a marked difference between the day and night-flowering tender nymphæas, the day-flowering varieties surpassing the night-flowering, proving that they require but a normal temperature to grow satisfactorily and that the night-flowering varieties require our usual summer temperature, a difference of about 10°.

The nymphæas referred to above are grown in the victoria pond and doubtless a number of readers of these notes who have not seen our ponds this summer will presume that the victorias have fared even worse than the nymphæas, but this is not the case. Sceldom, if ever, have victorias done better and during August, as in July, we have constantly had fresh flowers and a number of leaves have exceeded five feet in diameter, not including the turned up rim of six and seven inches.

The flowers just now are not so deep in color as in the early part of August, but the flowers are at their best the first evening on opening, when the rich pineapple fragrance may be inhaled hundreds of feet away from the plants. Just now the oldest leaves show the effect of the cool, damp nights, but there is every probability that the plants will continue in fair condition until the end of the month, producing a number of flowers, as there are numerous buds in sight, especially on *V. Trickeri*.

The system of culture has previously been noted in these columns, that is in applying artificial heat for about a month after planting out, which was in the latter end of May and during June. The latter month was the critical stage and plants without artificial heat succumbed, while those with heat made steady progress and in July, when protection and artificial heat were removed, were able to stand a lower temperature with impunity.

Nelumbiums, lotuses in variety, have also been very satisfactory, with fine foliage and an abundance of beautiful flowers, unsurpassed by any other

aquatic plant. As a rule no class of plants gives such a wealth and profusion of flowers during the year as aquatics, not omitting the minor plants, such as *limnanthemums*, *limnocharises*, *sagittarias*, *pontederias* and the many sub-aquatic plants.

Yet apparently we are only beginning to know the value of these plants and their simple methods of culture, but they are steadily gaining in favor and popularity. There is an ever-increasing demand for plants and inquiries as to different varieties, when and how to plant, etc., which attests this fact. There is also an increasing demand for cut flowers. The supply has not been equal to the demand this summer and the choicest varieties have been sought after, also lotus flowers in quantities.

Seedling nymphæas are more or less unsatisfactory and disappointing. Plants are easily raised and with care will flower the first season, but the progeny are variable and one is apt to blame the seedsman. In the first place, it is mostly species that produce seed; but few hybrids produce any. These are mostly tender varieties, such as *N. O'Marana* and *N. Geo. Huster*, but as these are both hybrids of *N. dentata* it is very probable that there will be flowers of all shades of color from white to crimson and perhaps five to ten per cent of good flowers.

While plants can be readily raised from seed and are comparatively very cheap, it is very uncertain and unreliable in most cases, and any person desiring a certain nymphæa, not a species, will do well to secure a plant. Hybrids, both hardy and tender, that produce seed cause a great deal of trouble and persons raising seedling plants must not be disappointed if the plants are not just like the plants that produced the seed; the chances are that they will not be, especially if they are hybrids.

WM. TRICKER.

Thomas Manton.

Thomas Manton, the newly elected president of the Canadian Horticultural Association, was born in Hendon, near London, England, on September 1, 1851, and gained his first experience in gardening with the late Jas. Wier, at Hampstead, and on his father's place at Highgate. At the age of 21 he directed his movements toward Canada, where he located with R. R. Dobell, the railroad magnate of Quebec. One year at this place seemed sufficient, and he left to become gardener for George Brown, of Brantford, Ont., where he was employed two years, after which he served four years with John Macdonald, when he decided to go into business for himself. In 1882 he started a retail flower store on Yonge street, Toronto, with his brother, where for a few years they had a fine trade in cut flowers and plants. In 1888 he gave up the business and started growing plants at the present place in Eglinton, where they have a fine collection of orchids, ferns and palms. Mr. Manton is a thorough plantsman, and is no doubt the premier of Canada in this respect. He has been the first to take hold of any new introduction in hardy herbaceous or other perennial plants, which constitute a large section of the business, and theirs is the finest collection in this locality. Mr. Manton is an authority on orchids. It is practically the only commercial place in the province where they are grown to any extent. Palms, ferns and violets form the larger part of the miscellaneous stock which is grown under the 12,000

feet of glass at the place. Mr. Manton has been a member of the Toronto Gardeners' and Florists' Association since its start and, beside being president, has always been on the executive committee, where his practical suggestions have always been highly appreciated. The Toronto Horticultural Society has also claimed him as a president. He was chairman of the trade exhibit committee at the S. A. F. convention held at Toronto in 1892, and as a remembrance of his highly appreciated services, was presented with a gold watch by the mem-

THOMAS MANTON.
President Canadian Horticultural Association.

bers of the convention committee, and which he prizes highly. As president of the C. H. A. his influence is sure to work to the everlasting benefit of the organization. H. G. D.

Canadian Convention Notes.

The Hamilton parks were in fine condition for the occasion.

For a smooth tongue and winning way commend us to Wm. Algie.

The proceedings at the various sessions were marked with an earnestness that was most laudable.

Pierson's new fern and King's greenhouse construction were the most interesting of the exhibits to trade visitors.

Credit for the fine exhibition is largely due to the efforts of C. M. Webster, J. O. McCulloch, S. Aylett, T. Lawson and John Fox.

W. Cromwell Gurney was the author of the paper on "Greenhouse Heating," not Edward Gurney, as printed in our issue of September 6.

If the next convention is held at Toronto during the Industrial Exhibition, the visitors will have a hot time scrambling for hotel accommodations.

It seems there would have been a somewhat larger trade exhibition if some arrangements had been made with the customs officials for the free entry and return of exhibits from the United States.

READING, MASS.—The sixth annual exhibit of the Reading Amateur Gardeners' Association was held in Masonic Hall on the afternoon and evening of September 8.

Greenhouse Heating.

BY W. CROMWELL GURNEY.

[Read before the Canadian Horticultural Association at the Hamilton convention, September 3-5, 1902.]

To maintain a summer climate in a greenhouse throughout the long Canadian winter is the problem confronting us. Such a climate must be uniform in moisture, temperature and freshness, and to attain the best results the end in view must not be lost sight of in constructing any part of the house.

Local conditions themselves are most important; the situation of the houses, whether on the south side of a hill, which way they face, whether or not the houses themselves are quite level, all these as well as other points must be considered in each case, and every care taken before even the original drawings are put on paper.

Again, the internal construction of the benches is most important in relation to the results to be attained, and in this connection it may be said that after finally settling on the number of benches desired, by all means make them as permanent and substantial as possible.

The most desirable benches the writer has ever seen were installed in the J. H. Dunlop greenhouses in Toronto. The side walls, of brick, support closely laid horizontal tile pipes cemented together. On these tile pipes was laid the soil. The effect is at once apparent. The air of the house is conducted through the tile pipes to the very center of the beds. As the tile is porous the earth is aerated and kept at a uniform temperature throughout. Such an arrangement would be subject to no depreciation, and if the heating pipes were attached to the brick walls there would be no danger of any sagging in the pipes, which occurs so frequently when pipes are clamped to the sides of wooden benches, and so forth.

Care should be taken to provide for the growth of the industry. New houses will be added in coming years, and they must not shade present houses or be shaded by them. The boiler room and smoke stack should all be on a scale to admit of additional boilers being twinned to the original installation. It can be truthfully said that nothing in a greenhouse is more important than the smoke-stack. If it is too small it will provide poor combustion, and consequently large fuel bills. It will compel the boilers to throw off coal gas and give insufficient heat.

In keeping future expansion in view, it should be remembered that if two or more greenhouses are to stand side by side, and are to be kept at the same temperature, it can be done with much less fuel if the partition between them be taken down, throwing their total cubic capacity into one.

Again, in considering the future, build as substantially as possible. Substitute light iron trusses for heavy, light-obstructing, wooden posts and beams. The iron does not breed pests and does not rot out. Although having no relation to the heating it can do no harm to say a word on selecting a suitable "economic" situation.

Many hundreds of dollars can be wasted if a greenhouse is located so that it is difficult of access for supplies. Consider how far you are from shipping facilities, both express and freight; how far you have to haul your fertilizer, earth, sand, coal, and so forth; how far you have to haul your refuse away, your ashes and impoverished earth. Study your water supply. Is it likely to fail

MEMBERS OF THE CANADIAN HORTICULTURAL ASSOCIATION, AT HAMILTON, ONT., SEPTEMBER 3 TO 5, 1902.

during a bad drought? These questions and many others must all be carefully considered before work is commenced.

There are two modern systems for heating greenhouses, namely, steam and hot water. In the writer's opinion the former system is undesirable compared with the latter, except for very large installations involving many houses heated from a central boiler plant with fireman in constant attendance on the boilers. But for small and moderately large greenhouse installations the hot water system is very much to be preferred for the following reasons.

1st.—Greenhouse men who have tried both systems are almost unanimous in agreeing that better and quicker plant development is possible with the hot water than the steam system, and this is just what we would naturally expect when considering the low temperature of the hot water pipes in comparison with the roasting heat of the steam pipes. The hot water system undoubtedly produces a milder quality of heat.

2nd.—The attention required for a modern hot water boiler in all but zero weather, and with a properly designed system, should not represent more than three visits to the boiler room per day, whereas a steam boiler of the old horizontal return tube type practically requires constant hourly attention, not only for stoking but to keep an eye on the water level, and so forth. A modern water tube steam boiler fitted with automatic damper regulator, and so forth, should receive attention at least every three or four hours.

3rd.—Should the fire be allowed to die out in a steam system all heat would vanish at once from the greenhouse pipes. Under similar circumstances the hot water system could retain sufficient heat in the circulating water to give the operator time to start a fresh fire before much damage could result.

4th.—There is no danger from a well designed or even moderately well designed hot water system, while in a steam system there lurks the danger of allowing the boiler to go dry, with the consequent explosive results. It may be argued that even under such circumstances some water tube boilers are quite non-explosive, and such is the case, but the man who allows his boiler to go dry seems very seldom to be the man who uses a non-explosive water tube boiler.

Having tried to explain the advantages of the hot water system, it remains to describe the particular method of designing and piping such a system to obtain the best results. In the first place, if the apparatus is to be installed by the owner of the greenhouse himself, he should carefully make drawings showing in plan and elevation each pipe and fitting in the installation. This is most important, as a little time spent on such plans will save days of lost time later on.

The amateur steam fitter must equip himself with at least the following tools: Pipe cutters for from 3/4-inch to 2-inch pipe, stocks and dies to thread pipe from 3/4-inch to 2-inch, two Stillson wrenches to handle pipe up to 2-inch, one large monkey wrench, hammer, screw driver, brace and bit, saw and chisel.

To figure the amount of radiation necessary to obtain the required temperature, the following rule has been found to give very satisfactory results, assuming an out-of-door temperature of zero, Fahrenheit: Divide the square feet of glass surface by five for 45° of heat and the result is the square feet of radiation required. For 50° of heat divide by four and one-half, for 55° divide by four, for 60° divide by three and one-half, for 65° divide by three and one-fourth, for 70° divide by three, and in each case the result is the number of square feet of radiation required.

It is always best to select the last named figure intended to provide for 70° as even if a much lower temperature is all that is required, it can readily be obtained by damping down the fire, and so saving coal.

Having divided by three the square feet of glass surface in the house to be heated, we have as a result the square feet of radiation necessary and we must now determine how much pipe is necessary to equal this amount of radiation. Two-inch pipe throughout the whole establishment gives excellent results, as it contains sufficient water to hold the heat a reasonable time and not enough water to make the circulation sluggish.

To obtain the amount of 2-inch pipe that is equivalent to a given area in square feet, divide the given area by .62. For example, let us assume a house is 100 feet long with two slanting roofs each ten feet deep; we would have 2,000 square feet of glass in the roof, and let us say 100 feet of glass in both ends, or in all 2,100 square feet of glass. Divide this amount by three and we obtain 700 square feet as radiating surface. Divide this amount by .62, and we obtain the quantity of 2-inch pipe required, 1,130 feet. To arrange this amount of 2-inch pipe we would put five rows on each side wall of the house, one over-head 2-inch pipe to feed each of these rows, two 2-inch flow pipes close up under the roof.

A useful table giving the surface on a lineal foot of various sized pipes is as follows:

Size of pipe.	Sq. ft. in one lineal foot
1-inch	.31
1 1/4-inch	.38
1 1/2-inch	.50
2-inch	.62
2 1/2-inch	.75
3-inch	.92

Going back to our example, we now have twelve rows of 2-inch pipe each 100 feet long, or 1,200 feet of 2-inch pipe.

The rows of pipe must be so sub-divided that no one 2-inch pipe will have to supply more than about 300 square feet of surface or about 500 feet of 2-inch pipe.

The boiler should be set as low as possible, the lower the better the results. Rising from a flow header of the boiler we take our two 2-inch vertical flow pipes upward till about two feet from the level of the glass above them, thence they run horizontally, rising till at the far end of the greenhouse they are close up to the glass. The sharper they rise the better, but in very low houses where a great rise is impossible, a minimum rise must be provided of one inch in every ten feet, or in a 100-foot house, a total rise of ten inches.

At the highest point of the circuit an air vent is inserted in the pipe by drilling and tapping a 1/8-inch hole, and then the down pipe is run into the branch header. The final joint in each of the 2-inch pipe coils between the two headers is made as follows, with a right and left joint:

Screw together the pipes, one length after another, till close to the boiler end of the house. Cut off pipes till all five are even, or the same length; screw on a right and left elbow to each. Now screw five pieces of pipe into the return header, all the same length, put an ordinary coupling on the end of each, and bring

If any valves are inserted to cut off part of the radiation, they should be put in, say, two of the five pipes in each coil. The valves must be gate valves. If disc valves or globe valves are used failure is almost sure to result.

And now we come to the very important question as to the selection of a boiler. If everything in connection with the apparatus is of the best, and properly installed, an unsuitable or badly constructed boiler will ruin the usefulness of the whole apparatus. It is natural that the writer should be prejudiced, but the grower who keeps the following points in view cannot go far wrong:

1st.—The fire pot must be larger at the bottom than at the top, to prevent lodgment of effete matter and consequent insulation of the fire from the heating surface.

2nd.—The grates must be of such a character that clinkers will not jam and destroy them, and the grate bars must be easily removed from and replaced again in the heater.

3rd.—All heating surfaces must be as close as possible to the fire without interfering with combustion space.

4th.—The heater must be a reasonable height.

5th.—The circulation must be positive within the boiler; that is, the water must

have one course to travel only, and not be allowed to find its way out by any haphazard channel.

6th.—Provision must be made to avoid expansion and contraction cracks. The grower can only find out if such provision is made by inquiry as to whether other people have had such troubles with the heater under consideration.

7th.—In selecting the size of boiler add twenty-five per cent to the square feet of heating surface on your complete job, and then turn to the manufacturer's catalogue to find a boiler of that capacity. This twenty-five per cent is necessary, as the cooling effect of glass surface close to the pipes is far more pronounced than were the surface to be heated placed in a warm house.

The following are a few practical suggestions that may be useful on the work: Use lots of red lead in making joints. Keep on screwing up a joint after you are quite sure it is tight. Put your boiler at least so low that its return header is on the level of the ground. Keep the tank well above the highest point on your piping. Be sure that your air vents are at the highest point, not near it, but at it, on each flow pipe. All the fittings and headers on the above job will be tapped right excepting ten right and left elbows and ten right and left nipples. Don't forget to put a drain cock at the lowest point of the apparatus, usually the return header of the boiler. Don't leave the apparatus filled with water on a frosty night, and without any fire. In firing up for the first time use a slow fire and note that all mains get their supply of hot water. If you have any leaks fix them, they very rarely fix themselves. A small leak in the fire box of the boiler will generally take up but very rarely if in the piping.

Decorated Vehicles.

This is the season of the floral parade, now an established feature of the autumn festivities in so many communities, and the general practice nowadays of using natural flowers, instead of the artificial ones so commonly used at the inception of the floral fete, is giving the florists opportunity to use up quantities of outdoor flowers to good advantage and reasonable profit.

At no place in the country is the floral parade a more firmly established feature of the season than at Saratoga Springs, N. Y., where it makes the florists an

CARRIAGE DECORATED BY JOHN RALPH, SARATOGA SPRINGS, N. Y.

these couplings up close to the above mentioned right and left elbows. Now take a right and left nipple and see how many turns it will enter the right and left elbow before it tightens. Now try the other end in the couplings. Say in the first case it made six revolutions before tightening, and in the latter four, at once screw it the difference, or two revolutions into the elbow before starting the other end into the coupling, and then both ends will screw up tight simultaneously.

Now bring the 2-inch return pipes back to the boiler, dropping steadily. The side wall coils must drop toward the boiler as described in speaking of the flow pipes. The final connections of the returns to the boiler had better be made with unions. From the return header of the boiler run a 1-inch pipe to the expansion tank, which must be placed as high as possible in some place where it will be secure from freezing. An ordinary barrel will do, but a suitable tank with glass and cocks looks better and costs less than \$5 complete.

CARRIAGE DECORATED BY JOHN RALPH, SARATOGA SPRINGS, N. Y.

SWEET PEAS GROWN BY GEORGE BARKER, GARDENER TO A. F. ESTABROOK, SWAMPSCOTT, MASS.

annually increasing amount of business. This season was no exception to the rule of steady improvement in the decoration of the vehicles in the parade, September 4. There were many handsome ones, photographs of two of which, decorated by John Ralph, are reproduced herewith.

The carriage in the lower illustration is covered with fine trusses of hydrangea bloom, with pink asters and pink ribbon, the wheels being covered with pink gladioli. In the other picture hydrangeas are seen on the wheels, laurel and white asters on the body of the vehicle, blue and white ribbon being used.

Luxuriant Sweet Peas.

The accompanying illustration is from a photograph taken in the garden of A. F. Estabrook, Barberry Lodge, Swampscott, Mass. George Barker, the gardener in charge, gives the following as his method of cultivation for sweet peas:

I dig a trench about ten inches deep, put in it a layer of cow manure and then about two inches of soil, made firm by tramping. Upon this I sow the seed, in a single row, the seeds three inches apart. After the plants are above ground soil is gradually pulled up to them until the trench is filled level. For supports I use a trellis five feet high, of chicken wire on posts. The photograph was taken August 29, showing the vines in fine, healthy condition and bearing a good crop of flowers. The varieties are Emily Henderson and No Plus Ultra. The seed was sown March 29. A liberal supply of water is given when needed. In the early part of August a dressing of cow manure was worked into the soil with the spading fork.

Summer Flowers for Florists.

BY WM. HUNT, OF GUELPH, ONT.

[Read before the Canadian Horticultural Association at the Hamilton convention, September 3-5, 1920.]

The commendable and increasing demand on the part of the flower loving public during the last few years, for a greater display of taste in the more natural arrangement of flowers, necessitating their more lavish use in the make-up of designs and floral decorative work in general, makes it imperative on the part of the florists to consider well as to how they can best supply the wants of their customers in this respect.

The grouping of palms and foliage plants, as well as the very general use of large quantities of fern fronds, asparagus, and so forth, for room decorative purposes often requires the use of large quantities of flowering plants and cut flowers to brighten up the density of these masses of green. Bright-colored foliage plants, such as crotons, Pandanus Veitchii, and so forth, are admirable for this work, but they are not always available and cannot be used in many positions even where they are to be had.

Roses and carnations may, of course, usually be obtained, but these cannot always be had at prices that will warrant their use except for the finer points of florists' work. Outdoor flowers can usually be had in summer, but with the failure or partial failure of the sweet pea and aster crops, even these during the hottest weather in summer are often very limited in quantity and poor in quality, and many kinds of outdoor flowers are too common almost to allow of their being used satisfactorily.

It seems to me that the empty benches so commonly seen in many florists'

establishments, could be more profitably used than they are, to supply this demand for a better class of flowers than is often obtainable outdoors during the hot summer months.

Japan lilies, more especially *Lilium speciosum album*, *L. rubrum* and *L. auratum*, as well as other varieties of this class can be and are grown in large quantities, but these sometimes, like our at one time reliable and beautiful Easter lily, have of recent years become more fickle and uncertain in their character, and are at the best too costly, except for the very best class of work.

Although it is impossible to attempt even to fill the place of roses and carnations, as grown at the present day by our florists, or the more chaste and delicate beauty of the lily, there are some plants that I have found most useful as accessories and auxiliaries to these indispensable florists' flowers. I have reference more particularly to begonias.

For many years past I have grown *Begonia Weltoniensis*, *B. MacBetti* and *B. Weltoniensis alba* in as large quantities as desired, and although at least two of these varieties have been known to most of us for over a quarter of a century, they cannot in my opinion be surpassed by any of our newly introduced varieties, taking ease of culture, handling and keeping qualities, as well as profuseness in flowering habit into consideration. By wintering over a few old plants and starting them in April or May and propagating as soon as the cuttings are ready, a fine batch of plants can be had early in August, that will furnish a good supply of either bloom or pot plants, at a time when flowers and flowering pot plants are scarce.

By drying the plants off gradually when they are through flowering, and putting them on a front shelf under the greenhouse benches where the drip does not bother them, or on a back shelf in the greenhouse, or even in a warm potting shed, these begonias will keep splendidly, and occupy no valuable winter space. I have found two-year-old plants profitable, as they can be grown on into 6-inch or 7-inch pots, but after the second season I have not found the keeping qualities as reliable as in younger stock.

Begonia Weltoniensis is a splendid bedder and succeeds well in almost any position, in light soil. Fairly light soil should be used for pot plants of this begonia. Other newer varieties such as *Begonia Vernon*, *Bruanti*, *Erfordii*, *Ingrami* and other summer-flowering types of *Begonia semperflorens* will not compare favorably in my opinion to the two varieties first mentioned except, perhaps, that these latter can be more easily raised from seed than the *Weltoniensis* begonias. The seed, however, should be sown early in the spring, about February, to secure early flowering plants the same season.

The new hybrid type of *Gloire de Lorraine* begonia, although beautiful and floriferous at almost all seasons, can scarcely be considered as a summer begonia. Although several new types and varieties of *Begonia semperflorens* have recently been introduced, at present there is still room for an ideal summer-flowering begonia for florists, a want that may possibly be filled, as begonias are very susceptible to cross fertilization, a fact that many of our leading florists are taking advantage of, as is shown by the introduction of so many types and varieties of this beautiful and useful class of plants. But the ideal begonia is yet to be raised and, like all other classes of beautiful plants, we shall never know when the highest possible point has been reached.

I have been pleased to learn during the last few days that the three varieties of begonias mentioned, *Weltoniensis*, *Weltoniensis alba* and *MacBetti* are again coming into popular favor and in my opinion no florist should be without

And now a word on outdoor flowering plants in summer. Annuals are the prettiest, most varied and, unfortunately I must add, in many cases the most fickle and uncertain class of plants grown. It is gratifying to know, however, that there has during the last few years, more especially on the part of seedsmen and seed growers, been a greater effort made not only to introduce new species, but to improve generally the various strains and types of these useful adjuncts to a florists' establishment.

Time will not permit me to more than touch on the subject of annuals, as it is unnecessary for me to even mention the staple varieties of many of them, such as asters, sweet peas, mignonette, nasturtiums, *Phlox Drummondii*, cosmos, as well as *antirrhinums*, *petunias* and *verbenas*, the last three being now generally acknowledged for all practical purposes as annuals, as all of these are well known to all classes of flower lovers.

But there are a comparatively few new varieties and types that may perhaps not be as generally known and cultivated as those I have mentioned. Take first of all the annual *chrysanthemum*. The beautiful colors and markings, as well as ease of culture, and good keeping qualities well entitle them to the notice of all florists. For table and room decorative work, more especially, these annual *chrysanthemums* will be found to be invaluable. By sowing the seed early in the season, their decided and pretty flowers can be had early in August and in September in abundance.

Other species of plants that will furnish useful material for florists' use are the *malopes* and *lavateras*. These improved types will be found of great service for decorative purposes and for loose cut flowers. *Malope grandiflora alba* and *Malope grandiflora rosea* are the two varieties most useful to florists. *Lavatera rosea splendens*, *L. alba splendens* and *L. trimestris* are good varieties, their large, showy mallow-like flowers being often several inches in diameter and for a convolvulus-shaped flower their keeping qualities are very good, as I have kept the flowers and foliage quite fresh for

gardens by the too general use of masses and rows of yellow flowers, such as *Rudbeckia laciniata*, and the deep-colored, heavy-looking sunflowers. Several of the last named, very much lighter shades, make very aesthetic flowers and are quite worthy of a place in a florists' collection of annuals, even though they have to be called sunflowers.

There is one more annual I would like to mention, *Argemone grandiflora alba*, or Mexican poppy. Although the growth is coarse the abundance of pure white-petaled flowers will especially commend it to florists, as it gives an abundance of bloom during August if sown in the open border in April. This variety has a habit of closing its flowers when on the plant at night and during dull weather, but when cut it remains open constantly. Although the stamens in the center of the flower are yellow it is of such a soft shade that this feature is not as objectionable, as it sometimes is for a florists' flower. For short time work it ought to be of value to florists as large white flowers are so scarce oftentimes before the asters make their appearance.

I should like to have said a few words on perennials but time will not permit except to say that the improvements in this class of plants are equally as noticeable as in annuals and no general florist's establishment is complete without a collection of these useful and inexpensive plants. I have a few specimens of the varieties of plants that I have mentioned, among which will be found *Helianthus cucumerifolius*, *H. decapetalus nanus*, the form and soft lemon yellow color of which well recommend them to the notice of florists as useful summer-flowering varieties.

I would like to mention another class of plants that could be made of more service to florists in summer than they are at the present time. I have reference to hardy climbers, more particularly the clematises. The beautiful colors and shades of those that are now offered, from the pure white of the *Duchess of Edinburgh*, *paniculata* and *Henryi* to the deep lavender color of the *Standishii* or to the intense purple of the more common *Jackmani* will allow of no excuse for florists planting around and about their establishments, as we often see, the common varieties of *ampelopsis* and *clematis*.

The Hardy Perennial Border.

BY ANDREW ALEXANDER, HAMILTON, ONT.

[Read before the Canadian Horticultural Association at the Hamilton convention, September 3 to 5, 1902.]

The earliest and sunniest recollections I have in connection with flowers hover over the borders and beds of my childhood home, which were filled exclusively with old-fashioned perennials. There were lilies, stately and tall, in large groups, great masses of sweet william, primulas in endless variety, scarlet lychnis, saxifragas, phloxes, peonias, hollyhocks and many others too numerous to mention.

These were all interesting as they one by one opened their blossoms in the floral procession of the year, but to me, there was, and is still, the yearly miracle of their re-awakening, to watch the tips piercing the soil and the varied modes of unfolding their first leaves with such a variety of color, from the tenderest green to deep crimson, which is an added pleasure not derived from ordinary bedding plants. I consider this a strong argument for the cultivation of these hardy flowers.

HYDRANGEAS ON THE LAWN AT A. F. ESTABROOK'S, SWAMPSCOTT, MASS.

them on his greenhouse benches in summer, as their many good qualities for decorative purposes in general still entitle them to a place in the front rank of this numerous and useful class of plants. Many florists who have dropped them from their lists are again taking them up, ample evidence that they are still of service, and that there is nothing yet to surpass them for general usefulness among summer-flowering begonias.

three days under conditions similar to what they would receive as cut flowers for decorative work.

Another class of annuals coming into favor is the annual *rudbeckia*. The beautiful brown and dark crimson markings at the base of the petals of these flowers make them more acceptable than they otherwise would be, taking into consideration the almost objectionable and overdone appearance of many flower

While I do not say that hardy perennials will ever take the place of ordinary bedding plants for the decoration of public or private grounds, or can be used for the striking color effects secured by the geranium or coleus and others, still I assert that anyone, whether possessed of only a small garden or of acres, can have a succession of bloom from early spring to autumn.

We have varieties suited to every situation and to nearly every kind of soil. Not only so, but when once established they stay forever, if we are fairly good to them, increasing in bulk and beauty from year to year. We have them gay as the oriental poppy and showy as the pæonia, while many of them are excellent as cut flowers.

There are single and double flowering pyrethrums, so many beautiful hybrids of which are being introduced. There is the iris family, with its varied additions, all exquisitely beautiful, and the aquilegias in infinite variety, from our own native sort to the Rocky Mountain one with its heavenly blue and immaculate white. The campanulas are all dainty and general favorites. The larkspurs give us stately growth and colors from pure white through every gradation to blue and red. Many of these hardy plants are very fragrant, such as the sweet valerian and many others quite as hardy.

I have no intention of wearying you with lists of names of these hardy plants. The best and most useful list that I have seen is that issued by the Experimental Farm, at Ottawa, naming 100 varieties, compiled by Mr. Macoun, the horticulturist there in 1897.

Just a word about the border itself. Hardy perennials I find thrive best in good soil with plenty of rotted leaves worked into it. The thrift of the plants in such soil is so marked as to warrant them getting it. These plants, many of them, increase so fast and spread so much that they require to be lifted, divided and replanted every three or four years. Some of them, such as the perennial phloxes, so exhaust the soil in their immediate neighborhood that they are better if their position is changed every two years. The pæonias and some others are better not to be moved.

Every fourth year I trench my perennial borders. I proceed as follows: I take out a trench two spades deep and in the bottom put two inches of top soil, on this I put a good coating of fresh manure, tree leaves or the product of a rubbish heap of vegetable matter of any kind, then I throw soil upon this to the depth of a spade and on this I spread some more well rotted manure or humus, filling the trench with soil, and so I proceed until I reach the end of the border. This really means the turning upside down of the whole border to the depth of about eighteen inches and enriched with two layers of manure.

Planting is best done in the early spring. It is better to have good clumps or masses of the best of these perennials than to have little bits of everything you can lay hands on. I would recommend a very liberal planting of the hardy bulbs, not lilies only, but the scilla, the snow-drop, crocus and the narcissus family should be fully represented. I also make a liberal use of many of our native plants.

We sometimes hear the complaint that a perennial border is an unkempt and unsightly affair as compared with the trim beds filled with greenhouse plants. It is if not cared for. Plants needing sup-

port should have it early and all flowers that are fading should be removed, and the soil between the plants kept stirred from time to time.

It would be well if the commissioners of public parks gave this matter some attention and planted borders of these perennials so labeled that the public might see and choose for their own gardens and be instructed as well as interested. I urge the more general cultiva-

tion of hardy plants, first, because it is interesting to watch their development and because there is a touch of home in them, in the coming of the truly hardy varieties of flowers that seem to defy all kinds of abuse and quickly respond to good care, and we watch for them as eagerly as the seasons come and go; second, because the first cost is less than of the tenderer and more aristocratic bedding plants; third, because of the greater variety and the longer flowering period; fourth, because they are less trouble than the more tender sorts and increase from year to year.

named J. F. Huss and golden variegated privet. From H. A. Dreer came two tanks of splendid aquatics in which were thirty varieties of nymphæa, including the new Pennsylvania, a lovely blue shown for the first time. A fine tank of aquatics was contributed also by Oakes Ames.

Mrs. Gardner's group of begonias and saintpaulia is the only display of greenhouse flowering plants outside of the

EXHIBITION OF PACIFIC COAST HORTICULTURAL SOCIETY, AUG. 14 TO 16, 1902.

tion of hardy plants, first, because it is interesting to watch their development and because there is a touch of home in them, in the coming of the truly hardy varieties of flowers that seem to defy all kinds of abuse and quickly respond to good care, and we watch for them as eagerly as the seasons come and go; second, because the first cost is less than of the tenderer and more aristocratic bedding plants; third, because of the greater variety and the longer flowering period; fourth, because they are less trouble than the more tender sorts and increase from year to year.

The Boston Exhibition.

The annual exhibition of the Massachusetts Horticultural Society is in progress as we go to press, open from Thursday till Sunday night. There is the usual display of stately groups of tropical decorative plants in which are specimen ferns, palms, dracenas, begonias and crotons such as are rarely seen outside the most pretentious private establishments. The largest contributors are J. S. Bailey, E. S. Converse, Mrs. J. L. Gardner, K. & J. Farquhar & Co., A. F. Estabrook and W. H. Lincoln.

Special croton exhibits are made by E. J. Mitton, J. S. Bailey and Mrs. Gardner, the former leading with seventy-five superb plants in 6-inch pots, but the crotons show the effect of the cool summer in the lack of their full brilliance in the color of the foliage.

J. E. Rothwell and Lager & Hurrell make fine exhibits of blooming orchids, the latter showing as specialties Cattleya Hardyana and Lælia grandis tenebrosa Summitosa. H. T. Clinkaberry is exhibiting the American seedling Zygopetalum Roeblingianum.

W. A. Manda shows a seedling dracena

orchids. Yamanaka & Company make an attractive showing of Japanese dwarfed plants and curios. The section devoted to garden bloom is radiant with thousands of dahlias, zinnias, asters, marigolds and so forth.

Among the dahlia contributors are such well-known enthusiasts as Burt, Lothrop, Winter, Symonds, Strouthers, Alexander, Winsor and Lawrence. The cactus varieties are shown in increasing proportion and quality. Blue Hill Nursery and Shady Hill Nurseries each make superb displays of hardy herbaceous flowers, the labeling of the former being especially creditable.

There is a fine array of Groff's hybrid gladioli which attracts much admiration and Messrs. E. Johannsen and J. Lawson each stage a pretty arrangement of small plants. Col. Chas. Pfaff, Mrs. H. L. Higginson, Mrs. E. M. Gill and F. J. Rea are also exhibitors in various classes.

As usual John Ash hypnotized all beholders with his magnificent hothouse grapes. The fruit and vegetable section showed the regulation high cultural excellence. As usual, also, the arrangements as to general effect and means of entrance and exit are far from admirable.

Floral Exhibits at Rockford.

The Winnebago County Fair Association held its annual exhibition at Rockford, September 2 to 6, the floricultural department forming an important feature. The display of cut flowers would have done great credit to a more pretentious flower show. I have never seen better in the whole of my experience.

One exhibit contained no less than sixty-eight distinct varieties of petunias. Among the single kinds were varieties closely resembling dipladenias in size and

coloring. Others were like giant pink fringed Chinese primroses. The flowers, with green margins, some fringed, and others smooth, with blotches of deepest rose, crimson and purple, were equally conspicuous. An immense, smooth, round flower five inches in diameter, of the deepest cobalt blue (not purple) reminded one of a giant morning glory.

These were only a few of the distinct single kinds. The double varieties presented everything that seems possible. There were hollyhock shapes, peonia shapes and every known variety of fringing. Those of the green ground, blotched, both plain and fringed, make one think that some of the petunia family are caricaturists. A variety covered with hairs like the Boehmer chrysanthemum, pink and white, probably is the latest departure.

The display of nasturtiums came next. Some forty varieties were shown and made a brilliant and beautiful display. The later introductions must very soon become as well appreciated as the later introductions of sweet peas have been.

Then came the dianthus and perhaps no better or greater variety has been exhibited, the intense claret and ruby-red colors being most remarkable. The phloxes, perennial and Drummondii, were also very good. So were sweet peas, verbenas and pansies, and there were some fine exhibits of vegetables.

Mr. Buckbee is a very active member of the association. His many friends will be pleased to learn that he is surely recovering from the accidental fall he met with last winter. A visit to the greenhouse department found Charley Johnson as modest and unassuming as ever. There are five or six houses of chrysanthemums that are in the finest possible condition. There will be something doing from Rockford in November. Carnations are in equally good condition. The planting from out of doors began July 17 and most of the plants were housed before August 1. There is no stem rot or rust or spider. A 200-foot house of American Beauties and one of the same size of Bridesmaid are far above the average.

JOHN THORPE.

The Toronto Exhibition.

The horticultural display at the Toronto exhibition, in comparison, hardly comes up to last year. The wet and dark weather of the past season was not beneficial to crotons or other highly colored foliage plants, consequently the large groups have not the brightness which usually catches the eye so quickly. In point of number and arrangement nothing is lacking, as each plant is placed to show its own individuality to advantage, and the specimen cycads, kentias and phoenix are plants which would add to any collection. William Wilshire, of Montreal, was judge of this section, and the competition was keen in most classes. His decisions were generally very satisfactory. In the three sections for stove plants in flower George White and Horticultural Gardens took firsts. For caladiums, crotons and dracenas, Exhibition Park, Horticultural Gardens and Central Prison each took one first. In the five sections for ferns Exhibition Park took three, Manton Brothers one and Central Prison one first. In begonias, fuchsias and other soft-wooded stock, George White was most successful. In lilies Grainger Brothers took first. In palms and cycads Central Prison took two, Manton Brothers one and Exhibition Park one first.

In the next section, for best group of plants, most tastefully arranged, Horticultural Gardens came first with a very handsome group, each detail being artistically carried out, and the award was very deserving. Manton Brothers came second and Government House third. For collection of orchids, Exhibition Park took first, Horticultural Gardens second and Manton Brothers third. For best orchid in flower, Exhibition Park was first, Horticultural Gardens second and Government House third. H. G. D.

Society of American Florists.

Some of the state vice-presidents' reports were published in our issue of August 30 and others September 6. The concluding one is presented below:

New Jersey.

BY JOSEPH B. DAVIS, ORANGE, N. J.

Lying, as our state does, in the direct line of communication between two great cities of America, with four lines of railways crossing the entire state, it finds a ready market for its products in both. This has tended to make it an important factor, horticulturally, floriculturally and commercially.

In the elevated and rocky districts comprising the north and north middle coun-

try the growth of *Cattleya labiata* has been considerably retarded.

The influences which have helped this increase of prosperity are due to the superior organization of the commission trade, assisting the shipments from one market to another, and rendering prices of staples less variable; to the trade press in an increased opportunity of reaching distant points; to the growing love of flowers in those communities where so-called nature study forms part of the school curriculum; to the activity of our experimental station in the use of bulletins and public addresses given by its staff, and to the increased attention of current periodical literature to flower cultivation in the house. One indication of this is the appearance of plant room and conservatory in the new houses now building, even at the seashore, where the use of the house is but for a portion of the year.

The increase of local trade can be clearly traced in neighborhoods where there are active horticultural societies and clubs, whose addresses and exhibitions are frequently society features, and very largely to the influence of our public parks, particularly in Essex, Passaic, Hudson and Monmouth counties, though in the first the matter has been overdone and is suffering a reaction at the present time. Any effort made to further the work along these lines by the S. A. F. must tend to materially benefit, individually, and our standing horticulturally.

While there has been a decided falling off in the small grower (that is under 1,000 square feet of glass), except where

CARNATIONS SHOWN AT SAN FRANCISCO, AUGUST 14 TO 16, 1902.

tries, known as the Newark and Orange mountains and the Palisades of the Hudson, are found many of the largest rose-growing establishments in the country, while the broad, sandy plains of the southern part are favorable to the carnation and growing of nursery stock. We have three of the largest orchid raisers in the country, and our three largest nurseries of trees and ornamental plants have a universal reputation. While closely allied to its two near neighbors, whose market is also ours, we yet have much that is characteristic and individual. Our state has furnished a president to the S. A. F. and helped to officer both it and the rose, carnation and chrysanthemum societies.

For her private estates and the skill of her private gardeners she has always been celebrated, and her parks, though recent, will be visited for the great beauty of their natural scenery and remarkable extent of view. One of these parks, it is said, overlooks one-quarter of the population of our country, and the prospect is limited only by human power of vision.

During the past year the output of roses sent from some of its rose houses to the New York market has doubled. The flowers consist of the usual varieties. Its yield of carnations and chrysanthemums has grown and its trade, from latest reports, is steadily increasing. An advance is claimed in improved cultivation of the orchid so as to control the season of bloom, and orders are reported from outside of the state as far as New Orleans and Chicago, one wedding bouquet last winter returning the grower the sum of \$50. During the past rainy season

saved by a local trade, and also a few florists, this has been compensated by the increase in glass area by larger concerns. The incorporation of one stock company with a capital of \$85,000 is to be noted, as also the phenomenal growth of some of our youngest houses in the trade, notably in decorative plants. There is no reason why, with four of the largest houses, three in the eastern and one in the western part of the state, New Jersey should not largely influence the market in the coming year.

An increased demand for young apple and pear trees for fall planting is reported, even to the extent of exhausting the stock of firsts, and a decided increase in herbaceous plants and hardy annuals, particularly the Japanese iris. There are still three active Japanese firms in our state, but the business in Japanese freak products has lost its grip and now the sales are assisted by the "Japanese ball game," with plants as prizes. Introductions of Japanese products of merit by our own trade are meeting with fair sales.

While we have no public botanical garden, and have received only the most meager state encouragement, the appropriation voted for our State Horticultural Society's display at Buffalo being ridiculously inadequate, yet our agricultural experimental station during the past year has prosecuted its investigations still further into plant diseases and has furnished bulletin and address whenever applied for. One house will be devoted to studying remedies for mildew this coming season, and much space to the crossing of ornamental plants. Much of the energy

displayed is due to the activity of an able superintendent. Attention of legislators should be brought to the importance of our horticultural and floricultural interests to the state, and copies of our proceedings should be placed so as to be accessible to them.

Both our private and commercial houses have been schools in the past and have furnished growers all over the country. At the present time in one of our largest rose houses are young men "doing time" from New York, Illinois, Pennsylvania, Massachusetts and Michigan. While many very interesting papers covering a wide range of subjects have been given before our own societies, and also given by Jerseymen before societies in other states, and duly noticed by the trade press, yet only one published book in the past year is to be reported by a Jerseyman, notably "Live Covers for Country Homes," by Prof. Byron M. Halsted.

Many prizes have been taken during the past year. Among others for merit may be mentioned John N. May, J. R. Mitchell, Robert Simpson, E. Waller, H. C. Steinhoff, Dale Estate, Peter Duff and A. J. Weingarten.

Among those who have introduced new flowers are John N. May, of Summit, Rose Mrs. Oliver Ames, and J. M. Horsburgh, of Elizabeth, a new geranium, named Harriet Cleary. Inventions have been made by Theron Parker, of Harrison, of a glazing point, a tomato support and a folding trellis.

A few have passed away, but since the death of William Macmillan none have been followed with more respect to the

Chicago.

TRADE BRISK AND WHOLESALERS BUSY.—SHIPPING DEMAND HEAVY.—BEAUTIES LEAD BUT ALL ROSES WANTED.—CARNATIONS AND ASTERS MOVE WELL.—FLOWER SHOW COMMITTEES.—NEW GROWER HAS FINE STOCK.—VARIOUS DOINGS IN THE TRADE.—PERSONAL AND OTHER NOTES.

This week's business has given indication of what it is hoped the autumn season will be. Shipping trade has been excellent, Tuesday's business being greatly in excess of recent records for that day. Cincinnati required a great deal of stock. Beauties continue to lead the demand and those houses which are having large daily receipts have found their gross sales footing up to a very satisfactory figure, for the Beauties are generally very good, a reasonable proportion of them running to medium and long stems, all with good buds and fine foliage. The cut of tea roses shortened decidedly at the end of last week, and it has not always been easy to fill orders, but supplies are slowly on the increase. In general the roses are very fine for the second week in September, the cool weather seeming to have helped them

Kanst, W. C. Egan and W. A. Peterson; press, P. J. Hauswirth, G. L. Grant and M. Barker; programme, J. C. Vaughan, G. W. Wienhoeber and E. A. Kanst; advertising, E. A. Kanst, C. A. Samuelson and E. E. Piesser; music, W. H. Chadwick, E. G. Uihlein and W. A. Peterson. The Florists' Club will be asked to appoint committees on the acceptance of exhibits.

The first chrysanthemums of the season were some Fitzwygram received September 4, by E. C. Amling. They came from Mrs. E. T. Grave, at Richmond, Ind. In a couple of weeks there will be abundant supplies for all demands, for the big growers report their stock in excellent shape. The season seems to have been very favorable and most of the stock will be of high quality.

Hubert Hansen, of 4016 North Clark street, has put his five 155-foot greenhouses into carnations, having planting now well along to completion. He has hitherto grown vegetables. His plants are said to be the best benched by any of the north side growers. He bought his cuttings of Peter Reinberg in the spring and has grown them on into splendid stock.

The Wilkes Manufacturing Company has secured a block of ground at Shields avenue and Thirty-fifth street and is building an up-to-date foundry covering more than half an acre. They have found business so good this season that it was difficult to fill orders.

P. J. Hauswirth and Mrs. Hauswirth and Anna Kreitling are at Norfolk, Va., this week where Mr. Hauswirth is attending a Red Men's convention. They go thence to New York.

P. S. Peterson & Son are shipping large quantities of peonias. They report this item of their fall business heavier than ever before.

E. E. Piesser, of Kennicotts', has been kept away from business this week by illness in his family.

Edgar Sander's condition does not improve as rapidly as his friends could wish.

Miss Nell M. Sisler, of E. H. Hunt's is at Denver on a vacation trip.

Visitors: Swan Peterson, Gibson City, Ill.; W. W. Adams, with the Gasser Company, Cleveland; Geo. Souster, Elgin, Ill.; J. D. Eisele and Geo. Clark, of H. A. Dreer's, Riverton, N. J.

Detroit.

CLUB INSTALLS NEW OFFICERS AND PLANS SEASON'S CAMPAIGN.—TRADE BRISK AND STOCK IN SHORT SUPPLY.—VISITORS.

Over thirty members attended the club meeting September 3. The chief business transacted was the installation of the newly elected officers for the ensuing year: President, Edmund S. Beard; vice-president, John Dunn; treasurer, B. Schroeter; secretary, J. F. Sullivan. The president appointed a committee to prepare a programme for the season's work and at a meeting Thursday evening sub-committees were appointed to complete the work. The popularity of the retiring president, Geo. A. Rackham, was fully attested by the presentation of a splendid Turkish leather chair. The recipient was completely though most agreeably surprised.

The past ten days was a period of unusual activity in retail circles. American Beauties were very much in demand. The closing of the aster season caused a heavy run on the meagre local supply of roses and carnations and outside markets were daily utilized. The carnation grow-

EXHIBITION OF PACIFIC COAST HORTICULTURAL SOCIETY, SAN FRANCISCO.

grave than Thomas Young, Sr., in May last, at the age of 84 years.

The donation of land by private citizens for public parks should be mentioned. While many have taken place prior, yet during the past month C. W. Anderson, of Upper Montclair, has donated a strip of probably twenty acres to the township.

On the whole the business of the past year marks an advance in glass surface and an increase in production with steady prices. It is impossible to discriminate by name any flower, so much depending upon the skill of the grower, and any healthy plant of acknowledged merit will bear continuously and brings a price. Educational influences are at work, not alone as part of school and high school curriculum for children, but our societies are doing much by furnishing able speakers, our agricultural station by bulletins and speakers, our own society by its report so widely distributed and noticed, and by an intelligent and ever practical trade press. This, with the objective teaching of our public parks and private estates, is ever and ever advancing the importance and excellence of the craft we love so well.

Material assistance is recognized to Messrs. W. J. Stewart, Alexander Wallace, Patrick O'Mara, Prof. Byron D. Halsted, the Universal Horticultural Establishment and Chestnut Hill Nursery.

CEDARHURST, N. Y.—The annual exhibition of the Lawrence and Cedarhurst Horticultural Society will be held here on November 5 and 6.

immensely. There is little mildew seen as yet, although the sudden changes in temperature are sure to inflict it on careless growers. Brides and Bridesmaids are being cut with excellent stems and fine form and color. There are some exceptionally good Kaiserins and a few good Liberty, Marquise Litta and Madam Chatenay. Carnations are also increasing daily in supply and improving in quality. In the past week they have cleaned out at prices proportionate to the quality, and with reasonable satisfaction to the growers. Perhaps the carnations have profited by the decrease in the aster crop, for this flower is no longer in great oversupply, and as the qualities are excellent, sales are very satisfactory, there being a brisk demand for white. There is some excellent lily of the valley, but it moves slowly, except where wanted for an occasional funeral order. Smilax and asparagus, too, move slowly.

There was a meeting of the executive committee of the Horticultural Society on Monday afternoon. It was thought best to divide up the work more than heretofore and the following committees were announced: Finance, W. H. Chadwick, E. G. Uihlein, J. C. Vaughan, E. A.

ers have nearly all housed their plants and a big season's cut is expected although the plants generally are smaller than usual. Increased planting is noticed everywhere.

Visitors: Geo. W. Goldner, New York; M. Reukauf and E. J. Fancourt, Philadelphia; C. W. Ward, Queens, N. Y.; J. L. Clucas, New York. J. F. S.

Boston.

TOUR OF THE DOWN TOWN RETAILERS PROVES THEM PROSPEROUS.—GENERAL VERDICT THAT THE PAST SUMMER WAS THE BEST ON RECORD.—MUCH FUNERAL WORK USES UP LARGE RECEIPTS OF CUT FLOWERS.—EDGELEY THE BEST ROSE.—MORE TROUBLE FOR FORESTERS.—NOTES.

A "swing around the circle" of the down town florists this week found every one of them in the best of humor, satisfied with the summer's showing and innocent of any solicitude as to the approaching fall and winter season. At Newman & Sons' a row of six industrious artists, including both the Messrs. Newman, were rapidly transforming the great heaps of asters, Japan lilies, gladioli and white roses into divers wreaths, crowns and other funeral emblems and a glimpse of the interior of the refrigerator where the completed work was placed gave confirmation to the declaration of Arthur Newman that business was first-rate. This gentleman has recently returned from a six weeks' trip across the continent as far as Seattle. John Newman, who had set out, on his brother's return, for a brief tour, got as far as Chicago, when western water got in its work and sent him hurrying homeward, cheerful and philosophical as ever, notwithstanding. The greenhouses of Newman & Sons are at Winchester, where they have rebuilt one house this season. W. E. Doyle's new store, on the corner of Beacon street and Tremont place, begins to assume a finished and home-like appearance, although some large mirrors and other accessories are yet to be put in. It is a very spacious establishment and is well set off by the groups of splendid palms, among which are a pair of kentias that would be hard to duplicate. These are from the greenhouses at Cambridge. J. H. Keehal, who has been in Mr. Doyle's employ for many years, has been placed in charge of the new store. Further down Beacon street Julius A. Zinn's place was found, as always, a model of neatness. In the interval between regular business calls all were busy on artificial flower work, a large shipment of which was being got ready to send to San Francisco. Mr. Zinn has just put another new and handsome wagon on the road and is happy over the figures on the day-book, which indicate the largest summer business he has ever had. Down at the lower end of Washington street J. W. Newman was found in his new store, busily at work on a big gates-ajar that towered away above his head and which would necessarily enjoy the exclusive occupancy of a barouche at the funeral for which it was being constructed. All together it would seem that "Please omit flowers" has no terrors for the patrons of Boston's down-town florists.

As to the wholesale market, it is characterized by abundance in all lines of seasonable flowers and the frequency of funeral design orders in the local and suburban retail stores furnishes a convenient outlet for the heaping bushels of white material which every morning dumps upon the market. Roses are milled as a rule, although the stock from

regular summer rose houses is, as yet, excellent. Queen of Edgely is easily the finest rose offered here at the present time and Welch Brothers have no difficulty in placing it with scrupulous buyers, who seem to have changed their views as to the desirability of this rose, as its good qualities have become better known.

The recent cutting down of a number of trees in Commonwealth avenue by direction of the park commissioners has set the kettle vigorously a-boiling again in the long-standing feud between the park department and the department of public grounds and the columns of Boston dailies have bristled with "vandal hands," "ruthless destruction," "wholesale slaughter," "bungling wood butchers," "carping critics" and similar backfence compliments of the hot-air order. The main question, however, is simply whether or not the course of the park commission in dealing with tree problems is in accordance with the judgment of the best tree authorities, and this should be easy of demonstration.

Quite a bunch of prominent visitors have appeared in the Hub recently. D. Fuerstenburg and Harry Simpson, from the Floral Exchange, Philadelphia, were here a few days ago; next came Mr. Creighton, representing H. A. Dreer, and W. A. Manda, of South Orange. This week we have L. A. Berckmans, Augusta, Ga.; George Brown, of the Agricultural Department, Washington; Wm. Griffin, Thompson, Conn.; J. B. Kidd, of Wm. Elliott & Sons, and Chas. Loechner, of Suzuki & Iida, New York. The horticultural exhibition at the end of the week will no doubt bring others.

W. W. Edgar and Mrs. Edgar arrived in good spirits on the Commonwealth from Liverpool last week and Ed. Hatch comes on the Ivernia this week in charge of the best steward who ever uncorked a bottle of apollinaris.

New York.

CLUB HOLDS A WELL ATTENDED MEETING.

—O'MARA HOLDS CENTER OF STAGE.—

REPORTS GOOD PROGRESS ON FLOWER

SHOW.—URGES EARLY ENTRIES.—NAR-

RATES INCIDENTS OF CONVENTION TRIP.

—OTHER SPEAKERS.—EXHIBITS.—NOTES.

Forty-one members attended the monthly meeting of the New York Florists' Club at Civic Hall, 128 East Twenty-eighth street, Monday evening, September 8. Alex. Wallace, chairman of the transportation committee, reported that the New Yorkers were well cared for en route to Asheville, congratulated the club on turning out the largest number of delegates from the east, and presented his bill, which was ordered paid and the committee discharged with thanks. Patrick O'Mara, chairman of the exhibition committee, told of a conference with a committee of the National Sculpture Society at which a plan of the exhibition was favorably acted upon, also the matter of a poster. A most harmonious spirit was shown during the conference. Mr. O'Mara urged that those who intend to exhibit make their entries at the earliest possible moment. By invitation of the house committee, Mr. O'Mara entertained the club with his impressions of the Asheville convention. He said that he was one of those who had been pessimistic as to the success of a convention held so far from the beaten track but was agreeably disappointed at the interest shown. He recounted incidents of the trip going, and also referred appreciatively to the reception by the committee of the Board of Trade and gave his

impressions in general of the serious work of the convention. The club accorded Mr. O'Mara a rising vote of thanks. Alex. Wallace, J. Austin Shaw, W. H. Siebrecht and A. H. Langjahr also made a few remarks regarding the trip. The thanks of the club were tendered the Washington Florists' Club for its generous hospitality. Benj. Hammond, from whom an address had been expected, was not present. In the room adjoining the meeting hall there was an excellent exhibition of cannas and dahlias. A. Herrington, F. L. Atkins and Frank McMahon served as judges in the absence of the regular committee. Their report was as follows:

Collection of cannas from A. L. Miller. A very fine collection. The seedling shown compares favorably with standard varieties but is not shown in good condition. Cultural commendation and vote of thanks recommended.

Collection of cactus dahlias shown by W. Duckham. Miss Jeekyll, beautiful red; Marie Service, salmon pink; Cycle, grand red, specially fine; and numerous other varieties, all good. We recommend a certificate of merit.

Dahlias from Chas. Lenker. Germania Giant, very handsome. Vote of thanks.

Five varieties of cannas from Peter Henderson & Company, Gov. Roosevelt, a striking variety, and four new French varieties of interest. Vote of thanks.

Nephrolepis Anna Foster, shown by L. H. Foster. Recommend a certificate of merit as this is a distinct and graceful form.

Various dahlias from H. Beaulieu, Chameleon, a pretty pompon; Asheville seedling, a handsome show flower. Vote of thanks.

The cut flower market is somewhat better this week, the cool weather curtailing the production and, in some things helping the quality. Prices remain about as they were but averaging slightly better in the aggregate, as stock cleans up more satisfactorily in wholesalers' hands. Violets are increasing daily and are fully two weeks ahead of the usual time. The market treats them leniently so far and a top price of 50 cents per hundred is the limit.

Patrick Keenan, of 958 Franklin avenue, Brooklyn, died on September 5, from lockjaw resulting from a thorn wound in the thumb which he got while potting plants two weeks ago.

Cleveland.

ANNUAL OUTING OF THE CRAFT THE MOST SUCCESSFUL ON RECORD.—GAMES AND DINNER FOLLOWED BY SPEECHES.—CLUB MEETING.—PERSONAL AND OTHER NOTES.

The great event of the year, the outing and annual banquet of the Cleveland Florists' Club, came off in grand style on September 4. The entertainment surpassed all previous efforts. Over 150 persons participated. The bowling was a source of great enjoyment to the ladies; about twenty-five competed. Mrs. A. L. Brown captured first prize, a silk umbrella, second prize, a box of handkerchiefs, going to Mrs. Fred. Ponting, while Mrs. H. A. Hart captured the booby. In the gentlemen's class the competition was very keen. There were over forty entries. The first prize, a silk umbrella, went to A. L. Brown; second, a fountain pen, to Isaac Kennedy. The booby went to J. C. Andrews. After satisfying the inner man with a delightful repast, Adam Graham was chosen toastmaster and performed that duty in his inimitable style. Robert George treated the subject of floriculture in a masterly way. Mr. Schmitt praised the ladies for their share in the work. Mr. Steyn spoke on athletics in connection with floriculture. Mrs. Ella Grant Wilson was in a reminiscent mood and recalled the good work done by the pioneers in floriculture in Cleveland. Robt. Kegg told of the good work done by the city in beautifying the parks.

Mrs. Schmitt spoke on behalf of the ladies connected with the market. Other speakers were H. A. Hart, J. C. Andrews, A. L. Brown and Isaac Kennedy. A fish-pond was thoroughly enjoyed by the youngsters, each one receiving at least two prizes. Mr. Naumann's singing of German melodies was a feature.

The club meeting September 8 was very well attended, the special feature being the nomination of officers. The following candidates were named: For president, Gordon Gray; first vice-president, F. C. Borte; second vice-president, A. L. Brown; secretary, Isaac Kennedy; treasurer, H. A. Hart. The following were elected to membership: G. H. Bruehler, Edward Elliott and Henry Eickhoff. It was decided that all members who have been dropped from the club roll may be readmitted as new members, this rule to hold good until January 1, 1903.

Mrs. G. M. Naumann has returned from her trip abroad. Her itinerary included Leipsic, Dresden and the Hartz mountains, her former home. While in Leipsic she purchased of Herr Tolacker two plants of a wonderful new white carnation, called Gloire de Nancy. We are all anxious to see how it turns out. Mrs. Naumann enjoyed her trip very much.

W. W. Adams is back from a two weeks' visit with friends in Peoria, Ills., looking robust.

Albert Wilhelm, of Butte Mont., is home for a visit. He likes the west, but says the climate is hard on an eastern man.

Mrs. Isaac Kennedy and family have returned from the east. ECHO.

Philadelphia.

MARKET QUITE DULL.—ASTERS IN EXTREME OVERSUPPLY.—BEAUTIES PLENTIFUL.—GOOD BUDS PREFERRED TO LONG STEMS.—THE PRICES.—A VISITOR.—DOINGS OF THE WHOLESALERS.—PERSONAL DOINGS OF VARYING INTEREST.

There has been no feature to the market the past week, except that of extreme dullness. Asters were piled up everywhere. Wagon loads were backed up on the street corners and the bunches of flowers were offered at "any old price." Whether the commission merchant or the fakir was back of the scheme is still an open question. The asters were there and had to be moved somehow and the wagon venture was not a bad one. Week before last was high tide with Dumont & Company, who handled 125,000 blooms. This is about the record, for this city at least. Several more Beauty specialists began to cut last Monday and from now on until cold weather sets in there is likely to be enough of this variety to meet the demand. To the growers of this rose I would suggest that they pay more attention to getting perfect buds, rather than length of stem. Prices for Beauties range from \$1 to \$2.50 per dozen, the latter for only gilt-edged stock. Teas bring from \$3 to \$4 per hundred. Carnations fetch \$1 per hundred, with \$1.50 for a few extras. We hear of chrysanthemums in other markets but nothing is in sight here as yet and we hope to see none until after October 1.

George McLean, of Walker & McLean, Youngstown, O., was in the city this week. He reports having had a most satisfactory year. He looks well and says that his partner looks even better. When last seen Harry Bayersdorfer was touching him up for a large order of his last importations.

Repair work in the stores is about finished. Pennock Brothers put in a new

boiler and at the same time erected a furnace out of the old material, in which they hope to burn up the rubbish which accumulates so fast during the busy season.

The question of coal is beginning to worry the growers not a little. It seems now to be bituminous or nothing and quite a number are laying in a supply of the dirty stuff from absolute necessity.

Eugene Bernheimer now has a place in every way fitted for the business. He spent the past week among his carnation growers and reports the outlook for the coming season as most satisfactory.

Robert Craig is home again, after spending a week with W. K. Harris at his Ocean City villa. He is mending slowly and hopes to be all right before the winter sets in.

Wm. J. Moore has moved to his new location, 11 South Sixteenth street, where he has a much larger store and greatly increased facilities.

Wm. Holmes and James Higgins, late of Philadelphia but now with Messrs. Neff and Randolph & McClements, of Pittsburg, are here on a visit.

The wholesale men are still renovating. Ed. Reid is having a large cellar excavated under his store, which will give him much needed room.

Fred. Ehret says that the up-town district will be well cared for, as the outlook was never better with him.

K.

St. Paul.

DONALDSON PLACE AT MINNEAPOLIS A MODEL.—STOCK IN FINE SHAPE.—WELL KEPT GROUNDS.—TRADE IMPROVING.—STOCK NONE TOO PLENTIFUL.—A VARIETY OF PERSONAL AND TRADE DOINGS.

A model establishment is that of the Wm. Donaldson Company, at Minneapolis. Their roses are exceptionally fine. Old stock is being carried over, some for the third year. I think their Liberty are a little the best I have seen and I may change the opinion expressed some time since that Meteor is still the most profitable red rose grown. Their carnations and violets are in fine condition. Chrysanthemums are thrifty but backward. Two new sash houses have been erected this season and are planted to asparagus and smilax in solid beds. The grounds outside are kept neat and attractive, beds of geraniums and cannas with well kept graveled walks adding greatly to the general appearance. This is an example many of our friends might copy to good advantage.

Trade is improving daily and will soon be back to a profitable basis, after the summer vacation. There have been no frosts and the late rains have kept outdoor stock growing nicely, but it is about gone. Roses are increasing in quantity and quality. Some very good Brides and Bridesmaids are being cut from old stock that has been replanted. They come into bloom much quicker than the smaller stock and produce better flowers. Beauties are in good demand but short supply at present. Carnations are more plentiful but are still short of the demand.

L. L. May & Company had a fine exhibit of palms and cut flowers in the main building at the State Fair, in connection with their seed exhibit. It was not entered for competition.

Jos. Heintz, of Jacksonville, Ill., one of the "old timers" in the business, made a visit on his way home from the Pacific coast.

Mildew and black spot are quite preva-

lent on roses owing to the cool, damp nights.

C. W. Scott, of Vaughan's, Chicago, has been here with samples of palms and ferns.

Christ. Hansen has returned from his trip to the Canadian northwest.

W. W. Seekins, of Duluth was here during fair week. FELIX.

Toronto.

GROWERS MAKING MANY IMPROVEMENTS.—ROSES IN CONNECTED HOUSES.—GOOD RESULTS WITH ASTERS.—CATALOGUE TRADE EXPANDING.

John H. Dunlop's new range is nearing completion and makes an imposing appearance. Benching is about finished. Most of the space is devoted to carnations and roses, chrysanthemums being grown in very limited quantity. Mr. Dunlop's method of growing various roses together in blocks of non-partitioned houses is being watched with much interest by the experts of this vicinity.

Grobba & Wandrey have added several acres to their property and will build new barns and sheds this fall. They have a fine new delivery wagon in course of construction. Their stock in general has been unusually good this season and sold well. The crop of Hohenzollern asters in particular has given great satisfaction.

The Steele, Briggs Seed Company has on its trial grounds four greenhouses 18x100 feet and four 12x100 feet, all of which will be extended fifty feet next year to meet the growing demands of their catalogue trade.

Field carnations are bought up close in this vicinity and some of the large growers are having considerable trouble in procuring sufficient stock to fill their benches.

Visitors: A. Zirkmann, representing Sigmund Geller, New York; Wm. Scott, Buffalo, N. Y.; Wm. H. Gammage, London, Ont.; Alfred Murdock, London, Ont.; G. B. Wiegand, Indianapolis, Ind. H. G. D.

Minneapolis.

GOOD FLORAL DISPLAY AT THE ANNUAL STATE FAIR.—THE PREMIUM WINNERS.—TRADE SHOWS LITTLE INCREASE.—VARIOUS NOTES.

The exhibits at the State Fair last week were beyond all doubt the finest ever shown there and included palms, ferns and miscellaneous flowering plants. Mendenhall, E. Nagel, the Minneapolis Floral Company and L. L. May & Company were the leading exhibitors. First prize was captured by the Minneapolis Floral Company, for general arrangement of plants. In the design exhibits Wm. Donaldson & Company secured first prize, E. Nagel second, the Minneapolis Floral Company third, and Mendenhall fourth. L. L. May & Company, of St. Paul, had a beautiful layout of palms, ferns, seeds and so forth.

Business showed a little increase during fair week. Stock in tea roses and Beauties is in fair supply and in good demand. Carnations are good but short in stem. Asters and gladioli are in large supply and sacrifice sales have to be made to move them.

We are more than pleased at Milwaukee's success in securing the convention for next year and surely the Twin City florists will be largely represented.

Wm. Donaldson & Company are cutting some fine tea roses from their young stock. C. F. R.

The Use of Spent Hops.

ED. AM. FLORIST:—Please tell me if
hops are of any use as a fertilizer or to
mix in the soil. We have several brew-
eries here and I would like to know if the
spent hops would help lettuce?

J. G. G.

Spent hops contain a considerable
amount of fertilizing matter, but it is in
a slowly soluble condition and they
should be thoroughly composted before
they are mixed with soil for greenhouse
use. In this condition they have a good
physical effect when the soil is heavy. If
hops can be readily obtained they are
excellent for mulching stock and other
plants that are bedded out during the
summer. Used in this way they lessen
the labor of hoeing and watering and
promote a strong and healthy growth of
the plants. L. R. TAFT.

Piping Two Houses.

ED. AM. FLORIST:—I have two houses
running east and west, connected to shed
on the west ends, with cellar below for
boiler room. House No. 1 is 14x33, ten
feet to ridge, one raised bench on each
side, center bed solid. To be piped to
maintain 60° to 65° when it is 10° to 15°
below zero outside. House No. 2 is 20x33,
ten feet to ridge, connected to No. 1,
three raised benches, to be piped for 50°
to 55°. Pipes to be all under benches.
How many lines of 2-inch pipe will be
required? What would be the best posi-
tion for the expansion tank? Boiler is
Wilks, No. 42. C. C. W.

Pipe both houses the same, using one
2-inch flow and four 2-inch returns on
each side of each house. Connect the
expansion tank to the highest part of
the system and elevate it ten feet if pos-
sible. L. R. TAFT.

Worms in Rose Beds.

ED. AM. FLORIST:—We are bothered
with worms in our rose beds. Are they
a detriment to the plants? Would it
hurt the bushes to sprinkle the ground
with fresh lime and work it in? Would
it hurt the bushes to dig between the
rows? What is the best fertilizer to use
for roses? W. L. P.

Utah.

One can sprinkle lime lightly on the
surface of his rose bed without doing any
damage to the plants, but to exterminate
the earth or angle worms a much better
plan is to slake the lime the same as if for
mortar, then add water and let it stand
till clear before using, giving the whole
soil a good soaking. One application
will usually clear all the worms out, but
if it should not do so, a second dose in
about two weeks will surely finish them.
To make this lime water take one peck
of fresh lime to fifty gallons of water.

I would not advise digging between
the rows as it is very apt to destroy

some of the young feeding roots; as a
rule it is preferable to keep the main body
of soil as firm as possible and only rub
the surface over lightly occasionally to
prevent its forming a green surface from
frequent waterings.

The best fertilizer for roses, all things
considered, is pulverized sheep manure.
If this cannot be obtained readily, then
the next best is chicken manure. In
using this as a mulch mix at least half
soil with it before using, and then only a
very thin coat should be applied, once in
six to eight weeks. For chemical fertili-
zers nitrate of soda and nitrate of potash
are the most useful in equal parts, using
six ounces to fifty gallons of water at
each application, every fifteen to twenty
days. JOHN N. MAY.

Heating Capacity.

ED. AM. FLORIST:—Our greenhouse is
devoted to general purposes and is
28x56, side walls of brick five feet high,
well boarded outside, with 2-inch dead
space between. The comb is twelve and
one-half feet high and with 1,950 square
feet of glass, and the house somewhat
exposed. The office, 12x16 at one end
of the greenhouse, and divided from it by
a wall, is eight and one-half feet high and
is warm. For heating I have the Ideal
boiler, No. 26, set in the office. I then
have one 3-inch pipe passing from the
boiler through the wall, and running
overhead the full length of the green-
house, then dropping by means of 2½-inch
headers from which ten lines of 2-inch
pipes pass back under the benches the full
length of the greenhouse to the boiler.
There are fifty-five feet of 3-inch pipe,
thirty-five feet of the headers, and 550
feet of the 2-inch pipe. I would be glad
to be able to maintain, if necessary, 65°
of heat in zero weather. Can I do it in
your opinion? The expansion tank of
thirty gallons is set overhead in the
greenhouse, across the wall from the
boiler. E. J. P.

The radiation given (432 feet) will not
give a temperature of more than 50° in
zero weather, unless the boiler is pushed.
For economy of fuel and labor the radia-
tion should be at least 750 feet and 800
feet would be more satisfactory. While
one 3-inch flow would answer for 432
feet, two flows of this size will be needed
for 750 feet, and the number of the
returns should be increased to eighteen.
If a temperature of 60° will answer when
the mercury outside drops to zero, sixteen
returns will be satisfactory. As I remem-
ber, the No. 26 Ideal boiler is rated for
about 1200 square feet of radiation.
This will give a safe margin.

Brampton, Ont.

THE CUT FLOWER PRODUCING CENTER OF
THE DOMINION.—GREAT RANGE OF GLASS
GOING UP.—SPLENDID STOCK.

This town is rapidly extending as a
growing center. In addition to the great
establishment of the Dale Estate, Wm.
Fendley and R. Jennings are now increas-
ing their area to meet the constantly
growing demand, and Geo. Harvey is
holding his own. Mr. Jennings put up a
house 24x115 feet early in the season
and now has it filled with excellent
chrysanthemums. He is completing a
violet house 18x115 and, having plenty
of room to develop, he does not expect
to stop building. He grows about 10,000
chrysanthemums, including such varie-
ties as Fitzwygram, white and yellow;
Ivory, white and pink; Bergmann, Glory
of Pacific, Golden Wedding, Timothy

Eaton, Bonnaffon, Whildin, Higinbotham and Mrs. Jerome Jones. Some of the Fitzwygrams were ready for cutting September 5. Some 16,000 carnations are grown and for these Mr. Jennings believes in early planting, from July 15 to August 15, which is certainly not the rule hereabouts. As he is now cutting about 3,000 very good blooms per week, his system would appear to have merit. The varieties he favors are Glacier, Flora Hill, White Cloud, Hoosier Maid, Prosperity, Lawson, Marquis, Morning Glory, Crane, Roosevelt, Wm. Scott, Van Horn, Cerise Queen and Mrs. Bradt. In violets he grows Princess of Wales, Marie Louise and the Farquhar. While a general line of stock is carried, including roses, the foregoing are Mr. Jennings' specialties and he grows them well, especially the chrysanthemums.

At the Dale Estate's place work is going forward rapidly on the magnificent new range of twenty-three houses. There is need for Chicago growers to look to their laurels if that city is to retain supremacy as the cut flower growing center of the world. T. W. Duggan, the urbane manager of the estate, returned August 23 from Europe, where he has sojourned six weeks and incidentally made heavy investments in Roman hyacinths and lily of the valley pips.

St. Louis.

TRADE SHOWS THE STIMULUS OF THE APPROACHING AUTUMN.—GOOD STOCK QUICKLY TAKEN UP.—PERSONAL AND TRADE DOINGS.

The market remains about the same as far as quality is concerned, but the demand is some better. Beauties are very fine and \$2.50 per dozen is received for the best. In the way of roses, Brides and Bridesmaids are in the lead, followed closely by Meteors and a few very fine Perles. Carnations are coming in quite plentifully, with Ethel Crocker and Crane in the lead. A big demand is expected for pink carnations the latter part of the week, as they will be worn in memory of Mr. McKinley. Several large orders have been booked ahead for this color. Asters and bulbous stock are scarce.

John Young is back at his place of business after his eastern trip. Will Young has also returned from New York and Philadelphia. Walter, the eight-year-old son of James Young, is ill with typhoid fever.

The baseball game of last Sunday was given to the Tessons after the fifth innings, as the Bernings threw up the sponge. The final game comes September 21.

H. J. Fuhlbruegge, foreman at Tesson's greenhouses, has been on a successful hunting expedition across the river in Illinois. R. J. M.

OBITUARY.

HENRY M. BOWIE.

Henry McKay Bowie died August 26 at the Providence Hospital, Washington, D. C., from typhoid fever and a complication of diseases. He was sick about three weeks. Mr. Bowie was born in Wilmington, N. C., in 1877, and removed to Washington, D. C., in 1892, to work in the florist business with Otto Bauer, in whose employ he remained about five years. When George C. Shaffer started in business he employed Mr. Bowie at his store. July 21 he went on his vacation, to Ocean City, Md., for three weeks, returning only to go to the hospital. Mr.

Bowie was a favorite in the trade and his loss is felt keenly by Mr. Shaffer. His remains were taken to Wilmington, N. C., for interment. P. G.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

CUT FLOWERS AT WHOLESALE.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

WALTER P. STOKES, Pres.; C. N. PAGE, First Vice-Pres.; S. F. WILLARD, Wettersfield, Conn., Sec'y and Treas.

A. W. ANNANDALE, of the Steele, Briggs Seed Company, Toronto, returned from Europe August 16.

THE Steele, Briggs Seed Company, Toronto, expects important results from its trials of sugar beets which are now in the third year.

THERE are reports of still further shortages in the California onion seed crop. C. P. Braslan also reports radish light and carrot very short.

D. M. FERRY is a candidate for appointment to the United States Senate to fill the unexpired term of the late Senator McMillan, of Michigan.

VISITED TORONTO: F. R. Pierson, Tarrytown-on-Hudson, N. Y.; R. W. Clucas, of Clucas & Boddington Company, New York; Walter Mott, of Jamestown, N. Y.

H. SIMMERS, of the firm of J. A. Simmers, Toronto, states that the sales of field seeds in July and August were not as heavy as the business of the earlier months of the year warranted.

S. B. DICKS, of Cooper, Taber & Company, London, Eng., is calling upon the trade in Canada, having reached Hamilton September 4, but does not talk very encouragingly of European seed crops this season.

THE Braslan Seed Growers' Company, of San Jose, Cal., has been incorporated with \$75,000 capital stock and the following directors: O. A. Braslan, E. O. Pieper, M. W. Williams, C. P. Braslan and Milton Bernard.

JOHN A. BRUCE and F. C. Bruce, of Hamilton, Ont., returned August 28 from the coronation festivities in England. John A. (now retired) is the founder and F. C. the present head of the firm of John A. Bruce & Company.

Trouble With Pearl Tuberoses.

ED. AM. FLORIST:—With regard to Peter Crovetto's complaint of lack of success with Pearl tuberoses in Italy, I would say that we are growing here at Magnolia, N. C., about 175,000 spikes for flowers and are greatly troubled this season by exactly the same blight your correspondent mentions. We find that it is caused by the heat from the sun. When we have a few cool nights and the sun is not so extremely hot there is a marked difference in the flowers. As autumn approaches they will become fine. H. E. NEWBURY.

PANSIES

VAUGHAN'S "INTERNATIONAL"

Received the only reward for Mixed Pansies at the World's Fair. It is to-day better and more complete than ever. It contains the cream of the stock of 10 Pansy specialists. There is no better mixture to existence, as all the florists who saw or used it can tell you. Price per oz., \$10.00; ¼ oz., \$5.00; ½ oz., \$1.50; trade pkt., 50c.

VAUGHAN'S "GIANT MIXTURE."

This mixture is specially made by us from all the separate colors of Giant Tricolor, the Giant Bugnot and Cassier and several special strains which cannot be had any other way. If your trade demands large flowers there is no better mixture. Price, ¼ lb., \$14; oz., \$4; ½ oz., 60c; td. pkt., 25c.

MASTERPIECE--New Giant Curled.

This strain comes nearer to "Double Pansies" than anything ever introduced under that name. In reality the number of petals is the same as that in other Pansy flowers, but they are crimped and curled in such a fashion that the flowers appear double. The flowers are of enormous size, often 3 inches across, and the color variations and combinations are odd and striking. Pkt., 50c; ½ oz., \$1.00.

SWEET PEAS *Blanche Ferry* and *Extra Early Blanche Ferry*, per ¼ lb. 10c; lb., 25c; 5 lbs. for 100.
Earliest of All, pink and white, ¼ lb., 10c; lb., 25c; 5 lbs., \$1.25
Mont Blanc, earliest white, ¼ lb., 20c; lb., 70c.
Lady Grisel Hamilton, best lavender, ¼ lb., 15c; lb., 40c.

FOR COMPLETE LIST SEND FOR CATALOGUE.

"Vaughan's International" Primrose Mixture. Unquestionably the best mixture of Chinese Primroses. It contains the largest variety of the best selling colors. Flowers large, beautifully fringed, borne in large clusters well above the rich green leaves. Pkt. (250 seeds) 50c; 5 pkts. (1250 seeds) \$2.00.

Cineraria **VAUGHAN'S COLUMBIAN MIXTURE.** A mixture of the best English and German strains, unsurpassed. Pkt. (1000 seeds) 50c; 3 pkts. \$1.25.
Cineraria **HYBRIDA**, large flowering, white, blood-red or crimson, double white or best double mixed, each, per trade pkt., 3c.

VAUGHAN'S SEED STORE, 14 Barclay Street, New York. 84-86 Randolph St. Chicago.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.
 CHAS. A. ILGENFRITZ, Pres.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y.
 Twenty-eighth annual convention, Detroit, Mich., June, 1903.

P. S. PETERSON & SON say that the fall planting of ornamental nursery stock promises to excel all previous records.

WHATEVER fall planting of nursery stock can be accomplished is just so much gained; there is always enough to do in the spring.

THE annual convention of the American League of Civic Improvement will be held at St. Paul September 24 to 26. A diversified and comprehensive programme has been prepared, Prof. Chas. Zueblin, of the University of Chicago is president, and E. G. Rutzahn, of Dayton, O., corresponding secretary.

NEW CASTLE, IND.—Myer Heller and family are at home from Groton, Conn., where they have been spending the summer.

SOUTH SUBBURY, MASS.—Henry N. Eaton made an assignment to W. W. Rawson on September 5, for the benefit of creditors.

BUFFALO, N. Y.—Wm. Scott has been at the Industrial Exhibition, Toronto, this week, officiating as judge in the cut flower classes.

NORTHAMPTON, MASS.—The stock of A. Parks, who failed recently, has been purchased by C. H. Pierce and Mr. Parks will conduct the business for him.

PROVIDENCE, R. I.—Timothy L. O'Connor was married on September 9 to Mrs. Emma T. Baingan, reputed to be one of the wealthiest women in the state.

F. A. BALLER, Bloomington, Ill.

NEW GOOSEBERRY, "VICTORIA."

The best Gooseberry in England and the Champion Berry for the London Market. It is the strongest grower, making shoots 3 ft. 9 in. in a season. Berries larger than Crown Bob or Lancashire Lad, color and flavor similar to Ashton Reds or Warrington, a late bloomer and a sure cropper, it is of a hardy constitution, growing and bearing well in Northumberland. A Victoria three-year-old bush bearing 28½ lbs. of fine large fruit was shown at the Drill Hall, London, in 1900, and got great praise from a large number of leading nurserymen who spoke very highly of it. It is as much in advance of all other Gooseberries as Victoria Plum stands above all other Market Plums.

Extract from the Horticultural Trade Journal, Aug. 14th, 1901.

A week or two ago, when Gooseberries were at their best, we visited the famous Gooseberry Growers, Messrs. Geo. Charlton & Sons, High Church Nurseries, Morpeth. Messrs. Charlton have for many years maintained a reputation at home and abroad for raising and disposing of large quantities of young trees of "Whinham's Industry," and we saw some fine healthy quarters of this favorite and prolific variety in their Nurseries. Whinham's now seems likely to be eclipsed in productiveness by the introduction of "Victoria." Messrs. Charlton & Sons have grown this variety for several years and they are now placing the young stock in commerce; an illustration on one of our pages shows the prolific nature of this variety, and what is shown in the illustration on the two shoots that are reproduced from photographs, we saw on hundreds of branches on the young trees, every shoot was alike, no blanks, each one bearing down with an enormous weight of fine large fruit, truly a most prodigious cropper; the large fruit of a pale red color were thickly set on every branch, and this we understand has been characteristic of the variety from the first. The flavor too is excellent, and all around it seems well suited for market purposes. It is also about seven days earlier than Whinham's.

Testimonial from Mr. R. S. Pal- lester, Commission Agent, and Fruit Salesman, Green Market, Newcastle-on-Tyne, who turns over many hundreds of tons of both London and Northumber- land Gooseberries in the year.

DEAR SIR:—I have very great pleasure in bearing testimony to the excellence of your "Victoria" Gooseberry. Their quality and size are remarkably fine and surpass anything of the kind I have ever had to deal with during the whole of my business experience.

Yours faithfully,
R. S. PALLESTER.

Mr. Pal-
lester has given us £16 per Ton for all the "Victoria" Berries we had to sell this season, when he could buy the best fruit in the Newcastle Market of Whinham's, Crown Bobs, Lancashire Lads and others at £11 per ton.

See top next page for prices.

Prices for our Victoria Gooseberry Trees

4 years, fine selected strong plants..... £16 per 1000; £2 per 100 | 2 years, not disbudded£9 per 1000; £1, 2s per 100
 3 years, fine selected strong plants..... £12 per 1000; £1, 10s per 100 | 2 years, ordinary..... 8 per 1000; 1 per 100
 2 years, fine selected strong plants..... 10 per 1000; 1, 5s per 100

We strongly recommend our 2 yrs. Victoria not disbudded for America as they will be a lighter carriage with a large quantity of very fine Cuttings.

WHINHAM'S INDUSTRY.

We have over 200,000 very fine plants to offer this season.

5 years, extra strong selected£6 per 1000; 14s per 100 | 3 years, early strong selected£4, 10s per 1000; 10s, 6d per 100
 4 years, extra strong selected..... £5 per 1000; 12s per 100 | 2 years, selected£4 per 1000; 10s per 100

CASH. For large orders, packages, packing free. We have raised more Whinham's Industry than any two firms in England and supplied most of the leading nurserymen in England, likewise on the Continent.

TRADE GOOD AND STOCK MOVING BRISKLY. —ROSES OF IMPROVED QUALITY.—CLUB MEETING NEXT WEEK.—NOTES.

Business is good and a nice lot of flowers are coming in. Asters are very good and \$2 per hundred is realized for the best. Roses are coming better owing to the cool weather, while carnations are plentiful but poor in quality. There is a good demand for lily of the valley, with supply equal to demand. Adiantum cuneatum was never better. Smilax is scarce.

The Florists' Society meets at Wm. Murphy's place on Friday, September 19. Be at the end of the Elberon avenue car line and conveyances will take you to Murphyville. This will give those interested an opportunity to get a line on the new carnations and hear what Wm. Rodgers has to say about Asheville.

Robt. Greenlaw, representing N. F. McCarthy & Company, Boston, was in the city Monday.

Wm. Mann, of the Cincinnati Cut Flower Company, is on the sick list.

Columbus, O.

WEEK OF STATE FAIR BROUGHT INCREASE IN BUSINESS.—EXHIBITION SHOWS AN IMPROVEMENT.—VARIOUS NOTES.

Ohio State Fair week brought a little trade out of the ordinary, some of the business houses finding advantage in the thousands of visitors by making their stores attractive by decorating. This of course could not help but benefit our local trade some. The display at the fair was ahead of former years, which is largely due to Jno. D. Inlay, of Zanesville, who is a member of the State Horticultural Board. If Mr. Inlay is continued as a member of this board I think the State Fair will be marked with an improvement from this on. Mr. and Mrs. Charles, as usual, took most of the premiums, which was but a fair reward for their effort.

The Fifth Avenue Floral Company is cutting some fine asters of the Semple strain, which they are having no difficulty in disposing of. This firm is also completing two more rose houses, of which this winter's crop has already been spoken for. Some good carnations are now coming in, but most of them are rather lacking in stem. CARL.

ALLEGHENY, PA.—E. C. Ludwig reports trade good, much funeral work and several wedding decorations last week.

BONE MEAL

Best for Carnations, Roses and general use, \$3.50 per 200 lb. bag; \$32.50 per ton.

ALBERT M. HERR, Lancaster, Pa.

Springfield, Mass.

FINE WEATHER AND GOOD STOCK MAKE BUSINESS BRISK.—NOTES OF DOINGS OF THE GROWERS.

The weather has been ideal the past two weeks, although we had a slight frost September 6, early for this locality. Everyone is busy getting tender stock housed. Trade has been good in funeral work. Asters have sold well. Roses are fair for the time of year. Carnations are badly needed and from the stock that is housed we can look forward to a good supply. Chrysanthemums are in fine shape and pushing their buds in sight. A few Boston ferns are being sold but it is early yet for potted plants. The coal question is our worst trouble just now. There is no coal to be had now and when there is the price will be away up.

L. Morgan, of Longmeadow, has three houses of carnations and chrysanthemums in grand shape. His carnation Ruth Morgan and a white seedling are extra fine.

M. Aitken has completed two houses 10x50 for azaleas. Chrysanthemums, cyclamens, primulas and so forth look well.

H. Grout has housed his carnations. The stock is a little small but he is an old hand at the game and will be on time.

Mr. Beals, of Eastern avenue, is on hand with a fine stock of chrysanthemums, carnations and potted plants.

L. D. Robinson is busy getting ground ready to put up one house 20x125. He reports business good.

A. Buckleton, who grows nothing but carnations, has put in a fine lot of stock. A. B.

Flushing, Long Island, Dec. 14th, 1901. Mr. THERON N. PARKER, Brooklyn, N. Y. Dear Sir:—I have used your Wire Carnation Support the last two years in all about 12,000. They fill the bill in every particular. Nothing could be more satisfactory and would give me a great deal of pleasure if I can bespeak a good word for you to the trade and you are at liberty to refer to me at any time. Very truly, A. L. THORNE. La Fayette, Ind., July 8th, 1902. Mr. THERON N. PARKER, Harrison, N. J. Dear Sir:—After using your Model Carnation Support in two of our houses the past winter, we have come to the conclusion that it is perfectly adapted to supporting carnations, and shall use them on all our plants the coming season. We were much pleased with the simplicity, strength and neat appearance of the support. Yours truly, F. DORNER & SONS Co.

Bargains FOR Florists.

We are headquarters for a general assortment of the necessary material and supplies that you are looking for. If you are about to improve or construct, consult us.

In connection with the dismantling of the Pan-American Exposition, we have for sale:

20,000,000 FEET of fine seasoned lumber, practically new, consisting of all sizes of joists, timbers, dressed and matched boards and flooring; also sash and doors.
50,000 FEET of roofing glass.

PIPE.

We are headquarters for pipe. We offer you:

100,000 FEET of 2 to 4 inch wrought iron, lap welded casing. We can furnish this material in three ways: Either with sleeve or jacket couplings, screwed ends and threaded couplings or with expanded cast iron flanges with bolts and nuts.

1,000,000 FEET of standard black wrought iron pipe, size $\frac{3}{8}$ to 12-inch. It is second-hand but has new threads and couplings and is in first-class condition.

1,000 TONS of galvanized wire 9, 10, 11, 12, 13, 14 and 15 gauge.

50,000 FEET of 2, 3 and 4-inch cast-iron soiled pipe and fittings.

100,000 FEET of garden hose, $\frac{3}{4}$ and 1-in.

75,000 FEET of cotton rubber-lined fire hose, (rubber-lined in and outside), ranging in sizes 1 to 2 $\frac{1}{2}$ -inch.

VALVES and fittings of every kind.

BOX COILS for heating purposes.

RADIATORS, new and second-hand.

We also offer the following bargains in

Heating Boilers

50 CAST-IRON sectional heaters, capacity from 450 to 5,000 feet.

100 2 Standard Kroeschell hot water heating boiler.

FOUR 36x10 Horizontal Tubular.

FOUR 36x12 Horizontal Tubular.

FIVE 42x10 Horizontal Tubular.

FIVE 42x12 Horizontal Tubular.

SIX 48x 4 Horizontal Tubular.

TWO 54x16 Horizontal Tubular.

FOUR 60x16 Horizontal Tubular complete with all fittings.

PUMPS of all Descriptions.

A carload of shovels and spades that we are selling at \$5.00 per dozen.

We carry a complete stock of hardware and farm implements, besides plumbing material of every kind.

AUTUMN TRADE ALREADY UNDER WAY.—
ROSES NEITHER GOOD NOR PLENTIFUL.—
PERSONAL NOTES.

Florists about town are preparing for the fall trade, which has already begun to some extent. There has been considerable design work for the last month. There is a plenty of small stock for funeral work, but a scarcity of good Bride and Bridesmaid roses, which are very small.

L. J. Stuppy has been rebuilding his range of rose houses this summer and has placed in position a large steam boiler. Ed. Wiseman has taken charge of the rose houses.

Fred. Krum has returned from Excelsior Springs, where he spent a couple of weeks recuperating.

Mr. and Mrs. J. N. Kidd are in Colorado. Mr. Kidd's health is poorly this summer.

MANSFIELD, MASS.—The Hamilton greenhouse, on Warren avenue, has been purchased by Charles Chase.

MODEL EXTENSION CARNATION SUPPORT

HOME VISITORS' LOW RATE EXCURSION

Sentiment inspired by patriotism has—and it is to be hoped always will afford—a one-cent-a-mile rate to enable the "Boys in Blue" to assemble in reunion at least once a year, from all points of the compass. Such a rate is authorized from all points east of Chicago to Washington for this purpose in October, 1902. Such a rate has been afforded once a year since the first reunion of the veterans of the war of '64. This especially low rate has become popular, not only for the purpose for which it was established, but for other purposes, chief among which we recognize the opportunity thus afforded to visit friends, at or convenient to, the place of reunion, because of the low rate, and because of the favorable opportunity by reason of the liberal extension of time limit for return.

On dates authorizing sale of Grand Army Excursion Tickets to Washington, for the Reunion of 1902, are also authorized similar reduction in rates, from all points west of Chicago, with time limits the same as on such tickets to Washington, excursion tickets to any point in the territory of the Central Passenger Association, on or reached by the Nickel Plate Road. For full information call on your most convenient interline ticket agent by mail, wire, phone—or in person, on

JOHN Y. CALAHAN,
General Agent Nickel Plate Road,

CROP INSURANCE.
Life insurance is valuable because it guarantees the outcome.

"Gurney" Heaters

"BRIGHT IDEA," "DORIC" and "400 SERIES" do the same thing for your hothouse: **THEY GUARANTEE THE CROP.** First of all they save 20 per cent on the coal bill and so keep expense at a minimum. Next, they produce an even heat and so do not imperil the life of the plant. Next, they are simple to operate and so require least attention. Lastly, they wear longer than others and thus perceptibly reduce the capital invested. Don't buy or exchange until you've investigated them.

CHRYSANTHEMUMS.

NEW AMERICAN VARIETIES.

Having planted most of the novelties, the new American varieties disseminated this year, the following brief notes may be useful for comparison at this date, September 15:

Adrian—Planted May 20; six and one-half feet; only few buds taken; remainder ready September 20; fine large foliage; easy to manage.

Bentley—Planted with preceding, four and one-half feet; nice, clean growth; most buds taken; very promising.

C. Holst—Planted same date; four and one-half feet; growth good; foliage ample; does not appear to be extra early, as terminal buds have just been taken; may require crown to come early.

Edgar Sanders—Planted same date; six feet; very clean growths; buds partly taken, balance ready soon.

Harry A. Fee—Planted same date; three feet; foliage good; buds just taken.

Honesty—Planted June 1; three feet; very short jointed, with exceedingly large foliage; one of the best looking of this year's introductions; buds all taken September 5.

Kansas City Star—Planted June 1; four feet; growth and foliage all that could be desired; most of the buds to come in a few days.

Marian Newell—Planted June 15; four feet; growth good; buds just taken.

Mrs. F. J. Taggart—Planted June 15; three and one-half feet; foliage and habit excellent; few crowns taken but they make little progress; terminals ready September 20, which make best flowers.

Mrs. Wm. Fraser—Planted June 15; five feet; buds taken September 10; growth strong; rather too long-jointed for the commercial grower.

Opah—Planted July 15; three feet; most buds taken by August 20; now showing color; appears to show more pink than formerly.

Oresco—Planted June 1; four feet; buds all taken September 10.

Polar Queen—Planted June 15; two and one-half feet; foliage heavy; few crowns taken, but like Eaton and Appleton, generally comes more double from terminals; ready September 30.

Pride of Elstowe—Planted June 15; three and one-half feet; mostly crowns taken, few terminals to follow. This variety badly affected with rust when received, which has ruined the foliage of most of the plants; may outgrow this, as did Golden Wedding, and become one of the standard sorts.

Prosperity—Planted May 20; three and one-half feet; very heavy foliage; exceedingly promising; buds just taken.

Did not receive Miss Jane Morgan, hence can give no comments.

ELMER D. SMITH.

SEASONABLE TREATMENT.

Nearly all varieties are setting their buds now and should be "taken" without delay, as soon as they appear. Select the center bud to make the flower, rubbing out all side buds and growths. After setting the bud the plants will commence to throw out suckers from the roots in all directions, which must be removed to keep all the strength possible in the plants. Any side shoots which may have been overlooked will also push out rapidly, drawing vigor from the plants. Extra watching will therefore be necessary to keep these down.

Sometimes when the beds have been mulched, the mulch after a while will become baked and hard, which prevents the water soaking evenly into the soil. Should this be the case go over the beds and loosen the surface of the mulch, being careful not to go deep enough to disturb the young roots that have formed in it.

Attend to the tying to prevent the stems from getting crooked and to insure a free circulation of air. Again, by keeping them tied up as needed, the plants attain a vigorous, sturdy habit not possible when this has been neglected. If there is any time that chrysanthemums need fresh air more than another, it is just now. They seem to fairly revel in the bright sunlight and cool atmosphere that we get at this season. Leave plenty of ventilation on at night, it will add lustre to the foliage, strength to the stems and insure a well formed bud.

After taking the buds the next important part in looking after chrysanthemums is to be very careful with the watering and, while they must not suffer for want of water, with a mulch on the beds, together with the extra shade from the heavy foliage, it is an easy matter to get the soil too wet. This must be avoided or the plants will receive a big check.

After the buds begin to swell applications of liquid manure may be given once a week. To start with we use about a bushel of manure to a barrel of forty-eight gallons of water, changing the manure at each watering. It is well to bear in mind that if the right texture, strength and vigor are not in the plants at present it cannot be put there by overdoses of liquid manure during the next

few weeks. It would more likely be just the reverse. Also, if you are satisfied that you have got all that is possible out of your plants up to the present date, and if this be the case they will surely show it by their strong, stiff stems and luxuriant foliage, do a little thinking as to what your plants have taken out of the soil or you may overdo the liquid fertilizer. C. W. JOHNSON.

SPECIMEN PLANTS.

Chrysanthemums are making rapid growth. From this time onward success depends very much upon the judicious use of fertilizers, either in liquid form or as a top dressing. Some plants will take liquid manure in liberal amounts; others are quickly surfeited.

Overfeeding shows itself in yellowed, stunted foliage. When this occurs we use only clear water and let them get as dry as we can with safety. Air gets into the soil and sweetens it. Too much feeding has a tendency to make the growth soft; but usually there is time enough to harden and ripen it if discontinued at the end of this month.

It is all a matter of experience and careful feeding may continue until the buds show color. It is, however, worthy of note that pink and red varieties, including bronzes, show a lack of color and also burn easily because of too long continued feeding.

We vary our ingredients. For a week we use barnyard drainings. There is nothing better when the strength is known. An over-dose will make the plants wilt badly, but usually they come out without any serious injury, by letting up for a few days. Clay's fertilizer is an excellent manure and perfectly safe to use, either as a liquid or as a top dressing, mixed with a little loam. Bowker's greenhouse chemicals may also be used with good results, and it varies the diet.

Soot water at times and weak lime water will sweeten the soil. The drainage must, however, be kept free, and this is difficult sometimes at the end of the season, when the pots are filled with roots. Punching holes through the ball to the drainage will generally relieve water-logged plants, but we have had to drill holes along the sides.

Any outdoor-grown plants should be taken up at once. If left later it will be difficult to get them into shape and they also suffer a loss of foliage if grown very large. I have recommended, in previous notes, a few stakes to keep the branches off the ground, and if this has been done, they will come up in good condition.

Outdoor grown plants, if lifted in time, and staked into presentable shape at once often make finer specimens than those grown in pots throughout the season, and, it has often happened that poor plants, especially of new varieties, which did not look promising enough at the time they should go into large pots, when planted out made good specimens. Chestnut Hill is one I have in mind now, and Pink Ivory behaves in the same way.

It will be a good plan, even though we defer staking until a week or two before exhibition time, to regulate the shoots occasionally, bringing into the center all strong shoots and carrying to the sides all weaker ones, where there is better light.

It is too late to make a good plant of a poor one. Room will be needed and poor plants should be thrown away, at least put into a pit, out of the way, if wanted for stock. This we find neces-

sary to do every season, and such gives us, at least, flowers for cutting.

Disbudding will be in order soon. Usually we limit the shoots to one bloom, but if it appears there will be spaces not well filled we allow three blooms to develop. Garza and other anemones and pompons we do not disbud.

Our plants for decorative purposes have been growing along in their own way. We would just as soon have them unshapely. They fit better into any decorative scheme, either together, when some are left to stand alone, or stand out, or when we use foliage plants. Dwarf varieties such as Midge, Mizpah and its varieties, Golden Ball and some of the dwarf pompons we grow in considerable quantity. They come in splen-

VICTOR V. MORRIS.
President Salt Lake Florists' Society.

didly for edging or color massing. We do very little disbudding, except in the case of a few of the large-blooming varieties, which are used for contrast only.

Red spider is an insidious pest, and we must spray frequently, and as long as we can. T. D. HATFIELD.

Victor V. Morris.

The president of the newly organized Salt Lake Florists' Society is Victor V. Morris. He is 29 years of age and a native of Salt Lake City, descending from a pioneer family, his grandfather and great-grandfather having borne prominent parts in the founding of the city. For more than five years Mr. Morris has been identified with the retail flower trade. He was for several years manager for the B. C. Morris Floral Company but he has recently assumed the direction of the retail stores of the Salt Lake Floral Company, which, organized a year or two ago with ample capital, is building up a large plant for the production of cut flowers. It is one of the most progressive concerns in the west and the accession of Mr. Morris to its forces is a matter of congratulation for both. He is both popular and energetic and under his guidance success lies ahead of the new society; indeed, at its second meeting eleven names were added to the original list of members and the organization now embraces practically all those in the trade. Mr. Morris is also

a leading spirit in Lodge No. 85, Benevolent and Protective Order of Elks.

Decorations in Floral Parade.

One of the most interesting features of the celebration of the semi-centennial of the town of Swampscott, Mass., on July 21, was the floral parade. We present herewith reproductions of photographs of two vehicles decorated by Julius A. Zinn, of Boston, one of which (Mr. Traiser's) was the winner of the first prize silver cup. The flowers used on this were all white, lilies, carnations, lily of the valley, and so forth, and the carriage and livery were blue. The other carriage, belonging to J. I. Taylor, was all in lavender and purple sweet peas, with a few Fair Maid carnations with bows of pink ribbon. No artificial flowers of any kind were employed.

Seasonable Plant Notes.

Cool nights have been the rule rather than the exception throughout the summer of 1902 in the eastern part of this country, and temperatures of 50° to 55° have been by no means uncommon, even during July and August. Such conditions have been very favorable for lawn grass, these low temperatures having been accompanied by abundant rains during most of the season, but are not quite so conducive to the rapid growth of plants under glass, and also necessitate considerable care in the watering of freshly potted and unestablished plants, the root growth of palms, for example, being less rapid under such conditions than it is when the prevailing weather is clear and bright and the night temperature seldom below 65°.

A sufficiently moist atmosphere is required for the successful culture of such plants, but this does not mean that the foliage should be reeking with condensed moisture in the morning, and the only way to avoid such a condition of the plants is by giving a fair amount of ventilation during the night. One does not like to begin firing early in the season, and especially so just now with the great uncertainty that prevails in the coal market, but it is usually more profitable to use a few tons of coal in this way than to give a houseful of valuable plants a severe check by overdoing the economical plan. It is safe practice to follow the plan of the successful rose grower in starting a little fire when he finds that the mildew is getting ahead and that the foliage of his roses is hung with heavy dewdrops in the morning, a condition that so often portends an attack of the insidious black spot and other tribulations.

The time is also at hand for the removal of tender plants that have been outdoors for the summer to the protecting shelter of the greenhouse, and it is well to remember that such stock does not need to be cooped up to any great extent after it is brought indoors, but on the contrary should have plenty of light and fresh air. Take into consideration the fact that these plants have been enjoying unrestricted ventilation, and if kept too close when under glass are likely to start a weak and thin growth, and thus lose some of the advantages that have been gained by their former outdoor life.

This suggestion will apply to poinsettias, Ficus elastica, stevias, solanums and other stock of a somewhat tender nature that may have been growing in the open or in cold frames, and which,

PRIZE WINNER IN COACHING PARADE AT SWAMPSCOTT, MASS.

(Decorated by Julius A. Zinn, Boston.)

while being improved in habit and condition by an open air sojourn, are likely to suffer to some extent when left out too late in the season, the poinsettias especially being liable to injury if allowed to stay out too late in the season. Such plants as azaleas, metrosideros, acacias, sweet bays and araucarias may be allowed to remain outdoors for some time yet, unless there should be danger of actual frost, these being cold house plants and remaining in better condition in the open air as long as possible.

Mignonette is a favorite flower with a great many people and usually is fairly profitable when well grown. It is at this season that the foundation is laid for the winter and spring crop of this modest but fragrant flower. A good depth of well manured soil and a low temperature, combined with full light and plenty of air, are among the essentials for successful mignonette culture, and the middle of August is considered by most growers the best time to sow the seed.

A solid bed is preferable to bench culture for mignonette, from the fact that the roots of this plant prefer to be kept cool. Although some good spikes have often been grown in rather antiquated structures, yet a good light house with provision for abundant ventilation will give the grower much advantage in the race. New soil is best and that of a rather turfy character is most favored, the best fertilizer being cow manure, though the latter is better adapted for use when not too fresh. It may be used in quite liberal proportions, one part of manure to five or six of soil, according to the quality of the latter, not being too much. A sprinkling of bone dust will also be found helpful, the whole compost to be thoroughly mixed as it is brought in.

The easiest method of sowing the seed is in shallow drills across the bed, making the drills about one foot apart and sowing the seeds rather thinly, but pressing the soil down quite firmly over the seeds. After the seedlings are up enough to allow of selection, they should be thinned out to about six inches apart in the row, and the surface of the soil kept stirred up with a small rake or weeder,

the soil being given water enough to keep it thoroughly moist without becoming sodden.

It is about this stage of the proceedings that troubles may begin, and one of the first to appear is usually a small green caterpillar similar to the cabbage worm, and also resembling the latter in having a most voracious appetite. These worms may usually be conquered by hand picking or by a light application of Paris green, but continual watchfulness is required, for it is really surprising how much injury may be done in a couple of days if these pests get a start.

A measure of prevention is sometimes adopted in the form of a cover of fine netting over the open ventilators of the

house, in order to keep out the small yellow butterfly that is the parent of the worm in question.

Greenfly is also quite partial to mignonette, but this insect may be kept in check by frequent applications of tobacco dust. The best night temperature for the growth of the plant in question is 45° to 48°, for while the flower spikes do not develop quite as rapidly under such conditions as when grown in a higher temperature, yet the quality is much better, and a longer succession of good bloom will be had under the cool treatment suggested.

Mignonette in pots is also in demand in the winter and spring, and in this case the same soil and general treatment will be required, several seeds being sown in a 4-inch or 5-inch pot, preferably the latter, and the seedlings being thinned out to three to a pot. As the plants gain size they will need a neat stake and a tie of green silkline to keep them in shape, and toward spring it may be found necessary to give the plants a watering with liquid manure about once a week to keep them in an active condition, but if well grown these pots of mignonette will usually find a ready market.

As to varieties, there are several from which to make a choice, but for pot growing a good strain of the old Miles' Spiral is very satisfactory, while for cutting either Machet or Allen's Defiance is very satisfactory, and will produce immense spikes when well grown.

Pansies for winter flowering may be grown in the same house with the mignonette if it is not desired to occupy the entire house with the one crop, the same conditions applying very well to the pansies. If one desires to use pansies to any great extent in funeral work it will be the best plan to sow named sorts in solid colors, in order to get a good supply of any particular color, but if the demand for that purpose is limited then any good strain of large-flowered exhibition pansies will answer.

DECORATED BY JULIUS A. ZINN FOR THE COACHING PARADE AT SWAMPSCOTT, MASS., JULY 21.

But pansies for winter blooming should have been sown some two months ago, and should now be large enough for transplanting to their permanent places, the pansies differing from the mignonette in the fact that the former may be transplanted at any time, while the mignonette is much more satisfactory when sown in the position in which it is to remain.

W. H. TAPLIN.

ROSES.

SEASONABLE TREATMENT.

The young stock should now be well along and no doubt much of it is ready to let go for a few early flowers. But do not make the mistake of letting every bud come, as this is very apt to weaken the plants. All of the weak and short stems should be cut back, and by cutting back quite short the next break is very apt to come stronger. It is also a good plan to leave only the strong breaks on the top of the plant and to pinch back those which come from near the base until there is a strong and stocky base to each plant. It is much better to watch each house carefully and pinch back all of the smaller plants until they have reached the proper size, permitting to bloom only those which are strong enough.

The weather has already started in quite cool and it is not safe to try and do without heat at night. The extra cost for heat will be fully repaid by having stock free from mildew and black spot.

Unless Liberty is doing exceptionally well it will be wise to keep it cut back some time yet. In order to get good, strong stems later on it is necessary to keep them in check long enough to have a large, strong plant.

Golden Gate and Ivory are very strong growers and are not liable to be bothered with mildew or spot, but they are apt to make too much brush and blind wood and there are no bad results to be feared by trimming this out.

If you have any old houses which are being carried over through another winter they will need a liberal amount of nourishment now. After they have been dried off they should be started gradually until the new eyes have started and then a top dressing should be applied. To get the best results it is best to tie them down and thereby induce the lower eyes and those along the old wood to start, as these usually make good, strong shoots.

Do not let the soil become weak and destitute of nourishment, as by keeping the plants in a growing condition you will find it much easier to keep off the black spot and mildew. R. I.

Hardy Perennial Phloxes.

[A paper by John G. Gardner, read before the Pennsylvania Horticultural Society, Philadelphia, September 16, 1902.]

The word phlox is Greek for flame, alluding to the general brilliancy of the flowers of the natural order polemoniaceae, a genus comprising about thirty species, chiefly North American, annuals and perennials, and it is on the latter I wish to address you. I will mention two types of phloxes which in the past have been divided into two sections, early and late-flowering, termed respectively *P. suffruticosa* and *P. decussata*, but at present, with so many seedlings, it is difficult to judge of the parentage and the general characters of growth are lost.

Undoubtedly the early flowering phloxes come from *suffruticosa* and the late flowering from *P. paniculata* and *P.*

maculata. In my opinion the types of the latter are the most beautiful for the garden and when planted in masses, with panicles one to two feet long, in so many forms, as densely filled with bloom as hydrangeas, and the great profusion of flowers of fine form and substance, they are a sight to behold.

The perennial phloxes are one of the most important classes of hardy plants we have to-day for the garden, the culture is so simple, as they grow in any good garden soil, blooming from May until frost, a feature not often found in hardy plants.

The perennial phloxes have a bright future and improved forms are appearing annually. We may confidently look forward to a great extension of their use as their merits become better known among the general public.

The general use of the hardy phlox has been for effect in grouping and massing in the hardy border and for cut blooms, but in the near future they will be used for bedding and massing upon the open lawn. My attention was first called to bedding the perennial phlox on the open lawn by a letter from A. E. Wohlert, of Altoona, Pa., three years ago, and his graphic account of the beauty of them took me to Altoona the second week in September.

I can safely say I was well paid, for my visit was a pleasant surprise. Mr. Wohlert had a circular bed planted with Lothair, salmon red, and bordered with Independence, while sectional beds were formed of *Etna*, bright red, and *Fiancee*, white. I must say the beds were beautiful indeed, one mass of bloom, the height ranging from one and one-half to two feet.

Mr. Wohlert assured me that they had been in bloom since the middle of July and that he planted two-year-old roots propagated from cuttings. He pinched them back the first week in May and again the first week in June, to make them branch out, and used good rich loam and watered liberally. From that time my love for the perennial phloxes became strong and at present we are great friends.

A few named varieties which have pleased me in my work, will, I have no doubt, be interesting to you.

Whites—*Fiancee*, *Independence*, *Queen*, *Snowflake*.

Whites with pink disk—*Mme. Fonnier*, *Richard Wallace*, *Mrs. James Young*.

Pinks—*William Robinson*, *Le Siecle*, *Carran de Ache*, *Lothair*.

Crimson—*Epopee*.

Reds—*Etna*, *Mme. P. Langier*, *Oberon*, *Coquelicot*.

I have made these selections not chiefly on account of large individual flowers, but mainly for density of bloom, branching habit and good growth.

The types of *suffruticosa* make beautiful pot plants for home and greenhouse decorations. Last spring I had them in bloom early in March.

The best method of propagation I have found is to lift from open ground two-year-old clumps in January and put them in the greenhouse, taking cuttings in February, which will root freely in about twenty days. Then pot in 2½-inch pots and when well rooted shift into 4-inch and 5-inch pots. Keep well pinched to make them branch and plant outside end of April. Phloxes when well handled in this way in a temperature of 60° will grow very rapidly and make good, strong, branched plants and will bloom splendidly in July, August and September.

I am pleased to say that I have some very promising seedlings which I raised the past three years from crosses of *suffruticosa* and the *paniculata* and *maculata* forms. This season I have been making trials to cross *divaricata* with the above sorts, hoping to see seedlings that will flower outside early in May. I am also using *Drummondii* to get, if possible, the beautiful colored flowers of the Texas varieties. I hope to report upon this subject later.

WITH THE GROWERS.

VAUGHAN'S, WESTERN SPRINGS, ILL.

At Vaughan's Greenhouses, Western Springs, at the time of my visit everything pretended the advent of cool nights. Plants were being hurriedly housed and precautions taken against the invasion of the frost king. In looking over the chrysanthemums it seems as though a good many of the specimen plants will be near perfection. The cuts are also looking well. There is a yellow that is due for a high place.

Begonia Gloire de Lorraine is in fine condition and is growing as freely as watercress does in a sunny stream in May.

There are a few novelties at Western Springs that must make their mark. First is an *acalypha* with large, acuminate leaves eight inches long by four to five inches wide at the broadest part. The color is a deep green ground regularly marbled with deep primrose blotches, uniformly spread over the surface. It stands heat and sun here outdoors and is one of the few sterling foliage plants recently added to our gardens. It is equally good indoors.

A pure yellow *canna*, with no markings of any kind, with good-sized flowers, compact and rather dwarf habit, is a gem and one of the most desirable among the many kinds that have a good standing. It is appropriately named *Buttercup*. Another good *canna* is *King Humbert*. It is a great advance on *Egandale*.

There are at Western Springs about two acres of phloxes and they are truly magnificent. When I was at Queens, some eighteen years ago, I ventured to push herbaceous phloxes. How hard I worked for them, and I have not let up yet. It's just beginning to dawn on many people that there is merit in this, the peer of all August flowering plants. If paeonias deserve a special committee, I am sure phloxes can go them one better. Mr. Wilson says that he felt, until two years ago, that there was no reward, but a 10,000 sale this spring has cheered him up and he is going in for 50,000 for next spring. The collection contains over eighty varieties and there is not a bad one among them. Cut these down to forty and they are grand, and if you want twenty-four you can have all gems.

The most marked improvements in the *decussata* section during the past ten years are in the width and depth of the panicles, the size and texture of the flowers and the sturdy dwarfness of the plants, together with the elaboration of all of the colors. There are no plants that have the same fiery red flowers, except perhaps *Saccolabium curvifolium*. There are no flowers that have the same soft blending of pink shades with marbled centers and there are no flowers that have as wide contrasts as the white forms, having purple and crimson eyes, to say nothing of the darker and more intermediate shades. No frost hurts them, no wind breaks them and they

PRIZE FLORAL DESIGN AT TORONTO INDUSTRIAL EXPOSITION.

J. J. Simmons, artist.

appreciate all the care given them. So much for herbaceous phloxes.

JOHN THORPE

St. Louis World's Fair.

The contract for grading the sites of the Palaces of Agriculture and Horticulture at the World's Fair has been let. The work will require the handling of 252,000 cubic yards of earth, carrying it an average distance of 500 feet. The Agriculture building, according to revised plans, will be 600x1600 feet, covering an area of nearly a million square feet, or more than twenty-two acres. In this great building will be displayed the agricultural exhibits of the states of the Union and nations of the world. The location of the building is

near the central part of the exposition grounds and its immense size, upon the elevated site which has been allotted to it, will make it perhaps the most prominent of the fifteen great exhibit palaces.

The Palace of Horticulture will stand directly south of the Palace of Agriculture and will be 400x800 feet, having an area of 320,000 square feet, or seven and a half acres. One room in this building 400 feet square will be devoted to fruits and fruit products, another room 200x200 to a conservatory with plant display and still another room 200x200 feet to the accessories of horticulture, such as implements and appliances for the cultivation and handling of fruits and plants. The elevation of these palaces is such as to afford opportunity for terraced gar-

dens and other beautiful landscape effects, while the outdoor exhibits of agriculture and horticulture will be very extensive and interesting both to the general visitor and the practical grower or expert. Frederic W. Taylor is the chief of the department of agriculture and acting chief of horticulture.

The plans for both these great palaces are now being prepared in the department of works, under Isaac S. Taylor, the director of the department, and it is the expectation that they will surpass in beauty and arrangement the similar palaces at any former exposition.

Hybridizing.

BY GEORGE BOLLES, TORONTO.

[Read before the Canadian Horticultural Association at the Hamilton convention, September 3 to 5, 1901.]

I have been asked to write a short paper on hybridizing and am pleased to do anything I can to help this branch of the profession. I cannot tell anything new to some of you, for although I have worked hard at this branch for a good many years, I don't know it all by a long way.

I have a list of eighty-seven varieties of chrysanthemums that I grew twenty-five years ago. Looking over their names I cannot trace any of them to-day; they are gone and many more with them. As far as I can remember they were nearly or quite as large in bloom as we have to-day, but we now have far better stems.

To have any success in raising seedlings you must grow plants for that purpose, as the highly fed single-stemmed bench or pot-grown plants are in most cases all petals. But grown in rather poor soil you can get pollen from most varieties, and the seed bearing plants would be better, that is, after being fertilized and kept in a house where the atmosphere is drier than the ordinary chrysanthemum house.

I always fertilize the full-petaled flowers, that is, such varieties as Viviani-Morel with Perrin, rather than Perrin with Morel. By working that way I have had very few single seedlings, the other way many.

Don't be in too great a hurry to cut the seed heads off. Leave them to get ripe. Some will not be ready before the end of January. Lay them on paper for a few days to dry, rub out and sow at once. Sow each sort in a pot by itself and label it, and when the seedlings appear (they may take three weeks or more) transplant when large enough, putting one in each small pot, using a light soil both for the seed and also for the small plants.

I always root the tops of the seedlings and grow them on the bench with the old varieties, keeping the stock plants in pots. The seedlings must be extra good to beat those already on the market, and it may take years, but go ahead and have a try. There's room on top yet.

In crossing carnations one must be careful to seed the most vigorous and healthy growers. In varieties that do not seed the seedlings will resemble the male parent. Take Scott for instance. I have had seedlings you could not tell from the parent. The same with the chrysanthemums.

Better work among your own seedlings, selecting the best each year. Keep no weak stems, even if the flower is good. The carnation of to-day is, I think, near perfection, but some want a better stem.

I would like to see some one try his hand with asters. There are some fine varieties, I admit, but they could be

improved by crossing and selecting and growing each variety by itself, pulling out all poor plants and flowers that show a big center. Without going to the trouble of crossing you can by saving seed from the double flowers improve your strain. I know that for a fact, but colored flowers will come among the white, at least that has been my experience. By making a specialty of any flower and being careful you will some day get something good.

Winter Flowering House Plants.

BY C. A. SMITH, LA BINE, QUE.

[Read before the Canadian Horticultural Association at the Hamilton convention, September 3 to 5, 1902.]

Geraniums of the single varieties make splendid plants for winter flowering. Cuttings should be taken about the first week in March, inserted in the propagating bed, and when well rooted potted into 2½-inch pots. Repot into 4-inch when these are well filled with roots. After the 4-inch size is well filled with roots repot into 6-inch or 7-inch according to the size of plant wanted. After all danger from frost is over, they should be placed outdoors in the full sun and kept well pinched back, also keeping all the blooms pinched off until about three weeks before they are wanted to flower. Then they should be given manure water once a week right through the winter.

Poinsettias, both double and single, are fine winter plants. Cuttings rooted in May and carried to one stem, flowered in 6-inch pots, make splendid bracts. I have had some ten inches across. They are best kept on the dry side at all times, for if they once get sodden they will surely lose their bottom leaves. They should be kept in the greenhouse at all times. A few old plants put out in the garden in June will give cuttings which can be rooted in sand in August, putting four or five plants in a 6-inch pot. They will flower when from ten to fifteen inches high. Given a little manure water they will last all through the winter. The soil used should be good coarse loam and well rotted cow manure with a liberal supply of sand.

Euphorbia jacquiniæflora makes one of the best plants for winter, as it lasts in any ordinary greenhouse for three or four months. Cuttings should be struck in May and when well rooted potted into 2½-inch pots, using loam and leaf mould and a little peat and sand well mixed. Put three or four into the pots and shade for a few days. When well rooted, repot into 5-inch pots using the same soil as for the first potting. Keep in the greenhouse all summer and when the pots are well filled with roots feed liberally with weak manure water. The result of this treatment will be sprays of bloom from fifteen inches to two feet long.

Primulas and cinerarias make good winter plants. Seed should be sown in April or May, pricked out into 2½-inch pots and placed outdoors in a frame. Keep slightly shaded and repot into the next size when necessary, using good coarse and rather rich soil. When the plants are well rooted in their flowering pots, they may be left out in frames until there is danger of frost, and fed once a week with manure water. A second sowing may be made in July, which will make good plants flowered in 5-inch pots. They will come into bloom during February and March.

Begonias of the different tuberous-rooted varieties are very useful. They can be rooted in sand and, when well

rooted, potted into 3-inch pots, using loam, leaf mould and cow manure. Repot when necessary until the flowering size is reached, when they should be fed liberally right through the winter. The Gloire de Lorraine makes splendid plants, either for pots or baskets. They should be kept in the house all summer and well shaded.

Cyclamens are fine plants for winter. Seed should be sown in January and placed in the warmest part of the greenhouse until the plants have made two leaves. Then they should be pricked out in shallow boxes, using three parts leaf mould and one part loam and sand. Leave until April, then pot them, using two parts loam and one part cow manure, one part leaf mould and plenty of sand. Keep the plants out in the frames as long as possible but shelter from heavy rains and midday sun. Water liberally with manure water when the buds appear.

Salvia Scarlet Dragon makes fine little plants for winter if cuttings are rooted in August, potted in good rich soil, and flowered in 5-inch or 6-inch pots. Alysums also flower well if taken up from the beds and potted about the first week in September, cutting the plants back very hard.

Browallias and gesnerias are very useful. The blue of the browallia is a color we are very short of in the winter, while the gesnerias make perfect plants till about Christmas, when they should be gradually dried off. Of course there are lots of other plants too numerous to mention, such as azaleas, cannas, fuchsias, callas and the different kinds of bulbs which make good plants for winter and are very easy of culture.

Tarrytown Horticultural Society.

At the last meeting of the Tarrytown Horticultural Society, President Wm. Scott in the chair, N. H. Diamond and Mr. Stranall were elected to active membership, Homer Hitchcock was proposed for active membership and H. Walter Webb and H. C. Graef were elected to honorary membership. Francis Gibson exhibited a vase of gladioli and some very fine asters. A very interesting and instructive essay on bulb forcing was read by Joseph Bradley, of Hastings, and was ably discussed by Messrs. Pearson, Moody, Bradley, Cockburn, McFarlane and Gibson, after which Mr. Bradley was tendered a vote of thanks.

H. J. R.

Roman Hyacinths and Lachenalias.

The *Gardeners' Magazine*, London, recommends *Lachenalia pendula* as a good combination planted with Roman hyacinths. The very soft red of the lachenalia harmonizes rather than contrasts with the pure white of the hyacinths. Sutton & Sons make favorable comment on the same point in their latest bulb catalogue and remark that many other exquisite companionships of a similar nature will occur to those who possess taste in grouping colors effectively. All of which is very true but the trouble with most gardeners is that they do not possess "taste in grouping colors effectively." A course of Schuyler Matthews or Chevreul would be of great advantage to even those who have some natural good taste and to those who have not it would enable them to refrain from the horrible nightmares in the way of combination which one frequently comes across both indoors and outside.

G. C. W.

Spraying With Paris Green.

At the recent meeting of the Canadian Horticultural Association at Hamilton, Roderick Cameron, superintendent of Queen Victoria Park, Niagara Falls, Ont., said:

"Perhaps some of you noticed that the trees, particularly the plums, along the trolley line from Hamilton to Grimsby had lost their foliage. This, in my opinion, is caused through spraying with Paris green. (Prof. Hutt gave it as his opinion that it was caused by fungus.) There are many things burned by spraying with Paris green. A little experience that I have had in this line I believe would be worth thousands of dollars to this country.

"Paris green, if it is properly used, will not harm any plant, whatever the plant may be. You can make the plant green with it and it will not burn the leaf if it is used in the right way. Take about a pound of Paris green and put it in a small can, and put enough water into the Paris green to make a soft paste. Take as much of it as will make the water as green as you want it, and spray any plants, after the sun goes down. If the sun comes out after that plant is sprayed it will certainly burn. But if put on after the sun has gone down it will not injure the tenderest plant.

"No plant is more quickly injured than the egg plant, the leaves of which are very tender. I have made the leaves of this plant so green that they were like Paris green themselves and not a burn resulted."

Philadelphia.

MARKET PEOPLE HOLD A VERY SUCCESSFUL MEETING.—PROJECT FULLY LAUNCHED.—QUARTERS LEASED AND CHARTER APPLIED FOR.—THE DIRECTORS.—LOCATION CHOSEN OUTSIDE THE WHOLESALE FLOWER CENTER.—TRADE SHOWS AN IMPROVEMENT.—STOCK IN FULL SUPPLY.

The meeting to further the cut flower market project held Thursday evening, September 11, in Horticultural Hall, was a success from every standpoint. There was a large attendance, something over fifty persons being present, and all showed the greatest interest in the proceedings. As is usual in such gatherings, a number of subjects were discussed which properly belong to committees and much talk without purpose was indulged in. A number of smaller growers seemed to have an idea that they would not be on the same footing as the larger ones, for the reason that as the stock has been subscribed for by some in amounts of fifty shares, while others have only from one to five shares, that three or four of the larger holders could get together and carry out any project they pleased. It was explained, however, that although there is a capital stock of 1,000 shares only 750 are to be issued, of which 619 have been subscribed up to the present in the names of over thirty-five persons. This seemed to set at rest this objection, but there still remained the commission man, each one of whom looked as large as the side of a house to the small grower. Several of the wholesale men were in the audience and their manly bosoms must have filled with pride when they discovered the importance of their position. Some would not hear of their admission at all; they were to be barred out unconditionally. Others thought that they might be admitted subject to such restrictions as may be found neces-

PRIZE BRIDAL BOUQUET AT TORONTO INDUSTRIAL EXPOSITION.

(J. Simmons, artist.)

sary. Finally the matter was dropped without action. The committee on site reported favoring the Potts building on Cherry street above Twelfth. The second floor contains 5,000 square feet and the third 9,000. The latter is lighted on three sides and has two freight and one passenger elevator. There is also an abundance of water and in every way it is very well fitted for the flower market. In the election of temporary trustees which followed, the following gentlemen were chosen: Joseph Heacock, W. K. Harris, Edwin Lonsdale, John Welsh Young, W. P. Craig, John Westcott and H. G. Tull. At a meeting of the directors on Saturday Edwin Lonsdale was elected president, David Rust secretary, and Joseph Heacock treasurer. Charles

Meehan has been offered the position of superintendent and is likely to accept. I believe the directors have made an admirable selection, as Mr. Meehan is thoroughly well fitted in every way for the position. On Monday last the directors visited the Cherry street building and signed the lease. It is thought that it will be nearly November 1 before the market will be open for business. Application for a charter has been made.

I cannot but feel, now that the market is about to be opened, that the question of location should have had more careful consideration. The wholesale flower center of the city is Sixteenth street above Chestnut; within one block of this point there are six establishments. This center

must be the most convenient for all parties concerned. Twelfth and Cherry streets is almost five blocks from this center and this fact should have stood in the way of its acceptance. At least half of the flowers that come to this market are handled by commission merchants who have found it to their advantage to get together as closely as possible and it seems as if it would be good policy for the growers to join them and make this neighborhood even a better center and one that will be most attractive to buyers. In New York the wholesale trade has become so centralized that a journey of two city blocks, or about equal the distance of one of ours, covers the whole district. No one who hopes to do business would now think of locating out of this center.

Things are looking a trifle brighter. The retail business is picking up a little, but there is much to be hoped for. Flowers are plentiful, almost all reasonable items being in full supply. Beauties are advancing a trifle, probably to make up for their improved appearance, as they are finer each week. In fact I do not remember such good quality at this season before. Prices range from \$1 to \$2.50 per dozen. Kaiserin and Carnot sell as high as \$6 per hundred. Brides and Bridesmaids bring from \$2 to \$4. Liberty commands \$4 to \$8. The Floral Exchange is cutting some nice blooms of Queen of Edgely, most of which go to Boston. W. K. Peacock, of Atco, N. J., is sending in his usual fine supply of dahlias. His acres of this showy fall flower are a great sight and well worthy a visit. Mr. Peacock gets wonderful results from his dahlias and is certainly the greatest expert in this country. Asters are holding out well but have commenced to deteriorate, the flowers being smaller and the stems weaker. There are no chrysanthemums in sight as yet.

Robert Crawford has been giving his beautiful store its annual touch-up. This time it is a new wood carpet floor and a new mosaic top on the counters, in addition to a new mirror or two. K.

Chicago,

BUSINESS MOVING ALONG NICELY.—ALL GOOD STOCK FINDING READY SALE.—SHIPPING BUSINESS BRISK.—STEADY CALL FOR BEAUTIES AND FUNERAL FLOWERS.—WITH THE NEW ROSES.—CLUB MEETING.—VARIOUS NOTES OF LOCAL DOINGS.—PERSONAL AND TRADE JOTTINGS.

There has been no complaint as to business this week, the principal difficulty being in filling orders. There has been a very steady shipping demand, and local trade is beginning to show increased activity. There has been a heavy call for high grade funeral flowers, the obsequies of W. S. Stratton, a western mining king, resulting in some of the heaviest orders of the season for shipment to Colorado Springs on Tuesday. Violets in quantity were ordered for this occasion, but it was not possible to supply them, nor could all the lily of the valley wanted be supplied. The production of valley for this market is now largely in the hands of two growers, H. N. Bruns and August Jurgens, and it makes them a very nice thing, although there are several smaller growers participating. The call for Beauties is a feature of the rose market. The supply shows some diminution and the increased demand makes a shortage; orders received late in the day frequently go unfilled. All through the market the Beauties are of exceptional quality, the weather having been exceedingly favorable. The accelerated demand and some-

what decreased receipts has produced a shortage of good tea roses. There is not so large a proportion of the stock coming short-stemmed, but there is a home for everything of quality now received in this market. Kaiserin is easily the best of the roses, some of the best stock being held for \$8 and \$10 per hundred. Carnot, Chatenay and other specialties go well. Receipts of carnations have not shortened to any great degree, but a wider market has resulted in cleaning up each day's receipts at an early hour. The qualities are generally very good and increased quantities could be handled to advantage. There are still thousands of asters in the market. Qualities are still fine and they are selling very satisfactorily. Chrysanthemums are not yet in evidence but can be supplied on advance orders. The season of early autumn weddings has made a good demand for valley and greens, asparagus and smilax moving nicely.

George Reinberg is beginning to cut from his plants of Balduin rose. The blooms take well as a novelty, but no matter how conclusively the Florists' Club of Philadelphia may have determined the correct name of the variety, the local retailers persist in labeling their vases of it "Helen Gould;" they think it a much better name for advertising purposes.

There was no club meeting Wednesday evening. Thirteen members presented themselves, which may account for the fact that through error no meeting room had been reserved and Handel Hall was full that night.

Weiland & Risch are getting very fine blooms on their new yellow rose, Souvenir de Pierre Notting. They think so highly of it that they will work up stock and largely increase their planting for next year.

E. E. Piester says that while trade is good for September, it is not up to last year at this date, which was exceptionally heavy at Kennicotts. Receipts were considerably heavier a year ago.

John Poehlmann is now able to come down to the store every day with the aid of a crutch and a cane. He says he has discovered that it takes much longer to mend a knee than to sprain it.

When Benthey & Company have finished their alterations they will have practically doubled their facilities without having enlarged their floor space in the least.

McKellar & Winterson are finding a daily market for about 250 bunches of euphorbia at a "quarter" a bunch. Retailers find it useful in many ways.

Peter Reinberg and a party of friends have been at Larchwood, Iowa, this week. There has been great excitement among the wild fowl.

Clare & Scharrath, dealers in Florida natural products, have removed their Indianapolis office to Chicago, at 633 Washington street.

Klehms were heavy losers by the wet season. Hundreds of thousands of valley pips perished and the loss of lilacs for forcing was great.

H. S. Harmon is again on duty at E. H. Hunt's after a week's illness and a trip to his old home at South Bend.

John Potts has gone to Jamestown, N. Y., to do the propagating for the Lakeview Rose Gardens.

J. A. Budlong has completed his range of carnation houses and has the place all in shape for winter.

P. J. Hauswirth and family reached home Wednesday evening from their trip east.

Adiantums are a feature of several retailers' show windows.

Visitors: E. C. Keck, Washington, Ia.; J. A. Evans, Richmond, Ind.

New York.

TRADE IMBUED WITH OPTIMISTIC VIEWS.—GOOD SEASON ASSUREDLY AT HAND.—HOME COMING OF THE TRADE TOURISTS.—VACATION SEASON AT AN END.—VARIOUS NOTES OF LOCAL INTEREST.

An optimistic feeling seems to pervade all departments of the trade this fall, which is more pronounced as the weeks pass. General business in the cut flower line has apparently started up earlier than for some years past. This may reasonably be attributed to the cool season, which has sent people back to the city with an ambition to "get a move on" generally. All the retail stores report a satisfactory activity and this condition has a cheering effect on the wholesale markets where, although rapidly increasing production has more than kept pace with the augmented demand and prevented any advance in values, the feeling is well-rooted that a season of prosperity is about to start in.

The home-comings from foreign shores and domestic summer resorts are at present quite an item in the daily record of metropolitan horticultural happenings. Last week saw the arrival of August Khotert, A. Gilchrist and wife, of Toronto; L. C. Bobbink, of Bobbink & Atkins and John Scott. George Stump arrived Tuesday on the Kronprinz Wilhelm, that vessel beating the best transatlantic record on this trip. Alfred Dimmock is due to arrive on the Lucania on Saturday and in his company is F. Sander, Jr., who is making his first visit to America. Mr. Krawell, of Speelman & Sons, arrived on the Rhinedam last Saturday. From the Catskills came C. H. Joosten, after a long summer vacation, and J. M. Keller, who has been enjoying the bracing mountain air at the Keller cottage in Elka Park. A. L. Thorne, who had gone last week with Mrs. Thorne, to Rangeley, Me., was obliged to turn back on account of illness.

James McHutchison arrived home from Europe on the Maltke, September 16. Mr. McHutchison and Daniel W. Wittpenn have formed a partnership, as McHutchison & Company, to represent European plant, bulb, seed and nursery houses in America and to act as custom house brokers and forwarders, with offices at 218 Fulton street, New York. Mr. McHutchison took on several good concerns while abroad. He will travel, as heretofore, Mr. Wittpenn devoting his energies to the office work. Both gentlemen have lately been with Aug. Khotert.

Ford Brothers are having extensive alterations made in their store on West Thirtieth street. The removal of partition walls and a stairway will give them a large additional floor area and when it is completed they will have one of the most desirable stores in the wholesale section.

The Babcock funeral here this week has made an active demand for choice material. Alex. McComell made a number of elaborate designs for this occasion, among which was a superb wreath for the New York Mutual Life Insurance Company, costing \$150.

A. Wadley made his first appearance in the city since the tunnel accident, on Thursday of last week and received the glad congratulations of many friends.

Moore, Hentz & Nash are having good success in handling the Queen of Edgely

rose in this market for the Floral Exchange Company, of Philadelphia.

A new store on the corner of Forty-ninth street and Sixth avenue bears the name of Hansen.

Visitors: Phil. Hauswirth, wife and Miss Kreitling, of Chicago; G. H. Hale, Seabright, N. J.

Boston.

AWARDS AT THE RECENT HORTICULTURAL EXHIBITION.—MANY NOVELTIES RECOGNIZED.—THE PRINCIPAL PRIZE WINNERS.—HIGH PRICES FOR MARKET STALLS.—NEW MARKETS CONTEMPLATED.

At the horticultural exhibition which closed on Sunday night last, the following special awards were made: To E. J. Mitton, for display of crotons, a silver gilt medal. To W. A. Manda, for Ligustrum ovalifolium aureum, a silver medal; for rose American Beauty × Jersey Beauty, honorable mention. To Col. Chas. Pfaff, for Dracena Lantuginosa, a certificate of merit. To H. A. Dreer, for Nymphaea Mrs. C. W. Ward, a certificate of merit. To A. Cowee, for Groff's hybrid gladioli, honorable mention. To M. H. Walsh for seedling perennial phlox, honorable mention. To J. E. Rothwell, for Cypripedium Fairy Queen, honorable mention. To J. S. Bailey for Alocasia Waveriana, honorable mention. The majority of the first prizes for palms, greenhouse plants, crotons, lycopods, and so forth, were won by J. S. Bailey. Mrs. J. L. Gardner, E. S. Converse, A. F. Estabrook and E. J. Mitton were also winners of valuable premiums in the various classes. All the classes for dahlias were filled and every prize in this section awarded. W. C. Winter, J. K. Alexander, Mrs. J. B. Lawrence, W. G. Winsor and W. H. Symonds were awarded the prizes for general display, in the order named. These were also prominent winners in the special dahlia classes, as were also H. F. Burt and W. P. Lothrop. Prizes or gratuities were awarded to all the exhibitors mentioned in our general report of last week. In addition to the displays there recorded mention should be made of a fine show of dipladenias made by George McWilliam and Lilium Wallacei superbum by Mrs. H. L. Higginson. Many classes heretofore well represented in these annual shows, such as conifers in pots and tubs, caladiums, specimen ferns, nepenthes, cycads and greenhouse flowering plants were missing this year.

At the annual auction sale of stalls at the Co-operative Market the highest prices on record were realized and there were a large number of disappointed stall-holders who talk of locating in new markets, of which two are now contemplated, one on Province court, the other on Milk street.

James M. Tuohy has opened a new store at 192 Washington street.

Newport, R. I.

TRADE CONTINUES VERY BRISK.—SOCIAL SEASON NOT YET WANING.—GOOD DISPLAYS.—PERSONAL AND TRADE NOTES.

The combination of continuous well social functions and a horse show resulted in lively trade, cut flowers having been in large demand. Wadley & Smythe's show window in the Casino was artistically decorated with bright and well blended "horsey" colors, a large floral horseshoe studded with Beauties, forming a striking center.

W. G. Postings is a new man among us, but old in experience. He is gardener for Winthrop Chanler.

J. C. McLeish, florist and street commissioner, while watching a boat race on Labor day met with injury by a fall from a barrel upon which he was standing.

Hodgson's display of rare aquatics, giant palms, large boxwoods and so forth, proves one of the handsomest sights on Bellevue avenue.

Gardenias seemed to be the favorite outing flower with the ladies during the season.

Harry Westley has resigned as gardener for I. T. Burden, after five years' efficient service. C. J. M.

St. Louis.

CLUB HOLDS GOOD MEETING.—AN ENTERTAINMENT FUND FORMED.—NEW PRESIDENT DINES THE CLUB.—MARKET SHOWS IMPROVEMENT.—VARIOUS NOTES.

The last meeting of the St. Louis Florists' Club, September 11, was well attended. The picnic committee reported a balance above expenses. The sum was set aside as the nucleus for an entertainment fund. F. B. Call, of Clayton, was elected to membership. President Meinhardt asked the three ex-presidents, Fillmore, Halstead and Ammann, to escort President-elect J. W. Dunford to the chair, which he then vacated. Mr. Dunford was presented with the gavel by Dr. Halstead and made a short speech. Otto Koening asked the club for its endorsement as superintendent of floriculture at the World's Fair, under F. W. Taylor, which was given. Thomas Carrol, the first man to start carnation growing as a specialty in this section, was present. He has lost his sight. George Windler gave a very interesting talk on his trip to Asheville, and Wm. Trilow, of Vaughan's, Chicago, talked entertainingly on the things seen on his travels. Just before the meeting adjourned Mr. Dunford extended an invitation to all present to come down to the hotel with him to have a crust of bread and a glass of water, which proved to be a bountiful supper.

The wholesale market is much stronger this week and stock has improved slightly in quality. Liberty and Meteor lead in roses. American Beauties are fairly plentiful. Carnations are selling well. Sunday saw a shortage of pink. The Transit Street Railway furnished each of its 3,000 motormen and conductors with a pink carnation on Saturday morning and this was a good advertisement for the sale on Sunday morning, which was immense. A few early Fitzwygram chrysanthemums were on the market this week. Lily of the valley is very fine but slow sale at present.

The St. Louis County Fair last week was very successful. The premium winners in floral classes were Mrs. Ernest Knochs, Mrs. John Blank and M. Eisenhardt.

G. A. Whitman was married to Miss Frances M. Klein about a month ago, but has kept it quiet until this week. He is in the employ of H. G. Berning. R. J. M.

Columbus, O.

FROST FAILS TO TOUCH THE BEDDING STOCK.—GOOD ROSES.—COMPLAINT AT PRICE OF ROMANS.—MUCH FUNERAL WORK.

For two nights in succession we have been visited by a heavy frost but owing to favorable atmospheric conditions there was no harm done to bedding plants, and if the general rule is carried out we may now look for favorable weather for the next two weeks. There

are some beautiful beds of cannas edged with salvia now at their best in this locality.

C. A. Roth is receiving a fine cut of roses, which he claims is just a small portion of what he expects to handle later in the season. Mr. Roth, like many others, complains of the short stems on the carnations.

Many are the complaints about the high price of Romans this season and not a few will increase their order for Paper Whites and decrease that for Romans another season if the high price still prevails.

Sherman Stephens was very busy with funeral work last week. CARL.

Omaha.

STATE FAIR AT LINCOLN A GREATER SUCCESS THAN EVER.—GOOD FLORAL DISPLAYS.—SOCIETY RE-ELECTS OFFICERS.—TRADE GOOD.—NOTES.

September 3 the State Horticultural Society held its annual fair at Lincoln. The florists were well represented. Frey & Frey, of Lincoln, made a remarkable display of greenhouse plants and took first premium on same. B. Floth and L. Henderson, of Omaha, made very creditable displays of plants, as did C. Greene, of Fremont, and J. W. Hesser, of Plattsmouth. The cut flowers and floral designs this year were better than ever and honors evenly divided. Those displaying cut flowers were Chapin Brothers and Frey & Frey, of Lincoln, C. Greene, of Fremont, and Hess & Swoboda and L. Henderson, of Omaha.

September 11 the Nebraska Florists' Society held its annual election in the city hall at Omaha. J. J. Hess was re-elected president, S. R. Faulkner for vice-president, L. Henderson secretary and Geo. Swoboda treasurer. J. Bates, E. Ellsworth and G. Swenson were elected trustees.

Business has been good and stock in normal supply. McKinley memorial day rushed the sale of carnations, which brought Christmas prices, selling Sunday morning for 10 cents each, and the demand was greater than the supply.

Lloyd Vaughan, of Hunt's, Chicago, passed through the city the other day on his way to the Pacific coast.

It is with regret that I have to announce the death of Mrs. H. Petersen, after an illness of several months.

Mr. and Mrs. Arnold and daughter have returned from their vacation trip. L. Henderson has remodeled his store and has more space than formerly. GRIPPE.

Lowell, Mass.

VERY LITTLE DOING.—ASTERS IN GREAT OVER-SUPPLY.—NOTES OF PERSONAL AND OTHER HAPPENINGS.

Business is not very brisk but now and then comes a funeral order to break the monotony. Semple's asters are now in all their glory, and are being shipped to town in tremendous supply. With so many people raising them the price realized by the grower in some cases hardly pays for the picking. Think of buying choice Semples for \$4 per thousand and Comets for \$2.50! No wonder some of the growers are worried with the coal problem staring them in the face, not knowing where they are going to get their winter's supply. Labor day, which is a great holiday in this city, did not create as much business as was expected. The supply of carnations is steadily increasing but receipts are soon snapped up at 35 cents per dozen.

The floral exhibits at the Middlesex fair were not all that might have been asked. Burt, Marshall, McManamon and Haynes made displays but the showing would have been larger with better premiums. A feature was a parade of vehicles decorated with products of the soil. Burt and Griffiths had their delivery wagons in line.

Geo. Foster, at Wamesit, has just finished a 100-foot house for violets. With this addition to his facilities he ought to give good account of himself this winter.

George W. Patten has returned from Salt Lake City, where he went to attend the Elk's convention. Afterward he went on to San Francisco.

It seems that the Boston fern is to be more popular than ever, if one can judge from the large number of people looking for them at present.

John J. McManamon is at home after spending several weeks in the White Mountains.

C. L. Marshall is now in his new store on Central street.

A. C. Tingley is laid up with rheumatic fever. A. M.

New Bedford, Mass.

SEASON GOOD BUT TRADE DULL IN LATE SUMMER.—STOCK IN FINE SHAPE.—CARNATIONS A LEADING CROP.—VARIOUS NOTES OF DOINGS OF THE GROWERS.

The florists here, growers and retailers, have had a very good business the past year, although it is quiet enough now. There are no new houses being built this season. Material is too high. But the majority of the florists are improving their places. R. H. Woodhouse has torn down his palm house and rebuilt it, and has also built a fine new office. He keeps a fine stock of decorative plants and does a good deal of decorating for swell weddings. He had a job that amounted to \$100 the past week.

The season has been very favorable for growing stock. The principal crop here is carnations, and they have made a very good growth and are quite free from stem rot. We grow for white mostly the McGowan, although the Queen Louise and Flora Hill are also favorites. H. A. Jahn has a seedling white that is immense. He is growing a house of it and it will be heard from later. Daybreak is giving out and Morning Glory is being tried in its place. Joost is a favorite and the Lawson is being largely grown.

S. S. Peckham, who lives three miles out in the country, is boring a well for water. He is down 150 feet without finding anything to speak of and the drill is stuck fast, so he cannot get it out. He has commenced another hole and if he does not find water, is in hopes to find fuel oil or coal. That coal question is causing us a good deal of anxiety just now.

At the north end H. V. Sowle has about 8,000 feet of glass. His trade is mostly funeral work and he raises his own flowers.

W. L. G. Brown has torn down two old houses and is making them over into one.

Richard Nofitz is making a specialty of bulb forcing this winter. A. B. H.

LEWISTON, ME.—The display of plants and flowers at the State Fair last week was the best on record. Among the finest exhibits were those of L. C. Goddard, of Woodfords, Mrs. Lucy A. Chandler, of Freeport, and Ernest Saunders, of Lewiston.

secure insertion in the issue for the following
Saturday. Address

AMERICAN FLORIST CO., Chicago.

MRS. LAWSON is the shortest item in
the list of field-grown carnation plants.

THE cool, wet weather appears to have
been a potent factor in the production of
excellent dahlias and sweet peas in many
sections this season.

FOR those who failed to make early
contracts, the price of coal promises to
take a considerable part of the profits of
a very prosperous season.

THE business world sees in the great
grain crops of the west promise of an
unprecedentedly profitable season. In
many lines manufacturers claim that
the present affords no question of a
market, that the problem is entirely one
of production.

A GENERAL plan for an organization to
be known as the Plant and Animal
Breeders' Association has been formu-
lated by a committee of the Association
of American Agricultural Colleges and
Experiment Stations. The committee
consists of W. M. Hays, Thomas F. Hunt,
H. J. Webber, L. H. Bailey and C. F.
Curtis. The original plan was for a con-
ference of those interested in the problems
of heredity, but the interest seems to
warrant the formation of a permanent
association.

Greenhouse Building.

Winchester, Mass.—J. Newman & Sons,

Medway, Mass.—H. F. Cooper, one
house.

Do Business Every Day.

Every day may be and should be a day
good to the business man who adver-
tises. There are degrees in the yield of
the days as they come and pass, but each
and every one of them may be made
profitable. This holds with peculiar
force as to advertising. People buy
every selling day in the year. There are
seasons when they buy more than at
other seasons, but buying is going on all
of the time. The wise merchant seeks to
get his full share of the trade, whether it
be little or much. He should know and
recall the old maxim, "Out of sight, out
of mind." He must persist in advertising
all of the time if he would secure the share
he properly covets.—*Printers' Ink.*

Sell the Surpluses.

ED. AM. FLORIST:—Please do not again
print our 1-inch advertisement for carnation
plants. One insertion sold them all,
in fact brought orders for several times
our surplus. A. LAUB & SONS.
Hugbunville, N. Y.

Latest Facts About Roses.

ED. AM. FLORIST:—I noted when too
late that my stenographer in copying my
paper, "Latest Facts About Roses," read
before the Canadian Horticultural Associa-
tion, made two important omissions,
which I would like you to correct. In
speaking about Manetti stocks, the sen-
tence "When the buds begin to swell,"
etc., should read: "When they are started
at the root and the buds begin to swell,
they are ready for use."

Again, about the care of the frame, the
sentence "Keeping closed for about seven
or eight days, then giving one inch or two
of air," etc., should read: "Keeping
closed for about seven or eight days, giv-
ing it no air, unless too much moisture
should gather, when you should give not
more than one inch of an opening, just
enough to cause a slight circulation of
air to carry off part of the moisture,
closing again in the course of twenty
minutes or half an hour. After the first
seven or eight days give one inch or two
of air for two or three days, then keep
increasing it for the next twelve or fifteen
days." EDWARD DALE.

To Make Ficuses Bushy.

ED. AM. FLORIST:—Can you give us
information through the columns of your
paper on the method employed by suc-
cessful growers in branching small rubber
trees to make them bushy? It is said
some certain method of cutting, topping,
wounding, or a method without wound-
ing at all, will bring out shoots at fairly
definite points. We have a system
intensely unscientific and the branches
respond or fail to respond accordingly.
Kindly set out for us a generally accepted
method and oblige. C. B.

Give them the highest possible cultiva-
tion and nature will do the rest by exert-
ing her energies at every leaf axil, or bud,
of the main stem. Summer is the only
time of the year in which a rubber can be
grown to make branches without top-
ping. Light, heat and moisture, in the
proper proportions, are the most essential
elements for the successful growth of all
plants, and the rubber requires all of
these three in plenty. As nature in sum-
mer gives a liberal supply of the former
two, light and heat, the latter can be
easily furnished mechanically. The rub-
ber is a gross feeder and delights in a
rich soil. There is, perhaps, more than
one treatment to make natural branched
rubbers, but the following is the one most
in use. About the middle of May in our
locality (Philadelphia) make a hotbed
about twelve to fifteen inches deep out-
side in open ground, with horse manure.
One-fourth to one-third brewers' spent
hops mixed with the manure is good, but
not absolutely necessary. On top of this
place from four to six inches of good soil,
the same as one would use for chrysan-
themums. In this hotbed plant the rub-
bers fifteen inches apart. Shade them for
a week or two during the middle of the
day, when the sun shines; then expose
them to all the sunshine that a kind
Providence will give them and give plenty
of water when nature refuses her supply
in her natural way. If these directions

are carried out by the middle of Septem-
ber you will have a nice lot of sturdy
plants with few to many branches.
About this time lift and pot them and
place them in a warm house, slightly
shaded, water well and sprinkle the
foliage twice a day for a week or two.

WM. K. HARRIS.

A French Gold Medal Offered.

The French Chrysanthemum Society
offers as a premium to the Chrysanthe-
mum Society of America, to be competed
for at the November exhibition of the
Horticultural Society of Chicago, a gold
medal, value 100 francs, and a diploma.
The competition to be for not less than
thirty-six blooms, in six varieties, of
French origin. Among these the follow-
ing are all eligible:

Colette	Mme. G. Debrie
Coppelia	Mlle. Marie Liger
Calvat's Sun	Mlle. Lucie Faure
Calvat's 99	Marie Calvat
Fee du Champaur	M. Verlot
H. J. Jones (Santel 1892)	M. Chonon D. Leche
Le Grand Dragon	M. Philippe Roger
L'Enfant des Deux	M. A. Ray Jouvin
Mondes	Nouvelle Vie
Locadie Gentils	Princess. Bassaraba de
Le Fakir	Brancova
Mme. Ferlat	Ville de Bordeaux
Mme. Herreweghe	Vivand-Morel
Mme. R. Cadbury	Princess. Alice de Monaco
Mme. Carnot	Soleil d'Octobre
Mme. Von Andre	Merveille du Louvre
Mme. Deis	Mme. Emile Brandt

Other varieties of later introduction
can be used, but all blooms must be from
varieties of French origin. This being a
special prize and the first ever offered by
the French society in America, it is hoped
that the honor of winning this valuable
trophy will bring out a strong competi-
tion. The following is a synopsis of the
letter received from the general secretary
of the French society, bearing on the
above subject:

LYONS, FRANCE, AUGUST 8, 1902.

TO THE TREASURER OF THE CHRYSANTHEMUM
SOCIETY OF AMERICA, SUMMIT, NEW JERSEY:—It
is with pleasure that I have submitted to the
French society of chrysanthemum growers the
request you sent to it. Although our society is
involved in rather heavy expenses by the publica-
tion of a catalogue of the colors and plates of the
diseases of chrysanthemums, the administrative
committee has however, maintained in testifying
to your society a pledge of the friendly relations
which it holds with ours. The committee has
decided to offer you a gold medal (value 100
francs) with the emblem of our society.

I shall give the necessary orders to the engraver
so that the medal may be stamped and I shall see
that you receive it as soon as it is ready. Mean-
while I pray you accept my sincere greetings.

Yours etc., A. M. PH. RIVOIRE.

Le Secrétaire General.

JOHN N. MAY.

Toronto.

BUSINESS GOOD AND ALL SALABLE STOCK
QUICKLY TAKEN OUT OF THE MARKET.—
ROSES NOT YET PLENTIFUL.—VARIOUS
NOTES.

Toronto is at present enjoying unusual
activity in the retail business. Roses are
still very scarce, the stock coming mostly
from young plants, and the stems are
short. Cool nights have enabled the
growers to put on steam and mildew is
fast disappearing. Beauties have picked
up considerably and are better colored
and longer stemmed, and with favorable
weather will soon be plentiful. Good
Kaiserins from Dunlop's, Bridesmaids
and Morgans from the Toronto Floral
Company and Brides from the Dale
Estate are quickly bought up. Perles
are much in demand, as yellow seems a
favorite color this season, but as yet
there are few good ones to be had. Car-
nations are also scarce, mostly being cut
from outdoor stock, but those planted in

look very promising, and another week will see many more flowers. Some very good dahlias from our specialists, Tuttle Brothers, have done much to relieve the shortage of the cut flower market. Asters are still in abundance and some good sweet peas are still in the market. Lilies of all kinds have been around all season and have helped out with funeral work. Violets will be with us soon, for a few fairly good flowers have been picked.

The cut flower show at the Toronto fair called forth considerable competition in the way of annuals, perennials and hardy shrubs, but in the class of roses, carnations and made-up work competition was not as large as in former years. For best funeral design J. Simmons was first, Jay & Son second, F. C. W. Brown third. For best funeral wreath F. C. W. Brown took first. For best presentation basket, Jay & Son first. For centerpiece and bridal bouquet, J. Simmons first. On roses Walter Muston, of the Toronto Floral Company, took the firsts. In the other classes Wm. Rennie, Manton Bros., Geo. White, Chas. Scott, Robt. Brooks, Grainger Brothers and Roderick Cameron, of Queen Victoria Park, Niagara Falls, each took prizes.

J. H. Dunlop recently took his employes to his summer cottage at Rosebank for a day's outing. The usual outdoor sports were indulged in, prizes being offered for the different events.

Geo. Hollis seems to be having more than his share of hard luck. His horse was found beside the railroad track the other day, having been killed by a train.

E. Collins, foreman at the Horticultural Gardens, is on a trip to the old country.

Visitors: Robt. Harper, Hamilton; Jas. White, Montreal; E. Maxson, Lindsay; J. Hay, Brockville. H. G. D.

San Francisco.

MARKET SHOWS IMPROVED PRICES FOR GOOD STOCK.—TOO MUCH RUBBISH.—NOTES OF THE GROWERS AND OTHERS.

Pick & Faber are building a house 25x180 for carnations, with an addition for propagating purposes. Their carnations are all benched, except in the new house, and are looking very well.

A stiffening of prices for good carnations and roses, an over-production of cheap stock and a fair business, with plenty of warm weather, is the record of the past week.

T. Tuttle, of the Oregon Nursery Company, Salem, has been visiting here and is well satisfied with the outlook for next winter's business.

Wm. Eldred has been advanced to the superintendency of the Crocker estate.

T. Berry, who leased Pottet's Nursery last winter, has given up the venture.

A. Carbone, has resigned his position with D. O. Mills. GOLDEN GATE.

Providence, R. I.

FLORISTS' CLUB WANTS MEMBERS.—TRADE NOT YET ACTIVE.—VARIOUS NOTES.

The Florists' Club is not satisfied with present prospects and is engaging an ambitious committee to go into the high-ways and byways and bring in the good men. One of the members is trying to form a bowling team.

Maenair had the arrangements for the unveiling of the Samuels monument last Friday. The entire granite was covered with streamers of green galax and white and pink flowers.

Although things have improved since the first of the month, we must wait till

frost before any active business comes. Design work still gives encouragement.

T. J. Johnston's building is being increased three stories in height, which will interfere with his window display for some time.

Messrs. Johnston and Rennie are in Baltimore for a few days. M. M.

Washington.

NOTES OF VARYING INTEREST OF DOINGS AT THE NATIONAL CAPITAL.

F. H. Kramer has finished his new rose house, 30x206. He has planted about 10,000 Beauty, Meteor, Ivory, Bride-maid, Bride and Golden Gate. His carnations in the field are looking well and he is getting five houses in shape for planting.

We are having fine weather. The nights are cool but the sun is quite warm during the day. Bedding in general about Washington is looking very fine, especially the canna and sub-tropical beds.

N. Studer has some of his carnations planted; he will house about 8,000 plants in all. He also has a fine stock of decorative plants. P. G.

Coming Exhibitions.

[Secretaries are requested to supply any omissions from this list.]

BOSTON, MASS., November 6-9, 1902.—Chrysanthemum show Massachusetts Horticultural Society. W. P. Rich, Sec'y, Horticultural Hall, 360 Massachusetts avenue.

CUT FLOWERS AT WHOLESALE.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

WALTER P. STOKES, Pres.; C. N. PAGE, First Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

ROMAN hyacinth bulbs, 13 to 15 centimeter grade, are practically out of the market.

ALFRED EMERICH, of Vilmorin-Andrieux & Company, Paris, is due at New York to-day on the La Touraine.

AUGUST RHOTERT arrived home September 13, on the Fuerst Bismarck, from an extended European trip.

VISITED CHICAGO: Frank Emerson, of the Western Seed and Irrigation Company, Waterloo, Neb.; Mr. Root, of Barteldes & Company, Denver, Col.

HOWARD EARL, of Burpee & Company, Philadelphia, reached home Tuesday from a two weeks' inspection trip among western and eastern seed growers. He reports many short items.

THE crop reports sent out by Nebraska vine seed growers show conditions to be worse than was feared, particularly so on cucumber seeds. These promise to be as scarce as the proverbial hen's teeth the coming season.

European Seed Crops.

The following is the condition of European seed crops as reported by special correspondents by latest mail:

GERMANY.

The crop of this year is much behind on account of the wet weather which now rules in Germany and which has lasted for almost two months. We have hardly one hour of sunshine during the whole day and in the middle of August the thermometer went down some nights to 38° to 40° Fahr. Lettuce has suffered much and it is quite uncertain what will be harvested of the different varieties. About three weeks ago their aspect was very good, but this constant humidity spoils them to a great extent, chiefly on heavy and low lying soils. Beans and leeks will ripen very late; both need sunshine and warm weather. Chervil, corn salad, spinach and turnips are harvested. These seeds are the first to be cut and were benefited by a few warm days at the end of July. The crop is a good average one. Cucumbers are in a sad condition. They did not fructify and, a lot of them being rotten, it is to be presumed that the crop will be insignificant, even if we get a fine autumn. Cabbages and kohlrabi are secured and will give a satisfactory crop, both for quality and quantity. Carrots are not bad at present—chiefly the long varieties. It will soon be time to cut them and everyone is hoping for fair weather in order to take off the first ripe heads. The half long and short sorts are not so good as the long ones. Red and fodder beets are in a fair state; the crop will certainly be sufficient, the grains being now developed and out of danger. This is about all that can be said of vegetables at present, although parsley, leek, onions and radishes seem in good condition, but these last named are not of great importance in the Queclinburg and Erfurt seed growing districts.

Flowers show the effects of the bad weather, the colors not being so bright as they appear in the sunshine. For instance, the extensive nasturtium fields which ordinarily delight the numerous visitors by their splendid and varied colors, are mournful to behold. Aster, stocks, antirrhinum, lobelia, tagetes, phlox, verbena and other flowers are at least three weeks later than in a normal season, and it is not likely that they can now make up the delay, as the nights begin to get cooler and longer.

FRANCE.

In France the seed-growing districts complain much of the want of water, just the contrary to what is the case in Germany. Last week some rain fell in the western provinces, but it seems too late and not sufficient in quantity to do much good. The present aspect of the crops is not bad, but it might have been far better if rain had come some weeks earlier. Carrots, especially, and red beets (very important crops) have not progressed. In July these two things promised excellent crops but the drought and strong winds have made the quantities far lower than expected. Cabbage, turnips, kohlrabi, celery and chervil are harvested and the growers satisfied with the quantities. Fodder beets show a good state except in the south, where the crop seems to be deficient. Fodder carrots, on the contrary, are good in the south and satisfactory in the center.

Beans, an important item, seem to have gone off. For some weeks after germination the young

plants showed sufficient development, but the continued drought dried up many flowers and the quantities likely to be gathered do not at all answer to previous expectations. They look a little better in the south on account of later sowings. Spinach, corn salad, lettuces and chicory are good, parsley, onions and leek, too. On the latter two varieties low prices are expected everywhere. Of radishes only small areas have been cultivated, but the crop, both in quantity and quality, is good, so that those who grow this article in spite of the last three bad seasons will be satisfied this year. Peas seem weaker than usual, especially the early varieties, and it is

likely that they will fetch good prices. Cucumber will be a dear article, for it is now almost certain that the crops are bad everywhere.

The flower seeds are getting on well with the exception of nasturtiums, which are bearing very few seeds.

ITALY.

The Italian seed-growing districts have yielded only a small average crop, especially lettuces and onions, leaving much to be desired. Kohlrabi and cabbage are also far under the normal.

Business is quiet yet, only small quantities having been sold up to date. This is presumably in consequence of the lateness of the season.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSEYMEN.

CHAS. A. ILGENFRITZ, Pres.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y. Twenty-eighth annual convention, Detroit, Mich., June, 1903.

PROF. L. R. TAFT, Agricultural College, Mich., has been appointed state inspector of nurseries and orchards.

THE crop of southern natural peach pits is reported much shorter than was anticipated. Some collectors fear they are oversold.

A CONVENTION of the nut growers of the southern states will be held at Macon, Ga., October 6. A permanent organization is to be formed.

THE Stark Brothers Nursery and Orchards Company, Louisiana, Mo., has certified to an increase of its capital from \$300,000 to \$1,000,000.

THE future is sure to see a large demand for oaks for street and lawn work. When the young stock is frequently transplanted in the nursery it makes fibrous roots enough to insure safe removal, if the top is well pruned.

Cleveland.

GOOD WEATHER PUTS LIFE IN TRADE AND IMPROVES GREENHOUSE STOCK.—PROSPECTS FOR GOOD CHRYSANTHEMUMS.—CARNATIONS IN GOOD SHAPE AND PLANTINGS LARGER THAN EVER.—BUILDERS BUSY.—NOTES.

The cool weather for the past week or more has had a beneficial effect upon trade in general. Outdoor flowers have decreased in quantity, while the indoor article has decidedly improved. Some very good roses are coming into market. Carnations, while a little short in stem, show good flowers. Asters are about over, with the exception of a few late lots. Dahlias now hold the center of the stage for outdoor stock. Cosmos has not made its appearance yet. It is later than usual this year. This has been a particularly good season for chrysanthemums and some fine ones are promised in the near future. Montmort, Bergmann, Glory of Pacific and Polly Rose are grown for early. Very few Fitzwygram are handled by the growers. The amount grown this year will exceed that of last season considerably. The same may be said of carnations; fully one-third more will be grown. And from the present condition of the plants the supply of cut blooms ought to be double that of any other season.

The greenhouse builders have all their houses on the home stretch toward completion. Andrews and Kegg are putting in the glass. Schmitt, Anderson and Wilson have finished up and planted.

John Lueschner has bought a piece of ground on Detroit street, in Lakewood, on which he contemplates erecting several houses next season, as the lease on his present place expires next year.

J. D. Eisele, of the H. A. Dreer Company, Philadelphia, was a visitor in town this week.

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and sporting readers are solicited and will be given place in this column. Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

At Philadelphia.

As the cooler weather is setting in the bowling contingent is more lively and many warm battles are being waged on the alleys. Scarcely a day passes that several scores of 200 or over do not go on the board. At the last meeting of the Bowling Club it was resolved to offer a high game medal and also a high average handicap medal, the same to be awarded each month, the member winning either the greatest number of times in a year to be finally awarded the same. It was also resolved to hold a handicap tournament on Thursday, October 2, at which some valuable prizes will be presented.

The cups won in Asheville are yet to be delivered. Well, it is all right boys, we are in no hurry, only when you get done looking send them along and they will be placed in the case in good company. The following are the past month's averages for those who have bowled more than ten games:

Mooney.....	177	Westcott.....	159
Moss.....	149	Fletcher.....	155
Kift.....	165	Watson.....	151
Polites.....	164	Baker.....	149
Eimerman.....	163	Gibson.....	142
Harris.....	163	Hoegerle.....	136
Connor.....	162	Anderson.....	131
Kuestner.....	162	Falek.....	132

John Westcott entertained a party of his friends at his Waretown club house, on Barnegat Bay, last Saturday. Robert Craig, who has been spending a few weeks there recuperating, and we are glad to say is much improved in health, was joined by J. C. Vaughan, Michael Barker, Geo. C. Watson, W. J. Stewart, George McLean and Mr. Westcott himself. The club house is certainly an ideal place to spend a few restful days. The boat landing is but a few rods from the cottage and the fishing excellent. In the fishing contest that took place George McLean took first honors for quantity, but Robert Craig was easily first with the largest, as he hooked one which measured over seventeen inches in length and weighed something over four pounds. It gave him a great struggle, however, before it was landed, as it broke the line near the pole. But the floating cork followed and after an exciting chase in a boat the fish was hauled in. This story will no doubt be told and retold to his admiring grandchildren when he takes them on his knee, around the family fire-side in the days that are to come. K.

Cincinnati.

RETAILERS TOO BUSY TO MAKE LARGE DISPLAYS AT FESTIVAL.—HARDESTY AND CLIFTONS MAKE FINE SHOWINGS.—TRADE ACTIVE AND STOCK SCARCE.—NOTES.

The floral display at the fall festival did not bring out much competition, for nearly all the florists were too busy to enter for the prizes. Hardesty took all the first premiums and the Clifton Rose Houses the seconds. The third prizes on bridal bouquet and box of cut flowers went to Charles McCrae. The table arranged by Hardesty & Company was done in lily of the valley and Beauties, with Adiantum Farleyense. The Clifton Rose Houses had a center piece of Pandanus Veitchii and Adiantum cuneatum

around which was a fine wreath of Liberty roses, adiantum and lily of the valley. Six crescents of the same flowers, with violets as boutonnières completed this table. The bridal bouquet from Hardesty was done in white orchids, lily of the valley and Farleyense.

Business is very good, with not near enough stock for orders. Roses have slackened up somewhat but are fair in quality. The fall festival is now going on and this has caused a good demand for stock. Monday we will have a civic parade which will use an immense quantity of material.

Hardesty & Company have the decorations for the Roosevelt dinner, at the St. Nicholas hotel. They will use Beauties and lily of the valley.

Phil. Foster, brother of Ed. Foster and who for the last twelve years was employed at A. Sunderbruch's Sons, died September 16.

J. A. Peterson has his place in first-class condition and we can look for a good cut of first-class flowers from there this winter. D.

Buffalo.

TRADE NOT WHAT IT SHOULD BE.—STOCK GOOD BUT DEMAND NOT BRISK.—STORE OPENINGS MAKE USE FOR PLANTS.—NOTES.

With weather fair and cool, trade has not been what one would expect. Asters are still coming in heavily and some good white are to be found. Gladioli are fine. Carnations are scarce but of very fair quality. Brides and Bridesmaids are improving in quality. It seems strange that more Carnot are not grown around Buffalo, for they are good and sell well. Several store openings next week will make a use for everything in the decorative plant line.

The club meeting last week was a failure; no quorum. About the best that can be said for the B. F. C. is that we can get together for a banquet, picnic or to entertain a convention.

The traveling men have been thick here of late and there have been a number of other visitors, among them Richard Ludwig, of A. N. Pierson's, Cromwell, Conn., who is on a vacation.

W. F. Kasting is at home from his European trip and says he had a great time. BISON.

ELGIN, ILL.—George Souster is building an additional house 12x134. He is looking for a very busy season.

SAN ANTONIO, TEX.—The P. D. Hauser & Sons' Floral Company's business has been established fifteen years but the firm was only recently incorporated. They have about 35,000 square feet under glass and are doing a fine business.

Buy your wants in Field-Grown CARNATIONS

to fill your houses now, so you will have lots of Carnations this Winter. Following varieties:

MELBA	TRIUMPH
MARQUIS	DAYBREAK
WHITE CLOUD	GOV. GRIGGS
MORNING GLORY	FRANCES JOOST
ETHEL CROCKER	GENEVIEVE LORD.

Fine, Strong, Field-Grown. \$40 per 1000.

A TAIL OF A COW.

ROSEBUD FARM, MICH., Sept. 6th, 1902. J. B. DEAMUD, CHICAGO, ILL.

Dear Sir:—Having read several articles in the AMERICAN FLORIST, from the pen of one styling himself Caldwell The Woodsman, to the effect that the feeding of Wild Smilax (Smilax Laciniolata) greatly increased the flow of lactical fluid when fed to the genus, bovine foemina, I purchased a few cases of Wild Smilax of Messrs. Caldwell of your city and fed them to a favorite Jersey cow, when to my great grief and loss this morning animal was found dead in her stall next morning. I have since learned that you are in some way connected as agent of this fellow, Caldwell, and desire you to inform me if he can be made responsible for my loss. He should at least be exposed and if possible, punished, for promulgating so dangerous a canard. Yours indignantly,

JOHN R. DASH, Professor of Agricultural Chemistry.

51 WARASH AVE., CHICAGO, ILL., Sept. 7th, 1902.

CALDWELL THE WOODSMAN COMPANY, Evergreen, Alabama.

Dear Sirs:—Enclosed find letter received to-day. Can you offer any explanation? It will certainly give the sale of Wild Smilax (as cow feed anyway) a tremendous setback unless promptly and satisfactorily explained. Yours very truly,

J. B. DEAMUD.

GETMORE FARM, NEAR BELLEVILLE, ALA., Sept. 11, 1902.

MR. J. B. DEAMUD, Chicago, Ill.

My Dear Deamud:—Mr. Beaven forwarded your esteemed favor of the 7th with the enclosure to me on "me" estate, where I have for the past two years been experimenting with a view of producing a cow that will milk all cream; this I hope to accomplish in a year or two by careful breeding and constant feeding on Wild Smilax.

I have read with much concern the letter of Prof. Dash, for I can sympathize deeply with a fellow experimenter, in the loss of a valuable animal, but the Prof. certainly did not use any of CALDWELL THE WOODSMAN COMPANY'S SMILAX, but must have gotten some of the numerous cheap sealawag shipments with which your market is flooded during the early fall, and in which is frequently found poison ivy (R. Toxicodendron), yellow jessamine, (Gelsemium Sempervirens), or the yet more deadly (to cows) Prunus Caroliniana, mixed among the foliage of the Wild Smilax. Many of these shipments are positively dangerous for men to handle and all are death to cows.

To my mind Prof. Dash's letter proves nothing if it does not prove that KWALITY KOUNTS in cow feed as well as in decorations.

Yours very truly, GEO. W. CALDWELL, Of Caldwell the Woodsman Company.

P. S.—I hate to be turned down on a scientific statement, so will send the Prof. several cases of our carefully selected stock, prepaid, (the kind, you know, which is handled by Kreshover, Bayersdorfer, Vail, Kasting, McCullough and yourself) and hope that in the interest of science the Professor will try his experiment again.

TRADE DULL AND COLORED STOCK GOING TO WASTE.—TWO EXHIBITIONS.—FIRE BRINGS SERIOUS LOSS TO A POPULAR FIRM.—VARIOUS NOTES.

The September meeting of the Gardeners' and Florists' Club was unusually well attended and two new members were elected, C. Craig and C. Bollen. After a long debate it was decided that the series of winter games should start on the third Monday of this month.

Two exhibitions have recently been held in this vicinity. The Montreal Horticultural Society had its own show and the Lachine Horticultural Society had a fair and successful exhibition. The principal winners of our club in this show were C. H. Smith, G. Trussel, Hall & Robinson, T. McHugh and F. Bennett.

The trade is quiet, with some fair stock going to waste. White flowers meet with a better fate. The winter stock is almost all housed and roses are looking fine. Carnations are exceptionally healthy. Violets, also, are very promising. The growers will have a big cut of chrysanthemums this year; imported ones are seen already.

Hall & Robinson sustained a heavy loss by fire September 12. The fire caught from a heap of shavings burning in an adjoining lot. The office, potting shed and also a part of five of their new houses were completely destroyed. A large part of the stock was ruined. The loss will amount to about \$2,500, with no insurance. The firm intends to rebuild at once. G. V.

NEW HAVEN, CONN.—F. S. Platt has reached home from a trip to California.

CHESTER, PA.—John J. Bogan, son of Michael Bogan, died very suddenly on September 8.

GERANIUM BARGAIN

Two-inch pot plants, some of them had to be topped but they will all make good plants and are certainly a bargain at \$1.50 per 100.

20,000 Rooted Cuttings

Ready now, fine strong cuttings, all correctly labeled, at \$1.50 per 100 or \$12.50 per 1000. Jean Viaud and M. de Castellane, \$2.50 per 100 or \$20.00 per 1000.

PANSIES

The kind that make money for you when they come into bloom, per 100 by mail, 75c; per 1,000 by express, \$4.00.

BONE MEAL

Best for Carnations, Roses and general use, \$3.50 per 200 lb. bag; \$32.50 per ton.

ALBERT M. HERR, Lancaster, Pa.

READ THIS AND SEND FOR

F. A. BALLER, Bloomington, Ill.

Worcester, Mass.

TRADE SHOWING IMPROVEMENT BUT SOCIETY PEOPLE STILL OUT OF TOWN.—OUTDOOR STOCK STILL PLENTIFUL.—NOTES.

A gradual increase of business is noticeable, but with the exception of two or three weddings the functions that call for a display of flowers have not been numerous. The fine weather we are now experiencing has a noticeable effect on business, as the upper crust of society still lingers in the country. As yet we have had no killing frosts and the gardens are ablaze with cannas, salvias and geraniums. Asters still make up the bulk of a available flowers of the coarser grade. Carnations have not yet reached the point of steady supply and roses are rather scarce. A steady call has commenced for palms, ferns and foliage plants.

Building and repairing is nearly finished in this section and all the growers are in better shape than ever to turn out good stock. The coal situation is still keeping many of the growers on the anxious seat, as it is now necessary to fire nights for roses and other tender stock.

Lange had the decorations for the Denholm-Warren wedding, which were quite elaborate.

H. F. Littlefield and wife are sojourning in Maine for a brief vacation.

W. J. Wood and Hugo Book are cutting some very fine asters. A. H. L.

EAST BRIDGEWATER, MASS.—A small fire in the greenhouse of C. E. Field on Sunday, September 1, did about \$25 damage.

Carnation PLANTS

FINE HEALTHY STOCK.

QUINLANS MAKE A FINE SHOWING AT THE STATE FAIR.—SOME EXCELLENT FLORAL DESIGNS.—VARIOUS NOTES.

The floral exhibit at the New York State Fair last week was one of the best that has ever been seen here and the fair attracted the largest crowd in the history of the exhibition. The only Syracuse firm that had an extensive display was P. R. Quinlan & Company, which made almost a clean sweep of the prizes, winning over \$500. The display piece which took first prize was made by W. S. Wheadon and was one of the finest ever seen here. It was an American eagle perched on a stump, grasping two flags in its talons. The eagle stood on a real stump banked with moss and ivy. The body of the bird was made of pink asters and pink roses and the wings of white asters. The bill and legs were made of yellow roses and the flags of Meteor roses, white carnations and purple asters. There were white immortelles for stars. The piece stood over seven feet high. Another first prize piece made by Mr. Wheadon was a plaque of white asters, in the center of which was a crescent wreath of pink roses tied with pink ribbon. In each corner were two crossed sago leaves with Bride roses clustered around.

Henry Morris says that the summer has been fully up to the standard. His trade has been large. He has a striking display in his windows of Tritoma Pfitzerii. This is something of an experiment with Mr. Morris, but he expects to have three times as many next year as he has this. A. J. B.

Boston Ferns.

We are headquarters in the West for them. Write us about 2 1/2, 3, 4, 5, 6, 7, 8 and 10-in. sizes.

The Model Extension Carnation Support.

Flushing, Long Island, Dec. 11th, 1901.

MR. THERON N. PARKER,
Brooklyn, N. Y.

Dear Sir— I have used your Wire Carnation Support the last two years. In all about 12,000. They fill the bill in every particular. Nothing could be more satisfactory and would give me a great deal of pleasure if I can bespeak a good word for you to the trade and you are at liberty to refer to me at any time.

Very truly,
A. L. TORNE,
La Fayette, Ind.,
July 8th, 1902.

MR. THERON N. PARKER,
Harrison, N. J.

Dear Sir:— After using your Model Carnation Support in two of our houses the past winter, we have come to the conclusion that it is perfectly adapted to supporting carnations, and shall use them on all our plants the coming season. We were much pleased with the simplicity, strength and neat appearance of the support.

Yours truly,
F. DORNER & SONS CO.

Bargains FOR Florists.

We are headquarters for a general assortment of the necessary material and supplies that you are looking for. If you are about to improve or construct, consult us.

In connection with the dismantling of the Pan-American Exposition, we have for sale:

20,000 FEET of fine seasoned lumber, practically new, consisting of all sizes of joists, timbers, dressed and matched boards and flooring; also sash and doors.
 50,000 FEET of roofing glass.

PIPE.

We are headquarters for pipe. We offer you:
 100,000 FEET of 2 to 4-inch wrought iron, lap welded casing. We can furnish this material in three ways: Either with sleeve or jacket couplings, screwed ends and threaded couplings or with expanded cast iron flanges with bolts and nuts.

1,000 000 FEET of standard black wrought iron pipe, size 3/8 to 12-inch. It is second-hand but has new threads and couplings and is in first-class condition.
 1,000 TONS of galvanized wire 9, 10, 11, 12, 13, 14 and 15 gauge.

50,000 FEET of 2, 3 and 4-inch cast-iron soiled pipe and fittings.
 100,000 FEET of garden hose, 3/4 and 1-in.
 75,000 FEET of cotton rubber-lined fire-hose, (rubber-lined in and outside), ranging in sizes 1 to 2 1/2-inch.

VALVES and fittings of every kind.
 BOX COILS for heating purposes.
 RADIATORS, new and second-hand.

We also offer the following bargains in

Heating Boilers

- 50 CAST-IRON sectional heaters, capacity from 450 to 5,000 feet.
- 1 NO. 2 Standard Kroeschell hot water heating boiler.
- FOUR 36x10 Horizontal Tubular.
- FOUR 36x12 Horizontal Tubular.
- FIVE 42x10 Horizontal Tubular.
- FIVE 42x12 Horizontal Tubular.
- SIX 48x14 Horizontal Tubular.
- TWO 54x16 Horizontal Tubular.
- FOUR 60x16 Horizontal Tubular complete with all fittings.

PUMPS of all Descriptions.

A carload of shovels and spades that we are selling at \$5.00 per dozen.
 We carry a complete stock of hardware and farm implements, besides plumbing material of every kind.

CROP INSURANCE.

Life insurance is valuable because it guarantees the outcome.

"Gurney" Heaters

"BRIGHT IDEA," "DORIC" and "400 SERIES" do the same thing for your hothouse: **THEY GUARANTEE THE CROP.** First of all they save 20 per cent on the coal bill and so keep expense at a minimum. Next, they produce an even heat and so do not imperil the life of the plant. Next, they are simple to operate and so require least attention. Lastly, they wear longer than others and thus perceptibly reduce the capital invested. Don't buy or exchange until you've investigated them.

Advertising for Retail Florists.

Of the many noteworthy features of the Asheville convention of the S. A. F. none attracted more attention or awakened keener interest than George W. Wienhoeber's paper on the methods of retailing cut flowers; and no part of Mr. Wienhoeber's remarks were re-read with more thoughtful care than that portion relating to advertising for the retail florist. As Robert Kift, of Joseph Kift & Son, Philadelphia, said: "I guess advertising a flower store always will be a problem. We have all tried it but few of us know enough about it to speak with any assurance. But I was much interested in Mr. Wienhoeber's paper and think I secured several pointers from it." We present herewith several expressions of opinion provoked by Mr. Wienhoeber's views:

PHILIP BREITMEYER, DETROIT, MICH.

When the paper read before the meeting at Asheville by Geo. W. Wienhoeber, of Chicago, I beg leave to say that on advertising I am of the same opinion as the writer of that most able and valuable document. The writer has gone through the matter so thoroughly that it leaves little room, if any, for suggestions.

The many things denoted by the term "advertising" may be grouped into two divisions, the one class being newspapers, periodicals, programmes and so forth, in the other the attractive features connected with the business itself and which in detail are many.

If I may be permitted to say what I think of newspaper advertising, one is very apt to be misled by the eloquent solicitor. My motto, of course, is "live and let live" and for the many courtesies received through the press we are at times obliged to reciprocate. My opinion is that to insert a plain card announcing, the occupation is the most effective. My reason for this is that a florist has few specialties to offer, the only motive being to keep your name before the people. Contrary to the views of many florists we decline to have our firm name used in programmes. They are, to my notion, most bombastic and you do well to avoid them. If one is catering to an out of town trade, it pays to use the columns of first-class periodicals.

As Mr. Wienhoeber writes in his paper, the many details connected with the transaction of business are oftentimes the best advertising. First of all have the grade of goods which sell themselves. Keep them in good order, arrange them

attractively and fill all orders as you agree to do. Exercise every effort to accomplish this. Make it a policy to finish all design work, be it ever so trifling, to avoid all criticism. That's what advertises. Be prompt in filling orders. Have persons in charge of your business equipped for their respective parts. Clerks should be well read and able to adapt themselves to any situation. They advertise and bring results which any other method cannot buy.

We believe in getting out neat announcements of coming events in our line. Keep your patrons reminded of your existence. We begin this work in October in some form. In November we do as dry goods merchants do, have an exhibition. This is not termed an opening but is on similar lines. Chrysanthemums open the season of festivities and afford an opportune time to invite the public to inspect your goods. Carry out all details so as to impress the callers with an air of completeness, so much so that if during the season they are in want they are apt to give you a call. Experience proves it a profitable investment, to my notion advertising that pays.

In conclusion let me say to every reader, do not fail to study the article by Mr. Wienhoeber; it is complete in all details.

—
GEO. WITTBOLD COMPANY, CHICAGO.

As to the best methods of advertising for retail florists, we think that they will depend entirely upon the abilities and facilities of the parties doing the advertising. The advertising that will bring the best results for high class florists like Mr. Wienhoeber would not do for his brother retailer who has not worked himself up to the same standard.

We believe in advertising, but feel that it should be strictly honest, as anything represented that is beyond the capabilities and facilities of the advertiser would be harmful to his trade. We believe in a mailing list composed of parties who are interested in flowers, to whom printed matter can be sent from time to time, in which the florist feels they are interested, and which is in harmony with the goods he has to offer, so that they are kept constantly in touch with the doings of the trade.

We do not believe that expensive matter is necessary or advantageous, as such matter will have a tendency to create an exclusive trade, and we think that the florist needs orders from the middle class

as well as the rich, thus enabling him to work off certain goods at a good profit, which otherwise would go to waste. A good deal of money can be wasted by distributing advertising matter promiscuously. It is worth repeating: Do not send advertising matter to a class of trade that you cannot handle, as you will be wasting money and further will belittle yourself, even to the trade that you could take care of.

J. A. VALENTINE, DENVER.

I am inclined to think that too much of an effort is made to make the florist business seem unlike other lines of trade and governed by principles peculiar to itself. I am a firm believer in the value of an advertisement in the daily paper, especially if that "adv." says something. It should be short and right to the point, free from superlatives and earnest in its tone. It should dwell chiefly on one thing. You are likely to lose the interest of the reader if you try to make your advertisement into a florists' catalogue.

Do not crowd too much into a small space. Say less or use more space. I like two columns wide, top of column, with a clear display type. If such an advertisement does not pay a less conspicuous one is not likely to.

The theatre programme, one full page or two pages at the center fold and treated as one page, has paid us. In these we use attractive halftones from our own photographs that directly illustrate the text of the advertisement.

Artistic cards and booklets mailed to a selected list have proved profitable, but one should be careful not to mistake expense for artistic effect. On the other hand if the expense promises to be heavy either drop the idea altogether or spend all the money necessary to put it out in proper form.

was opened a few years ago, it was most violently opposed by every florist in the city. The department store course was on it and dealers in flowers who made their living by that alone thought that it would injure their trade and demoralize prices. They seemed to think we were merely going into the business to cut prices on all grades of flowers, that we would carry nothing but the cheaper stock. This was not our intention, as we wished to establish a floral department where purchasers of flowers could procure the best to be had.

To-day there is scarcely a florist in the city, we believe, who is not glad of the existence of our floral department. It is true that we compete with them closely, but we aim to supply the best, also, and they now realize that the presence of such a department in a large department store brings flowers to the notice of the people, a large class of whom would otherwise never see them. It thus created a general demand for flowers, which is the best and strongest advertisement, and during the years which the flower department has been running, every florist in the city has increased his business.

Perhaps the most effective trade bringer has been a card which we send to people whom we think will wish flowers for weddings, dinners, social functions, congratulations, etc. We clip carefully the social calendars in the papers as they appear every Sunday and then we mail a card in a sealed envelope, with 2-cent stamp, to the people who may be entertaining during the following week. We find these cards bring us in contact with the best class of people, who are in need of flowers and it is one of our best methods of advertising.

We also have a wagon for delivery, made expressly for this department. It is up to date in every particular and we

box and packed with extreme care, so that when it is opened the flowers are presented to the customer in the most pleasing and attractive way. We send packages long distances, which usually arrive in perfect condition, and this is a good advertisement for the grower.

We keep an attractive looking window, changed daily and carrying out the color scheme, being very particular that every color blends. We also have an excellent advertisement in the way of an ice box. This box is a large room, about 10x14 feet, lined throughout with white tiling, kept at a temperature of between 50° and 60°, in which we place the flowers every morning, arranging them so that they look artistic and pleasing. We can take customers right into this room where they can make their own selections from our entire stock.

We also have a department store feature not enjoyed by a regular florist. This is the bargain booth, which is used by different departments every day for special sales of different classes of merchandise. We often use this for a special sale of ferns, palms, chrysanthemum plants, or any other flower or plant in season, dressing the booth in an attractive manner. We place flowers and plants on this booth at a reduced price and the results are very gratifying, the sales being largely to the middle class who only buy cheaply and in this manner, palms, ferns and plants find their way into homes which otherwise would not have them.

Another method of advertising is to place in the different departments every morning, an attractive vase of flowers, with a card "Grown in our own greenhouses," which we find brings us much custom.

The above are only a few of the methods we use in advertising this particular branch of the store. Our methods change according to season and conditions but these are the principal means by which we keep it before the public that we are in the flower business.

A. H. BUSH.

WEDDING DECORATION BY DANIELS & FISHER CO., DENVER, COL.

But after all, a florist's window is the best advertisement for him. Pay as high a rent as necessary in order to get a good window, passed by the largest number of people in the class to which you cater, and then work that window for all it's work.

DANIELS & FISHER CO., DENVER, COL.

In regard to our methods of advertising our retail florist business, it may not be improper to state, before going into details, that when the floral department of The Daniels & Fisher Stores Company

consider it one of the finest in the west. It is entirely different in style and color from the rest of our delivery wagons, representing the best thought of the wagon maker. It is specially equipped for the safe delivery and carriage of designs, baskets, center pieces, etc. The flower wagon always attracts attention by its elegant appearance and is a good advertisement in itself.

We also have found that the careful packing of flowers is a good advertisement, through their appearance when opened up. They are put in an attractive

CARNATIONS.

NOTES ON SEASONABLE TREATMENT.

With those florists who are not fortunate enough to have their coal laid in, the matter of fuel is something of an item this fall and it becomes a question of choosing the least of two evils in regard to early firing. There is no question but that early firing, with night ventilation in order to keep the houses at the proper temperature, is a good thing for the man who grows high grade carnations; neither is there any question but that the man who pays careful attention to the other details of carnation culture and saves some money on his coal bills can have as good carnations and with a margin of profit instead of a shortage.

Where roses or other stock is grown that demands heat at this time it is a simple matter to run one pipe in the carnation houses on all cool nights, and at little expense, but where carnations are the exclusive crop there is no use firing up until the thermometer drops to below 40° in the houses, and then only temporarily, letting the fires go out again as soon as the little cold spell is over, for they are but little spells up to as late as November 15 to 20. A saving of from ten to 100 tons of coal is an item this season.

There are two or three things to be carefully watched in following up this

cool method of culture and perhaps of most importance is to avoid the heavy condensation of moisture on the plants that will take place when the temperature drops to 40° or below outside and the house is closed up tightly. This can be partly overcome by leaving a little ventilation on at night, even if the temperature in the house does drop to 38° or even to 35°. There is in reality not so much harm done to the general health of the plant by this condensation but it

flowers through chrysanthemum time, and it is just as well not to have many then and have what you do get away up to the top mark of perfection. Carefully disbud them and, above all other things, do not leave them on the plants after they are ready to cut in order to have a few more for a certain day. Perhaps I am a crank on some particulars but it is a hobby with me to have my flowers cut close three times a week; it is only for the fact that we do not have the time to

you get the thrips out now a fumigation every two weeks will carry them through the balance of the season.

In spite of the fact that all new introductions are described as perfectly healthy in growth, and so forth, there are very few of them that do not have carnation rust and some of them quite a good deal of it. My own experience with rust is that a new variety that is entirely free from it is not worth much of anything. This may seem paradoxical but I find that the strongest and healthiest growers among the novelties have some rust, and the poor little weak fellows that are not worth bringing in from the field have none. There may be some cure for rust, but I have yet to find it, and the only method we follow is to give the plants good treatment and pay no attention to the rust. In this manner we get good flowers all the season from some varieties that have quite a bit of rust on them. Filling the pores of the leaves with powder or even with liquid rust-cures produces poor flowers and checks the rust but a very little. Air-slaked lime sprinkled over the plants is the least harmful of these and if you want to try and keep it in check use this first, as an experiment, and other cures in very small quantities.

ALBERT M. HERR.

GREENHOUSES OF THE DANIELS & FISHER CO., DENVER, COL.

seems to be the sort of condition that carnation rust revels in and as most of our really good varieties of to-day have rust to a greater or less extent, we do not want to offer favorable conditions for its development.

Another point to be very carefully watched in this cool method of growing is to have plenty of ventilation on during the day, for to allow the temperature to run up to 90° or over during the day and down to 38° or 40° at night would split calyxes all to pieces and even affect the crop of buds forming to such an extent that it would reach over into the holidays. The day temperature should be between 60° and 70°, as nearly as you can have it.

Still another point to watch is the watering. Growing them cool the plants will not need the water that they would if grown warmer and at the same time will, I think, suffer quicker from a lack of moisture. If on benches it will pay to look them over almost daily and see that any dry spots are touched up so that the regular watering of the week leaves the bed nicely and evenly moistened. Avoid feeding until you begin regular firing, as the cool temperature at which you are growing them will give them all the growth they will need in order to produce satisfactory results later on.

All of this, of course, only applies to the man who does not have a supply of coal and is asked exorbitant prices for it. The man who has an abundance of coal at nominal figures can better afford to start his fires and let a little heat go out through the ventilators, rather than grow his plants cool and lose on the quantity of flowers produced. But outside of a few extra split calyxes I am not so sure that early firing will produce a better grade of flowers; there are too many carnations produced in this country that do not stand shipping and our high temperatures have something to do with it.

Through having some unfinished houses the latter part of August, I did not get my carnations housed as early as usual and they made so many buds in the field that we had to keep them cut back away beyond what is our usual method, consequently I will not be troubled with many

do it that I do not have them cut close every day, especially so early and late in the season.

In going over the houses when cutting flowers do not be afraid to cut out all weak-looking buds and throw them away, for you will by an intelligent following of this method of pruning make your holiday crop that much better and that much larger.

If you have any thrip in your houses, and I have not seen any houses the past few years that did not have some in them, it is a good time now to get them out of the way. Fumigating freely with tobacco, and using a small handful of either red pepper or insect powder in conjunction with each half bushel of stems, will rid the houses of thrips to such an extent that their depredations will not be noticed for the balance of the season. If they are bad it will be best to fumigate every alternate night for a month, as it is only by constantly keeping at it that you will catch them on the outside of the buds, where the smoke will get at them strong enough to kill. This will, of course, give you flowers perfumed with tobacco instead of cloves, but better now than later in the season. If

The American Institute Show.

The seventy-first fair of the American Institute of the City of New York was held at the Berkeley Lyceum September 23 to 25. From the point of exhibits, both quality and quantity, it was one of the best in recent years, the showing of dahlias being especially strong, the cactus type being noticeable for their variety and color.

The hall proved to be rather small for the numerous entries and exhibits were rather crowded, which goes to show that New York needs her own horticultural building, like some of her sister cities.

Among the plant exhibits Julius Roehrs showed an excellent and well balanced group of orchids, palms and foliage plants, the *Cattleya labiata* being particularly strong and well flowered.

Lager & Hurrell sent a very comprehensive collection of orchids, the following varieties being especially noticeable: *Cattleya Harrisoniae*, *Cattleya chryso-toxa*, *Zygopetalum Gautieri* and *Peristeria data*, the Holy Ghost orchid.

Siebrecht & Son displayed some specimen palms and foliage plants and some nice platyceriums.

FLOWER WAGON OF A DENVER DEPARTMENT STORE

W. A. Manda exhibited a very striking group of the golden anemone, a particularly bright and novel variety.

Ellwanger & Barry exhibited a very large collection of fruit, including apples, pears and grapes, clean, well-grown and of excellent quality, but the beauty of the display was destroyed by lack of space.

Geo. Burchett, of Montclair, N. J., showed some excellent seedling gladioli, Groff's and other hybrids.

W. P. Lothrop, of East Bridgewater, Mass., exhibited a collection of cut gladioli, including fifty varieties.

Frank Weinberg sent a collection of cacti and dwarfed shrubs.

In the class for best display of flowering and foliage plants covering fifty square feet, the collection shown by James Dowlen, gardener to H. L. Terrell, Seabright, N. J., and George Hale, gardener to E. D. Adams, also of Seabright, N. J., showed some excellent examples of the gardener's art, the color quality and arrangement being all that could be desired.

A very interesting exhibit was a long table of vegetables made very effective by arrangement, by the Manhattan State Hospital, Central Islip, L. I., Wm. Thompson, superintendent.

Apart from the above mentioned exhibits the classes for outdoor and indoor fruits, vegetables, nuts, cereals and roots were well filled and of high order of merit.

The collection of cucurbits, which included gourds, pumpkins, squashes and others, by Alex. Mair, of Oakdale, L. I., was a distinct attraction.

Rhode Island Horticultural Society.

The early autumn exhibition of the Rhode Island Horticultural Society was

held at Providence, September 18 to 20 and was one of the most successful on record, there being a profusion of exhibits in all departments, the showings of three dahlia growers being sufficient for a considerable exhibition in themselves. William H. Tarbox, of Compton, occupied one entire side of the hall with his dahlias and asters, the number of blooms of the former being no less than 3,800. H. F. Burt, of Taunton, had a display of the same character, including a large number of the newest, rarest and most remarkable of the named sorts. W. P. Lothrop, of East Bridgewater, was the third extensive exhibitor, his display embracing several of the latest importations from Europe. On the whole, few better showings of dahlias were ever made. The judges were James Hockey, Charles Forbes and Farquhar Macrae. The awards were as follows:

Best display of dahlias, all classes, H. F. Burt first, William P. Lothrop second. Best display of show dahlias, H. F. Burt first, W. H. Tarbox second. Best display of pompon dahlias, H. F. Burt first, W. H. Tarbox second. Best display of cactus dahlias, H. F. Burt first, W. P. Lothrop second. Best display of single dahlias, H. F. Burt first, Neil Ward second. Best display of pink, purple and white asters, not less than twenty-five each, W. H. Tarbox first, Mrs. Samuel W. Lewis second. Best display of pink, purple and white asters, not less than twelve each, W. H. Tarbox first, Mrs. E. Osborne second. Best display of asters, all classes, W. H. Tarbox first, Mrs. Samuel W. Lewis second.

The president of the Rhode Island Horticultural Society is Prof. W. Whitman Bailey, L. L. D., and the secretary is C. W. Smith. The exhibition committee is composed of Silas H. Manchester, chair-

man; Farquhar Macrae, N. D. Pierce, Fred. P. Hunt, William Hill and J. E. C. Farnham.

Three Leading Canadians.

JOHN H. DUNLOP.

It was in New York, January 7, 1855, that John H. Dunlop, now one of the leading florists not only of Canada but of America, first saw the light. He came of Irish parentage, and removed to Toronto with his people, at the age of seven. While yet a lad he spent two years in the book business and then went back to New York, where for some time he worked as carpenter. He returned and finally settled in Toronto in 1875, and leased a news stand and telegraph office from the Queens Hotel. Up to this time he knew nothing of floriculture but during the quiet afternoons, books and papers that could throw any light on the subject, and on rose growing in particular, were carefully studied. Becoming acquainted with the theoretical part, in 1880 he built his first greenhouse, a modest structure 6x12 feet. The following year it was doubled, the next year a house 8x50 was built, and the following year this gave place to a more modern structure 12x50 feet, what is known as a three-quarter-span house. All this time by hard work and perseverance he was becoming more competent, and as a demand for choice roses was increasing in the city, a large piece of ground was purchased on Lansdowne avenue near Bloor street, where one of the finest establishments in the Dominion stands to-day.

He was the first to force lily of the valley, about 1885, at this time considered quite a feat, and has continued growing this flower until now, when sufficient pips are placed in cold storage to give a supply all through the year. He was the first to adopt raised benches for forcing roses in winter. The system used up to this time was to plant on solid beds and leave the plants undisturbed for a number of years. This was all right at times, but there was no certainty of getting blooms in midwinter, when most desired, for they usually came on with a great crop after March. Knowing the advantage of having the supply at the right season, he adopted the raised bench, which is now generally used. He was also first to use buttered glass for glazing greenhouses and is still an ardent advocate of this system, so much so that his plant of over 200,000 feet was all glazed in this way.

In carnations he has always taken a lively interest, growing all the new varieties, as shown in the national convention of the carnation society, and he usually visits the establishments that are sending out new varieties, and most of them are found in his houses. The annual display of carnations at Toronto is due to Mr. Dunlop's initiative. At his present place there are eighteen houses devoted to roses, seven to carnations, two to violets, two to asparagus and four to propagating. This season eight other houses, 160 feet long were erected, and seven of the most modern houses for roses. They are 240 feet long, iron trussed roofs, with brick and tile benches.

Mr. Dunlop has been connected with the S. A. F. for a number of years, and was a member of the executive committee for three years. He is also a member of the American Carnation Society and was president of the Canadian Horticultural Society, and also its first secretary. He was president of the Toronto Gardeners'

PRIZE VASE OF GLADIOLI AT TORONTO INDUSTRIAL EXPOSITION.

(Exhibited by Wm. Remie, Toronto.)

A TRIO OF LEADING MEN IN THE FLORICULTURAL AFFAIRS OF THE DOMINION OF CANADA.

and Florists' Association, and in fact it was in response to his call for a meeting that this association was formed. He takes a personal pride in keeping his establishments in the front rank, produces the best of stock and exhibits at all the shows.

H. H. GROFF.

H. H. Groff, who has attained a world wide reputation as a hybridizer of the gladiolus, was born at Simcoe, Ontario, Canada, forty-nine years ago, his father being of an old Pennsylvania Dutch family, and his mother's parents from Massachusetts. His inherent horticultural tastes came strong from both sides of the family, his mother having a long and successful record as an amateur, and his father, who was connected with the banking interests of his section from the early settlement of the country, always took pride in having one of the most beautiful homes in the Dominion.

Mr. Groff's interest in horticulture began in early childhood, with the improvement of wild flowers by cultivation, and continued during a long and successful amateur experience in fruit and flowers, both in the garden and under glass. He also had a long experience in fancy poultry, pigeons, rabbits, dogs, Jersey cattle and pedigreed horses for breeding purposes. In all these experiences his standard was high and in the latter interest his stock secured the highest awards at the state fairs of Iowa and Nebraska.

He occupied the position of assistant cashier in one of Canada's leading banks previous to the death of his father and afterward was engaged in banking in his own interest until four years ago, when his business was taken over by one of the largest chartered banks in the Dominion, who secured his services as cashier, which position he occupies to-day.

It is now nearly fifteen years since he commenced his work on the improvement of the gladiolus and, recognizing the principle that it is the business of science to secure results with the least possible outlay of work and time, as results are regarded as the standard by which a man's work is judged, he acquired with out delay all material obtainable from

every desirable source, even to following the botanical explorers into the wilds of Africa for new species.

Mr. Groff states that his experience in breeding all kinds of live stock has been of great service to him in his work on the gladiolus. His system is the production of specific types from every species, on the lines he desires to advance, these specific types to be used as the foundation of new strains, and also as re-vitalizers for the production of the many thousands of his now celebrated hybrids. The correctness of this system is evidenced by the satisfactory performance of these hybrids under changed conditions of soil and climate in all parts of the world.

JOSEPH BENNETT.

The retiring president of the Canadian Horticultural Society is Joseph Bennett, of Montreal, a typical Canadian gardener, one in whom the best traditions of the craft find exemplification. He is a native of Northwold, Norwalk, England, born October 5, 1858. When 14 years of age he began his horticultural career in the gardens of the rector, Rev. Norman, from whose place he advanced to Sprothoro Hall, near Doncaster, the seat of Sir Joseph Copley, where James Tindall was gardener. After three years at Sprothoro Mr. Bennett went to Wentworth House, the seat of Earl Fitzwilliam, where he put in another three years under John Young, going thence to Veitch's, that great finishing school for British gardeners. Leaving Veitch's Mr. Bennett went to Combe Abbey, Coventry, to delve under Wm. Miller, then in charge for the Earl of Craven. The late James Brydon was at Combe Abbey at the time and so was Fred. Palmer, now at Brookline, Mass. Mr. Bennett's next move was back to Veitch's for a post-graduate course, after which he was for a time at Streetham, under Wm. Howe, gardener to Sir H. Tate, the sugar king. Going thence to Wm. Cutbush & Son, at Highgate, he completed his British training and landed at Boston, January 17, 1883, a thoroughbred gardener, aged 25. The next day he went to work with Alex. Montgomery, at the Waban Rose Conservatories at Natick. Removing to Montreal in 1884, Mr. Bennett engaged

in business for himself about seven years ago. Since then he has "managed to make a living" for himself, according to his own modest description of the upbuilding of a prosperous establishment. He has a store in Montreal and a range of 25,000 feet of glass and five acres of land at Lachine, about eight miles outside the city.

Mr. Bennett has been one of the active members of the Canadian Horticultural Society since the day it was organized and the year during which he was at its head was one of its most prosperous.

Exhibition Management.

The indifference of the public toward the floral exhibitions and the financial embarrassments often resultant from lack of patronage presents a problem for which no universal solution can be offered, because of the special circumstances which, in every case, affect in greater or less degree the prospects of success. In one direction, however, there is abundant room for improvement in very many instances. It is well known to every observant flower show patron that in respect to general artistic effect as well as in the composition and arrangement of the individual decorative groups, seldom is there anything approaching the careful study for finished effect that is demanded daily of every retail florist doing high-class decorative work. The occasional group of surpassing beauty which is seen, is unequal to the task of lifting the show as a whole out of its low estate and only emphasizes by contrast the hideousness of its neighbors. Neat and harmonious accessories are as necessary to successful results in the exhibition hall as they are in my lady's parlor and it will not be disputed that the unpainted tubs, grocery boxes, untidy plant stakes and labels, odd jars and bottles and similar make-shifts so commonly in evidence must be banished absolutely from our flower shows before our attempts shall have reached the level of ordinary respectability or before we can reasonably expect a refined public to come and admire and pay for the privilege.

Careful consideration of these facts

suggests as a possible remedy for scanty public support the appointment of a superintendent of recognized taste, with full authority to squelch the soap box and similar abominations, including the man who would persist in bringing such truck to the exhibition hall, and then supplementing him with a good outside manager, well experienced in the mysteries of the box office business and the high art of advertising. While the qualifications for these important offices are not impossible under the hat of the successful plant or flower grower, yet that "thorn of experience which is worth a whole wilderness of warning" has taught us that the double accomplishment of good grower and good showman "truly is a rare bird in the land."

Early and Late Phloxes.

It may seem strange, but it is nevertheless an established fact, that some of the phloxes in two or more species are in flower during every month from April to November and all are extremely floriferous, the dwarf section as well as the taller, later bloomers. The earliest spring days see the various forms of *Phlox subulata* out, a dense carpet of color. Soon afterwards the bristly form, *P. setacea*, more compact and erect in growth, but equally dwarf, shows itself. The waxy white variety, with a faint lilac eye and tube, is *Nelsoni*, not what is usually sold under that name. The variety *Vivid* is the brightest possible lustrous pink with a dark carmine center or eye, but these are very little known here, though superior to varieties of *P. subulata*. *P. reptans*, with orbicular foliage, spreads its slender, creeping stems and branchlets closely over the ground and covers it effectually. It is in bloom about the same time. Its clusters are loose, showing each individual flower distinctly and the color is a pretty shade of purplish rose or red.

P. amena, brighter in color and some-

twelve inches high and, while most of the former mentioned are still in good shape, *P. Carolina* makes its appearance. The flowers are rosy pink with darker center, the foliage narrow, lance-shaped and the loosely-panicked stems are about twelve inches high.

This brings us well into June and after this we may depend on the suffruticosa class of phloxes to furnish flowers for the rest of the season. Many shades are represented here. The habit is dwarf; none of the varieties ever exceed twenty inches in height; most of them are dwarfer. The pyramidal panicles are large and last a long time in perfection. The habit is graceful, the stems slender, bending and wiry enough to maintain an erect position in wind and weather; no staking is ever required. The foliage is dark and glossy, in some varieties narrow, in others broadly lanceolate.

All varieties of this class will continue to flower until frost, provided we take the precaution to remove all the stems down to the ground or nearly so, as soon as the panicles have dropped the flowers. The root stock always shows new growth; by removing the old stems the sap is thrown into these shoots and the stronger ones develop fast into flowering size.

But of course we would not be without the so-called late flowering section, *P. decussata* or *P. paniculata* and hybrids. They are taller, some of the varieties reaching a height of four feet. The foliage is broader and pointed, the stems stout and rigid, the great, branched panicles very broad and compact and the colors represented are more varied, especially in the brighter shades than in the suffruticosa section. They are at their best at the beginning of September, though none of them will outlast the suffruticosas. The largest and fullest trusses are usually perfected on two-year-old plants. After that they gradually decrease in size of truss and flower, but in very rich ground, or where a heavy,

sparingly and it is natural, therefore, that the most productive seedbearer should be represented in the most varied shades.

It is a pity that as yet we have no shade of salmon or bright carmine pink, or anything approaching a crimson in the suffruticosa section, but we may get there in time. In my own opinion *P. suffruticosa*, as a plant in bed or garden border, or as a graceful cut flower for decorative purposes, is pastly superior to any of the other species, only we often miss the brighter shades, though the soft tints which are quite plentiful are often preferred. J. B. K.

WITH THE GROWERS.

GEORGE REINBERG, CHICAGO, ILL.

Although the past three or four years have seen some great advances in the production of cut flowers, few neighborhoods show a more remarkable development than that in the north of Chicago, a region which, years ago specked here and there with glass, is now one of the greatest flower producing sections of the country. Here, within a radius of a mile or two is more glass for cut flowers than the whole United States could show not much more than ten years ago. What Madison, N. J., is to the New York market, this neighborhood is to Chicago. Acre upon acre is roofed with glass and some of the best stock in the country is turned out here, for the location seems particularly adapted to rose and carnation growing. The one drawback is that the growth of the city is making much of the property too valuable for further acquisitions for greenhouse purposes.

Of all these dozens of fine ranges, and they are all worth a visit, the majority have grown from a nucleus originally devoted to forcing lettuce and cucumbers. George Reinberg is one of the oldest hands at the business but within a brief span his houses have been rebuilt and modernized and he has added largely to his area. He now has forty-seven houses, each 265 feet long, this season's addition consisting of ten of the Dietrich short-span houses. An exterior view of this range is shown in one of the accompanying illustrations; the other shows the Beauties in one of these houses, photographed seven weeks after planting.

This is a style of house that has attracted considerable attention of late and already there have been many visitors to inspect the range. All the houses are 265 feet long, nine of them fourteen feet four inches wide, the outside house fifteen feet nine inches. Each house has two benches five feet five inches wide and two walks twenty inches wide, except that the outside house has an extra walk. The houses are glazed with sixteen-inch glass and there is continuous ventilation on the south side of each ridge. It is but natural that a grower should consider his latest addition the best on the place, but Mr. Reinberg is particularly pleased that this section should show such a remarkable variation in summer temperature as compared with his old style, wide and high-peaked houses. When these photographs were taken at nine o'clock on an August morning the temperature in the new range was 9° lower than in the old-style houses alongside and Mr. Reinberg says that at 2 p. m. the difference in summer was frequently 12° and sometimes as much as 15°.

The new section was planted to Beauties in the last week of May and flowers were cut in seven weeks, the plants being

REINBERG'S AMERICAN BEAUTIES SEVEN WEEKS AFTER BENCHING.

what taller in growth, is only a few days later. It has lanceolate, pilose foliage and very dense, semi-erect growth. Then the lilac blue, large flowers of *P. divaricata* begin to show themselves in many-flowered, loose, erect spikes. It grows from eight to twelve inches high, according to soil and situation and is the only representative of this pretty and most unique color in phloxes. *P. ovata*, with rather broad and large oval foliage and panicked heads of soft pink flowers comes out shortly after. Its stems grow eight to

substantial top-dressing is repeatedly administered, the plants produce satisfactory results for years.

Ordinarily though, we should split the old clumps up after flowering them for three or four successive seasons. Varieties are most numerous in this section and new ones come out every year. *P. decussata* seeds freely and is easily raised from seed and, like a geranium, blooms the first year, if sown early in spring, while all other species of phloxes, including *P. suffruticosa*, bear seed but

A RANGE OF TEN SHORT-SPAN AMERICAN BEAUTY HOUSES BUILT THIS SEASON BY GEORGE REINBERG, CHICAGO.

strong and vigorous, from 4-inch pots. In all there are 32,000 Beauty plants on the place. The older houses are 25x265 and planted to roses and carnations. There are 22,000 Brides and Bridesmaids, 5,000 Golden Gate, 5,200 Meteor, 4,200 Liberty, 2,100 Perles and 1,100 of the new varieties, Ivory, Balduin (Helen Gould) and Mrs. Oliver Ames. The Balduin, over the identity of which the Florists' Club of Philadelphia had such a racket, is making a particularly fine growth. Like many other growers in the neighborhood Mr. Reinberg is carrying over a considerable number of his rose plants. The work of benching carnations was begun in the middle of August and the plants now look fine. It took 80,000 plants to stock the section given to them.

Incidentally Mr. Reinberg does a big business in the production of cuttings and plants, above those required for his own use. He annually sells great quantities of rose and carnation cuttings and rose plants and last fall sold over 100,000 field-grown carnation plants, but this year this latter item was considerably cut down by the loss of plants because of the continuous rains in June and July. The plants on low ground suffered considerably but those on higher ground came through nicely. In general throughout this whole neighborhood the plants were healthy but smaller than those benched in recent years.

The expense of running one of these great places is something which would have been considered beyond reason a decade ago. Last year Mr. Reinberg paid out for labor the sum of \$10,000. Coal cost him \$8,000. To keep the houses, heating apparatus and equipment in repair costs \$6,000 a year and incidentals aggregate \$8,000. The money to meet these bills comes in at 51 Wabash avenue, where O. W. Frese has charge of the store.

New Haven Horticultural Society.

The second annual exhibition of the New Haven County Horticultural Society will be held November 11 to 13, in the new Music Hall, New Haven, Conn. A schedule of prizes may be obtained from the secretary, Thos. Pettit, 316 Orange street. The majority of classes are open and fairly good prizes offered. This is anticipated to be the best horticultural exhibition ever held in Connecticut. The society has made a steady growth in membership and is this year receiving the support of the wealthier citizens, in

the way of special money prizes. It now remains with the craft to grow and show well, and I might also say, win and lose well. The judges, in whom the greatest confidence is placed, are Messrs. Patrick O'Mara, New York; F. L. Atkins, Rutherford, N. J., and Theodore Wirth, superintendent of parks, Hartford, Conn.

JOHN DOUGHTY.

About Sports.

It is a matter of common knowledge among breeders, not only of plants but of animals, that there are really two types of variation, although, as is always the case with nature, instances occur which render it impossible to draw a hard and fast line. The one type of variability consists of those minor divergences which give individuality, and which, especially in plants, often require a very sharp eye to discriminate, or perhaps baffle the observer entirely.

The other type embraces individuals which have quite suddenly assumed more or less distinct characters, and sometimes extremely abnormal ones. As a rule, too, these suddenly acquired peculiarities affect the reproductive system also, with the result that their progeny largely partake of the same new character as the parents, assuming in this way a specific character between which and the species proper it seems impossible to draw a line.

A species recognized as such is merely a branch of a genus in which certain distinctive characters have become fixed, while the fundamental generic plan is adhered to. These distinctive specific characters are constant in the vast majority of cases, though modified in minor ways by variations of the first category, which may not be merely that of external form, but may also be constitutional, so that of two plants externally precisely similar in habits and appearance, one may be hardier than the other, or better able to withstand drought or insect or fungoid attack. In this way it may possess an advantage worth cultivating by further selection, and which undoubtedly plays and has played a considerable role in evolutionary history.

The selective cultivator, other than the hybridizer, undoubtedly owes the bulk of his successes to variations of the second category, that is, the marked and sudden kind which may arise either as seminal or bud sports, that is, may show their new characters as seedlings from normal progenitors, or from forms which have already been modified by selection, or

buds may form on plants of either category, which as they develop present the novel features.

Bud sports, however, are less wide in range of departure from the parental form than seminal sports. Thus in roses and chrysanthemums the new varieties arising from bud sports are usually variants in color, retaining the other parental characters intact, but here again there is no hard and fast rule, as some rampant climbing roses were bud sports from bush forms.

As regards the cause of these sudden sports we are absolutely in the dark, and although naturally they are more apt to be remarked and utilized in plants under culture, it is a very open question indeed whether culture acts as an inducement, since plants in a perfectly wild state are well known to sport as widely and as eccentrically, and when made the subject of specially careful research, as in the case of ferns, are proved to do so on extremely liberal lines, while departing further from the normal than any have done under culture.

Naturally the selective cultivator finds in these abnormalities, not merely splendid material in many cases which otherwise would have required generations of culture to arrive at, but very often characters are presented of so original a type that his ideas are revolutionized, while, thanks to the reproductive power aforesaid, he finds ready to his hand an easy mode of propagation, plus an increased probability of further variation by which he can profit, and a possibility of introducing the new features into allied species by hybridizing.

To the biologist these sudden sports are of supreme interest, representing, as they do, absolute examples of that "special creation" which the science of evolution disclaims, but which is here strongly put beyond all dispute whatever. Generation after generation has passed and the offspring have been practically identical, the fundamental building cell has been faithful to tradition and reproduced its parental type to all intents and purposes thousands and thousands of times exactly; then suddenly it becomes inspired with a new idea (there is no other way of putting the fact), and it starts constructing on a different plan, plays a fresh tune, as it were, in the great harmony of nature, and in due time the "sport" is established. In point of fact we have here the introduction of a new species, subject only to the proviso that, left alone in the struggle for existence, it can not only maintain its individual existence, but also

extend it, retaining its integrity of type and holding its own among its near relatives.

Variations in these marked lines appear to be of the indiscriminate type; no evidence has been put forward indicating that they form a sympathetic response to environmental stimuli, and are therefore better fitted to their surroundings than their unresponsive neighbors and relatives. Hence, doubtless, the large majority belong to the "unfit," and eventually fail; it would, however, be strange indeed were there no exceptions, and the belief is becoming more and more established that these sports have played a material part in the formation of species in the past, and are still performing a like role in the present.—*Chas. T. Drury, in the Garden.*

Philadelphia.

TRADE SHOWS CONSIDERABLE IMPROVEMENT.—ALL GOOD STOCK TAKEN AT FAIR PRICES.—DAHLIAS SELL WELL.—BEAUTIES WANTED.—A SWINDLER.

Business is improving considerably, there being a constant demand for all good stock, even dahlias selling out clean. Peacock, of Ateo, N. J., seems to have an unlimited quantity of these fall flowers. A whole express wagon load at a time is deposited with S. S. Penock, who says he finds a good local as well as out of town demand. Prices range from \$2 to \$4 per hundred. Peacock's new Twentieth Century dahlia is a very large single which brings top price. It is a rich wine color on white, irregularly blotched or shaded. Penock Brothers have been making a dahlia show in their window this and last week and a large basket of this variety attracted much attention. Prices are getting a move on, carnations selling as high as \$2, this being obtained for some fine Hills. Good Crockers bring \$1.50 and this is top for most of the stock now in. Beauties, particularly the poet's variety, the "long fellows," are scarce and are eagerly grabbed up at from \$1.75 to \$2.50 per dozen. This, in view of the increase in the number planted, shows a healthy condition and speaks well for the outlook. The quality of the stock is good but a trifle of mildew is showing, as well as some black spot. A few single violets are coming in and show a great improvement over those of last week.

Charles Liver, a young man whom no one seems to know, tried to purchase flowers from Fred. Ehret sometime ago and have them charged to Schuck Bros., of Eighth and York streets, whom he said had sent him for them. He was held until word was received that the Messrs. Schuck declared him an imposter, when he was arrested. Last week his case came up in court and his sentence would have been light but for misrepresentations to the judge as to an aged father and mother and wife and children, whose sole support he said he was. This was proved to be out of the whole cloth and two years was the sentence imposed.

The plantsmen are busy shipping to their out of town customers, who are stocking up while they can receive their goods by freight without danger from frost.

Edward Reid has been spending a few days in Norfolk, Virginia. His basement addition is now about finished and will give him much additional space.

George Faulkner is about to open a store on Fifteenth street above Walnut. Mr. Faulkner is active and energetic and should succeed. K.

Chicago.

INCREASED SUPPLIES FIND A DULL MARKET.—DEMAND FOR PRESIDENTIAL DECORATIONS RECEIVES A SUDDEN CHECK.—GOOD BEAUTIES ARE PLENTIFUL.—MANY SHORT-STEMMED ROSES.—JURGENS TELLS OF SLOW SALE FOR FINE VALLEY.—THE CARNATION WHICH ENCHANTS.—PERSONAL NOTES.

The market has been dull this week. Supplies have multiplied while orders have been divided, and most items have been slow sale for the past eight days. President Roosevelt's western trip made business for some of the large growers, for there were heavy orders from Cincinnati, Detroit and Indianapolis. Milwaukee had booked some big orders, but mostly countermanded at the very last minute, when it was learned that the presidential tour had been abandoned. Mr. Roosevelt was to have been in Chicago for the last three days of next week and it was expected that his presence would considerably accelerate the local call for good stock. The demand for Beauties is good, but the supply is very much larger than a couple of weeks ago and there is no difficulty in filling any kind of an order, with a surplus in the middle of the week. The stock continues to be first-class. Tea roses are much more plentiful this week and only that portion of the stock which is of high grade finds anything like a ready market. There are large quantities of short-stemmed stock which are moved with great difficulty. This includes both Bride, Bridesmaid and Golden Gate. There are now some very fine blooms of Ivory on 12-inch stems which are selling first rate, and N. J. Wiator reports sales of extra select La France at fine prices. Mme. Chatenay continues in demand and Peter Reinberg is finding a good sale for Sunrise, into which he has gone very heavily this year. Meteor is improving in quality but not many Liberty are in evidence just now. There are ample supplies of all carnations except white, the deterioration of asters throwing the principal demand for funeral flowers on the white carnations. Violets are now in almost daily receipt and chrysanthemums are showing in many of the retailers' windows. Valley is plentiful and there is enough smilax and asparagus to supply all requirements.

August Jurgens says that the forcing of lily of the valley is not all that it is "cracked up" to be, for he finds that the big orders come just when he hasn't the stock, and when he has it, the big requirements are not at hand. He is forcing about 1,500 pips a day and is producing valley of a quality never excelled anywhere. What he calls select stock has from twelve to eighteen bells to a spike, and its fragrance is remarkable, but the retailers do not seem possessed of any great anxiety to procure it. H. N. Bruns is forcing about 2,500 pips a day at present and says that he has succeeded in keeping in good touch with the market thus far.

The J. D. Thompson Carnation Company has had a vase of fine blooms of Enchantress on exhibition at McKellar & Winterson's this week. They have a house of 6,000 plants of this variety just coming into bloom, and those who have been to Joliet in the last few days say it is a sight. Mr. Thompson recently received a box of S. J. Reuter's new white carnation, Lillian Pond, three-inch blooms on 18-inch stems, and they kept ten days after the journey from Westerly, Rhode Island.

The George Wittbold Company has the decoration for the opening of Marshall Field & Company's wonderful new retail store next week. The firm is reported to be expending \$20,000 on decorations for the opening, and the floral part of it will require close to \$2,500. The Wittbolds also have a big order for a decoration at Stevens' in the same week.

A. L. Randall will be at home next week from his summer at St. Joseph. He and his family have not only had a fine summer outing, but have gathered a big peach crop as well.

Last Saturday night there was a gathering of florists at Highland Park to assist Mr. and Mrs. Fritz Bahr in celebrating their third wedding anniversary.

The horse show this year comes two weeks before the flower show. Last year the two were in the same week and each one helped the other.

The variable weather has given the rose growers the inevitable mildew, and it is much worse than usual this time.

W. N. Rudd's gait has lost its sprightliness because of the rheumatism with which he is suffering.

E. C. Amling has been at New Castle this week, to see how the stock is coming on.

Alex. Newett, of Deamud's has a new son at his home.

Visitors: Paul Berkowitz, Philadelphia; S. W. Pike, St. Charles, Ill.; A. J. Clarke and Miss Clarke, Portland, Ore.; Mr. Irvine, Bay City, Mich.

New York.

TRADE DEAD AND GROWERS BETRAY SIGNS OF UNEASINESS.—ROSES OF LOW GRADE AND SELLING CHEAP.—EARLY CHRYSANTHEMUMS MEET UNAPPRECIATIVE RECEPTION.—PLENTY OF ORCHIDS.—PLANT BREEDING CONFERENCE.—VARIOUS LOCAL NOTES.

Cut flower trade in the wholesale section seems to be almost at a standstill. The conditions are presumably the commencement of the usual fall situation which recurs every year about this time, and the warm, damp weather of the past week has helped to hasten the coming of the critical period. This is the season when the peripatetic commission man, of whom there are several in town, has his innings with the susceptible grower in the rural districts and has little difficulty in creating a suspicion that the returns of sales indicate he is not being fairly treated by the man who has helped him struggle through the summer. Chrysanthemums have begun to arrive in quantity, the white variety Mme. Gasteller being especially abundant and bringing about \$6 per hundred against \$12 to \$15 per hundred at the opening of the season last year. The heavy supply of fine asters in the market is undoubtedly responsible for the chrysanthemum depression. A first-class disbudded white aster of the modern type is infinitely superior to the small early white chrysanthemum. As to roses, Beauty is increasing rapidly in numbers every day and sales in quantity are made at reduced values. Other varieties are also being received in heavier supply, quality being low on the average, mildew being generally prevalent. Bride and Bridesmaid roses in thousand lots are sold as low as \$3.50 to \$5 per thousand, as received from growers without rehandling. Carnations of the fancy varieties are now showing up, \$2 a hundred being average price. Violets are as recently reported, in quantity sufficient for all calls, at 50 cents a hundred. Cattleya labiata is in

evidence and rapidly increasing. Herrington, Roehrs and Lager & Hurrell are all sending in regular shipments. The price has fallen to 35 cents a flower but it will be difficult to maintain this value long, as the cut gets heavier. Lily of the valley is in full supply at present.

A great and constantly increasing interest is being manifested in the approaching Madison Square Garden exhibition. The New York Florists' Club and National Sculpture Society are working together with much enthusiasm and unquestionably the show will make a great sensation here. It will last from October 30 to November 6.

President F. R. Newbold and ex-President Benjamin Dorrance were in New York last week and discussed rosesociety matters with Secretary Barron. It was decided to call a meeting of the executive committee to be held in Philadelphia, on the second day of the Pennsylvania society's fall show. This will be November 12.

The International Conference on Plant Breeding and Hybridization will open at the Berkeley Lyceum Building, 19 to 21 W. Forty-fourth street, New York, at 10 a. m., September 30. Many distinguished scientists are expected to be present and there will be an interesting exhibit of hybrid plants and their products.

Chas. Arick, who has been in the employ of Wadley & Smythe for many years, died on Saturday, September 20, of pneumonia, after a three weeks' illness. He was born in New York, aged 42 years. He leaves a widow and one child.

Mrs. Arthur Herrington arrived from England last Saturday on the St. Paul.

Alfred Dimmock is busily engaged in showing F. Sander, Jr., about the city.

Visitor: Patrick Barry, Rochester, N. Y.

Boston.

BUSINESS NOT HEAVY AND WARMTH ACCELERATES PRODUCTION.—AMPLE ROOM IN HORTICULTURAL HALL.—LAST EXHIBITION NOT WELL ARRANGED.—SOCIETY ELECTS OFFICERS NEXT WEEK.—OBJECTION TO USE OF PARK FOR GOVERNMENT PURPOSES.—AUCTIONS ON.—PERSONAL AND TRADE DOINGS.

The uniting of the annual plant and flower show and the annual fruit and vegetable show on one date, together with the attenuated method practiced in the exhibiting of fruits and the lack of adequate supervision in the classifying and general arrangement of the entries in the exhibition at Horticultural Hall last week, gave color to the idea, industriously diffused by a certain class of obsequious reporters, that the halls were of insufficient size to properly accommodate the exhibits. With the space wisely utilized, however, there would have been abundant room for all.

The announcement of the purpose of the United States government to appropriate a portion of Castle Island in Boston Harbor for use as a lighthouse depot has brought out a vigorous popular protest. This island is one of the most desirable spots in the great metropolitan park system and the taking away, as proposed, of a tract which affords the most attractive outlook seaward would mean a serious loss to the public which, it is to be hoped, may be averted by the prompt action already started by the mayor, park commissioners and others.

Warm, damp weather has served to increase the cut of roses materially and has not improved the quality. Beauties, especially, are in augmented supply and, in over-ripe condition, are bringing very

low figures, injuring market prospects for the present. Other roses show much mildew from average growers. There is a generally adequate supply of carnations but the better qualities are scarce. The aster crop is going off rapidly.

The annual election of officers in the Massachusetts Horticultural Society will take place at Horticultural Hall on Saturday, October 4. The "compromise" committee will, it is expected, make its report on new method of government at that time.

Probably the most comprehensive exhibit of perennial asters ever shown here was that prepared for the late horticultural exhibition by Carl Blomberg, of North Easton. The collection comprised fifty species and varieties, all carefully labeled.

McCarthy's auction sales are on in earnest, and a large quantity of material is disposed of every Tuesday and Friday, but prices paid seem very low so far. Good carnations of best varieties have been going as low as 2 cents and 3 cents a plant.

Mrs. W. A. Boek has decided to carry on the business of her husband, the late W. A. Boek, at North Cambridge. Mrs. Boek has a host of well-wishers who have no doubt of her success in the venture.

Visitors: Mr. and Mrs. W. F. Dreer, Philadelphia; A. M. Rennie, Providence, R. I.; M. Reukauf, Philadelphia.

Cleveland.

MARKET OVERBURDENED WITH STOCK.—PRICES BADLY DEMORALIZED.—MUCH LOW GRADE STOCK HARD TO MOVE.—CLUB ELECTS OFFICERS UNANIMOUSLY.—VARIOUS NOTES.

The business for the past couple of weeks has been very satisfactory for the time of the year. Society has returned, to a certain extent, and a round of social functions may be looked forward to. The warm weather for the past few days has had a demoralizing effect upon the wholesale business. Such quantities of flowers of all kinds arriving made it impossible to handle them to advantage, consequently prices were cut unmercifully, extra fine grades of carnations only bringing \$1.50 per hundred, the ruling price being \$1. Teas bring \$2 to \$6 per hundred, only the fancy grades bringing the latter figure. Beauties still hold up well at from \$10 to \$25 per hundred. Valley is not over-plentiful and brings from \$4 to \$5. The J. M. Gasser Company is sending in the first chrysanthemums in the market. The variety is Montmort, and the flowers retail at \$3 per dozen. Marion Henderson will follow in a few days. The aster crop is about over. Carnations were never more plentiful or quality better at this season of the year.

The club held its regular meeting on Monday evening and the officers for the ensuing year were unanimously elected, as follows: President, Gordon Gray; first vice-president, F. C. Bartels; second vice-president, A. L. Brown; secretary, Isaac Kennedy; treasurer, H. A. Hart. The retiring president, Wm. Brinker, made a neat little speech and complimented the club upon its advancement within the past couple of years and expressed the hope that the same pace will be kept up in the future. Two new members were taken in, Wm. Warnke and A. C. Wasson. The alleys have been platted down and varnished, making them as good as the best in the city. Some good scores are looked for in the future.

Mr. Smith, of Smith & Fetters, was taken to a hospital the other day, threatened with an attack of typhoid fever. From last account he is progressing favorably towards recovery.

Jno. Mollenkopf has the knack of growing the best G. H. Crane carnations coming into market. This year his stock is extra fine. Crancisa "hard doer" around Cleveland.

Casper Aul's chrysanthemums are extra fine, especially Polly Rose. This is one of Mr. Aul's specialties, growing good chrysanthemums.

Mr. Kice, of Oberlin, was a visitor in town this week. LCHO.

Kansas City, Mo.

GROWERS AND RETAILERS PREPARED FOR A BUSY SEASON.—GREENHOUSES MODERNIZED AND STORES IN FINE SHAPE.—REMOVALS AND VARIOUS NOTES.

Trade with the down-town florists has been very satisfactory this month, demand for first-class stock far exceeding local supply and prices better than last season at this time. On the anniversary of McKinley's death there was a heavy demand for pink carnations, and but few of our florists anticipated the rush. Those who were prepared sold out clean and at good prices.

W. L. Rock has entirely remodeled his store at 1116 Walnut street, added a long needed conservatory in the rear, a new office and an addition for a ware-room. A large full glass refrigerator, capacity of from 5,000 to 10,000 flowers has been put in. The entire store is done in white enamel and trimmings of gold and green. He can lay claim to one of the best equipped flower stores in the country.

J. H. Vesey, a formerly of Ft. Wayne, who leased the old Baker Brothers houses, at the corner of Denver and Harris streets, has turned these houses inside out and has now as fine a lot of stock as is grown hereabouts. He is a hustler, and Kansas City could support a few more just his build.

The Rock-Heite Company has added one house for ferns this season. Their place at Sixty-third and Troost avenue now covers 25,000 square feet and every inch is utilized. Carnations are principally grown here and some good results are looked for.

Edward Humfeld, formerly of the Humfeld Floral Company, has opened an up-to-date place at Seventh street and Paseo boulevard. W. H. Humfeld continues at the old stand.

A considerable change has been made in Kellogg's establishment, brought about by the wide awake young man from St. Louis, Mr. Weber, who now has charge.

Interest is increasing in our coming All-American flower show. From all indications it will be a "buster." Premium list will be out next week.

Miss Jennie Murray has removed from 711 Walnut street to a more central location at 1029 Main street.

W. J. Barnes, Thirty-eighth and Euclid streets, has remodeled his entire plant. W.

COLORADO SPRINGS, COL.—Stephen Clark is shortly to add to his glass area for vegetable growing. He is both nurseryman, florist and vegetable grower.

VAN WERT, O.—C. W. McConahy has just completed two new houses, one planted to roses, the other to carnations. He has also installed a new Furman sectional boiler. Business is good.

THE AMERICAN FLORIST

EIGHTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00. Subscriptions accepted only from those in the trade.

Advertisements on all except cover pages, 10 Cents a Line, Azalea, \$1.00 per inch. Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive insertions, as follows—6 times, 5 per cent; 13 times, 10 per cent; 26 times, 20 per cent; 52 times, 30 per cent.

Cover space sold only on yearly contract at \$1.00 per inch, net, in the case of the two front pages, regular discounts applying only to the back pages.

The Advertising Department of the AMERICAN FLORIST is for florists, seedsmen and nurserymen and dealers in wares pertaining to those lines only.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to secure insertion in the issue for the following Saturday. Address

AMERICAN FLORIST CO., Chicago.

THERE is a brisk market for small stock for ferneries.

DENVER, Colorado, reports a snowfall of three inches September 21.

WHITE CLOUD is one of the short items of field-grown carnation plants.

WILD SMILAX will be used this season far more extensively than heretofore. Decorators are just beginning to appreciate its usefulness.

THE mailing label on your paper shows when your subscription expires; when you send your renewal note that the date changes within two weeks; it will serve as your receipt.

Piping and Heater.

ED. AM. FLORIST:—I have two greenhouses for growing vegetables, both running east and west, a building 10x10 between. The one running west is 12x36, the other 11x60, both banked up to caves with earth and well protected from north winds. The 60-foot house has one solid bench on south. Will two 2-inch flow pipes and six 1-inch returns heat both houses up to 45° to 50° during zero weather? Will the No. 0 Doric boiler be large enough for both? P. R. W.

For hot water six 1½-inch returns will be needed in addition to the flows in each house. With steam only one flow in addition to the six 1-inch returns will be needed. The boiler should be rated for about 600 square feet of hot water radiation or 350 feet for steam.

L. R. TAFT.

Lifting Power.

ED. AM. FLORIST:—Where one has to depend on a well for water, what is the best power for lifting and best method of warming the water for winter use?

M. E. J.

While conditions might make some other power desirable, the gasoline engine will doubtless be perfectly satisfactory and quite economical. If the water supply is ample it will be possible to get along without an elevated tank, the system being worked under direct pressure. One of the simplest methods of heating the water is to run the water pipe for twenty-five to fifty feet, the distance varying with the temperature desired, through a 3-inch pipe for 1-inch water pipe or 2½-inch for ¾-inch pipe, and connecting this jacket with a steam pipe at one end and running a drip pipe to one of the returns. L. R. TAFT.

Indispensable.

ED. AM. FLORIST:—Enclosed is \$1 to renew our subscription to your valuable paper. It is indispensable, especially to the country florist. We don't want to miss a copy.

LeRoy, Ill.

L. A. RIKE & SON.

Society of American Florists.

DEPARTMENT OF PLANT REGISTRATION.

The Conard & Jones Company, West Grove, Pa., registers new rose Beauty of Rosemawr (China) hardy, everblooming; flowers large, imbricated, color carmine rose with white markings.

Henry Eichholz, Waynesboro, Pa., registers the following zonal geraniums: Double Dryden; James S. Wilson, double aureole, bright rose, white center; Little Red Riding Hood, double dwarf, dark rose; Governor Stone, single, crimson rose, white center; Cleopatra, single, clear salmon, round flower; Goliath, single, magenta, yellow blotches on base of petals. Wm. J. STEWART, Sec'y.

Greenhouse Building.

Detroit, Mich.—M. DeBeul, two houses 20x100, one 10x80.

Washington, Ia.—Elmer Keck, house 55x88.

Columbus, O.—Livingston Seed Company, three houses.

Seattle, Wash.—C. N. Sandahl, two carnation houses, one plant house.

Newport, R. I.—Carl Jurgens, three Beauty houses 200 feet long.

Scarborough, N. Y.—F. R. Pierson Company, house 54x300.

York Corners, Me.—W. G. Moulton & Son, house 60 feet long.

Greenwood, Mass.—R. L. Pitman, carnation house 21x130.

Plainville, Mass.—F. A. Sandland, one house.

Findlay, O.—Karg & Barnd, house 180 feet long.

E. Braintree, Mass.—John Streiford, one house.

Summit, N. J.—Lager & Hurrell, one orchid house.

Floriculture at Honolulu.

H. J. Rhodes, of Honolulu, H. I., who was in the United States last year and made many friends in the trade, writes as follows, under date of September 8:

"I fully intended to go with you to Asheville, but circumstances ordered it otherwise. Things are moving along here. Some complain of hard times, but they don't know the meaning of the word. Of course sugar is low, but they have been accustomed to such enormous profits that fifteen or twenty per cent profit is very small in their eyes, and sugar is king here. What do you think of getting from twelve to fifteen tons of sugar from one acre of ground? One plantation here gets that from some of its land, and still they cry hard times. Some people are very hard to please. I am raising quite a lot of roses and carnations for the market here. Good flowers sell well. The trouble is that the thoroughbred carnation will not do well until the second or third generation. The Marquis, Melba and Lawson do well in the open. Flora Hill and White Cloud, for white, and Empress, for red, also do well. There are large quantities of common pinks grown by the native flower-women and are sold on the street. You remember the view published in the AMERICAN FLORIST last year. I cut my first blooms of Prosperity to-day and they are fine.

Ethel Crocker does well. What can I do to get American Beauty to grow well here? They just do nothing. They won't grow. Every shoot an inch long wants to bloom. I have disbudded constantly and still get no good wood."

For Steam Heat.

ED. AM. FLORIST:—We are building two houses 24x300, attached, and wish to heat from north end by steam. We are about to place our order for pipe and are not sure about the size of flow pipes. Will two 2-inch mains take care of eight 1¼-inch returns? How large an opening should we have on a seventy horsepower boiler? Is it better to have a dome on a boiler of this size? How many feet of grate surface are needed?

DAVIS.

The size of the supply flow pipes should vary somewhat with their length. If a close connection is made a 2-inch pipe will answer, but a 2½-inch will be better, especially if the connection is at a considerable distance from the main. If the boiler is intended to supply only the two houses good results can be secured with a 4-inch main, but a 5-inch main would be needed if the boiler is to be worked to its full capacity with low pressure. A dome will not be needed. A grate with fifteen square feet of surface will suffice for the two houses but this should be increased to twenty-five square feet for the full capacity of the boiler.

L. R. TAFT.

Coming Exhibitions.

[Secretaries are requested to supply any omissions from this list.]

BOSTON, MASS., November 6-9, 1902.—Chrysanthemum show Massachusetts Horticultural Society. W. P. Rich, Sec'y, Horticultural Hall, 360 Massachusetts avenue.

CHICAGO, ILL., November 11-15, 1902.—First annual exhibition Chrysanthemum Society of America and twelfth annual exhibition Horticultural Society of Chicago, to be held jointly. E. A. Kanst, Assistant Secretary, 5700 Cottage Grove avenue, Chicago.

KANSAS CITY, MO., November 3-8, 1902.—Flower show, Convention Hall Directors, Kansas City, Mo.

LENOX, MASS., October 23, 1902.—Fall exhibition Lenox Horticultural Society. F. Herremans, Sec'y.

LOUISVILLE, KY., November 12-15, 1902.—Chrysanthemum exhibition Business Women's League. H. Nauz, superintendent, Louisville, Ky.

MADISON, N. J., November 6-7, 1902.—Seventh annual flower show Morris County Gardeners' and Florists' Society. C. H. Atkins, Sec'y, Madison, N. J.

MARSHALL, TEX., November 13-14, 1902.—Annual flower show East Texas Flower Association. W. L. Martin, Sec'y, Marshall, Tex.

NEW HAVEN, CONN., November 11-13, 1902.—Annual flower show New Haven Horticultural Society. Thomas Pettit, Sec'y, 316 Orange street.

NEW YORK, N. Y., October 30-November 6, 1902.—Annual exhibition New York Florists' Club. John Young, Sec'y, 51 W. Twenty-eighth street.

PHILADELPHIA, PA., November 11-15, 1902.—Annual autumn exhibition Pennsylvania Horticultural Society. David Rust, Sec'y, Horticultural Hall, Broad street below Locust, Philadelphia.

PROVIDENCE, R. I., November 13-14, 1902.—Chrysanthemum exhibition Rhode Island Horticultural Society. C. W. Smith, Secretary, 27-29 Exchange street, Providence.

ST. PAUL, MINN., November 3-5, 1902.—Chrysanthemum and orchid exhibition Ladies Auxiliary of the Northwestern Manufacturers' Association. Mrs. A. P. Moss, Sec'y.

TARRYTOWN, N. Y., November 11-13, 1902.—Fourth annual exhibition Tarrytown Horticultural Society. Edw. W. Neubrand, Sec'y, Tarrytown, N. Y.

Chrysanthemum Society of America.

President Herrington has announced committees to examine chrysanthemum seedlings and sports on dates as follows: October 4, 11, 18 and 25, November 1, 8, 15, 22 and 29, 1902.

Boston, Mass.—E. A. Wood, chairman, care Boston Flower Market, No. 1 Park street; James Wheeler, William Nicholson.

New York, N. Y.—E. Dailedouze, chairman, care New York Cut Flower Company, Twenty-sixth street and Sixth

avenue; James W. Withers, William H. Duckham.

Philadelphia, Pa.—A. B. Cartledge, chairman, 1514 Chestnut street; Wm. K. Harris, John Westcott.

Chicago, Ill.—James S. Wilson, chairman, care J. B. Deamund, 51 Wabash avenue; Geo. Stollery, E. Wienhoeber.

Cincinnati, O.—Albert Sunderbruch, chairman, care Cincinnati Cut Flower Company, 437 and 439 Main street; James B. Allan, E. G. Gillett.

Exhibits to receive attention from the committees must in all cases be prepaid to destination, and the entry fee of \$2 should be forwarded to the secretary not later than Tuesday of the week preceding examination.

Anyone having a variety in season before or after dates fixed, can have the same passed upon by specially notifying the chairmen of committees.

The following is the scale of points for the judging of the several classes of exhibits by the Chrysanthemum Society of America:

Scale A.—Scale of points for bush plants and standards, single specimen or any number up to six, in an exhibition where the class under consideration does not form the chief feature in the exhibition hall.

Equality of size and form of plant	40
Excellence of bloom	35
Foliage	25
	100

Scale B.—Scale of points for bush plants; exhibits of more than six or for any number of specimen plants in an exhibition where the class under consideration forms the chief feature in the exhibition hall.

Excellence of bloom	40
Equality of size and form of plants	35
Foliage	25
	100

Scale C.—Scale of points for plants grown to single stem and one bloom. A height of not over three feet is recommended for plants in this class and pots not over six inches in diameter.

Excellence of bloom	40
Compact and sturdy growth	35
Foliage	25
	100

Scale D.—Scale of points on specimen blooms or commercial purposes.

Color	25
Form	25
Fullness	15
Size	15
Stem and foliage	10
Substance	10
	100

Scale E.—Scale of points on specimen blooms for exhibition purposes.

Distinctiveness	15
Color	15
Form	15
Size	15
Stem	10
Foliage	10
Fullness	10
	100

EDWIN LONSDALE, Secretary, Wyndmoor, Chestnut Hill, Pa.

PONTIAC, ILL.—W. J. Miller has nearly completed his new range. He has benched 4,000 of the new carnations from Dorner.

FLORENCE, COLO.—L. Templin has been using a night blooming cereus as a means of attracting many visitors to his greenhouses.

MADISON, N. J.—The seventh annual flower show of the Morris County Gardeners' and Florists' Society will be held in the Assembly Rooms on November 6 and 7. An unusual interest is displayed and some very fine entries are assured.

SPRINGFIELD, O.—The Springfield Floral Company, successor to the J. A. Doyle Company, has a large iron frame house nearing completion. The catalogue output was increased 5,000 this fall and the edition of the spring catalogue will be increased 25,000.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant advs. not admitted under this head. Every paid subscriber to THE AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

SITUATION WANTED—By experienced grower to take charge; roses preferred. References. Address: L. F., care American Florist.

SITUATION WANTED—By good all-around man, as grower of cut flowers and bedding plants; married, age 34; Chicago or vicinity preferred. C. C., care American Florist.

SITUATION WANTED—As night fireman with florist, vicinity of Cincinnati or southern Illinois; American, age 25, sober and steady. J. L. C., care Gould, 198 W. Federal St., Youngstown, Ohio.

SITUATION WANTED—By foreman, 17 years' experience, capable of taking charge of large up-to-date place, with a record of growing prize winning stock. Best of references. Address: B. G., care American Florist.

SITUATION WANTED—As working foreman, pot plants a specialty; 18 years in the business, age 35, German; now employed. Wages \$60 to \$75 a month. Address: J. W., care American Florist.

SITUATION WANTED—In the vicinity of N. Y. city, by an all-around grower. Would consider a proposition to work on shares. Married man; good references. X. Y. Z., care American Florist.

SITUATION WANTED—By experienced gardener and florist; German, married; last four years with Mr. W. C. Egan, Egandale, Highland Park, Ill. State wages. Address: P. W., Box 342, Highland Park, Ill.

SITUATION WANTED—By first-class all-around florist, 18 years' experience; age 32, single. Specialty palms, ferns, and pot plants in general. Able to take charge. Address: L., care Schiepan, 3455 State St., Chicago.

SITUATION WANTED—A young lady anxious to learn the florist business; fair stenographer and Remington operator; would like a position with a wholesale or large retail florist of Chicago. Willing to start at low salary. Address: H. A., care American Florist.

SITUATION WANTED—By a practical florist, age 28, German, good grower. Would like a position as first-class carnation and pot plant grower. Have references as a sober, honest and faithful worker. Please state wages. Address: COMPETENT, care American Florist.

SITUATION WANTED—By Nov. 10th, as head gardener on private place or public institution in California, Oregon or Washington, by young man, aged 25; a 1 grower of roses, chrysanthemums, carnations and general stock, with knowledge of lawn work. At present holds position as florist at one of the leading institutions of the middle west. Address: MIDDLE WEST, care American Florist.

WANTED—To know the address of Prosper Henry, florist. E. R., care Am. Florist.

WANTED—An all-around florist for general greenhouse work. State wages expected with board and room, in first letter. Address: O. R. Demmler, Eau Claire, Wis.

WANTED—By Oct. 1st, good rose man, especially on brides and Maids. Steady position and good wages to right man. F. HOLZNAGLE, Highland Park, Suburb of Detroit, Mich.

WANTED—Man with practical experience in growing cut flowers and bedding plants. State age, nationality, experience and wages wanted. Send references. S. M. HARRISON, Danville, Ky.

WANTED—To buy, at reasonable price, a well-established retail florist business, or established store in live town of over 10,000 inhabitants. If you mean business, write particulars at once to M. M., care American Florist.

WANTED AT ONCE—Experienced man for general greenhouse work. Must be well recommended. Steady position and good wages to the right party. Address: J. A. BISSINGER, Lansing, Mich.

WANTED—Greenhouse assistant in commercial place, southern New York state, wages \$20 per month, board and room. State age, experience and where last employed. Address: PERMANENT, care American Florist.

WANTED—Propagator of roses, carnations, etc. must be thoroughly first-class; no other need apply. Also a few growers of roses and carnations for sections. Good wages and steady work. LAKEVIEW ROSE GARDENS, JAMESTOWN, N. Y.

WANTED—On a fine private place in Omaha, Neb., a first-class florist and gardener for second man. Wages \$30.00 and board. To a man who proves satisfactory in every way after four months will pay \$35.00 per month and board and steady employment. Address: GEO. A. JOSEPH, Omaha, Neb.

FOR SALE CHEAP—My entire stock of plants, glass, boiler, Morehead steam trap, pipes and fittings. Inquire for prices at 1317 N. Michigan Ave., Saginaw City, Mich.

FOR SALE—Horizontal tubular boiler 18x15 with plug hat dome and with 39 3/4-in. flues, very suitable for heating hot houses. Apply to WISCONSIN BOX CO., WAUSAU, WIS.

FOR SALE—An old established greenhouse business; entire plant rebuilt; steam heat. With all the ground or part; also with or without residence. Situated in Cleveland, O. A bargain. Address: O. K., care American Florist.

ANNOUNCEMENT.

POTATO prospects indicate lower catalogue prices for 1903.

NEBRASKA seed growers continue to make unfavorable crop reports.

JAS. McHUTCHISON & COMPANY, have opened at 218 Fulton street, New York.

VISITED CHICAGO:—Alfred Emerich, representing Vilmorin-Andrieux & Company, Paris, France.

ROBERT BUIST, of Robert Buist & Company, Philadelphia, is at Atlantic City, N. J., ill with typhoid fever.

VISITED ST. PAUL:—J. B. Comont, representing Carter, Dummett & Beale, and S. B. Dicks and son, representing Cooper Taber & Company, of London.

JOHN A. BRUCE & COMPANY, Hamilton, Ont., report excellent trade in general grass seed lines the past season, with good prices. Prospects for next year are satisfactory.

PICKLE men have commenced to realize the conditions of the cucumber seed crop and inquiries are coming in very freely. It will not be a question of the price of the seed but of supply at any price.

THE Alfred J. Brown Seed Company, Grand Rapids, Mich., has filed notice of dissolution, the stock of the corporation being all held by one party. The style of the firm will remain the same, Alfred J. Brown, proprietor.

Cincinnati.

CLUB HOLDS A VERY ENJOYABLE SESSION AT MURPHYVILLE.—GOOD CARNATIONS.—FOUR MONTHLY EXHIBITIONS PLANNED.—BUSINESS GOOD.—PARADE REQUIRES MUCH STOCK.—VARIOUS NOTES.

The September meeting of the Cincinnati Florists' Society was held last Friday at the residence of Wm. Murphy. Despite the damp weather there was a good attendance and a very enjoyable time. President Murphy met the florists at the end of the car line with three large wagons. It was found that the crowd was too big and Mr. Witterstaetter had to call his wagon into use to help transfer the crowd to Murphyville. Arriving at Mr. Murphy's place we were conducted through the greenhouses to view Murphy's White carnation. Will is also very strong on Estelle and Lawson. After looking over the place we partook of a buffet lunch and then got down to the business meeting. All bills were ordered paid. The schedule committee reported for three exhibitions the coming season, chrysanthemums in November, violets and roses in February and carnations in March. Altogether there will be about \$325 awarded in premiums. The December meeting was left open for new and meritorious varieties of plants and flowers, also specialties, such as begonias, cyclamens and ferns. Word was received from Secretary Stewart, of the S. A. F., that our society would be the recipient of a silver and a bronze medal to be awarded for new and meritorious plants or flowers. The same was accepted and a vote of thanks tendered for same. J. W. Rodgers read a well gotten up paper on Asheville and its surroundings, which was listened to with great interest. After the meeting we sat

down to a fine supper, followed by music and a rollicking good time.

The floral display at the Fall Festival was called off for Thursday, September 25, owing to a lack of competition. What is the matter boys? Are you all afraid of Tom Hardesty? There will be a large display of lodge emblems, however, on September 27. This display will include emblems sent to the Festival by the different orders and we can look for a fine display as some of the lodges are spending as high as \$100 for their designs.

Business the past week has been all that could be expected. The civic parade used up an immense quantity of natural flowers although it is true that paper flowers predominated; however, it would have been impossible to have secured enough natural flowers to decorate all the vehicles. Some idea might be formed about the flowers used by the fact that in one design a calla lily made of white asters took 3,000 flowers.

An immense amount of asters are being shipped into the city and roses are in good crop. George & Allan are sending in some extraordinary valley, which sells at \$5 per hundred.

John Bertermann, of Indianapolis; Chas. Reimers, of Louisville, and Harry Altick, of Dayton, acted as judges of the floral exhibits at the fall festival last week Thursday.

Felix H. Myers, representing R. Craig & Son, was a caller this week. D.

WASHINGTON IA.—Elmer Keck is making good progress on his new connected houses 55x88. This is at a new location, and both places will be run this winter, the old place to be removed to the new next season.

BRAMPTON, ONT.—At the H. Dale estate a power plant is in course of erection which is expected to be the most modern in America used for greenhouse heating. The plans are those of the King Construction Company, of Toronto.

CHAS. A. IJGENFRITZ, Pres.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y. Twenty-eighth annual convention, Detroit, Mich., June, 1903.

THE Stephen Crane Nursery, at Norwich, Conn., will be put on the market by the executor.

THE business heretofore conducted at the Laurel Hill Nurseries, Stockbridge, Mass., Frank Brunton, manager, has been discontinued.

C. L. WATROUS, of Des Moines, Ia., has purchased the Terry plum, originating with H. A. Terry, at Crescent, Ia., and will distribute it a year hence.

C. W. STUART & COMPANY, of Newark, N. Y., have purchased a large three-story brick building, most of which will be required for office room for their growing business.

THE nurserymen are steadily going into orcharding, the latest venture announced being in western Maryland. H. E. Van Deman is president and manager of the company and several nurserymen are stockholders.

Toronto.

TRADE BRISK AND STOCK IN SHORT SUPPLY.—GOOD ROSES MOVING WELL.—WEDDING DECORATIONS REQUIRE MUCH STOCK.—THE FIRST CHRYSANTHEMUMS.—PERSONAL AND TRADE NOTES.

The last week has seen a decided improvement in roses but still there has not been enough stock to go around. The many fall weddings are calling for decorations which are using up large quantities of stock. Beauties again hold predominance, and some good flowers with long stems are noticed in the different stores. Liberty, after a long absence, has again made its appearance, and from present indications has come to stay, as the flowers are very good. Meteor, Bride and Bridesmaid have all picked up considerably and stems are getting much longer and the foliage better. Carnations are also becoming very plentiful and longer in the stem. The few violets that come to town are soon picked up. Princess of Wales at present seems much the best. Frost has not yet appeared in this section and gladioli, dahlias and some Clematis paniculata add much in relieving the otherwise short market.

W. Jay & Son, of Spadina avenue, have about completed remodeling their store. They have a nice conservatory at the rear and the place looks very clean and bright. They report good business the past summer.

A few nice chrysanthemums, white and yellow Fitzwygram, from R. Jennings, of Brampton, are the first of the season. He has a fine batch of these early varieties and finds ready sale for them.

W. J. Lawrence reports good business at the Yonge street store. He has been keeping his windows well filled up and the place looks very attractive.

Indianapolis.

PREMIUMS FOR FLORAL EXHIBITS AT THE STATE FAIR.—A MEAGER DISPLAY.—PERSONAL AND TRADE NOTES.

The State Fair was unusually well patronized, but the flower display was meager. What there was, however, looked fresh and kept well to the very last day. The same firms that have made

displays for the last few years were there, with the exception of A. Wiegand, whose place was taken by E. A. Nelson. George Stellhon, of this city, acted as judge. Premiums were awarded as follows. Baur & Smith were first on ten blooming begonias, ten foliage begonias, two filled vases, two specimen Boston ferns and display of show plants. W. W. Coles was first on collection of roses second on collection of cut gladioli, on collection of dahlias and on collection of cut flowers. J. L. Childs was first on gladioli. E. A. Nelson was first on collection of cut flowers, second on original show arrangement of flowers, on three bouquets, on cut roses and on two baskets, third on gladioli. John Rieman was first on two funeral arrangements, on two baskets, on original show arrangement of flowers and on three bouquets.

H. W. Rieman has finished all his improvements and has his carnations planted. He is now in good shape for winter. Mr. Rieman has been unusually busy with funeral work this fall.

E. A. Nelson, as well as the Indianapolis Flower and Plant Company, have planted American Beauties very exten-

sively this year. The stock in both places looks well. The Indianapolis Flower and Plant Company is getting ready to use coal; until now they have had a sufficient supply of gas, which is a thing of the past.

Mrs. J. G. Rathsan died suddenly last week. Her husband, formerly a well-known florist of this city, died about a year ago.

John Bertermann was in Cincinnati last week to act as judge at the floral display for the fall festival.

John Grande is investing his surplus in real estate. He has built a very nice double house for renting.

Mrs. M. Brandlein and little son, who have been very sick with typhoid fever, are convalescent.

Alvin Schreiber, of Bertermann Bros., is on the sick list. H. J.

STERLING, MASS.—The "Angel's Trumpet" is the soaring name given to a datura plant with which a lady amateur here is dazzling the reporters for the Worcester papers. Pity she didn't send a few samples to Asheville.

California Privet.

Any Size Desired up to 6 Feet.

Contracts for immediate and future delivery solicited.
